

Welcome

Publication Date: March 15, 2022

These pages provide a guide to academic requirements, resources and facilities at the University of Wisconsin-Green Bay.

- Students entering in Summer 2022, Fall 2022 or Spring 2023 will use this edition (**2022-2023**) to map their academic plans in consultation with faculty and staff advisers.
- Students follow the requirements of the annual catalog that was current when they entered. A student may, however, change to a more recent catalog with permission from their academic adviser.

Quick Links:

- Additional campus information can be found on the UW-Green Bay website (<http://www.uwgb.edu>)
- Please see the UW-Green Bay Mission statement here (<http://www.uwgb.edu/univcomm/about-campus/mission.asp>)

Undergraduate Catalog

UW-Green Bay Education

The University of Wisconsin-Green Bay is known for excellence in teaching, its focus on problem solving, its attractive bayshore campus and a friendly, welcoming atmosphere.

Major Advantage

UW-Green Bay students choose from a wide selection of majors and fields of study.

In every academic program, the curriculum is designed to provide students the tools necessary to evaluate and address real-world problems. There is an expectation that students will be challenged to integrate ideas from different fields, seek connections, consider more ideas rather than fewer, to manage uncertainty rather than fear it, and to always remember there is rarely one answer.

UW-Green Bay's approach is notable in that students choose their majors from traditional disciplines (fields of study) but also from the University's extensive list of "interdisciplinary" majors. Interdisciplinary is a term used by educators to describe programs that bring together the best thinking and thinkers in multiple fields to address complicated, interrelated issues.

An example of an interdisciplinary major is Environmental Science, where a student might apply biology, chemistry, mathematics, geoscience or other disciplines to larger environmental concerns. Other examples of interdisciplinary majors include Business Administration, and Democracy and Justice Studies.

Every student completes a major.

Valuable Skills

In an interdependent world with a growing innovation economy, the future will favor people who are flexible, highly adaptable, entrepreneurial and effective communicators.

UW-Green Bay's top academic leaders talk of the demand they see for "T-shaped individuals" — people with deep intellectual roots and skills in a specific discipline who are able to reach out to link up with individuals having similarly deep roots in other disciplines.

The UW-Green Bay academic approach emphasizes the development of these high-value traits: flexibility for on-the-job learning; ability to work in small, task-oriented teams; capacity to analyze and delineate a clear overview of a problem; strong written and verbal communication skills; technological competence and information literacy; and the ability to collaborate with individuals from diverse backgrounds.

Connections Outside the Classroom

Students, faculty and staff connect learning to life, every day, through research, internships, paid employment and volunteer involvement in the community.

Green Bay and its surrounding region provide ample opportunity. Long known as a manufacturing, papermaking and food-processing center and the home of the Packers, Green Bay has experienced growth in the healthcare, insurance and tourism sectors of its economy. While the metropolitan population is about 250,000, the city serves as the trade, transportation and cultural heart of an increasingly diverse region of nearly one million residents extending across much of northern Wisconsin and the Upper Peninsula of Michigan. Green Bay is home to excellent museums, parks, theatres and sports-related facilities. It is the gateway to popular Midwest vacation destinations in the scenic Door Peninsula and Wisconsin's northern forests.

Affirmative Action Policy

In compliance with applicable federal and state regulations, the University of Wisconsin-Green Bay is committed to nondiscrimination, equal opportunity and affirmative action in its educational programs and employment practices. Inquiries concerning the Affirmative Action Policy may be directed to:

Human Resources Office
University of Wisconsin-Green Bay
2420 Nicolet Drive
Green Bay WI 54311-7001
(920) 465-2390

Accommodations

UW-Green Bay is committed to providing accommodations for eligible individuals with documented disabilities as defined by federal and state law. In accordance with UW System Board of Regents Policy UWS 22.01, sincerely held religious beliefs shall be reasonably accommodated with respect to all examinations and other academic requirements. Questions about these policies should be directed to:

Dean of Students
University of Wisconsin-Green Bay
2420 Nicolet Drive
Green Bay WI 54311-7001
(920) 465-2152

This catalog is an informational publication of UW-Green Bay. Its provisions DO NOT constitute a contract between the student and the University.

About UW-Green Bay

- Our Mission (<http://www.uwgb.edu/univcomm/about-campus/mission.asp>)
- At a Glance (<https://www.uwgb.edu/about/quick-facts/>)

Degrees and Accreditation

Undergraduate Degrees

- Associate of Arts and Sciences (A.A.S.)
- Bachelor of Arts (B.A.)
- Bachelor of Applied Studies (B.A.S.)
- Bachelor of Business Administration (B.B.A.)
- Bachelor of Fine Arts (B.F.A.)
- Bachelor of Music (B.M.)
- Bachelor of Science (B.S.)
- Bachelor of Science Nursing (B.S.N.)
- Bachelor of Social Work (B.S.W.)

Accreditation

Founded in 1965, UW-Green Bay is one of 13 degree-granting institutions in the highly respected, tradition-rich University of Wisconsin System.

The University holds a full 10-year accreditation from the

Higher Learning Commission
230 South La Salle Street, Suite 7-500
Chicago, Illinois 60604-1413

For more information, view the UW-Green Bay affiliated institution profile page (http://www.ncahlc.org/?option=com_directory&Action=ShowBasic&instid=2052) on the Higher Learning Commission website.

Individual programs with accreditations or approvals:

- Art (Art Education, Gallery/Museum Practices, Studio Art); Design Arts, National Association of Schools of Art and Design
- Chemistry, American Chemical Society
- Dietetics component of Human Biology, Academy of Nutrition and Dietetics
- Health Information Management and Technology, Commission on Accreditation for Health Informatics and Information Management
- Music, National Association of Schools of Music
- Nursing, Commission on Collegiate Nursing Education
- Social Work, Council on Social Work Education
- Teacher Education, Wisconsin Department of Public Instruction

State Authorization for Distance Education

Authorization for Distance Education in States Outside Wisconsin

The University of Wisconsin-Green Bay has nine online degree programs: an Associate Degree (AAS), a Bachelor of Business Administration (BBA), a Bachelor of Science Degree in Nursing (BSN), a Bachelor of Science in Health Information Management Technology (BS-HIMT), a Bachelor of Arts in Organizational Leadership (BA-OL), a Bachelor of Applied Studies in Organizational Leadership (BAS-OL), a Master of Science in Applied Biotechnology (MS-ABT), a Master of Science in Cybersecurity (MS-CYB), a Master of Science in Data Science (MS-DS), a Master of Science in Health and Wellness Management (MS-HWM), a Master of Science in Sustainable Management (MS-SMGT), and a Master of Science Degree in Nursing Leadership and Management (MSN).

Distance Learning Education - State Authorization Reciprocity Agreement

Pursuant to Wis. Stats. Ch. 39.85, et. al, the State of Wisconsin is a member of the State Authorization Reciprocity Agreement (SARA) through the Midwestern Higher Education Compact which regulates the manner in which participating institutions may offer distance learning education to students who reside in other states. The University of Wisconsin-Green Bay is a participating institution in MSARA. The terms and conditions of SARA can be

found in the current SARA Policy Manual (<https://nc-sara.org/resources/guides/>). If a student has a complaint that involves distance learning education offered under the terms and conditions of SARA, the student must file a complaint with the institution first to seek resolution. If no resolution is reached, then the student may file a complaint with the Wisconsin Distance Learning Authorization Board (DLAB) in accordance with the State Authorization Reciprocity Complaint Process and available at UW System Student Complaint Process Information (<https://www.wisconsin.edu/student-complaints/>) or by email to apei@uwsa.edu (afgp@uwsa.edu). For purposes of this process, a complaint shall be defined as a formal assertion in writing that the terms of this agreement, or of laws, standards or regulations incorporated by the State Authorization Reciprocity Agreements Policies and Standards have been violated by the institution operating under the terms of SARA.

Additional information can be found at The Distance Learning Authorization Board's Frequently Asked Question (<http://www.heab.state.wi.us/DLAB/faq.html>) resource.

Approved SARA Institutions in Wisconsin

A list of approved SARA Institutions in Wisconsin is included in the NC-SARA Directory (<https://www.nc-sara.org/directory/>).

National Council for State Authorization Reciprocity Agreements Complaint Process

Pursuant to the United States Department of Education's Program Integrity Rule, the University of Wisconsin-Green Bay is required to provide all prospective and current students with the contact information of the state agency or agencies that handle complaints against postsecondary education institutions offering distance learning or correspondence education within that state. Students are encouraged to utilize UW-Green Bay's internal complaint or review policies and procedures through the Office of Student Affairs prior to filing a complaint with a state agency or agencies.

The State Authorization Guide (<https://nc-sara.org/guide/state-authorization-guide/>) provided by NC-SARA includes the contact information for each state's agency for complaints regarding SARA and non-SARA institutions.

- Placement Testing (p. 6)
- Transfer Students (p. 6)
- Special Students (non-degree seeking) (p. 7)
- Other Admission Information (p. 8)

Admission Standards

Success at the university level requires proficiency in a number of academic skills areas. Preparation for university study is best achieved by completion of a rigorous high school program. In order to be assured that students are prepared to successfully complete college-level work, UW-Green Bay is guided by a philosophy of personalized admission and comprehensive applicant review.

High School Coursework

New first year applicants will typically meet or exceed the following college-preparatory unit standards:

- English, 4 credits
- Science, 3 credits
- Math, 3 credits
- Social Studies, 3 credits
- Academic Electives*, 2 credits
- Other Electives**, 2 credits
- **Total: 17 credits**

* From the areas of English, science, math, social studies, or foreign language.

** From the above areas and/or in the fine arts, computer science, business or other areas.

Consideration for admission is based on a number of factors: cumulative grade point average, GPA trends, GPA in core courses, strength of college-preparatory curriculum in high school, special talent/circumstances, leadership and extra/co-curricular participation, socio-economic background, the personal statement, and other materials requested as part of the application process. ACT/SAT score are not required, but you are welcome to provide them.

Criteria may be guided based on enrollment targets, application volume, and institutional capacity.

Home Schooled Students

The Admissions Review Committee will consider students individually based on the same criteria used for other applicants.

GED/HSED Applicants

The Admissions Review Committee will consider students who have completed the tests for the General Education Development (GED) or the High School Equivalency Diploma (HSED). Factors considered in these decisions include:

- Review of high school coursework completed
- Review of total GED/HSED score, plus review of individual test scores
- ACT/SAT scores are not required, but you are welcome to provide them

Students with GED/HSED scores below admissible standards may be considered if additional coursework has been taken to improve ability in that area. Since a GED/HSED test may be taken only once if a passing score is earned, successful additional work may be presented as evidence of ability.

Transfer Admission Requirements

Students who have attended college after high school graduation may transfer to UW-Green Bay if the college work has been successful. All transfer applications receive a comprehensive review. Admission decisions are based on GPA, number of credits earned, rigor and breadth of curriculum, and other predictors of success. Generally, students with a cumulative transfer GPA of 2.0 or above have the highest likelihood of admission. Based on the comprehensive review, students with less competitive academic records may be admitted with the requirement they participate in the Gateways to Phoenix Success program, or may be placed on a waiting list, or denied admission.

Admission to UW-Green Bay does not guarantee admission to all majors. A number of majors have competitive program admission requirements. To see if your proposed major has additional admission requirements, refer to the Undergraduate Programs section of this catalog.

Degree-Seeking Students

Application Procedures for Degree-Seeking Students

Degree-seeking students applying to UW-Green Bay should submit the University of Wisconsin undergraduate application. The application can be found online at apply.wisconsin.edu. (<https://apply.wisconsin.edu/>) If you prefer a paper application, you can print a PDF from that website.

Transcripts

New first-year students must request that a copy of the high school transcript be sent directly to the Office of Admissions at UW-Green Bay. Many students are admitted to the University on the basis of grades earned through the junior year in high school, plus a listing of the classes carried in the senior year. In this way, they may be admitted before high school graduation. The University must receive a final copy of the transcript after graduation to verify that the student has, indeed, graduated and has maintained a satisfactory academic record. This must be received prior to the student beginning classes at UW-Green Bay.

Changes on a transcript from what was originally reported (for example, dropped or failed classes or a drop in GPA) may alter the admission decision. A cancellation of admission may result, especially if there is a serious drop in GPA and grades.

Other students may be asked to provide grades through the senior year of high school to assist the Admissions Review Committee in making the best possible evaluation of their potential for achievement.

Students who hold GED or HSED diplomas must have an official score report for the GED/HSED sent directly to UW-Green Bay by the agency or school.

Transfer students must request that official transcripts be sent directly to UW-Green Bay from all post-secondary schools attended. Transfer students with fewer than 15 completed transferable credits must also have a high school transcript.

All students who have attended nursing, business, and vocational and technical colleges must submit those transcripts as well. (Transcripts from noncollege training schools attended as part of military service are not required.) Students must submit the records whether or not the work was completed and regardless of their desire to request UW-Green Bay credit for the courses.

UW-Green Bay accepts a number of courses and credits from the Wisconsin Technical Colleges. More information is available about transfer agreements (<https://www.uwgb.edu/admissions/credit-transfer/>) and transferrable courses. Credit transfer equivalencies between UW campuses and the WTCS campuses can be found at www.wisconsin.edu/transfer. (<https://www.wisconsin.edu/transfer/>)

Dates

Admission application priority dates are tentative and may change depending upon enrollment capacities. Applications submitted after priority dates will be considered as space permits. Applications typically are accepted after the priority dates listed below. Deadlines can be found for the current application term at <https://www.uwgb.edu/admissions/deadlines/>.

Application Fee

There is no cost to apply to UW-Green Bay for any undergraduate applicants. This includes new freshmen and transfer students seeking undergraduate-level credentials, associate degrees, and/or bachelor's degrees.

Placement Testing

English/Writing: ACT or SAT Test Scores

Official ACT or SAT scores are optional and used for placement purposes only for:

- all new freshmen;
- all transfer and reentry students who have not satisfactorily completed at least one college-level course in Writing Foundations;
- special (non-degree) students who want to enroll in an Writing Foundations course;
- students wishing to be eligible for intercollegiate athletics.

ACT/SAT test scores are used to provide a basis for course level placement in Writing Foundations. While UW-Green Bay does not require the ACT/SAT for Admissions purposes, in order to enroll in a Writing Foundations course above WF 100, an ACT/SAT score is needed.

Mathematics: Wisconsin Mathematics Placement Test

The Wisconsin Mathematics Placement Test (WMPT) is required for:

- all new freshmen;
- all transfer and reentry students who have not satisfactorily completed a college-level mathematics course;
- all special students who want to enroll in a mathematics course.

WI Regional Placement Testing begins in March and are available online and unproctored using a computer. Students not able to test online will be offered the opportunity to test on campus via paper/pencil testing. The test results determine the course level placement for mathematics courses.

Transfer Students

Credit Evaluation

Official credit evaluations are started after all transcripts have arrived at UW-Green Bay and the student has been admitted; the final official evaluation is held until a final transcript showing grades from the last term and any degrees earned is received.

Transferable Coursework

Credit is awarded for college-level course work completed at institutions accredited by a regional or national accrediting organization recognized by the Council for Higher Education Accreditation (CHEA). Courses must be similar in nature, level, and content to a course in our undergraduate curriculum and applicable to a UW-Green Bay academic program.

Foreign institutions must be recognized by the Ministry of Education in that country. To receive credit for courses that you have taken at another college or university outside the United States, you must submit your academic records to a professional evaluation service currently recognized by NACES (<https://www.naces.org/>) for review. UW-Green Bay recommends one of the following evaluation services:

- Educational Credential Evaluators (ECE) (<http://www.ece.org/>)
- World Education Services (WES)

Continuing education courses or units, graduate-level courses, and courses that are remedial, technical, vocational, or doctrinal in nature are not transferable for undergraduate students.

General Education Requirements

A student who transfers to UW-Green Bay must satisfy UW-Green Bay General Education requirements by completing or transferring courses that meet the UW-Green Bay General Education requirements in effect at the time of enrollment. Students will still be required to complete all other degree and graduation requirements (<http://catalog.uwgb.edu/undergraduate/planning/graduation-requirements/>).

As listed below, degrees from the following institutions will satisfy all lower-level general education requirements:

- An Associate of Arts and Sciences Degree from any University of Wisconsin campus earned after 1990.
- A Bachelor's Degree from a regionally accredited college or university in the United States. (Also satisfies Math and Writing Competencies)
- An Associate of Arts and Sciences Degree from College of Menominee Nation
- Liberal Arts/University Transfer Associate Degrees from these Wisconsin Technical College System (WTCS) institutions:
 - Chippewa Valley Technical College
 - Milwaukee Area Technical College
 - Madison Area Technical College
 - Nicolet Area Technical College
 - Northwood Technical College
 - Western Technical College
- Any Minnesota State College and University (MnSCU) – Associate of Arts or Associate of Science degree meeting Minnesota Transfer Curriculum (MnTC) requirements.
- Any Illinois community college Associate of Arts or Associate of Science degree meeting the full requirements of the Illinois Articulation Initiative Gen Ed Curriculum (IAI GECC).

Associate of Applied Science degrees do not automatically satisfy all general education requirements

Students who have completed the Michigan Transfer Agreement (MTA) will have several, but not all, general education requirements satisfied. Students should consult their advisor for more details.

Some, but not all of the above degrees include a course that satisfies the UW System Ethnic Studies requirement. Students should consult their advisor for more details.

Special Students

(Students Not Seeking Degrees)

Students who want to take selected courses for credit but do not have the immediate intention of earning a degree at UW-Green Bay may enroll as special students. A special student is identified as a nonmatriculated student but may earn regular credit, which is permanently recorded for possible future use. Special students should be prudent in course selections and the number of credits accumulated. For example, an excessive number of electives may not apply to degree requirements if the student decides to change to degree-seeking status in the future. Certain opportunities, such

as financial aid, for which degree-seeking students may be eligible, are not available to special students. Special students are subject to all normal academic regulations and Regent policies.

Normally, a student must have graduated from high school at least two years prior to the semester for which he or she is seeking special student admission. Exceptions are described in the categories below.

A student who has been, or who is likely to be, denied degree-seeking status for a given semester at UW-Green Bay may not enroll as a special student for that semester, and will be subject to review by the Admissions Review Committee when applying for subsequent semesters. Also, a student not in good standing at another college may be denied special student status at UW-Green Bay.

Special Student Categories

Special

Students who have not previously earned a baccalaureate degree and are not currently pursuing a degree at UW-Green Bay, are classified as specials, subject to the admission standards mentioned above.

Post Baccalaureate or Graduate Special

These are students who have already earned a baccalaureate degree (or higher) and are enrolled in undergraduate-level or graduate-level coursework but are not pursuing a degree at UW-Green Bay.

High School Special

Superior high school students may enroll for UW-Green Bay coursework while attending high school or during the summer.

High school specials must normally be seniors or juniors in high school and must demonstrate readiness for college-level work. Enrollment in UW-Green Bay courses requires the approval of the high school.

Summer/Winterim Session Only

Students enrolled at another college or university and current-year high school graduates who have been admitted to another college or university for the fall session may apply for Summer or Winterim Session Only admission. Such admission carries no commitment for permission to register for the regular UW-Green Bay academic year. Students from other colleges or universities must be eligible to continue at their respective institutions and are responsible for determining if their institutions will accept credits earned at UW-Green Bay.

Application Procedures for Special Students

Nondegree-seeking students applying for admission should submit a Special Student Application, available online at apply.wisconsin.edu (<https://apply.wisconsin.edu/>). (A paper version is available from the Admissions Office.) Often, the completed application is the only information required, but some situations will require the submission of additional records.

High School Special students must submit an official high school transcript in addition to the application

Early College Credit students must submit a high school transcript, as well as the UW System ECCP participation form. The form is available at <https://www.uwgb.edu/eccp/application-registration-process/>

No application fee is required of special students.

Other Admission Information

UW-Green Bay Admissions Office website: www.uwgb.edu/admissions/ (<http://www.uwgb.edu/admissions/>)

Teacher Preparation

Students who expect to seek teaching licensure should review the section on Education in the Undergraduate Programs segment of this catalog.

A student who will earn teaching licensure should apply as a degree-seeking student.

International Student Admission

International students from around the globe contribute to the rich diversity of the UW-Green Bay learning community.

Admission for international students is based upon scholastic achievement and ability to use the English language. Note: Proof of ability to finance a UW-Green Bay education is expected prior to the issuing the necessary Certificate of Eligibility (Form I-20).

An international student must have a recognized certificate of completion from a secondary school and provide transcripts for all high school work. Transcripts will also be required from all post-secondary schools attended, if any. Since all UW-Green Bay coursework is conducted in English, each

international applicant must provide evidence of English proficiency. For further information about meeting the English proficiency requirements at UW-Green Bay, go to www.uwgb.edu/admissions/international/apply (<https://www.uwgb.edu/admissions/international/apply/>) and click on “English Language Proficiency.”

International students must be prepared to finance their education. A limited number of partial tuition remission scholarships exist. Because of the difficulty in gaining permission from the U.S. Immigration and Naturalization Service to work off campus, international students should not anticipate financing an education by income from employment. Limited on-campus work opportunities are available.

The Office of International Education at UW-Green Bay will issue the necessary Certificate of Eligibility (Form I-20) to admitted students once it is confirmed the student has the ability to finance a UW-Green Bay education.

Further information about international student admission is available at www.uwgb.edu/admissions/international/apply/. (<https://www.uwgb.edu/admissions/international/apply/>)

Rising Phoenix

Students from approved participating school districts may be admitted to the Rising Phoenix program. Rising Phoenix is a collaboration between school districts and UW-Green Bay, providing students with a future-proofing blend of dual enrollment, ongoing student success coaching and an opportunity to earn a high school diploma and an Associate of Arts and Sciences degree while still in high school. Only students from approved participating school districts may apply to this program and admissions is based on a holistic admissions process, assessing students individually based on academic and personal backgrounds.

Admissions Appeals

A student who has been denied admission may appeal that decision by letter to the Director of Admissions. Students may contact the Office of Admissions for additional information.

Absence and Attendance Policy

Absence and Attendance Policies

Class Attendance

A student is expected to attend all class sessions. Failure to attend class does not alter academic or financial obligations. If, for any reason, a student is unable to attend classes during the first week of the semester, he or she is responsible for notifying the instructor(s), in writing, of the reason

for nonattendance and indicate intentions to complete the course. Failure to attend classes during the first week of the semester may result in an administrative drop by the instructor. Registered students are obligated to pay all fees and penalties as listed on the fee schedule.

Other Attendance Policies

- Absence due to inclement weather. For more information, see Attendance and the Weather (<http://www.uwgb.edu/provost/policies/storm.asp>).
- Absence for funerals or a death in the family. For more information, see Bereavement Policy (<http://www.uwgb.edu/dean-of-students/assistance-advocacy/bereavement-policy.asp>).
- Student Religious Beliefs: In accordance with Board of Regents Policy (UWS 22.01), sincerely held religious beliefs shall be reasonably accommodated with respect to all examinations and other academic requirements. Questions should be directed to the Dean of Students (dosmail@uwgb.edu); (920) 465-2152
- Absence due to Disability: UW-Green Bay is committed to providing accommodations for eligible individuals with documented disabilities as defined by federal and state law. Questions should be directed to Student Accessibility Services (<https://www.uwgb.edu/student-accessibility-services/>) (920) 465-2481

Academic Advising

The academic advising process at UW-Green Bay is designed to maximize students' educational potential through communication and information exchanges with an adviser; these exchanges are ongoing, individualized, multifaceted, and the responsibility of both student and adviser. Advising is assumed to be a developmental, decision-making process that assists students in the clarification of their life/career goals and the completion of educational plans for the realization of those goals. The adviser serves as a facilitator and coordinator of student learning through educational planning and academic progress review, and an agent of referral to other campus programs and services as necessary. Academic advising is a joint effort of Academic Affairs and Student Affairs.

Upon admission, all undergraduate students will be assigned to a professional advisor in the Office of Academic Advising. This professional advisor specializes in advising for the student's chosen program(s) and supports student exploration of other programs offered at the university. Students will typically remain assigned to the same professional advisor from admission through graduation. The student's assigned professional advisor and contact information is available in the student's SIS (Student Information System) account.

Academic Forgiveness

Returning students, who have not earned a baccalaureate degree, and have not enrolled in any courses at UW-Green Bay for a minimum of three consecutive years prior to re-admission are eligible to request academic forgiveness. If *academic forgiveness* is granted, all grades received from courses taken three or more years before readmission will be excluded when calculating the student's cumulative grade point average on their academic transcript. All prior grades and quality points are not excluded in financial aid satisfactory academic progress calculations. Courses that meet General Education requirements that are forgiven will be used to satisfy these degree requirements. Other forgiven courses may be used to satisfy major/minor/certificate requirements must be approved by the faculty advisor/academic department representative as substitutions. Credits that have been forgiven, are not eligible for inclusion in calculating and awarding of All University Honors.

Requests for Academic Forgiveness can be made through the Office of Academic Advising (advising@uwgb.edu) but **must be made within 21 calendar days after the last day of final exams of the first semester after readmission.**

Academic Honors

- Semester Honors (p. 11)
- Graduation Honors (p. 11)

Dean's List

(also known as Semester Honors)

- Acknowledgement of academic excellence for a semester and awarded by the academic Dean.
- Dean's List semester honors are awarded on a semester basis.
- Semester Honors are denoted on the academic transcript in the specific semester awarded.
- Students are eligible to earn semester honors if they are enrolled in a minimum of 12 graded credits for the semester. If any courses of the 12 total credits are graded as pass/fail or audited basis a student would not be eligible for this designation.
- If all grades are not submitted at the time the Dean's List is run on individual student records, the designation may not appear until final grades are received and recorded to the record.

Honors Recognition at Commencement

Bachelor degree students will be recognized at the commencement ceremony and honors cords provided if these two requirements are met:

1. the student's cumulative grade point average meets the minimum requirements at the end of the semester preceding their final term; and
2. graded credits in residence, including credits in progress during her/his final term at UW-Green Bay, total a minimum of 48.

Associate degree students are not eligible for graduation honors

All-University Academic Honors

Acknowledgment of overall academic excellence at the university level upon completion of a Bachelor degree and completing 48 regularly graded (GPA calculations do not include P-NC or audit graded courses or course grade points removed via Academic Forgiveness appeals process) credits taken in residence at UW-Green Bay.

Honors requirements for students who earn Bachelor degrees are:

- Cum Laude designation requires a cumulative grade point average from 3.500 to 3.749;
- Magna Cum Laude designation requires a cumulative grade point average from 3.750 to 3.849;
- Summa Cum Laude designation requires a cumulative grade point average of 3.850 or higher; or a cumulative grade point average of 3.750 to 3.849 and eligibility for and successful completion of an honors in the major project.

Honors cords are issued and honors designation earned is denoted on the commencement program based on cumulative GPA earned in the semester prior to commencement ceremony.

Final honors designation is transcribed on the diploma issued and academic transcript record once all outstanding grades are issued. All University Honors can be rescinded, increased or added upon final assessment of grades and degree requirements in the final semester.

There are no exceptions to these rules.

Academic Standing

All students are expected to maintain certain standards of academic achievement while enrolled at the University. The University is concerned about students whose academic achievements indicate that they are not meeting the expectations of their instructors, or who are experiencing other problems that may be interfering with their studies. An academic warning is an advisory notice that a student should take action to improve his or her performance. Probation and strict probation are formal academic actions that document unacceptable performance on the student's official transcript. An academic suspension action is taken when a student's achievement record indicates a need to interrupt enrolled status. Official academic actions on part-time students are withheld until they have attempted at least 12 credits at UW-Green Bay.

Good Academic Standing

A student is in good academic standing if the student's cumulative resident grade point average is 2.00 or greater. Academic standing is reviewed at the end of each academic term. Every student is expected to maintain at least a 2.00 grade point average on all work carried in every term, including summer session. Students who fail to maintain this minimum grade point average will face academic warning, probation, strict probation, or suspension, as specified.

Academic Probation

A student in good standing will be placed on academic probation if he/she earns a cumulative grade point average of less than 2.00 but greater than 1.00. Academic probation is an advisory warning and is not subject to appeal.

Strict Probation

A student will be allowed no more than two consecutive academic terms to remove him/herself from probation. If a student is on probation and earns a cumulative grade point average of less than 2.00 at the end of the probationary term, he/she will be placed on strict probation. A student on strict probation must regain good academic standing by the end of the strict probationary term in order to continue at the University.

Return to Good Standing

A student on probation or strict probation will be cleared of probation at the end of any term in which a cumulative grade point average of 2.00 or better is attained.

Academic Suspension

A student will be suspended from the University if he/she fails to achieve a cumulative grade point average of 2.00 at the end of a semester on strict probation or if his/her cumulative grade point average falls below 1.00.

Appeals Process

Academic suspension status may be appealed to the provost's designee. Appeals must be filed within the deadline specified in the official suspension notification. The action of the provost's designee may be appealed to the Academic Actions Committee within the deadline specified in the official suspension notification. The decision of the Academic Actions Committee is final. A student who is allowed to continue as a result of an appeal will be placed on suspension waiver, and is subject to any special conditions that may be designated. An academic suspension provides time for a student to give careful thought to the circumstances that resulted in the suspension action. Suspension appeals must include a clear explanation of the circumstances that resulted in inadequate achievement, and a statement explaining how the student proposes to resolve those circumstances.

Students planning to appeal should consider:

- Are the relevant facts and dates clearly stated and documented?
- Are the extenuating circumstances cited of an unforeseeable nature?
- Are relevant recommendations from instructors included, if appropriate?

Readmission Following Academic Suspension

Students who have been suspended may appeal for continued enrollment (see Appeals Process). For students who do not appeal for continued enrollment, or for whom the appeal is denied, the period of the first suspension shall be one regular semester. A student seeking readmission to the University after the expiration of the suspension must make formal application through the Admissions Office. Readmission cannot be guaranteed. A written request for readmission must accompany formal re-application to the University. A student who is readmitted after suspension will be placed on suspension waiver. If a student is readmitted and fails to regain good academic standing after re-admittance, a second suspension will be incurred. The second suspension shall be for a period of two regular semesters.

Audit Enrollment (U/S grade)

- A student may elect to enroll in a course but not receive a letter grade.
- **Degree seeking** students may audit a course by requesting a change to the grade basis using the **Grade Change/Audit** form which is approved by the faculty instructor.
- **Special student only auditors (course takers)** use the same Grade Change/Audit (<http://www.uwgb.edu/registrar/forms/>) form. Several conditions apply to audit only students and are highlighted in detail on the request form or Bursar information page. Click here (<http://www.uwgb.edu/bursar/tuition-fees/audit-students/>) for more information.
- **Audit grading option, is not reversible after add/drop deadline for the respective course.**¹
- Audit classes do not count toward degree requirements.
- Students can audit any undergraduate courses except:
 - Independent study
 - Internships
 - Honors projects
 - Professional courses in Education, Nursing, and Social Work
 - Adult Degree courses open to BAS and BA-ILS majors only
 - Graduate-level courses

¹

Add/Drop deadlines vary by length of course.

Courses have an add period in which a new grading option can be requested and approved using the appropriate forms mentioned above.

You can find your course dates on the Registration calendar (<http://www.uwgb.edu/registrar/calendar/registration/>) the deadline is based on the course length. If you are not able to find your information, please feel free to contact gboss@uwgb.edu.

Audit Students

For the complete Auditor policy, please see the Registrar's Office (<http://www.uwgb.edu/registrar/policies/>) website.

Students taking a mix of regular and audit courses are not eligible for a fee reduction. See the Registrar's Office for policies and procedures.

Audit Only students must have written approval from the course instructor prior to enrolling. Please use the Audit Form (<https://www.uwgb.edu/registrar/forms-petitions/registration-forms/>) in the Registrar's office to secure approval from the course instructor and apply for a reduced fee. Additionally, audit only students must complete a "special student" application with the Admissions office. Residency determination will be made at the time of application/admission to the University.

The decision to enroll on an audit basis for tuition purposes must be made at the time of registration.

Any course fees or field trip expenses are the responsibility of each student.

Wisconsin Residents under age 60 will be charged 30% of the normal per credit academic fee.

Wisconsin Residents Age 60 and older will have the normal academic fees waived. Age 60 and over auditors will be required to provide proof of date of birth (Driver's license or birth certificate).

Disabled Wisconsin residents who are receiving disability insurance benefits under either the federal Supplemental Security Income (SSI) program or the federal Social Security Disability Insurance (SSDI) program will have the normal academic fees waived. A copy of your Social Security benefit letter will be required.

Minnesota Reciprocity residents will be charged 30% of the normal per credit Minnesota Reciprocity fee.

Nonresidents will be charged 50% of the normal per credit academic fee.

Upper Michigan MSEP (MI Compact) will be charged 50% of the normal per credit academic fee.

Audit Student Fee Payment Instructions

You must report to the Student Billing office (SS1300) to have charges manually adjusted to the appropriate audit rate. Tuition and fees are due at the time of registration.

Calendars

Official University Calendars

- **Academic Calendar:** Official calendar of activity for the school year (term dates, registration dates, breaks and holidays, etc.)
- **Administrative Calendar:** Calendar relating to curricular change, timetable, and personnel evaluations
- **Registration Calendars (Fall/January/Spring/Summer):** Calendar of specific registration/academic action deadlines (add/drop/withdrawals, late registration, and fee implications of selected academic actions)
- **Final Exam Calendar:** Final exam schedule for the semester in session

Cancellation

Cancellation of admission or enrollment *prior to the first day of the term.*

- If a student cancels their admission or enrollment, they are not eligible to re-enroll in the subsequent semester.
- A student who cancels must re-apply for admission in a subsequent term.

Class Standing

Class standing is determined by the number of earned credits a student has completed. In-progress credits do not count toward standing. Class levels are defined as:

Freshman	23 or fewer earned credits
Sophomore	24 to 53 earned credits
Junior	54 to 83 earned credits
Senior	84 or more earned credits

Course Adds

Add one or more courses to a schedule and/or change course load.

Students may add one or more courses after the start of a term or session with no grade assigned and no financial penalty based upon the deadlines noted below. The Add Deadline is based upon the length of the session.

- Regular 14-week semester long courses or longer: within the first 7 days of the session.
- 10-week sessions: within the first 7 days of the session.
- 8-week sessions: within the first 7 days of the session.
- 6-week sessions: within the first 3 days of the session.
- 4-week sessions: within the first 2 days of the session.
- 3-week sessions: within the first day of the session.

After the Add Deadline has passed, a student may submit a Late Add eform (<https://www.uwgb.edu/registrar/forms-petitions/registration-forms/>) for the course they wish to add late. If the instructor approves the Late Add eform, the student will be added to the course by GBOSS and assessed a \$15 Late Add Fee. If the instructor denies the Late Add eform, the student will be informed of the denial and will not be added to the course.

Please check the Registration Calendar (<http://www.uwgb.edu/registrar/calendar/registration/>) for the specific deadline dates each term.

Course Drops

Remove one or more courses from a schedule but remained enrolled in at least one credit.

Students may drop one or more courses after the start of a term or session based upon the deadlines noted below. Please see the Bursar's Office website for information regarding drop fees and refunds.

Regular 14-week semester long courses or longer:

- Courses dropped within the first 2 weeks of the session will not receive an academic grade.
- Courses dropped within the third through eighth weeks of the session will receive an academic grade of 'W'.

Sessions less than 14 weeks:

- Courses dropped within the first week of the session will not receive an academic grade.
- Courses dropped within the second week through the first half (50%) of the session will receive an academic grade of 'W'.

After the Drop Deadline has passed, a student may submit a Late Drop Petition for review by the Enrollment Review Committee. Petitions are only approved for extenuating circumstances with supporting documentation. If a late drop is granted, students remain responsible for the tuition and fees assessed for the course as they received instruction and held a seat in the course. Courses dropped through the Late Drop Petition will receive an academic grade of 'W'.

- Regular 14-week semester long courses or longer: The Late Drop Petition is required within the ninth week through the last day of classes.
- Sessions less than 14 weeks: The Late Drop Petition is required during the second half (50%) of the session.

¹ A week is defined as 7 calendar days, beginning on the first day of a term or session, for the purposes of adds, drops or withdrawal deadlines.

² Tuition refunds and/or withdrawal fees vary by length of course and date of transaction. Please consult the Fee deadlines for the appropriate semester on the Bursar website for more details (<http://www.uwgb.edu/bursar/term-deadline-calendar/>). Please note that financial deadlines are different from academic deadlines.

Course Requisites

Prerequisites:

Requisites indicate the minimum level of proficiency or background knowledge needed to successfully achieve course objectives. Requisites are enforced, included in the course descriptions and are indicated in the Schedule of Classes by the designation P.

Recommended courses:

Recommended courses are typically lower-level courses that students are advised to complete prior to enrolling in a course. They are advisory (i.e., not enforced), so students may enroll without completing prior recommended courses, but they do so at their own risk. Recommended prior courses are indicated in the course descriptions by the designation REC.

Course registration restrictions (other than requisites):

Course can have other restrictions preventing enrollment.

Closed course:

no seats are available

Reserves:

seats are held for a certain period of time for students in a certain class level, student group or major/minor

Time conflict:

two courses delivered at the same time

Consent:

student must gain instructor or department consent to enroll

Auditions

In performance courses requiring an audition, students are responsible for making their own arrangements for the audition before classes begin.

Credit Hour

A credit hour is an amount of work represented in intended student learning outcomes and verified by evidence of student achievement that is an institutionally-established equivalency that reasonably approximates not less than one hour of classroom or direct faculty instruction and a minimum of two hours of out-of-class student work each week for approximately fourteen weeks for one semester, or the equivalent amount of work over a different amount of time, or the equivalent amount of work for other activities as established by the University including but not limited to graduate work, internships, practica, studio work, and other academic work leading toward the awarding of credit hours.

Credit Load

Total number of credits a student is enrolled in at a given time in a term, for example, after initial registration or at the end of a semester. All credits, regardless of grading status, count toward credit load for certain purposes.

- **Maximum Credit Load:** A student in good standing may register for a maximum of 18 credits during any regular session of fall, spring or summer semester and may register for a maximum of six credits in the January semester, no exceptions. A student who wants to enroll in more than 18 credits in fall, spring or summer semester must obtain written approval in advance from their faculty or academic advisor using the credit overload petition. Once approved, course(s) enrollment can be completed. Additional tuition and fees will apply. No overload petitions are accepted for the January semester.
- **Minimum Credit Load:** A specific minimum number of credits (excluding audit credits) that a student must carry to be eligible for certain programs and benefits. A student may register for or reduce a program below 12 credits in a semester with the understanding that for certain purposes he or she will be considered a part-time student. A student who reduces the credit load below 12 credits should check with the appropriate offices about the effect on financial aid, government benefits, athletic eligibility, health insurance coverage, and other programs with credit load eligibility limits.

Cumulative Grade Point Average (GPA)

Grade point average for all completed terms at UW-Green Bay. It is calculated by dividing the cumulative total grade points by the cumulative total grade point credits earned. Attempted courses where an F grade is received are also included in grade point calculations unless successfully repeated.

Declaration of Major

Students are admitted with their "Major", "Minor", or "Certificate" of interest noted for advising purposes. All students are required to have an official major and faculty advisor on file with the Registrar's Office by the time they have a total of 45 credits earned. Some majors require additional entrance requirements or addition of an area of emphasis, thus a student must complete the program admit process requirements. These students will be added as Pre-Majors to their area of study. A "Major", "Minor", or "Certificate" is not fully valid until the student is also assigned a faculty advisor. Students should follow the departmental directives for declaring a major/advisor assignment using the resources found in departmental web pages. Students are encouraged to discuss a major with faculty representatives as early as possible in their undergraduate career. The declaration of major/minor/certificate form is available online at <http://www.uwgb.edu/registrar> (<http://www.uwgb.edu/registrar/>).

Degree Residency Requirement

- A minimum of 30 credits must be earned at UW-Green Bay.
- The minimum credit residency requirement for a major is 15 credits.
- The minimum credit residency requirement for a minor is 9 credits.
- One half of the upper-level requirements for any major, minor, etc., must be earned at UW-Green Bay.

A student who has completed the junior year and meets the residency requirement, but cannot complete the senior year in residence for reasons of employment transfer, marriage, or other cause, can graduate from UW-Green Bay. Appropriate courses taken at another university as a substitute for senior year residence at UW-Green Bay can be selected with an adviser. Selected courses must then be approved by the chairperson of the student's major and, if necessary, by the appropriate academic dean.

Note: Credits earned at the undergraduate and graduate level through the Credit for Prior Learning process (e.g., standardized examinations, challenge exams, portfolio development) may not be used to satisfy UW-Green Bay Degree Residency Requirements for degrees, major and minors.

Earning a Second Degree

Earning a Second Bachelor's Degree at UW-Green Bay

Currently, UW-Green Bay has no dual degree programs. Students who have earned a first baccalaureate degree from UW-Green Bay may earn a second, distinct baccalaureate degree by completing a minimum of 30 additional undergraduate credits in residence subsequent to the awarding of the first degree and by satisfying all major requirements for the second degree. The subsequent 30 credit requirement should include a minimum of 15 credits that are used to satisfy the requirements for the major as part of the second degree. The two bachelor's degrees earned must have different degree designations (e.g., BS, BA, BAS, BBA, BSN, BSW).

Students seeking an additional major or minor in the same degree designation after having already earned that baccalaureate degree from UW-Green Bay may do so. Post-baccalaureate activity is recorded on their academic transcript, and the subsequent credential is recorded at the time of completion.

Educational Status

Degree-Seeking:

A degree-seeking student is enrolled in a program of study and plans to earn an Associate or Bachelor degree at the undergraduate level.

Special Student:

A special student is not seeking a degree, but taking courses. Status impacts the admissions process and financial aid eligibility.

Enrollment Status (full time, part time)

Enrollment status is based on number of credits enrolled. Status impacts financial aid eligibility and tuition/fees.

Full Time	12 credits
Three-Quarter Time	9-11 credits
Half Time	6-8 credits
Less than Half Time	1-5 credits

Global Catalog Numbers

The UW-Green Bay faculty and administration have approved the use of some catalog numbers across all subject headings. Academic departments are able to schedule these experiences without securing additional approval through the curricular approval process.

Courses include:

- 297 - Internship (p. 21)
- 298 - Independent Study (p. 21)
- 299 - Travel Course
- 478 - Honors in the Major (p. 20)
- 495 - Teaching Assistantship (p. 26)
- 496 - Project/Research Assistantship (p. 23)
- 497 - Internship (p. 21)
- 498 - Independent Study (p. 21)
- 499 - Travel Course

Grade Point Average (GPA)

A numerical value derived from dividing the number of grade points earned by the number of credits attempted on a regular grade basis. P-NC, incomplete, grades removed by repeat and audit grades and transfer credits have no effect on grade point average. Only those courses attempted at UW-Green Bay are included in a student's grade point average. Transfer grades may be used to compute eligibility for admission to certain programs/majors.

Example of GPA for a Semester

Course	Grade	Credits	Grade Points
ART 105	A	3	12
MATH 104	BC	4	10
GERMAN 102	C	4	08
WF 100	C	3	06
Total		11	30

(An A is equal to 4 grade points, a B is equal to 3, and so forth. Three credits earning an A grade equals 12 points.)
30 divided by 11 equals 2.72 grade point average.

Grading Policy

Final Grades

Final grades are posted to the student's transcript and may be accessed via the Student Information System (SIS).

Every student receives a grade from the instructor of a course at the end of a semester or session. **Instructors must enter grades on the course roster in SIS for processing by the Registrar's Office no later than seven calendar days after the final examination or last date of that individual course (if no final examination is given).** If an instructor finds they have made a grade error or missed entering a grade, the faculty member can complete a grade change in SIS, using the grading access they are provided, up through the end of the subsequent semester. **Please contact the Registrar's office with any grading issues or questions as needed.**

**Failure to add grades in a timely manner delays processing of academic standing, conducting satisfactory academic progress assessment, degree conferral, issuing diplomas and/or transcript documents, reporting of accurate enrollment and degree data to various entities for compliance and can prevent students from registering for subsequent courses.*

Grade Changes

Missing (N) grades must be updated and submitted via SIS, for permanent change to the student's academic record no later than the last day of classes in the following semester.

Incomplete (I) grades, faculty must submit an incomplete grade form to the Registrar's office documenting outstanding course work, deadline for completion. This grade change should be made no later than the last day of classes in the following semester. If the student does not meet the deadline identified, the grade will lapse to an F = fail grade for that semester.

Grade Changes AFTER two semesters

Grade changes considered after one subsequent semester must be requested to and approved by the College Dean from the faculty member. The approval should include student name, semester, course taken, new grade to the Registrar's office for an update to be made to the academic record. Grade change requests will not be accepted without Dean approval.

Grade Appeals

Any student who is dissatisfied and wishes to appeal a particular course grade, must first contact the instructor who issued the grade. If the student is still dissatisfied, he or she may appeal further to the department chair. The chairperson, in turn, consults with the course instructor. If a student wishes to appeal further, he or she should contact the appropriate academic dean who will consult with the instructor and the appropriate chairperson.

A faculty member may change the grade after appeal and can do so in SIS up through the end of the subsequent semester.

Grading System and Grade Points

Grade point averages indicate academic and class standing and are a means of measuring the quality of a student's academic work. Grade point averages are computed on a 4.0 basis. See chart for letter grade point values.

Grade Point Values

Letter Grade		Grade Points Per Credit
A	Excellent	4.0
AB	Very Good	3.5
B	Good	3.0
BC	Above Average	2.5

C	Average	2.0
CD	Below Average	1.5
D	Poor	1.0
F	Unacceptable	0.0
WF	Unofficial Withdrawal	0.0
P	A "C" grade or better for undergraduate courses	No effect
NC	No credit, letter grade of less than "C"	No effect
U	Unsatisfactory Audit	No effect
S	Satisfactory Audit	No effect
N	No acceptable report from instructor – temporary grade	No effect until an acceptable grade submitted
I	Incomplete, temporary grade	No effect until removed
DR	Dropped Course	No effect
W	Withdrew	No effect
T	Transfer Course, pass	No effect
PR	Progress in graduate thesis or internship, not complete	No effect
IP	In progress course	No effect
(Grade assigned)	Academic Forgiveness Applied	No effect/Example (F)

Guidelines for Certificates

The University of Wisconsin Green Bay offers certificates to provide students the opportunity to develop focused expertise in select academic areas, as a means to further their employability, or to enhance their professional qualifications. All certificate programs must have an executive committee which oversees the offering of the certificate. In establishing a new certificate, a clear rationale must be provided by the Executive Committee detailing the purpose and value of that certificate.

Requirements for Certificates

All certificates must have a minimum of 12 required credits. Those credits can be any combination of lower and upper level courses.

The certificate may be either associated with an academic program or a stand-alone certificate (i.e. a certificate that is not associated with an academic program). If the certificate is a stand-alone certificate, it must demonstrate that it provides for increased employability or enhanced professional qualifications for anyone receiving the certificate.

The Executive Committee's membership must include a minimum of three tenured faculty members. The committee can be an existing Executive Committee, such as a budgetary unit or department, or can be developed among interested faculty. The committee must meet at least once a year and forward copies of minutes for all meetings to the Provost's Office.

The Executive Committee must appoint an advisor for the certificate or have the chair serve that function. The advisor or chair advises students and performs necessary administrative tasks such as approving substitutions.

In order to be awarded a certificate, a student must have a minimum 2.0 Grade Point Average in the certificate's courses and earn 9 credits or one half the total required credits, whichever is greater, in residency at UWGB. The Executive Committee may establish a Grade Point Average higher than 2.0 or additional criteria that must be met to earn a certificate.

Students must declare that they are pursuing a Certificate Program by filing a **Declaration of Major/Minor/Certificate form**.

The Registrar's Office transcribes certificates earned on an academic record when a student completes a degree. Certificate Executive Committees may print and award a separate certificate of completion.

Guidelines for Majors and Minors

- Majors will consist of a minimum of 30 credits with at least 24 credits at the upper level.
- Minors will consist of a minimum of 18 credits with at least 12 credits at the upper level. The exceptions are Mathematics, Music, Art, and Theatre.
- The official transcript will include only type of degree and date earned; major(s), minor(s), and All-University Honors, Distinction in the Major and any Semester Honors achieved. Majors, Minors, and Certificates are only transcribed if a Bachelor's degree is earned.
- Diplomas will carry only the degree (B.A., B.S., etc.) and All-University Honors if achieved.
- Overlapping of requirements for majors, minors, and professional programs with the general education requirements is permitted.
 - Courses may not count for two requirements in a major, minor, professional program or general education.

- Majors, minors and professional programs may declare that their requirements are valid for a maximum period of five years following the final approval of a student's academic plan.

Students with Two or More Majors

Students who declare two or more majors at the same time are granted only one baccalaureate degree and receive only one diploma upon graduation. If the majors declared have different degree designations, then the student must choose which degree they want to receive. All successfully completed majors are recorded on the student's academic transcript.

Any student that has earned a baccalaureate degree at UWGB can earn an additional major or minor post-graduation. Students with a baccalaureate degree from another University would need to complete degree requirements (and residency) to have a major and minor posted on their official transcript.

Honors in the Major

(numbered 478, 3 credits)

- Honors in the Major is designed to recognize student excellence within interdisciplinary and disciplinary academic programs.
- Honors in the Major may not be substituted for a major requirement.
- The Honors in the Major project should be planned during the junior year.
- Students should enroll for Honors in the Major study during the first semester of registration with senior standing (84 or more degree credits) to ensure adequate time to complete it by graduation. Students should consult with sponsoring faculty during the junior year to determine possible special needs for library resources, equipment, supplies or field research.
- Eligibility requirements for Honors in the Major are:
 - Minimum grade point average of 3.500 for all courses required for the major, as indicated on the degree audit.
 - Minimum grade point average of 3.750 for all upper-level courses required for the major, as indicated on the degree audit.
 - Successful completion of the Honors in the Major project requirements.
- An Honor in the Major is different from All-University Honors. Rather than a required, cumulative grade point average, the grade point average is calculated on courses required for the major only and there is no residence requirement as with All-University Honors. An honor in the major is designed to recognize student excellence within interdisciplinary and disciplinary academic programs.
 - Students are recognized at Commencement if the Honors in the Major project is completed and minimum GPA requirements are met, in the preceding semester to commencement.
 - Honors in the Major can be awarded, rescinded or All University Honors increased to Summa Cum Laude, in a final semester of completion based on the outcome of the last remaining courses of record. Final GPA calculations, grades and All University Honors designations are not completed at time of commencement due to grading deadlines and degree conferral timeframes.
- There is no residency requirement for Honors in the Major.
- Regular semester/session add and drop deadlines apply; no P-NC grading is permitted.

Incomplete Grades

Incomplete grades (I grade)

- A student who is unable to take a final examination or meet other final coursework due to unusual circumstances may request an incomplete from the instructor.
- The decision to allow an incomplete is entirely at the discretion of the instructor. It is not a right.
- If an incomplete is approved by the faculty instructor, the student is granted an extension of time to complete course requirements.
- An incomplete form must be submitted to the Registrar's office specifying the terms and conditions of completing the incomplete from the instructor.
- Incomplete coursework must be finished no later than the end of the subsequent semester.
- If no final grade is awarded or the work is not completed, the temporary grade is lapsed to a final F grade at the end of the subsequent semester.
- A student may file petition for an extension of the incomplete deadline if bona fide unanticipated extenuating circumstances prevented compliance with the deadline.
 - The student has serious physical or mental health problems which are documented by statements from a physician or professional counselor.
 - The student has had a death or serious illness in the immediate family and this is documented by a physician's statement.
 - The course instructor is on leave during the semester for removal.
- Once an incomplete grade is recorded for a course a student may not, under any circumstances, drop the course.

Incomplete grades for Graduating Students

Students who complete their coursework in December (fall graduates), January (January graduates), May (spring graduates) or August (summer graduates) must have all incomplete grades removed within 42 days following the end of the classes to have their degree conferred in that semester. If this deadline is not met, students will be removed and added to a future semester for degree conferral.

Independent Study

(numbered 298; 498, variable 1-4 credits)

- Students can complete independent study courses at the lower or upper level.
- The student must prepare a statement of objectives and a list of readings and/or research projects that will fulfill the objectives.
- Independent study cannot be elected on audit or pass-no credit basis.
- Independent study may be taken only with a UW-Green Bay faculty member, instructional academic staff member (e.g., Lecturer), or visiting scholar.

Individualized Course Instruction

Universal Expectations

- Faculty approval is needed for courses that are individualized or coordinated by the student for a specific learning experience.
- Regular semester add and drop deadlines apply to these learning experiences.
- Approved forms must be submitted in the semester the learning experiences are taking place; students will not be retroactively added into these courses.
- Faculty must file syllabi and include appropriate information such as student learning outcomes, time commitments for work, additional requirements for placement including but not limited to criminal background checks, medical testing (such as a tuberculosis test) or other requirements outlined by a third party human resources department or site supervisor.
- The title and content of these individualized courses should not duplicate the title and content of existing courses.
- For each credit earned, 45 hours is the minimum number of hours to be dedicated to the learning experience over the course of the semester.
- A freshman or sophomore must have a minimum cumulative grade point average of 2.500 and a junior or senior must have a minimum of 2.000 to enroll in an independent study.
- Faculty members have the ability to override this GPA requirement and indicate as such on the approval form.

Specific conditions or limitations apply to the type of learning experience in addition to the universal expectations.

- Honors in the Major (p. 20)
- Independent Study (p. 21)
- Internship/Co-op (p. 21)
- Project/Research Assistantship (p. 23)
- Teaching Assistantship (p. 26)

Internship & Co-op

Internship

(numbered 297, variable 1-6 credits)

(numbered 497, variable 1-12 credits)

- Students will have a site supervisor and faculty supervisor for the work performed.
- All parties—student, faculty member, and site supervisor—should discuss and set expectations regarding the hours worked and performance feedback before the work begins. All parties must sign the internship proposal form.
- All additional requirements for employment (if any) should be identified prior to enrollment and an outline of how these will be met explained to the student intern.

Co-op

(numbered 494, variable 1-2 credits)

Participation in a full-time position at a host organization providing direct, on-the-job experience with professionals already successful in the selected field. The co-op will be in a position closely related to a professional career associated with the major. Students must complete at least two (2) co-op

credits during the fall or spring semester and one (1) credit in the summer to be considered full-time status. Course is repeatable for credit. No more than 6 credits may be used to meet requirements for a major and no more than 3 credits may be used to meet requirements for a minor; may vary by academic department.

Mode of Instruction

Blended

- Blended - A blended course is a course where the content is taught using face-to-face and online or “time-out-of-class” learning modes either synchronously or asynchronously. In accordance with HLC’s definition of distance-delivered courses, at least 75 percent of the instruction and interaction occurs via electronic communication, correspondence or equivalent mechanisms, with the faculty and students physically separated from each other.

Hybrid

- Hybrid - A hybrid course is a course where the content is taught using face-to-face and online or “time-out-of-class” learning modes either synchronously or asynchronously. Less than 75 percent of the instruction and interaction occurs via electronic communication, correspondence or equivalent mechanisms, with the faculty and students physically separated from each other.

In Person

- In Person - Faculty and students are scheduled in a particular classroom or laboratory during a set day/time. Class meetings are synchronous.

In Person w/lecture streaming

- In Person w/lecture streaming - Faculty and students are scheduled to meet synchronously in a particular classroom or laboratory during a set day/time. Class sessions can be attended in person or viewed live, and may be recorded and shared with all students for later access.

Interactive Video

- Interactive Video - Faculty and students are scheduled at a particular day/time at two or more campus sites and interactively use audio, computer and video connections to meet synchronously. Lectures are not recorded and shared.

Online

- Online - Online courses let students and faculty interact with each other as class members entirely over the Internet. Instructional courseware includes but is not limited to web pages, discussion groups and UWGB e-mail. Online courses do not meet at a particular time or place, but they are structured within the academic semester timeframe and require class participation several times each week. Online classes do not require synchronous meetings.

Virtual Classroom

- Virtual Classroom – Faculty and all enrolled students interact with each other as class members synchronously and entirely over the Internet during a set day/time. Faculty and students converse and interact with each other’s coursework while viewing each other in a real-time classroom, setting leveraging a tool like Blackboard Collaborate, Skype or WebEx.

Pass/No Credit Enrollment

- No letter grade or grade points are earned. Credits taken for pass/no credit grade option may not satisfy certain academic requirements and include:
 - general education courses
 - courses used to fulfill English Composition and Writing Emphasis (WE) requirements
 - major and minor courses except those offered as P-NC only (includes student teaching, some Social Work courses, Business Administration/Accounting internship, etc.)
 - honors in the major (478) projects
 - independent study (298, 498) courses
- P/NC grading option is requested using the **Change Grading Basis** form and must be approved by faculty instructor.
- P/NC grading option is not reversible after add/drop deadline for the respective course.¹ Electives may be taken on a P-NC basis.
- For pass-no credit, grades of A, AB, B, BC, or C, are designated “pass.” Grades of CD, D, F or WF are designated as NC or “no credit.” An NC does not affect grade point average, nor does it add to earned credits.
- Students considering applying for graduate or professional schools or transferring to another undergraduate campus should keep in mind that P-NC grading may have an adverse effect on admission. Graduate and professional schools generally prefer letter grades because such grades enable them to better judge potential for academic success.

- ¹ Add/Drop deadlines vary by length of course.
 Courses have an add period in which a new grading option can be requested and approved using the appropriate forms mentioned above.
 You can find your course dates on the Registration calendar (<http://www.uwgb.edu/registrar/calendar/registration/>) the deadline is based on the course length. If you are not able to find your information, please feel free to contact gboss@uwgb.edu.

Petition Process for Late Drop or Withdrawal

- Petitions (<https://www.uwgb.edu/registrar/forms-petitions/petitions-forms/>) can be submitted online or in person. All petitions with appropriate documentation will be evaluated and acted on in a timely manner by the Enrollment Review Committee.
- Petitions for late drops or withdrawals may be approved if one of these extenuating circumstances occurs and can be documented. The extenuating circumstance must occur within the semester the drop or withdrawal is being requested.
 - The student has serious mental or physical health problems verified by a statement from a physician or professional counselor.
 - There is a death or prolonged serious illness in the immediate family, verified by an obituary, a physician's statement, or other independent, official source.
 - The student receives orders being called to military service and cannot return for the semester. Supporting documentation is required.
- Petition to drop a course or completely withdraw from the University MUST be submitted prior to the last day of the semester that is being petitioned.

Posthumous Degrees and In Memoriam Degrees

In the unfortunate event that a student passes away before the completion of a degree, the University may award the student a degree posthumously. To be awarded a posthumous degree, the student must have completed 75% of the credits toward degree (45 for an Associate's Degree; 90 for a Bachelor's Degree; 22 for Master's Degree) and be in good academic standing (2.0 for undergraduate; 3.0 for graduate). The conferred degree is noted in the Student Information System and reported to external stakeholders.

Alternatively, the University may consider awarding an "In Memoriam Degree". This is an honorary degree, which is noted in the Student Information System but not reported to external stakeholders. There are no completion or academic standing requirements to award this honorary degree.

Project/Research Assistantship

(numbered 496, variable 1-6 credits)

- The student must prepare a research proposal, and both parties should identify the research arrangement and how the student will complete the work to fulfill the course objectives within the assigned term.

Regular and Substantive Interaction

UW-Green Bay is committed to offering courses that meet or exceed Department of Education Federal Regulations Vol. 85 No. 171 Part 600 (<https://nam10.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.govinfo.gov%2Fcontent%2Fpkg%2FFR-2020-09-02%2Fpdf%2F2020-18636.pdf&data=04%7C01%7C%7Cagrown%40uwgb.edu%7Ce758bf47a52e4b4c503208d88caf0a2b%7C7fc34f9d1f754f96b5b33cdcaab03aea%7C0%7C0%7C637414030712165209%7CUnknown%7CTWFpbGZsb3d8eyJWljojMC4wLjAwMDAiLCJQIjoiV2luMzliLCJBTiI6Ikl1haWwiLCJXVCi6Mn0%3D%7C1000&sdata=TahDeVJrtk52Cn4RifdK4Hlwi0x3TCNaC003FeNI7P0%3D&reserved=0>) regarding academic engagement and regular and substantive interaction between the faculty and students.

Academic Engagement

Active participation by a student in an instructional activity related to the student's course of study that— (1) Is defined by the institution in accordance with any applicable requirements of its State or accrediting agency; (2) Includes, but is not limited to— (i) Attending a synchronous class, lecture, recitation, or field or laboratory activity, physically or online, where there is an opportunity for interaction between the instructor and students; (ii) Submitting an academic assignment; (iii) Taking an assessment or an exam; (iv) Participating in an interactive tutorial, webinar, or other interactive computer-assisted instruction; (v) Participating in a study group, group project, or an online discussion that is assigned by the institution; or (vi) Interacting with an instructor about academic matters; and (3)

Does not include, for example— (i) Living in institutional housing; (ii) Participating in the institution's meal plan; (iii) Logging into an online class or tutorial without any further participation; or (iv) Participating in academic counseling or advisement.

Regular

Regular interaction requires that faculty provide both the opportunity for substantive interaction and the monitoring of student engagement and success in the course prior to submitting the final grade.

In each class, faculty are expected to provide regular interaction with the class in accordance with content and pedagogy. In most cases, regular interaction should occur weekly; exceptions to this institutional preference may include field placements, practicums, internships, or similar course work. Faculty should provide substantive interaction with each of their classes throughout the term.

Substantive

Substantive interaction in a course includes, but is not limited to, 1) Providing direct instruction through synchronous in-person or online meetings with students or asynchronous recordings of video or audio lectures; 2) Leveraging tools in our LMS or other institutional technology for class discussions, small group activities, and/or individual lessons or meetings; 3) Assessing or providing feedback on a student's coursework; and 4) Responding to student questions about the content of a course or competency in a timely manner.

Repeat Policy

Repeating a Course

Repeating Courses for Credit

Courses can be repeated for credit only if they are officially designated as repeatable due to the nature of the course content. Performance courses in Music, Studio Arts courses or courses designated with differing topics are examples.

Courses that have been repeated for credit are recorded on the student's transcript with the phrase *Course has been Repeated* after the course listing on the transcript.

Faculty members may not grant individual waivers for students to repeat a course for credit when the course is not already designated as repeatable in the college catalog. Creating a repeatable course can be accomplished via the course/curriculum change processes on an annual basis.

Repeating Courses to Improve a Grade

Courses can also be repeated to improve the grade received. If a course is repeated, the original attempt will still appear on the transcript with the grade earned. However, the grade received after the course is repeated will be used to determine the credit earned; attempted credits, grade points earned, and grade point average both for the term and cumulatively.

If a course is transferred in and then repeated at UW-Green Bay, the grade received when taken at UW-Green Bay will be used to determine the credits earned, attempted credits, grade points earned, and grade point average both for the term and cumulatively. The original transfer course and grade will no longer count toward degree requirements or total credits earned toward a degree. A course can only count once.

If a course is taken at UW-Green Bay, and then repeated at another institution and transferred to UW-Green Bay, the credits earned and grade received for the course taken at UW-Green Bay is still used to calculate the cumulative GPA, cumulative attempted credits, grade points earned and grade point average. The transfer course grade can, however be used to satisfy degree or course prerequisite requirements but the credits earned will not count toward the credits required for a degree.

The University does not guarantee the right to retake any course. Courses may be deactivated, discontinued, or offered on a different schedule.

Based on federal regulations which went into effect July 1, 2011, some repeat coursework may be excluded when evaluating a student's credit load as it relates to federal and/or state financial aid eligibility. If not designated as a repeatable course, students may have aid reduced. In general, for financial aid purposes, students are allowed to repeat a course for which a passing grade was previously received **ONE** additional time, with financial aid eligibility. Students may repeat the course after that, but those attempts would not be eligible for funding by federal or state financial aid programs.

Retroactive Credit

Degree seeking students who enter the university with advanced preparation in Calculus, Music Keyboard Musicianship or German, French or Spanish, may receive retroactive credit as indicated below.

Institutional Policy Regarding the Awarding of Retroactive Credit:

- Only degree seeking students who have been admitted to UW-Green Bay are eligible to receive retroactive credit. (The only exception is for high school students enrolled in UW-Green Bay Modern Language courses.)
- Retroactive credits are granted toward a UW-Green Bay degree; policies of other colleges would determine whether they would accept these Retroactive credits for transfer into their program, college or university.
- All credit awarded through retroactive credit options must equate to a specific UWGB course or courses. Credit cannot be awarded as general elective credit.
- Credit cannot be awarded for a course that already appears on a student's transcript.
- Retroactive credit awarded may not be used for grade point average calculation and does not count as credits in residence for the purposes of honors or degree program requirements.

- To receive credit a student must comply with all institutional policies and procedures relating to the awarding of retroactive credit.
- Courses will be recorded on the student's transcript as retroactive credit. The awarding of retroactive credit is limited to the specific courses listed below.

French, German, Spanish or other World Languages offered at UW-Green Bay

Degree seeking students may earn up to 14 credits as identified below for their previous world language study in French, German, Spanish, or other world languages offered at UW-Green Bay by completing courses beyond the 101 level. With a grade of "B" or better, credit will be given for all world language courses preceding the one in which the student has enrolled (of the eligible courses listed below), to a maximum of 14 credits. With a grade of "BC" or "C," half credit will be given for the courses preceding the one in which the student has enrolled, to a maximum of seven credits.

For example, with four years of high school Spanish, students who complete SPANISH 225, with a grade of "B" will receive 14 retroactive credits for SPANISH 101, SPANISH 102, SPANISH 201, and SPANISH 202 in addition to the three earned credits for SPANISH 225; students who complete the course with a "C" will receive seven retroactive credits for SPANISH 101 (2 of the total 4 credits), SPANISH 102 (2 of the total 4 credits), SPANISH 201 (1.5 of the total 3 credits), and SPANISH 202 (1.5 of the total 3 credits).

Students with previous world language knowledge should select appropriate courses by either (1) counting a year of high school work as roughly equivalent to a semester of college work; or (2) taking the UW System World Language Placement Test. If a student has studied Spanish for three years in high school, he or she should probably enroll in the fourth course in college (i.e., SPANISH 202), but might also consider 201; or (3) discussing their world language with a language advisor in the case of heritage learners. If more than two years have elapsed since the last language study, students should consult with a language faculty program coordinator to determine proper placement.

To determine if a student meets the above criteria for retroactive credit, the Registrar's Office will review the official posted grade rosters and where appropriate, the courses and corresponding credits will then be recorded on the student's transcript.

High school students enrolled in UW-Green Bay Modern Language courses are eligible to earn retroactive credits. This is the only retroactive credit option available to CCIHS, ECCP, or high school special program students.

Retroactive credit will not be awarded based on a student's performance on any sort of test. This includes, but is not limited to, AP, CLEP, or Challenge exams. Retroactive world language credits may **only** be earned by satisfactorily passing a course at UW-Green Bay or through an approved CCIHS program as described above.

Retroactive credits earned at any UW System institution or from Saint Norbert College courses will be honored and granted to transfer students.

Retroactive world language credits awarded by other institutions will not be granted to students who transfer to UW-Green Bay. Students may request an exception to this policy by submitting a written appeal to the language coordinator of the department they wish to receive credit from.

Math (Calculus and Analytic Geometry II (MATH 203))

Students coming with a background in Calculus can be placed in MATH 203 and may receive retroactive credit for MATH 202. If a student receives a grade of "C" or better then retroactive credit can be awarded for MATH 202. Credits for calculus at UW-Green Bay may also be awarded for satisfactory performance on an AP exam. More details are available here ([https://www.uwgb.edu/otsa/credit-for-prior-learning/advanced-placement-\(ap\)-program/](https://www.uwgb.edu/otsa/credit-for-prior-learning/advanced-placement-(ap)-program/)).

Retroactive credit for MATH 202 is not awarded to students who transfer to UW-Green Bay and have completed coursework deemed to be equivalent to MATH 203. If the student completes MATH 209 or MATH 305 at UW-Green Bay, they may submit an approved Retroactive Credit Form to the Registrar's Office to be awarded credit for MATH 202 only.

Music Keyboard Musicianship

Students successfully completing MUS APP 21, MUS APP 31, or MUS APP 41 may be eligible to receive retroactive credit for preceding courses in this sequence.

In order to receive retroactive credit for one or more Keyboard Musicianship courses a student is required to earn a grade of "BC" or better; courses taken on a Pass/No Credit basis will not be eligible for retroactive credit. Retroactive credit will be given in Keyboard Musicianship for all of the courses in the sequence preceding the one in which the student has enrolled, to a maximum of 3 credits.

To determine eligibility for retroactive credit students must consult with a member of the Music faculty who will advise them regarding which Keyboard Musicianship course they should take. If a student meets the criteria above, the instructor must complete the Retroactive Credit Form and submit it to the Registrar's Office. The appropriate courses and corresponding credits will then be recorded on the student's transcript.

The awarding of retroactive credit for Keyboard Musicianship courses began in fall 2012.

Transfer students who have completed coursework deemed to be equivalent to any of the classes listed above must meet with a member of the Music faculty to determine if they are eligible for retroactive credit.

Student

The University of Wisconsin-Green Bay defines a student as any individual who is currently enrolled, or was enrolled, in a credit bearing course at the University of Wisconsin-Green Bay.

Teaching Assistantship

(numbered 495, 1-6 credits)

- The student and supervising teacher must prepare a statement that identifies the course with which the assistantship will happen, objectives for the assistantship, and expectations in order to fulfill the course objectives.
- Students are not eligible to receive credit in both the course they assist the instructor with and the teaching assistantship in the same semester. Typically student has previously taken the course prior to enrollment in the assistantship.

Transfer Credit Policy

It is the policy of UW-Green Bay to accept transfer credits in full compliance with the UW System Board of Regents Transfer Credit Policy (<https://www.wisconsin.edu/transfer/uw-transfer-policy/>). Some of the basic components of that policy are:

1. The college or university attended must be accredited by an appropriate accreditation association.
2. All courses from a baccalaureate granting institution that is not regionally accredited may be eligible for transfer review by an appropriate UW-Green Bay department chair, or if an equivalent department is nonexistent, by an appropriate UW-Green Bay academic dean.
3. Whenever possible, transfer courses are equated to UW-Green Bay course numbers for equivalent courses. If there is an equivalent department, but not equivalent course, elective credit associated with the department will be granted. In such instances, the UW-Green Bay department will be consulted to make a determination whether the transfer elective might be counted toward the major or minor requirements.
4. Granting of academic credit is the responsibility of the faculty but this function is normally carried out by their designee.
5. A course designated as fulfilling a general education/breadth requirement at one UW institution should transfer as general education/breadth at the receiving UW institution. This principle should apply whether or not the receiving institution has a direct course equivalent.

After a student has been admitted as degree seeking, the Office of the Registrar will evaluate completed and in-progress coursework at the time of application. Upon receipt of a final transcript which includes final grades for courses previously in-progress, the credit evaluation will be completed. See more details in this section (<http://catalog.uwgb.edu/undergraduate/general-information/admissions/transfer-students/>).

Appeals

If you believe that there has been an error or oversight in your credit evaluation, please contact the Office of the Registrar (registrar@uwgb.edu) for assistance. In the event of an unresolved disagreement with the evaluation, you will be referred to the appropriate academic chairperson for a second review. You should be prepared to furnish a course syllabus or a letter of description from the previous institution if you wish to appeal the initial evaluation. If a satisfactory resolution cannot be reached after conferring with the chairperson, you may then appeal that decision to the appropriate academic dean. The decision of the academic dean shall be considered the final level of appeal.

Types of Credit

Attempted

Number of credits a student originally enrolled in a specific session or term before grades are awarded.

Degree Credits

Credits earned that count toward the 120 credits required for a bachelor's degree. Academic support courses do not count toward degree completion; they may have a credit value assigned and may be acceptable for enrollment verification.

Earned Credits

Number of credits (excluding audit credits) where a final grade and quality points have been awarded which are used to calculate grade point average for the term and cumulatively. Courses that are graded with a letter or passing grade are calculated in this total; temporary grades of I = Incomplete or N = Not yet graded, are excluded.

Withdrawal

Officially remove all courses from schedule; student is no longer enrolled.

Students may withdraw from all courses after the start of a term or session based upon the deadline dates noted below. Once a student drops to zero credits of enrollment, the Registrar's office withdraws the student from the semester. Please see the Bursar's Office website for information regarding withdrawal fees and refunds.

- Regular 14-week semester long courses or longer: Students who withdraw from all courses within the first 2 weeks of the session will not receive an academic grade. Students who withdraw from all courses within the third through twelve weeks will receive an academic grade of 'W'.
- Sessions less than 14 weeks: Students who withdraw from all courses within the first week of the session will not receive an academic grade. Students who withdraw from all courses within the second week through the first half (50%) of the session will receive an academic grade of 'W'.

After the Withdrawal Deadline has passed, a student may submit a Late Withdrawal Petition for review by the Enrollment Review Committee. Petitions are only approved for extenuating circumstances with supporting documentation. If a late withdrawal is granted, students remain responsible for the tuition and fees assessed for the course as they received instruction and held a seat in the course. Courses dropped through the Late Withdrawal Petition will receive an academic grade of 'W'.

- Regular 14-week semester long courses or longer: The Late Withdrawal Petition is required within the thirteenth week through the last day of classes.
- Sessions less than 14 weeks: The Late Withdrawal Petition is required during the second half (50%) of the session.

- ¹ A week is defined as 7 calendar days, beginning on the first day of a term or session, for the purposes of adds, drops or withdrawal deadlines.
- ² Tuition refunds and/or withdrawal fees vary by length of course and date of transaction. Please consult the Fee deadlines for the appropriate semester on the Student Billing website for more details (<https://www.uwgb.edu/student-billing/dates/term-deadlines/>). Please note that financial deadlines are different from academic deadlines.

Writing Emphasis Guidelines

In accord with the Purpose and Policies of the UW-Green Bay Writing Emphasis requirement, instructors of WE courses are not expected to teach writing skills but are expected to provide a series of writing assignments in accord with the guidelines below and to identify students with weak writing skills and assure that they get help from the Writing Center.

1. Students must complete three or more "public discourse" writing assignments as part of the course requirements. Public discourse assignments are written for an audience other than the writer. (Journals and diaries are excluded.) Typical public discourse assignments include--but are not limited to--research papers, essays, essay exams (in class or take home), lab reports, literature reviews, and others.
2. The three or more public discourse writing assignments must total a minimum of 2000 words (i.e., by the end of the semester each student must have turned in at least 8 to 10 pages of "public discourse" writing).
3. The public discourse assignments must count for a significant portion of the course grade. The intent of this guideline is to provide a strong incentive for students to take their writing assignments seriously. Writing assignments typically constitute 25%-33% of the final WE course grade.
4. The quality of the writing must be evaluated, not just the content. Organization and development of ideas, clarity of expression, coherence between sentences and paragraphs, and adherence to the conventions of written English are among the factors that instructors are expected to take into account in evaluating the public discourse assignments.
5. At least one public discourse assignment must be evaluated and returned to students during the first third of the course (i.e., before the end of the 4th week of a regular semester course). The intent of this guideline is to assure that students with weak writing skills are identified early enough in the semester to allow them to get help for their writing problems. Note that there is no required length for this assignment, nor is there a requirement that it count significantly towards the final grade. As long as other assignments in the course meet the other guidelines listed above, any writing assignment that provides the instructor with the opportunity to identify students with serious writing problems may be used to meet this guideline. Thus a typical first assignment might be a one or two page summary of--or reaction to--an assigned reading or a lecture, or a review of a film, or a preliminary description of the major paper the student proposes to write for the course, or a discussion of a problem related to the course that the student is interested in investigating, or a one-page answer to a study question.
6. Instructors of WE courses are required to notify students at the start of the semester that the course is a Writing Emphasis course and to strongly encourage students who need writing-skills help to use the services of the Writing Center. The syllabus should identify the course as a WE-approved course, describe the writing assignments in detail, and inform students that the Writing Center is the place to seek help with their writing skills.
7. Instructors of WE courses are expected to regularly evaluate the effectiveness of the writing assignments in helping students improve their writing skills and to make appropriate adjustments in those assignments in response to the evaluation results.

WE Required Assignments

- Three or more "public discourse" writing assignments must be included as part of the course requirements. "Public discourse" means the work is written for someone other than the writer. (Thus, journals and diaries are excluded.) These assignments may include in-class work including essay exams.
- These writing assignments must total a minimum of 2000 words.
- Writing assignments must constitute at least 25% of the grade for the course.

- One public discourse assignment must be evaluated and returned to the student before the end of the 4th week of class. (This is to allow students to seek help with their writing early in the course.)

Emergency and Parental Notification Policy

University of Wisconsin-Green Bay faculty, staff and administrators are regularly asked to balance the interests of safety and privacy for individual students. While the Family Educational Rights and Privacy Act (FERPA) generally requires UWGB to ask for written consent or proof that the student is a tax dependent of the parents [and then disclosure may only be made to the parent(s)] before disclosing a student's personally identifiable information, it also allows colleges and universities to take key steps to maintain campus safety. UWGB may disclose information to appropriate individuals (e.g., parents/guardians, spouses, housing staff, health care personnel, police, etc.) without the student's consent, where disclosure is in connection with a health or safety emergency and knowledge of such information is necessary to protect the health or safety of the student or other individuals. Disclosures are also allowed among university employees where there is a "need to know," such as conducting transactions or sharing updates between departments with whom the student interacts.

Health or Safety Emergency

In an emergency, FERPA permits UWGB officials to disclose, without student consent, education records which may include personally identifiable information from those records, to protect the health or safety of students or other individuals. At such times, records and information may be released to appropriate parties such as law enforcement officials, public health officials, and trained medical personnel. This exception to FERPA's general consent rule does not allow for a blanket release of personally identifiable information from a student's educational records. In addition, the Department of Education interprets FERPA to permit institutions to disclose information from education records to parents if a health or safety emergency involves their son or daughter.

Disciplinary Records

While student disciplinary records are protected as education records under FERPA, there are certain circumstances in which disciplinary records may be disclosed without the student's consent. UWGB may disclose to an alleged victim of any crime of violence or non-forcible sex offense, if requested in writing, the final results of a disciplinary proceeding conducted by the institution against the alleged perpetrator of that crime, regardless of whether the institution concluded a violation was committed. UWGB may disclose to anyone — not just the victim — the final results of a disciplinary proceeding, if it determines that the student is an alleged perpetrator of a crime of violence or non-forcible sex offense, and with respect to the allegation made against him or her, the student has committed a violation of the UWGB's rules or policies.

Annual Security Report

The University of Wisconsin-Green Bay's annual security report includes statistics for the previous three years concerning reported crimes that occurred on campus; in certain off-campus buildings or property owned or controlled by UW-Green Bay; and on public property within, or immediately adjacent to and accessible from, the campus. This report also includes institutional policies concerning campus security, such as policies concerning sexual assault, and other matters. Fire safety statistics for student housing are included. You can obtain a copy of this report by contacting the Office of Public Safety or by accessing the following website: <http://www.uwgb.edu/public-safety/clery/annual-security-and-fire-safety-report/>

Law Enforcement Unit Records

Police investigative reports created and maintained by UWGB Police and Public Safety are not considered education records subject to FERPA. Accordingly, UWGB may disclose information from law enforcement unit records to anyone, including outside law enforcement authorities, without student consent, and once an investigation is complete.

Disclosure to Parents

When a student enters UWGB, including those less than 18 years of age, all rights afforded to parents under FERPA will transfer to the student. However, FERPA also provides ways in which UWGB may share information with parents without the student's consent. For example:

- UWGB may disclose education records to parents if the student is a dependent for income tax purposes. Parents must provide tax returns or other information sufficient to show dependency for tax purposes.
- UWGB may disclose education records to parents if a health or safety concern involves their son or daughter.
- UWGB may inform parents if the student who is under age 21 has violated any law or its policy concerning the use or possession of alcohol or a controlled substance.
- A UWGB official may generally share with a parent, information that is based on that official's personal knowledge or observation of the student (e.g., a faculty or staff member's observation of a student's behavior).

FERPA and Student Health Information

The UWGB Counseling and Health Center may share student medical treatment records with parents and/or others under the health and safety circumstances described above. These records may otherwise be protected by other federal and state medical records privacy laws and can only be shared once a medical release form is signed by the student.

FERPA and Student and Exchange Visitor Information System (SEVIS)

FERPA permits UWGB to comply with information requests from the Department of Homeland Security (DHS) and its Immigration and Customs Enforcement Bureau (ICE) in order to comply with the requirements of SEVIS.

Transfer of Education Records

Finally, FERPA permits UWGB officials to disclose any and all education records, including disciplinary records, to another institution at which the student, seeks or intends to enroll or is currently enrolled.

Contact Information

For further information about FERPA, please contact the UWGB FERPA website at <http://www.uwgb.edu/ferpa/>.

More information regarding FERPA can be obtained from the:

Family Policy Compliance Office -
U.S. Department of Education
400 Maryland Ave. S.W.
Washington, DC 20202-5920
202-260-3887
<http://www.ed.gov/policy/gen/guid/fpco/>

Tuition and Fees

Costs

Fees and tuition are subject to change by action of the University of Wisconsin System Board of Regents and the Wisconsin Legislature. The actual costs for each academic year are available through Student Billing. Consult the Student Billing website at <https://www.uwgb.edu/student-billing/>.

Residency

A student's resident classification is made during the admission process. The determination is fully explained, as is some reciprocity and tuition programs, on the Registrar website (<http://www.uwgb.edu/registrar/residency/>).

If you have further questions or want additional information please contact the Residency Examiner at (920) 465-2725 or registrar@uwgb.edu.

Non-Resident Tuition Waivers

Non-resident tuition waivers are available on a competitive basis for students with a record of high academic achievement. Recipients of waivers remain responsible for Wisconsin resident tuition and fees.

Other Financial Aid

In addition to graduate assistantships, several other grant or aid programs are available. These include Perkins Loans, Stafford Loans, or University work/study awards. Students defined as minority group members may apply for Advanced Opportunity Grants or Wisconsin Indian Student Assistance Grants. For more information, contact the Financial Aid Office at (920) 465-2075.

Other Fee Related Policy Information

Tuition Appeals

- Students who wish to appeal institutional charges may do so via the tuition appeal process using the **Appeal Institutional Charges** form. The appeal institutional charges policy is also referenced, using this same link.
- Students must pay for completed coursework (i.e., grades that are earned and are part of the academic record). Students appealing institutional charges for coursework for which grades have already been earned must first complete a late drop/withdrawal appeal. Tuition appeals are not reviewed unless the grade earned has been removed.

University Testing Requirements

English/Writing and Mathematics Course Placement

In order to determine mathematics and English/Writing competency and appropriate course placement for students, the University uses the Wisconsin Mathematics Placement Test (WMPT) and the English portion of the American College Testing Program (ACT) or the Critical Reading (pre-2016 test) or Reading (post-2016 test) portion of the SAT.

The following students are required** to complete the WMPT and ACT or SAT requirement:

- all new freshmen;
- all transfers and re-entry students who have not satisfactorily completed a college-level course in Writing Foundations or mathematics;
- special students wishing to enroll in a Writing Foundations or mathematics courses;
- students wishing to be eligible for intercollegiate athletics (only the ACT is needed).

**UW-Green Bay does not require the ACT/SAT for Admissions purposes, but in order to enroll in a Writing Foundations course above WF 100, an ACT/ SAT score is needed.

ACT Registration

Potential students interested in taking the ACT test should visit the ACT website at <http://www.actstudent.org/>.

UW-Green Bay is not a test site location; please check the website for test center locations nearest to your community. **Be sure you indicate UW-Green Bay (code number 4688) as an institution to receive your score report.** Materials to help review and prepare for the ACT test may be purchased in the Phoenix Bookstore on campus and elsewhere. For more information, call ACT at (319) 337-1270.

English/Writing Placement

ACT English scores or SAT Critical Reading scores (pre-2016 test) or Reading scores (post-2016 test) are used to determine if a student has satisfied UW-Green Bay's English/Writing competency requirement. The following cut-off scores are used to place students in the most appropriate course based on their current level of English/Writing performance.

All international students whose country of origin's primary language is not English will be placed into WF 164, First Year Writing for International Students. This course satisfies UW-Green Bay's WF 100 requirement. The exception to this would be International students who have an ACT English score of 25 or above, or an SAT Critical Reading score of 590 or above, or an SAT Reading score of 32 or above. WF 105 or WF 200 may also be required by major.

ACT English score: 24 or lower

OR

SAT Critical Reading score: 580 or lower OR SAT Reading score: 31 or lower

The student should complete WF 100 by the end of their second semester at UW-Green Bay. Students referred to WF 100 who feel they have been improperly placed have an additional option: the College Level Examination Program (CLEP) College Composition. Registration for CLEP exams can be made through Testing Services at UW-Green Bay. A passing score on the College Composition exam will earn three degree credits.

ACT English score: 25-31

OR

SAT Critical Reading score: 590-740 OR SAT Reading score: 32-38

The student is eligible to enroll in WF 105 or WF 200. Students should complete WF 105 or WF 200 by the end of their third semester at UW-Green Bay. (Students majoring in programs in the Cofrin School of Business take WF 200 in place of WF 105.)

ACT English score: 32 or higher

OR

SAT Critical Reading score: 750 or higher OR SAT Reading score: 39 or higher

These scores satisfy UW-Green Bay's English/Writing competency requirement. These scores also satisfy the WF 105 requirement for some majors and minors.

If you do NOT have an ACT or SAT score, you will be placed into WF 100.

Math Placement

The Wisconsin Mathematics Placement Test (WMPT) serves as the primary instrument for determining both mathematics competency and appropriate course placement for new freshmen and transfer students who have not successfully completed a college-level mathematics course. Information on costs and testing dates are available from the Office of Testing Services.

Students must meet with an adviser to learn their WMPT score and course placement. New freshmen will be advised at the time of their GBO registration session. Continuing, re-entry and transfer students should seek assistance from the Academic Advising Office.

Students classified as new freshmen who do not complete the WMPT will not be allowed to register for mathematics classes, or for courses with college-level mathematics as a prerequisite, during their first semester.

Students must complete the UW-Green Bay Mathematics Competency before the completion of 60 earned and in progress credits. Students who have not taken the WMPT and have not satisfactorily completed or transferred in a college-level mathematics course must enroll in MATH 94, MATH 99, PSYCH 205, BUS ADM 220, or MATH 100 depending on academic program. Students should consult with their advisor to determine the appropriate course.

Assessment of the Major Program

All students are required to participate in the assessment of their major program of study. The assessment may take the form of a comprehensive exam, in-course assignment, portfolio, survey, interview, or any other specified means of evaluating the quality and effectiveness of the academic program.

Official University Calendars

Official University Calendars

- **Academic Calendar:** Official calendar of activity for the school year (term dates, registration dates, breaks and holidays, etc.)
- **Administrative Calendar:** Calendar relating to curricular change, timetable, and personnel evaluations
- **Registration Calendars (Fall/January/Spring/Summer):** Calendar of specific registration/academic action deadlines (add/drop/withdrawals, late registration, and fee implications of selected academic actions)
- **Final Exam Calendar:** Final exam schedule for the semester in session

Austin E. Cofrin School of Business

Mission Statement

The Austin E. Cofrin School of Business is a community of teachers, scholars, professionals, and learners dedicated to advancing the economic prosperity and entrepreneurial spirit of northeastern Wisconsin through partnerships, quality educational programs, and impactful research.

We achieve this mission through the following actions:

- Addressing the educational imperative to increase access to, and completion of, quality baccalaureate and masters-level business degrees within UW-Green Bay's 16 county footprint in northeastern Wisconsin.
- Intentionally seek a student body representative of the diverse, multicultural communities of NE Wisconsin that UW-Green Bay serves as a public regional comprehensive university.
- Providing transformative undergraduate and graduate business degree programs that emphasize the use of high impact practices to prepare learners to ethically and critically address complex issues and deliver innovative socially responsible solutions.
- To instill in our learners a philosophy that the positive power of business drives economic, social, and environmental progress.
- Recognizing our role as an anchor institution, to develop and sustain meaningful partnerships that facilitate the exchange of knowledge and resources with key stakeholders, including students, alumni, faculty, businesses, and other organizations and individuals that comprise our community.

- Building a diverse community of professionals who continually seek to enhance their core proficiencies through professional development and reflective practice, and a faculty who participate in high quality and impactful scholarship that incorporates discovery, application, and teaching and learning.

Values Statement

In pursuit of service to our students and community, the Austin E. Cofrin School of Business stresses core values in:

- **Community engagement:** a recognition of our responsibility to act as an anchor institution and through open dialog and partnership create shared opportunities and broad benefits across Northeastern Wisconsin.
- **Leadership:** a commitment that inclusivity, team-work, and interdisciplinary study enhance our ability to think creatively, act ethically, practice informed decision-making, and lead change.
- **Innovation:** a shared belief that reflection and calculated experimentation leads to a problem-solving mindset and continual progress in teaching, scholarship, and business evolution.
- **Sustainability:** a recognition of the power and responsibility of business to innovate sustainable social, environmental, and economic practices.

Majors

- Accounting (p. 59) (Accelerated, General)
- Business Administration (p. 94) (Business Analytics, Entrepreneurship, General Business, Supply Chain Management)
- Economics (p. 141)
- Finance (p. 182)
- Human Resources Management (p. 231)
- Management (p. 251)
- Marketing (p. 252)

Minors

- Digital Marketing and Sales Management (p. 364)
- Entrepreneurship (p. 365)
- Environmental Sustainability and Business (p. 366)
- Marketing Analytics (p. 369)
- Supply Chain Management (p. 374)

College of Arts, Humanities and Social Sciences

The College of Arts, Humanities, and Social Sciences offers over thirty undergraduate majors and minors in the visual and performing arts, humanities, communication, writing, computer and information sciences, and social sciences. Our faculty takes pride in their engagement with students through traditional, online, and blended delivery methods. We create unique communities of learners that engage critically and creatively around issues, problems, and solutions. In addition, the College supports community engagement through arts and culture programming, speaker series, outreach events, and community-based research. Central to our mission is the promotion of problem-based, engaged learning through close relationships with our students to ensure successful, fulfilling careers and lives. The College of Arts, Humanities and Social Sciences develops students who:

- Are critical and creative thinkers
- Engage in high impact, hands-on learning experiences
- Learn in a diverse and inclusive environment in order to enable success and understand a global, multicultural world
- Develop an understanding of civic and global citizenship and promote this through our community connections
- Can adapt to change and promote improvement

Majors and Minors

- Art (p. 63) (Art Education, Pre-Art Therapy, Studio Art, Art History)
- Communication (p. 114) (Health Communication, Journalism, Mass Media, Organizational Communication, Public Relations, Social Media Communication, Sports Communication)
- Criminal Justice (p. 128)
- Dance (p. 345)
- Democracy and Justice Studies (p. 129) (American Studies, Criminal Justice, Legal Studies, U.S. and the World, Women's and Gender Studies)
- Design Arts (p. 138)
- English (p. 157) (Creative Writing, English Education, Literature)
- Environmental Policy and Planning (p. 167) (Regional Planning & Environmental Design, Environmental Planning, Environmental Policy (Accelerated) / Integrated with graduate Environmental Science & Policy program)
- First Nation Studies (p. 184)
- French and Francophone Studies (p. 188)
- Geography (p. 190)
- German (p. 197)
- Global Studies (p. 202)
- History (p. 206)
- Humanities (p. 232) (Ancient and Medieval Studies, Digital and Public Humanities, World Cultures, Environmental Humanities, Film and Cinema Studies, Humanities Online, Linguistics/Teaching English as a Second Language, Religious Studies)
- Individual Major (p. 246)
- Information Technology and Data Science (p. 246) (Data Science, Game Studies, Information Technology)
- International Business (p. 250)
- Music (p. 268) (Music Education, Instrumental Performance, Vocal Performance, Audio Production, Composition, Individual Studies, Jazz Studies)
- Organizational Leadership (p. 298) (Applied Communication, Business Administration, Early Childhood, Emergency Management, Environmental Policy & Planning, Management in Health Systems, Public and Nonprofit Management, Self-Directed)
- Philosophy (p. 306)
- Political Science (p. 310)
- Psychology (p. 313)
- Public Administration (p. 317) (Emergency Management, Public and Nonprofit Management)
- Sociology (p. 330)
- Spanish and Latin American Studies (p. 331)
- Theatre (p. 338) (Design/Technical, Musical Theatre, Performance, Theatre Studies)
- Urban Studies (p. 350)
- Women's and Gender Studies (p. 358)
- Writing and Applied Arts (p. 360)

Certificates

- Data Analytics (p. 364)
- Emergency Management (p. 365)
- Environmental Sustainability and Business (p. 366)
- Lesbian, Gay, Bisexual, Transgender, and Queer Studies (p. 368)
- Nonprofit Management (p. 370)
- Professional Ethics (p. 372)
- Spanish/English Translation and Interpretation (p. 374)
- Teaching English as a Second Language (p. 374)

College of Health, Education and Social Welfare

The College of Health, Education, and Social Welfare (CHESW) offers educational programs that are transforming in terms of developing a broader worldview, gaining new knowledge and skills, and preparing for a chosen profession. Through field experience in degree programs, students are offered the opportunity to connect within communities. Graduates contribute to the greater good of communities as teachers, nurses, social workers, health information specialists, innovators, and leaders. CHESW programs include:

- The Professional Program in Education (<http://www.uwgb.edu/education/>) offers a Bachelor of Science in Education with specialization options ranging from teaching Early Childhood to Adolescence. Each student completes student teaching providing hands-on learning on how to be an effective leader in the classroom. A graduate program, Master of Science in Applied Leadership in Teaching and Learning, and several dual listed courses (for both undergraduate and graduate credit) are available.
- The Nursing and Health Studies Unit (<http://www.uwgb.edu/nursing/>) provides a range of online and face-to-face program options to acquire a Bachelor of Science in Nursing or Bachelor of Health Information Management and Technology. It also offers graduate degrees: Master of Science in Nursing Leadership and Management and Master of Science in Health and Wellness Management, as well as certificates in health-related areas (Management in Health Systems and Nursing Leadership). Students complete relevant practicum experiences in degree programs. Dual listed courses (for both undergraduate/graduate credit) are available.
- The Professional Programs in Social Work (<http://www.uwgb.edu/socwork/>) offers both a bachelor's degree in Social Work and a Master of Social Work (MSW) degree. Students complete field practicums for both degrees, providing hands-on learning in a variety of social service fields. The MSW Program also offers a school social work certificate for current and post-MSW students.

For further information about CHESW, go to <https://www.uwgb.edu/chesw/>

Majors and Minors

- Community Health Education (p. 121)
- Education (p. 143)
- Health Information Management and Technology (p. 204) (Healthcare Management, Healthcare Technology)
- Nursing (p. 285)
- Social Work (p. 322) (Child Welfare, General, Substance Abuse)

Certificates

- Health Information Management (p. 367)
- Management in Health Systems (p. 369)
- Physical Education (p. 371)

College of Science, Engineering and Technology

The College of Science, Engineering and Technology offers a diverse array of majors and minors through the departments of Human Biology, Natural and Applied Sciences, and the Richard J. Resch School of Engineering. These include human biology, biology, chemistry, environmental science, geoscience, physics, water science, computer science, mathematics and statistics, environmental engineering technology, electrical engineering technology, mechanical engineering technology, mechanical engineering, as well as a **new major in electrical engineering**. Faculty in the College are accomplished teachers and scholars who provide high quality instruction and hands-on teaching and research experiences to students in laboratory and field settings. The College has consistently obtained funding from local, state, and federal sources to support on-campus and community-based research projects that actively engage undergraduate students. The College also supports two seminar series (Human Biology and Natural and Applied Sciences) and several student organizations, while also providing numerous named scholarships for students. The state-of-the-art laboratory and research facilities include the Brown County STEM Innovation Center that houses the mechanical engineering and mechanical engineering technology programs, a human cadaver lab, an instrumentation laboratory, a scanning electron microscope, and numerous other research labs. A \$5.7 million renovation project was completed in 2022 and houses the electrical engineering and electrical engineering technology programs, as well as a new physics laboratory. In addition to the laboratory and research facilities associated with Human Biology, Natural and Applied Sciences, and the Resch School of Engineering, the College also includes the Cofrin Center for Biodiversity and the Environmental Management and Business Institute (EMBI), which both provide research and internship opportunities. The College also has a partnership with the Medical College of Wisconsin-St. Norbert Campus, with faculty in Human Biology providing instruction to Medical College of Wisconsin students.

Students in the College of Science, Engineering and Technology will have the opportunity to:

- Gain important knowledge and skills pertinent to their chosen field of study.
- Develop critical thinking, problem solving, and communication skills.
- Engage in hands-on teaching and research experiences.
- Utilize modern laboratories and equipment.
- Learn in an interdisciplinary environment that promotes diversity, equity, and inclusion.
- Become a complete student and citizen by participating in internships, co-ops, travel courses, student organizations, and other extracurricular activities.
- Fully prepare themselves for their next professional ambition – whether it be employment, further credentialing, or graduate/clinical education.

Majors and Minors

- Biology (p. 71) (Animal Biology, Aquaculture, Aquatic Ecology and Fisheries, Biology for Educators, Cell/Molecular, Ecology and Conservation, Microbiology, Pre-Veterinary)
- Chemistry (p. 102) (General, ACS Chemistry, ACS Environmental Chemistry)
- Computer Science (p. 124) (Information Assurance and Security, Software Engineering)
- Electrical Engineering (p. 149)
- Electrical Engineering Technology (p. 153)
- Environmental Engineering Technology (p. 164)
- Environmental Science (p. 175)
- Geoscience (p. 191)
- Human Biology (p. 211) (General, Health Science, Exercise Science, Cytotechnology, Nutritional Sciences/Dietetics)
- Mathematics and Statistics (p. 254)
- Mechanical Engineering (p. 260)
- Mechanical Engineering Technology (p. 264)
- Physics (p. 309)
- Sustainability (p. 337)
- Water Science (p. 353)

Certificates

- Electrical Engineering Principles (p. 365)
- Environmental Sustainability and Business (p. 366)
- Mechanical Engineering Principles (p. 370)

Undergraduate Degree Components

- General Education Program (p. 37)
- Writing Emphasis (p. 52)
- Writing Competency (p. 52)
- Math Competency (p. 51)
- Capstone Requirement (p. 35)
- Graduation Requirements (p. 49)

Capstone Requirement

Capstone - complete one course

- *Capstone courses are taken in the last semester as part of the Bachelor degree completion requirements at UW Green Bay. The capstone course is not waived for students entering with an earned block of credit, articulation agreement or for earning a prior degree.*
- *Honors in the Major courses approved as Capstone courses have additional requirements to enroll into the course, once the course is completed, additional review is done to award Distinction in the Major Honors when a degree is conferred.*

Learning Outcomes

- This could be either a classroom seminar experience or another integrative/culminating experience such as an internship/field experience/honors project that again addresses the campus' interdisciplinary perspective and also has a problem focus. By its very nature, the experience will also have an important communication element. They will all address:
 - Interdisciplinarity
 - Problem-focused
 - Communication

General Education Program

Courses that are listed in two or more general education designations will only count in one requirement area. (e.g., ANTHRO 100 is listed as being approved as Global Culture (GC) and Social Sciences (SOC), however it will only count once, as GC or SOC. If questions contact gboss@uwgb.edu

Purpose

The UWGB General Education Program supports the University's Select Mission by providing an interdisciplinary, problem-focused educational experience that prepares students to think critically and address complex issues in a multicultural and evolving world.

To that end, the UWGB General Education Program will help to develop liberally educated students and facilitate their living in an ever changing world by:

1. Introducing students to interdisciplinary education;
2. Providing knowledge that includes disciplinary breadth;
3. Working with students to develop an understanding of critical social problems;
4. Supporting the development of important academic skills including communication, critical thinking, problem solving and quantitative and information literacy.

The general education program gives students an opportunity to strengthen academic skills, broaden intellectual horizons, develop and explore new academic interests, reflect on personal values, and build a foundation of knowledge for future course work and lifelong learning.

General Education Requirements ¹

All students must complete the general education requirements. Depending upon the courses chosen, as well as the need to reach competency in mathematics and writing, students may take between 36-43 general education credits and additional math or writing credits if needed to meet competency or major requirements. Courses taken to fulfill general education requirements may also be used simultaneously to fulfill requirements in the major, minor or certificate programs.

Transfer students who enter UW-Green Bay with 15 or more transfer credits are not required to take a First Year Seminar. However, in order to meet the 36-43 credit general education requirement, they must substitute the First Year Seminar with another course in general education that is a minimum of 3 credits.

First Year Seminar

(complete 3 credits)

Learning Outcomes

- This class provides an “on ramp” to the University and its interdisciplinary mission. It is a content-based class that incorporates communication skills (written and oral) as part of the learning pedagogy. While the content of these courses will vary, they must all address at an introductory level:
 - Interdisciplinarity
 - Communication
 - Information Literacy

Code	Title	Credits

Graduation Requirements

- AAS Degree (p. 49)
- Bachelor Degree (p. 51)

Associate of Arts & Sciences Degree

Minimum Requirements

Degree Credits

60 degree credits

Grade Point Average

Students must have a cumulative 2.0 grade point average on UW-Green Bay courses

General Education

36 credits of breadth (see General Education Program) (p. 37)

Writing Competency

0-6 credits (see Writing Competency) (p. 52)

Math Competency

0-3 credits (see Math Competency) (p. 51)

Writing Emphasis Requirement: 2 courses

All students must complete two Writing Emphasis courses. Courses taken to fulfill the Writing Emphasis may also be used, simultaneously, to fulfill any other requirements. (see Writing Emphasis) (p. 52)

Area of Study

12 credits defined by an academic adviser (see Area of Study) (p. 50)

Lab Science

At least one science course must be completed with a laboratory (see Laboratory Science) (p. 50)

Residency

15 credits minimum must be earned at UW-Green Bay

AAS candidates are not eligible for graduation honors

Students should contact the Academic Advising Office (<http://www.uwgb.edu/advising/>) as early as possible for assistance in planning their programs to assure that all degree requirements are fulfilled.

Area of Study

Students earning the AAS degree must complete one 12 credit Area of Study:

- Business:** Any 12 credits of ACCTG, BUS ADM, ECON, FIN, HRM, MKTG, MGMT, and/or SCM.
- Music and Performing Arts:** Any 12 credits of MUSIC, MUS APP, MUS ENS, or THEATRE
- Fine Arts:** Any 12 credits of ART, ARTS MGT, or DESIGN
- Natural Sciences:** Any 12 credits of BIOLOGY, CHEM, GEOSCI, ENV SCI, or PHYSICS
- Human Biology:** Any 12 credits of BIOLOGY, CHEM, HUM BIOL, or ENV SCI
- Social Sciences** (Individual focus within social sciences): Any 12 credits of ANTHRO, COMM SCI, EDUC 206, PSYCH, SOC WORK 250, SOCIOL, or WOST (Note: Only these specific Education and Social Work courses have been approved)
- Community Sciences** (community focus within social sciences): Any 12 credits of ANTHRO, COMM SCI, ECON, GEOG, HISTORY, POL SCI, PU EN AF, DJS, SOCIOL or UR RE ST
- Humanities:** Any 12 credits of ENGLISH, FNS, HISTORY, HUM STUD, PHILOS, or foreign language (The foreign language credits should not include credits given retroactively)
- Computing and Information Sciences:** Any 12 credits of COMP SCI or INFO SCI
- Communication:** Any 12 credits of COMM
- Individualized Area of Emphasis:** Any 12 credits of coursework reflecting a specific area of interest or study, chosen by the student, and approved by an advisor.

Laboratory Science Requirement

Students seeking an Associates of Arts & Sciences degree (AAS) must complete at least one science laboratory course.

Code	Title	Credits
BIOLOGY 202	Principles of Biology Lab: Cellular and Molecular Processes	1
BIOLOGY 204	Principles of Biology Lab: Organisms, Ecology, and Evolution	1
BIOLOGY 469	Conservation Biology	4
CHEM 106	Survey of General Chemistry Lab	1
CHEM 107	Survey of Organic and Biochemistry Lab	1
CHEM 109	Survey of General, Organic, and Biochemistry Laboratory	1
CHEM 213	Principles of Chemistry I Laboratory	1
ENV SCI 103	Introduction to Environmental Sciences Lab	1
ET 206	Chemistry for Engineers	4
GEOSCI 202	Physical Geology	4
GEOSCI 223	Ocean of Air: Weather and Climate Laboratory	1
PHYSICS 103	Fundamentals of Physics I	5
PHYSICS 142	Observational Astronomy	1
PHYSICS 201	Principles of Physics I	5
PU EN AF 103	Environment and Society Lab	1
WATER 202	Introduction to Water Science Laboratory	1

Bachelor Degree

Minimum Requirements

Degree Credits

120 degree credits

Grade Point Average

Students must have a cumulative 2.0 grade point average on UW-Green Bay courses and a 2.0 grade point average for each major and/or minor. Certain majors, minors, and professional programs may have higher minimum grade point graduation requirements.

General Education

36 credits of breadth (see General Education Program) (p. 37)

Writing Competency

0-6 credits (see Writing Competency) (p. 52)

Math Competency

0-3 credits (see Math Competency) (p. 51)

Capstone

1 course (see Capstone Requirement) (p. 35)

Ethnic Studies

3 credits (UW System requirement satisfied by General Education, Ethnic Studies Perspective (p. 38) course)

Writing Emphasis Requirement: 4 courses

All students must complete four Writing Emphasis courses. At least two of these courses must be at the upper level. Courses taken to fulfill the Writing Emphasis may also be used, simultaneously, to fulfill any other requirements. (see Writing Emphasis) (p. 52)

Major

30 credits minimum

Residency

30 credits minimum must be earned at UW-Green Bay (see Degree Residency Requirement) (p. 16)

Additional Options

Minor

18 credits minimum

Certificate

12 credits minimum

Graduation Honors

(see All-University Academic Honors) (p. 11)

If there are any questions regarding multiple majors or earning a subsequent degree please contact the Registrar's office (registrar@uwgb.edu) for further information.

Math Competency

Students must complete the UW-Green Bay Mathematics Competency before the completion of 60 earned and in progress credits. Students who fail to complete the Mathematics Competency by this point will have any future enrollments cancelled until proof is submitted that the competency is completed. Students who have not taken the WMPT and have not satisfactorily completed or transferred in a college-level mathematics course must

enroll in MATH 94, MATH 100, BUS ADM 220, or PSYCH 205 depending on academic program. Students should consult with their advisor to determine the appropriate course.

see also University Testing Requirements (p. 30)

Writing Competency

WF 100 (or transferred equivalent) is required for students who earn a 24 or lower ACT English score or a 31 or lower SAT Reading score. Students should complete WF 100 by the end of their second semester at UWGB.

WF 105 or WF 200* (or transferred equivalent) is required unless students have earned a 32 or higher ACT English score or a 39 or higher SAT Reading score. Students should complete WF 105 or WF 200 by the end of their third semester at UWGB. The pre-requisite course for this requirement is WF 100 or equivalent.

* Students majoring in programs in the Cofrin School of Business take WF 200 in place of WF 105.

see also University Testing Requirements (p. 30)

Writing Emphasis

Writing Emphasis courses provide students with the opportunity to practice and improve their writing skills across the curriculum. Associate degree students must complete two writing emphasis courses. Bachelor degree students must complete four writing emphasis courses, at least two of these courses must be at the upper level. Courses taken to fulfill the Writing Emphasis (p. 27) may also be used, simultaneously, to fulfill any other requirements, including general education breadth requirements and requirements in the major, minor, or certificate programs.

Learning Outcomes for Writing Emphasis Courses

- Students will state important points and support them with illuminating details and examples.
- Students will demonstrate an ability to write in clear and lucid academic prose and to properly employ academic conventions (writing style, transitions, source integration, etc.).
- Students will demonstrate an advanced understanding of academic citation (if required by assignment).
- Students will demonstrate the ability to analyze logically and consistently and to draw meaningful implications.
- Students will demonstrate a clear and strong command of English grammar with regard to correctness, sentence structuring, and proper punctuation.

Majors and Minors

Students who declare two or more majors at the same time are granted only one baccalaureate degree and receive only one diploma upon graduation. If the majors declared have different degree designations, then the student must choose which degree they want to receive. All successfully completed majors are recorded on the student's academic transcript.

A

- Accounting (p. 59)
- Art (p. 63)

B

- Biology (p. 71)
- Business Administration (p. 94)

C

- Chemistry (p. 102)
- Communication (p. 114)
- Community Health Education (p. 121)
- Computer Science (p. 124)
- Criminal Justice (p. 128)

D

- Democracy and Justice Studies (p. 129)
- Design Arts (p. 138)

E

- Economics (p. 141)
- Education (p. 143)
- Electrical Engineering (p. 149)
- Electrical Engineering Technology (p. 153)
- English (p. 157)
- Environmental Engineering Technology (p. 164)
- Environmental Policy and Planning (p. 167)
- Environmental Science (p. 175)

F

- Finance (p. 182)
- First Nations Studies (p. 184)
- French and Francophone Studies (p. 188)

G

- Geography (p. 190)
- Geoscience (p. 191)
- German (p. 197)
- Global Studies (p. 202)

H

- Health Information Management and Technology (p. 204)
- History (p. 206)
- Human Biology (p. 211)
- Human Resource Management (p. 231)
- Humanities (p. 232)

I

- Individual Major (p. 246)
- Information Technology and Data Science (p. 246)
- International Business (p. 250)

M

- Management (p. 251)
- Marketing (p. 252)
- Mathematics & Statistics (p. 254)
- Mechanical Engineering (p. 260)
- Mechanical Engineering Technology (p. 264)
- Music (p. 268)

N

- Nursing (p. 285)

O

- Organizational Leadership (p. 298)

P

- Personal Financial Planning (p. 305)
- Philosophy (p. 306)
- Physics (p. 309)
- Political Science (p. 310)
- Psychology (p. 313)
- Public Administration (p. 317)

S

- Social Work (p. 322)
- Sociology & Anthropology (p. 330)
- Spanish and Latin American Studies (p. 331)
- Sustainability (p. 337)

T

- Theatre and Dance (p. 338)

U

- Urban Studies (p. 350)

W

- Water Science (p. 353)
- Women's, Gender, and Sexuality Studies (p. 358)
- Writing and Applied Arts (p. 360)

Accounting

(Bachelor of Business Administration)

Accounting at UW-Green Bay provides both in-depth knowledge and the broad business background necessary to understand the role of accounting in the business world.

Graduates are qualified to take professional accounting examinations, including the CPA* (Certified Public Accountant), CMA (Certified Management Accountant), and CIA (Certified Internal Auditing) examinations. Alumni surveys indicate that alumni perceive the Accounting program very favorably, their program of study prepared them extremely well for their careers, the quality of the Accounting faculty is "excellent," and they would recommend the program to others. The program provides considerable exposure to the liberal arts and develops the critical thinking, problem-solving, interpersonal, communication, quantitative, and computer skills needed by graduates to successfully serve as leaders within modern organizations. The program also addresses contemporary organizational issues, such as the role of accounting in continuous quality improvement, implementation of computer technology and advances in accounting information systems and accounting ethics..

Students who major in Accounting select either the General Emphasis or the Accelerated Emphasis. Both emphases offer a rigorous, problem-focused program comprised of three integrated elements: supporting, core, and major courses. The supporting and core courses provide breadth and introduce each student to the foundations of business knowledge, including communications, economics, statistics, computers, accounting, finance, management and marketing. The major courses provide depth and prepare each Accounting student thoroughly for a professional career. Students selecting the Accelerated Emphasis will complete nine credits of graduate-level classes that are geared toward students interested in the application of analytics in the accounting profession. The courses are offered to the students at the tuition for undergraduate courses and will apply toward their bachelor's degree. After completing the bachelor's degree (approximately 120 credits), students selecting the Accelerated Emphasis may complete the Master's Degree in Management by taking an additional 22 credits.

Accounting students have extensive opportunities to meet business professionals and gain practical experience. An active Accounting student organization supports these efforts and helps students to meet others with like interests. Faculty members encourage participation in the internship program, through which students learn and earn credits while working in real business settings. Each spring semester, the VITA (Volunteer Income Tax Assistance) program is offered for credit where students train using an IRS program and assist in tax return preparation for elderly and low income taxpayers from the community.

Entrance and Exit Requirements

Students can add an Accounting major or minor at any time with any number of credits through a simple online process. Students should contact their Professional Advisor listed under the Program Advisors on the right-hand side of SIS to start the process. Students will be required to read and accept an Honor Code (pre-declaration form). For students adding a major offered in the Cofrin School of Business, a faculty mentor who specializes in their program will be listed under their Program Advisors in SIS.

Students must maintain a cumulative GPA of 2.5 to proceed in the course progression for an Accounting major. Students intending to graduate with this major must have a minimum 2.5 cumulative grade point average. All students must meet this program exit requirement to graduate.

The accounting major prepares students to sit for a professional certification of the CPA, CMA or both. The certification exam process is rigorous and includes a proctored closed note exam. In order to prepare our students, this program uses proctoring software or may require proctors for certain online courses. Various proctors are acceptable including HR departments, local libraries and more. Details will be provided in specific courses.

*150 Credit-Hour Requirement for CPA License

Students should be aware that the state of Wisconsin requires 120 college credit hours to write the Uniform CPA Exam, while 150 college credit hours are required to become a licensed CPA. The UW-Green Bay Accounting program is designed so that students with Accounting majors will have several options to earn the credits required for the CPA exam and become licensed as a CPA. An Accounting advisor assists each student in determining which option best meets his or her interests.

Major Area of Emphasis (p. 61)

Students must complete requirements in one of the following areas of emphasis:

- General Emphasis
- Accelerated Emphasis - Integrated with graduate Management program

Minor

Code	Title	Credits
Foundation Courses		9-12
ACCTG 201	Principles of Financial Accounting	
ACCTG 202	Principles of Managerial Accounting	
ECON 202 or ECON 203	Macro Economic Analysis Micro Economic Analysis	
WF 200 or WF 105	Professional Writing for Business Majors ¹ Research and Rhetoric

³ BUS ADM 306, ACCTG 316, and ACCTG 415 are recommended to students planning to take the CPA exam.

Art

(Bachelor of Arts)

The visual arts are important components of human experience. They provide a means of articulating and understanding that experience through processes of seeing, making, and thinking in terms of visual systems. The major or minor in Art includes courses in studio art and art history, global cultures, and contemporary art.

Art facilities include well-equipped studios in painting, drawing, sculpture, ceramics, photography (traditional and digital), jewelry/metals, fibers/textiles, and printmaking. All Art students who complete ART 101 (Tools, Safety, and Materials) have access to a professional wood and metal-working laboratory managed by a staff person who provides training and technical assistance.

The Art program at the University of Wisconsin-Green Bay holds NASAD accreditation.

Studio art courses:

- present art making as a problem-solving process using creative methods combining intuition and imagination with critical analysis;
- provide knowledge necessary to master materials and techniques;
- provide a foundation for and continuing reference to the principles of visual organization and structure essential to works of art;
- foster a receptive attitude toward diverse forms of artistic production including fine art, applied art, and art produced outside the artistic mainstream.

Art history, global cultures, and contemporary art courses:

- provide a conceptual and philosophical context by investigating stylistic characteristics of specific periods and the dynamic relationship between art and society.

The Art discipline has three areas of emphasis:

- Studio Art can lead to professional practice as an artist or to related visual communication careers.
- Pre-Art Therapy is designed to prepare students for entry into graduate programs in professional mental health counseling, with specialization in Art Therapy.
- Art Education leads to credentials for teaching licensure from the Wisconsin Department of Public Instruction.

Art majors often combine their studies with a minor. Typical minors include Design Arts, Arts Management, Human Development, Business Administration, Women's and Gender Studies, and Humanistic Studies. The Art adviser can help select an appropriate minor depending upon students' individual goals.

Art majors who select a minor or double major in Design Arts are qualified to seek possible careers include graphic design, art direction, advertising, and other professional work in graphic communications.

Art majors who select a minor or a double major in Arts Management are qualified to seek careers in visual arts administration and art gallery management.

All areas prepare students for viable careers or for entry into graduate school programs. Students in Art should take as many and varied art courses as possible.

Students should seek faculty advising no later than the sophomore year in order to complete an Art major in a timely manner. Students seeking information on teacher certification should contact the Education Office. Students selecting the Pre-Art Therapy emphasis must complete a significant number of credits of Psychology and a Statistics course; we strongly recommend that those interested in this emphasis seek advising very early in their academic career.

Students in many fields find an Art minor an excellent supplement to their academic programs in the context of today's visually oriented, media-driven culture.

The Art minor may serve:

- individuals fulfilling a personal interest in art;
- those seeking to add visual skills to career preparations in such interdisciplinary fields as arts management, design arts, humanistic studies, urban and regional studies, and environmental planning;
- persons who intend it as a component of professional studies in fields such as education and business (advertising and marketing).

Active student organizations provide additional opportunities for art-related activities, as does a program of national and international visiting artists.

Major Area of Emphasis (p. 66)

Students must complete requirements in one of the following areas of emphasis:

- Art Education
- Pre-Art Therapy
- Studio Art

Minor Area of Emphasis (p. 70)

Students must complete requirements in one of the following areas of emphasis:

- Art History
- Studio Art

Curriculum Guide

An example: Four year plan for **Art Major with Studio Art Emphasis; Minor in Design Arts**

120 credits necessary to graduate.

Plan is a representation and categories of classes can be switched. Check with your advisor.

Art Major

Area of Emphasis

Students must complete requirements in one of the following areas of emphasis:

- Art Education
- Pre-Art Therapy
- Studio Art

Art Education

Art majors may complete an emphasis in Art Education leading to teacher licensure from the Wisconsin Department of Public Instruction. Only those requirements for coursework in Art are listed here. For additional information about admission to the teacher education program, consult the Education Office (www.uwgb.edu/education (<http://www.uwgb.edu/education/>)), or the Office of Academic Advising, or refer to the Education program description in this catalog. For advising information, see the Art Education adviser.

Upper-Level Studio Art Emphasis Courses (15 credits) ¹	

Total Credits**55**

¹ Students in the Studio Art Emphasis may choose from a variety of studio options in either 2-D or 3-D studios. Once students have decided on their chosen studio courses, they fill out the upper-level Studio Art Plan form in consultation with an Art adviser. The Art Plan form is used to count courses taken toward the degree and must be filed with the Registrar's Office. - The 10-credit Design Core is required prerequisite for all upper-level studio courses. - A minimum of 9 credits must be selected from one studio area in addition to other relevant upper-level studio art courses to total 15 credits. Upper-level classes have a 300 or 400 designation. - Advanced studios may be taken 3 times for a total of 9 credits. Some courses may have other courses substituted to be more appropriate for student goals. Talk to your adviser for more details.

Art Minor

Area of Emphasis

Students must complete requirements in one of the following areas of emphasis:

- Art History
- Studio Art

Art History

Upper-Level Courses ¹	6
Total Credits	25

¹ Select two ART courses at the 300-400 level, for which appropriate prerequisites have been completed. The entire Design Core is required for enrollment in all 300-400 upper-level studio courses.

Biology

(Bachelor of Science)

Biology is one of UW-Green Bay's most popular academic programs. The curriculum explores living systems from subcellular organelles to ecosystems. Biology majors can customize their academic plans to emphasize cell and molecular biology, animal biology, or ecology and conservation science. These tracks prepare students for a wide variety of interdisciplinary careers in resource management, fisheries and wildlife biology, health sciences, genetics, microbiology, science communications (technical writing, journalism, and nature interpretation), and many other fields. About 40 percent of Biology graduates pursue advanced degrees in graduate or professional schools in medicine, dentistry, veterinary science, biological sciences, wildlife biology, or ecology and conservation biology. Students at UW-Green Bay also can combine a Biology degree with a program in primary or secondary school education.

Graduates of UW-Green Bay's Biology program are employed today in government agencies (U.S. Environmental Protection Agency, Food and Drug Administration, Fish and Wildlife Service, Forest Service, Bureau of Land Management, Department of Agriculture, Wisconsin Department of Natural Resources, local government agencies); hospitals and clinics, including veterinary hospitals and zoos; private corporations (pharmaceuticals, food processing, agriculture, etc.); environmental consulting firms; conservation organizations; and educational institutions ranging from elementary schools to universities.

Biology majors often combine their studies with a minor. Human Biology is commonly chosen as a minor by Biology majors with interests in pre-medicine, health sciences or exercise science. Students interested in ecology, biodiversity conservation, and management of biological resources such as wildlife, forests, and fisheries, typically combine a minor in Environmental Science. Other popular subjects for Biology majors include Business Administration and Environmental Policy and Planning.

Students who prefer a Biology minor (rather than a major) often choose majors in Environmental Science or Human Biology. Students who desire to become science teachers often combine the Biology major with the professional program in Education. Information about teacher certification requirements can be found at the UW-Green Bay Education Office (<http://www.uwgb.edu/education/>).

UW-Green Bay's Biology program provides outstanding opportunities for students to gain practical experience. Many undergraduates work with faculty on field or laboratory research projects. Internships are widely available with private industry, public agencies, and non-profit organizations. These hands-on experiences are critical for developing a competitive resume for the job market or admission to graduate and professional schools.

The Biology program has well-equipped laboratories for coursework and faculty-guided research. In cellular and molecular biology laboratories, students become familiar with techniques of tissue culture, in situ hybridization, affinity chromatography, agarose and polyacrylamide gel, electrophoresis, polymerase chain reaction, and the use of monoclonal antibodies. In physiology laboratories, students learn techniques to study physiological functions. Teaching and research facilities available to ecology and conservation biology students include the Cofrin Center for Biodiversity, the 290-acre Cofrin Memorial Arboretum surrounding the UW-Green Bay campus, four off-campus natural areas managed by the University, the Richter Natural History Museum, small animal laboratory, the Gary A. Fewless Herbarium, a greenhouse, and state-of-the-art computer labs. Advanced undergraduates are able to participate in research projects on Great Lakes ecosystems, northern forests, agroecosystems, rivers, lakes, wetlands, and even tropical forests and mangroves.

Students in the Biology major develop basic skills such as statistical design and analysis, laboratory proficiency, and familiarity with major taxonomic groupings of plants, animals, and microorganisms. Many high paying occupations today require a college-educated individual who can write and speak well, solve problems using a scientific approach, learn new information quickly, and work well with others on a team. UW-Green Bay's Biology students acquire and apply these skills with excellence.

Biology Program Mission Statement

The Biology Program at the University of Wisconsin-Green Bay provides a quality educational curriculum in the study of life and living systems, from the molecular level to the ecosystem level. The disciplinary major and minor complement UW-Green Bay's interdisciplinary programs, especially those in Human Biology, Environmental Science, and the professional program in Education. The biology major prepares students for careers in ecology, organismal biology, physiology, genetics, cell and molecular biology, medicine and human health, veterinary science, wildlife management, education, agriculture, and science communication. Faculty and staff teach students to think critically and to solve complex problems scientifically by providing

hands-on laboratory and field experiences as well as meaningful scientific research opportunities. The Biology Program contributes intellectual, cultural, and economic outreach activities and scientific research that enriches the quality of life for people in northeastern Wisconsin and elsewhere.

Biology Student Learning Outcomes

Students in the Biology Program will:

1. Describe the organization and diversity of life at levels of complexity from subcellular to ecosystem.
2. Demonstrate an understanding of genetic information, hereditary processes, and their relevance to evolutionary change as a product of mutation and natural selection
3. Explain the important processes and pathways that sustain living organisms including functional systems for exchange of energy and matter
4. Solve problems by applying a scientific process of inquiry, including the effective use of appropriate techniques, instrumentation, and data analysis
5. Identify and interpret findings of scientists and communicate results of scientific work to others in the scientific community and the general public

Major Area of Emphasis (p. 74)

Students must complete requirements in one of the following areas of emphasis:

- Animal Biology
 - Animal Biology (Accelerated) - Integrated with graduate Environmental Science & Policy program
- Aquaculture
- Aquatic Ecology and Fisheries Emphasis
- Biology for Educators
- Cell/Molecular
- Ecology and Conservation
 - Ecology and Conservation (Accelerated) - Integrated with graduate Environmental Science & Policy Program
- Microbiology
- Pre-Veterinary

Biology Curriculum Guides

The following are curriculum guides for a four-year Biology degree program and is subject to change without notice. Students should consult a Biology program advisor to ensure that they have the most accurate and up-to-date information available about a particular four-year degree option.

- Biology Major with Emphasis in Animal Biology Curriculum Guide Example
- Biology Major with Emphasis in Aquaculture Curriculum Guide Example
- Biology Major with Emphasis in Aquatic Ecology and Fisheries Curriculum Guide Example
- Biology Major with Emphasis in Ecology & Conservation Biology Curriculum Guide Example
- Biology Major with Emphasis in Cell/Molecular Biology Curriculum Guide Example
- Biology Major with Emphasis in Biology for Educators Curriculum Guide Example

Biology Major with Emphasis in Animal Biology

An example: Four year plan for **Biology Major with Emphasis in Animal Biology**

120 credits necessary to graduate. Assumes an 18-credit interdisciplinary minor.

Plan is a representation and categories of classes can be switched. Check with your advisor.

Biology Major with Emphasis in Ecology & Conservation

An example: Four year plan for **Biology Major with Emphasis in Ecology and Conservation Biology**

120 credits necessary to graduate. Assumes an 18-credit minor.

Plan is a representation and categories of classes can be switched. Check with your advisor.

Business Administration

(Bachelor of Business Administration)

UW-Green Bay's major and minor in Business Administration offer the skills and broad business background needed for a lifetime of opportunity. More than 90 percent of graduates typically find employment in business, industry, government, and other fields, or enter graduate programs within six months of graduation. UW-Green Bay students are accepted into reputable graduate schools. Many alumni are successful business leaders. Alumni surveys indicate that alumni perceive the Business Administration program very favorably, their program of study prepared them extremely well for their careers, the quality of the Business Administration faculty is "excellent," and they would recommend the program to others.

The program provides considerable exposure to the liberal arts and develops the critical thinking, problem-solving, interpersonal, communication, quantitative and computer skills needed by graduates to successfully serve as leaders within modern organizations. The program also addresses contemporary organizational issues such as global competition, social responsibility and ethics, sustainability, and the relationship between organizations and various environmental forces.

The Business Administration major is an interdisciplinary and problem-focused program comprised of three integrated elements: supporting, core and emphasis courses. The supporting and core courses provide breadth and introduce each student to the foundations of business knowledge, including communications, economics, statistics, computers, accounting, law, finance, management and marketing. Each Business Administration major extensively studies an area of emphasis:

- Business Analytics
- Entrepreneurship
- General Business
- Supply Chain Management

Each emphasis consists of courses designed to thoroughly prepare the student in a business specialization.

A distinctive feature of the program is that many upper-level courses include a practical project component, offering the opportunity to apply the problem-solving theories and concepts learned in the classroom to real situations. Alumni say this increases their value to employers and sets them apart from traditional business program graduates.

Extensive opportunities are available for students to meet business professionals and gain practical experience. Active student organizations support these efforts and help students to meet others with like interests. Faculty members encourage participation in internships.

Program Entrance and Exit Requirements

Students can declare a Business Administration major or minor at any time with any number of credits through a simple online process. To declare, students must complete an online Declaration of Major/Minor/Certificate e-form (<https://www.uwgb.edu/registrar/forms-petitions/declaration-swap-forms/>), which includes reading and accepting an Honor Code (pre-declaration form). Your advisor will be assigned to you after the e-form is received. If you are declaring a Business Administration major, you will need to select at least one area of emphasis: Business Analysis, Entrepreneurship, General Business, or Supply Chain Management.

Students must maintain a cumulative GPA of 2.5 to proceed in the course progression for a Business Administration major or minor. All students must meet Business Administration's exit requirement to graduate with a Business Administration major. Students intending to graduate with this major must have a minimum 2.5 cumulative grade point average.

Business Administration is a popular choice as a minor. In addition, a second option is a minor in **International Business**. This minor encourages students to gain language and culture proficiency sufficient to complement their study of Business Administration in a world economy.

Major Area of Emphasis (p. 96)

Students must complete requirements in one of the following areas of emphasis:

- Business Analytics
- Entrepreneurship
- General Business
- Supply Chain Management

Overview of Program Emphases

Business Analytics:

Learn to translate data for business decisions. The Business Analytics major prepares students to interpret and analyze complex data into comprehensive insights for making actionable decisions. Students will be able to answer questions regarding what happened, what will happen, and what needs to be done.

Entrepreneurship:

Entrepreneurship skills are highly sought and marketable. Entrepreneurially minded graduates keep organizations viable through innovation. Entrepreneurship courses develop students' skills in problem solving, resourcefulness, independence, and critical thinking. The Entrepreneurship Emphasis provides students with in-depth knowledge in the Entrepreneurship domain through a rigorous curriculum with courses covering important topics including how to capture new markets and create new businesses that operate virtually, about online peer networks, e-business models and pitch experience and venture acceleration.

General Business:

The General Business emphasis is designed for working professionals seeking to advance their professional careers. The emphasis provides students with the opportunity to tailor the major by selecting specific coursework benefitting their career or aligning with their interests. Students can select to pursue one of the three certificate tracks (Digital Marketing & Sales, Entrepreneurship, or Supply Chain Management) or pursue the broad selection of courses to complete the general track. Entry into the program requires the transfer of a minimum of 40 credits from an accredited university, and at least 3 years of full-time equivalent relevant, professional experience to be evaluated through submitted evidentiary material. Admitted students can earn an additional six credits toward their general major requirements (Capstone experience excluded) through credit for prior learning. Evaluation of credit for prior learning follows accepted university practices.

Supply Chain Management:

Supply chain management is one of the most important career choices in the world. Everything we purchase gets to store shelves via a supply chain. Students will learn how supply chain management integrates supply and demand management within and across companies. The program closely studies the supply of materials to a manufacturer, along with the production and the distribution of finished goods through a network of distributors and retailers to a final customer. Careers in supply chain management are on the rise and continually increasing year after year with an excellent job outlook.

Chemistry

(Bachelor of Science)

Chemists have made significant contributions to the improvement of the quality of our lives. They have played a vital role in the advancement of so many fields that it is hard to think of an area where the contributions of chemists have not been important. The challenges of today and tomorrow will continue to rely upon well-trained and creative chemists for their solutions.

UW-Green Bay offers three emphases in chemistry. Two emphases are approved by the American Chemical Society and are designed for students who are interested in a career as a practicing chemist at the bachelor's level or who are interested in advancing their education in graduate or professional school. The other emphasis is appropriate for students who are interested in working in a chemistry intensive industry or teaching chemistry at the secondary level.

The UW-Green Bay Chemistry program is an integrated progression of lecture and laboratory instruction that is designed to provide students with the skills needed by chemists today and tomorrow. These skills include a solid understanding of chemical principles, hands-on training in the use of modern instrumentation, experience in the design of experiments and the ability to analyze data and present results. The majority of UW-Green Bay Chemistry majors have opportunities to work as research assistants on faculty projects, or to conduct their own independent projects. UW-Green Bay faculty are active in research on chemical catalysis, sol-gel chemistry, natural product synthesis, alternative and renewable energy, chemistry of ultrasound, polymer synthesis and applications, mesoporous material synthesis and applications, computation chemistry, photocatalysis, sensors, environmental chemistry, biochemistry, and molecular biology. A research experience is an excellent way to develop and to showcase your professional skills and can provide a significant advantage when entering the job market and in applying to graduate and professional schools.

The University maintains an excellent collection of modern instrumentation, including: Hewlett-Packard and Varian gas chromatography (GC) systems with a variety of detectors (e.g., MS, ECD, FID, and TCD); Shimadzu high performance liquid chromatography (HPLC) systems; a Dionex ion chromatograph (IC); a TESCAN scanning electron microscope (SEM) with an energy dispersive x-ray detector; an Anasazi nuclear magnetic resonance (NMR) spectrometer; a Nicolet Fourier Transform Infrared (FTIR) spectrometer; a Varian inductively coupled plasma atomic emission spectrometer (ICP AES); a Perkin Elmer luminescence spectrometer (LS); Shimadzu UV/visible spectrophotometers; a three-channel Lachat QuikChem 8500 flow injection analyzer (FIA); a Shimadzu total organic carbon (TOC) analyzer; a Suprex supercritical fluid extractor (SFE); and gamma-ray and liquid scintillation counters. Students gain hands-on experience with these instruments during advanced coursework and in research projects.

A UW-Green Bay Chemistry major provides excellent training for students interested in careers in industry and for students interested in continuing their studies in graduate and professional schools. UW-Green Bay Chemistry majors are sought after by local industries for their strong chemistry skills and problem-solving abilities. Approximately half of the UW-Green Bay Chemistry majors begin their professional careers in industry. Students

interested in continuing their studies have been admitted to the top graduate schools in the chemical and health sciences and into professional schools in medicine, dentistry, and veterinary science. UW-Green Bay Chemistry majors have gone on to become university professors, medical doctors and corporate directors.

Major Area of Emphasis (p. 108)

Students must complete requirements in one of the following areas of emphasis:

- Chemistry
- American Chemical Society Certified Chemistry
- American Chemical Society Certified Environmental Chemistry

Minor

Code	Title	Credits
Supporting Courses		11
CHEM 207	Laboratory Safety	
CHEM 211 & CHEM 213	Principles of Chemistry I and Principles of Chemistry I Laboratory	
CHEM 212 & CHEM 214	Principles of Chemistry II and Principles of Chemistry II Laboratory	
Upper-Level Courses		12
CHEM 311	Analytical Chemistry	
Complete one of the following course groups:		
CHEM 300 & CHEM 301	Bio-Organic Chemistry and Bio-Organic Chemistry Laboratory	
CHEM 302 & CHEM 304	Organic Chemistry I and Organic Chemistry Laboratory I	
Choose 4 credits from the following elective courses:		
BIOLOGY 407 & BIOLOGY 408	Molecular Biology and Molecular Biology Laboratory	
CHEM 303 & CHEM 305	Organic Chemistry II and Organic Chemistry Laboratory II	
CHEM 320 & CHEM 322	Thermodynamics and Kinetics and Thermodynamics and Kinetics Laboratory	
CHEM 321 & CHEM 323	Structure of Matter and Structure of Matter Laboratory	
CHEM 330 & CHEM 331	Biochemistry and Biochemistry Laboratory	
CHEM 410 & CHEM 411	Inorganic Chemistry and Inorganic Chemistry Laboratory	
CHEM 413	Instrumental Analysis	
CHEM 417	Nuclear Physics and Radiochemistry ¹

Kiel Nikolakakis; Lecturer; Ph.D., University of California - Santa Barbara

Courses

CHEM 104. Survey of General Chemistry. 4 Credits.

A one-semester introductory course in college chemistry.

P: Concurrent enrollment with CHEM 106.

CHEM 105. Survey of Organic and Biochemistry. 3 Credits.

A foundational course in the chemical makeup and metabolic processes of living organisms. Consists of lectures and may also include discussions and demonstrations.

P: CHEM 104 with at least a C grade; and CHEM 107 or concurrent enrollment

Spring.

CHEM 106. Survey of General Chemistry Lab. 1 Credit.

Laboratory to accompany CHEM 104

P: CHEM 104 or conc enr; and CHEM 207 or conc enr.

CHEM 107. Survey of Organic and Biochemistry Lab. 1 Credit.

Laboratory to accompany CHEM 105.

P: CHEM 106 with at least a C grade; and CHEM 105 or concurrent enrollment; and CHEM 207 or conc enr.

Spring.

CHEM 108. Survey of General, Organic and Biochemistry. 3 Credits.

Chemistry and measurements; states of matter and changes of state; atoms and elements; ionic and molecular compounds; chemical reactions; solutions; acids, bases and pH; organic nomenclature; introduction to organic functional groups, physical properties and reactions; carbohydrate structure and function; amino acids and protein structure and function; lipid structure and function; nucleic acid structure and function.

P: MATH 101 with at least a C, or WPT-MFND score >465 and WPT-AALG score >525, or ACT Math score >24, or SAT Math score >590; and CHEM 109 or conc enr

Spring.

CHEM 109. Survey of General, Organic, and Biochemistry Laboratory. 1 Credit.

Laboratory Course that accompanies Chem 108.

P: CHEM 108 or concurrent enrollment; CHEM 207 or concurrent enrollment

Fall and Spring.

CHEM 168. Sustainability Chemistry. 3 Credits.

Studying how chemistry and sustainability can relate to and improve our lives and our environment is a focus of this course. Specific topics that will be covered include scientific literacy, green chemistry, climate change, pollution, recycling, chemical usage in industry, best practices in sustainability, and more.

Spring.

CHEM 198. First Year Seminar. 3 Credits.

First Year Seminar, topics vary.

Reserved for New Incoming Freshman.

CHEM 201. Math for Chemistry Discussion: Principles of Chemistry I. 1 Credit.

This discussion course is designed to supplement the concepts presented in CHEM 211/213. Activities will focus on early exposure to math concepts in time for use in CHEM 211/213, deeper explorations of the mathematics and chemistry concepts addressed in these courses, and mathematics and chemistry skills necessary for success in CHEM 211/213.

P: Concurrent enrollment in CHEM 211/213.

Fall Only.

CHEM 202. Math for Chemistry Discussion: Principles of Chemistry II. 1 Credit.

This discussion course is designed to supplement the concepts presented in CHEM 212/214. Activities will focus on early exposure to math concepts in time for use in CHEM 212/214, deeper explorations of the mathematics and chemistry concepts addressed in these courses, and mathematics and chemistry skills necessary for success in CHEM 212/214.

P: Concurrent enrollment in CHEM 212/214.

Spring.

CHEM 207. Laboratory Safety. 1 Credit.

This course examines safety within the science laboratory with emphasis on practical application. Topics include current safety regulations, identification of hazards, chemical labeling and storage, waste management, personal protective equipment, ventilation, spill response, and biosafety.

P: BIOLOGY 201 or BIOLOGY 203 or CHEM 108, CHEM 211 or CHEM 212 or HUM BIOL 241 or conc enr

Fall and Spring.

CHEM 211. Principles of Chemistry I. 4 Credits.

Chemistry and measurement; atoms, molecules, and ions; chemical formulas, equations, and reactions; gaseous state; thermochemistry; quantum theory of the atom; electron configurations and periodicity; ionic and covalent bonding; molecular geometry and chemical bonding; and states of matter; liquids and solids.

P: MATH 104 or greater or eq or conc enr in MATH 104 or WPT-MFND score >465 and WPT-AALG score >525 and WPT-TAG score >525 or ACT Math score >26 or SAT Math score >630 & CHEM 213 or concurrent enrollment; can't repeat until open enrollment begins.

Fall and Spring.

CHEM 212. Principles of Chemistry II. 4 Credits.

Solutions; kinetics; chemical equilibrium; acids and bases; acid-base equilibrium, solubility and complex ion formation; thermodynamics and equilibrium; electrochemistry; and nuclear chemistry.

P: MATH 104 with at least a C grade or WPT-MFND score >465 and WPT-AALG score >525 and WPT-TAG score >525 or ACT Math score >26 or SAT Math score >630; and CHEM 211 and CHEM 213 with at least a C grade; and conc enr in CHEM 214

Fall and Spring.

CHEM 213. Principles of Chemistry I Laboratory. 1 Credit.

Laboratory Course that accompanies Chem 211.

P: CHEM 211 or concurrent enrollment; and CHEM 207 or concurrent enrollment

Fall and Spring.

CHEM 214. Principles of Chemistry II Laboratory. 1 Credit.

Laboratory Course that accompanies Chem 212

P: CHEM 212 or concurrent enrollment; and CHEM 207 or concurrent enrollment

Fall and Spring.

CHEM 298. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. A student wishing to study or conduct research in an area not represented in available scheduled courses should develop a preliminary proposal and seek the sponsorship of a faculty member. The student's advisor can direct him or her to instructors with appropriate interests. A written report or equivalent is required for evaluation, and a short title describing the program must be sent early in the semester to the registrar for entry on the student's transcript.

P: fr or so st with cum gpa > or = 2.50; or jr or sr st with cum gpa > or = 2.00.

Fall and Spring.

CHEM 299. Travel Course. 1-6 Credits.

Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.

P: cons of instr & prior trip arr & financial deposit.

CHEM 300. Bio-Organic Chemistry. 3 Credits.

Those aspects of the field pertinent to students entering the biologically related disciplines: Basic organic chemistry, natural products and molecules important to biological systems. Full credit not given for both Chem 300 and Chem 302 or Chem 303.

P: Chem 212 & 214 with at least a C grade or Chem 108 & 109 with at least a C grade.

Spring.

CHEM 301. Bio-Organic Chemistry Laboratory. 1 Credit.

Optional laboratory course to accompany Chem 300. Credit not granted for both Chem 301 and 304.

P: Chem 300 or conc enr; and Chem 207 or conc enr

Spring.

CHEM 302. Organic Chemistry I. 3 Credits.

The chemistry of carbon compounds: structure, reactions, synthesis, stereochemistry, reaction mechanisms, spectroscopy, nomenclature and physical properties of both aliphatic and aromatic compounds; covers all common functional groups and natural products. Full credit will not be awarded for both Chem 300 and 302 or 303.

P: Chem 212 and 214 with at least a C grade.

Fall and Spring.

CHEM 303. Organic Chemistry II. 3 Credits.

The chemistry of carbon compounds: structure, reactions, synthesis, stereochemistry, reaction mechanisms, spectroscopy, nomenclature and physical properties of both aliphatic and aromatic compounds; covers all common functional groups and natural products. Full credit will not be awarded for both Chem 303 and 300.

P: Chem 302 with at least a C grade.

Fall and Spring.

CHEM 304. Organic Chemistry Laboratory I. 1 Credit.

Basic and intermediate synthesis, basic and intermediate instrumental techniques in organic chemistry. Credit will not be granted for both Chem 304 and 301.

P: CHEM 212 and CHEM 214 with at least a C grade; and CHEM 302 with at least a C grade or conc enr; and CHEM 207 or conc enr

Fall and Spring.

CHEM 305. Organic Chemistry Laboratory II. 1 Credit.

Basic and intermediate synthesis, basic and intermediate instrumental techniques in organic chemistry.

P: Chem 303 or conc enr; and Chem 304 with at least a C grade; and Chem 207 or conc enr

Fall and Spring.

CHEM 306. Organic Chemistry Lab I & II. 2 Credits.

Basic laboratory techniques for organic chemistry including commonly used synthetic methods, purification and characterization of reaction products.

CHEM 311. Analytical Chemistry. 4 Credits.

Theory and practice of chemical analysis. Statistics; gravimetric analysis; acid-base chemistry; precipitation, complexometric and redox titrations; electrochemistry; spectrophotometry; atomic absorption; emission methods; separation methods (gas/liquid chromatography).

P: Chem 212 and 214 with at least a C grade; and Chem 207 or conc enr

Spring.

CHEM 320. Thermodynamics and Kinetics. 3 Credits.

Temperature, heat and work, thermodynamic properties of gases, solids and solutions; homogeneous and heterogeneous equilibria; thermodynamics of electrochemical cells; statistical thermodynamics; calculation of thermodynamic properties; chemical kinetics.

P: Chem 212 and 214 with at least a C grade and Physics 202 with at least a C grade and Math 203 with at least a C grade.

Fall Only.

CHEM 321. Structure of Matter. 3 Credits.

Integrated approach to the concepts of physical chemistry and modern physics: introduction to quantum theory, symmetry, atomic and molecular structure, spectroscopy, X-rays, properties of gases, liquids and solids.

P: Chem 212 and 214 with at least a C grade and Physics 202 with at least a C grade and Math 203 with at least a C grade.

Spring.

CHEM 322. Thermodynamics and Kinetics Laboratory. 1 Credit.

Laboratory course to accompany Chem 320.

P: Chem 320 or conc enr; and Chem 207 or conc enr

Fall Only.

CHEM 323. Structure of Matter Laboratory. 1 Credit.

Laboratory course to accompany Chem 321.

P: Chem 321 or conc enr or Physics 321 or conc enr.; and Env Sci 207 or conc enr or Hum Biol 207 or conc enr.

Spring.

CHEM 330. Biochemistry. 3 Credits.

Nature and function of the important constituents of living matter, their biosynthesis and degradation; energy transformation, protein synthesis and metabolic control.

P: Chem 303 with at least a C grade (or concurrent enrollment) and Biology 201/202 with at least a C grade; or Chem 300 with at least a C grade and 301 with at least a C grade and Biology 201/202 with at least a C grade.

Fall and Spring.

CHEM 331. Biochemistry Laboratory. 1 Credit.

Laboratory course to accompany Chem 330.

P: CHEM 330 or conc enr; and CHEM 207 or conc enr
Fall and Spring.

CHEM 355. Chemistry in the World. 3 Credits.

Focuses on chemistry of modern issues: air pollution, atmospheric ozone, global warming, energy utilization, water as a natural resource, acid rain, and nuclear energy.

P: MATH 101.

CHEM 402. Advanced Organic Chemistry. 3 Credits.

Advanced study of the structures of organic compounds, synthetic strategies, and the mechanisms of reactions will be emphasized. Topics will include molecular orbital theory, stereochemistry, linear free energy relationships, isotope effects, and natural and pharmaceutical products, among others.

P: Chem 303 with at least a C grade
Fall Odd.

CHEM 403. Advanced Organic Chemistry Laboratory. 1 Credit.

Synthesis of a natural pharmaceutical product. Learn the modern strategies and techniques involved in multi-step organic synthesis; run reactions, purify products, and use instruments to characterize products.

P: CHEM 305 with a C or better; Chem 207 with a C or better
Fall Odd.

CHEM 410. Inorganic Chemistry. 3 Credits.

Survey of the elements including coordination and organometallic compounds. Modern bonding theories, group theory and periodic properties extended and applied to chemical systems and reactions. General acid-base theory and non-aqueous solvent systems.

P: Chem 212 and Chem 302 with at least a C grade; REC: Chem 303.
Spring Odd.

CHEM 411. Inorganic Chemistry Laboratory. 1 Credit.

Laboratory course to accompany Chem 410.

P: Chem 410 or conc enr.; Chem 304 with at least a C grade; Env Sci 207 or conc enr of Hum Biol 207 or conc enr.; REC: Chem 305
Spring Odd.

CHEM 413. Instrumental Analysis. 4 Credits.

Theory and practice of analysis by instrumental methods, including methods based on absorption and emission of radiation, electroanalytic methods, chromatographic methods and surface analysis methods.

P: Chem 311 with at least a C grade; and Chem 207 or conc enr. REC: Chem 303.
Fall Only.

CHEM 417. Nuclear Physics and Radiochemistry. 3 Credits.

Properties and reactions of atomic nuclei; application of the properties of radioactive nuclei to the solution of chemical, physical, biological and environmental problems.

P: Chem 212 and 214 with at least a C grade and Physics 202 with at least a C grade; REC: Chem 321.
Fall Odd.

CHEM 420. Polymer Chemistry. 3 Credits.

An introduction to the synthesis, characterizations, and properties of industrial polymers.

P: Chem 300 or 303 or 321 or Physics 321.
Fall Even.

CHEM 423. Polymer Chemistry Laboratory. 1 Credit.

Laboratory course to accompany CHEM 420

P: CHEM 420 or conc. enr.
Fall Even.

CHEM 478. Honors in the Major. 3 Credits.

Honors in the Major is designed to recognize student excellence within interdisciplinary and disciplinary academic programs.

P: min 3.50 all cses req for major and min gpa 3.75 all UL cses req for major.
Fall and Spring.

CHEM 495. Teaching Assistantship. 1-6 Credits.

The student and supervising teacher must prepare a statement that identifies the course with which the assistantship will happen, objectives for the assistantship, and expectations in order to fulfill the course objectives. Students are not eligible to receive credit in both the course they assist the instructor with and the teaching assistantship in the same semester. Typically student has previously taken the course prior to enrollment in the assistantship. Course is repeatable for credit.

Fall and Spring.

CHEM 496. Project/Research Assistantship. 1-6 Credits.

The student must prepare a research proposal, and both parties should identify the research arrangement and how the student will complete the work to fulfill the course objectives within the assigned term.

P: Chem 413.

CHEM 497. Internship. 1-12 Credits.

Supervised practical experience in an organization or activity appropriate to a student's career and educational interests. Internships are supervised by faculty members and require periodic student/faculty meetings. Course is repeatable for credit.

P: jr st.

Fall and Spring.

CHEM 498. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. A student wishing to study or conduct research in an area not represented in available scheduled courses should develop a preliminary proposal and seek the sponsorship of a faculty member. The student's advisor can direct him or her to instructors with appropriate interests. A written report or equivalent is required for evaluation, and a short title describing the program must be sent early in the semester to the registrar for entry on the student's transcript. Course is repeatable for credit.

P: fr or so st with cum gpa > or = 2.50; or jr or sr st with cum gpa > or = 2.00.

Fall and Spring.

CHEM 499. Travel Course. 1-6 Credits.

Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.

P: cons of instr & prior trip arr & financial deposit.

Chemistry Major

Area of Emphasis

Students must complete requirements in one of the following areas of emphasis:

- Chemistry
- American Chemical Society Certified Chemistry
- American Chemical Society Certified Environmental Chemistry

Chemistry

Chemistry Curriculum Guides

The following are curriculum guides for a four-year Chemistry degree program and is subject to change without notice. Students should consult a Chemistry program advisor to ensure that they have the most accurate and up-to-date information available about a particular four-year degree option.

- Chemistry
 - General Major
 - ACS Certified Major
 - ACS Certified Major in Environmental Chemistry

General Major

An example: Four year plan for **Chemistry Major**

120 credits necessary to graduate.

Plan is a representation and categories of classes can be switched. Check with your advisor.

Communication

Bachelor of Science

The Communication program offers contemporary communication studies emphasizing comprehensive understanding of communication. Students come to understand how communication happens; how messages are put into visual and verbal codes; how messages are filtered through various media; how messages are interpreted and affect different audiences in different ways and in different contexts; and how students construct those contexts.

New information technologies tend to merge media. A major or minor in Communication provides the kind of integrative knowledge that is required for professional careers in the field.

Internships in Communication provide qualified students with opportunities for faculty-supervised experience in professional settings outside the classroom. In addition, several Communication courses involve students in research projects in the community.

Communication graduates have entered a wide variety of academic and professional areas: news reporting, photojournalism, broadcast journalism, television production, printing and publications, advertising, sales and marketing, management consulting, technical writing and editing, public relations, and government service, as well as graduate study in information science, library science, journalism, media studies, and telecommunications.

Communication offers eight areas of emphasis.

- Students in **generalist** ...
- Students in **health communication** study internal and external communications in the healthcare environment. Students will learn how to (1) improve provider/patient interactions, (2) enhance communication within healthcare organizations, and (3) how to inform the public about healthcare issues, threats, and crises.
- Students in **journalism** will develop writing and editing skills, including video reporting/editing skills; the ability to do in-depth research and reporting, a concern for people, a strong sense of autonomy, and a well-rounded understanding of important issues in their field through this program and through a liberal arts education. Students will also gain hands-on experience in journalism through participation in on-campus publications and/or through outside internships.
- Students in **mass media** need more than just knowledge of production techniques. Professional advancement requires skills in writing, editing, advertising and sales, market and audience research, as well as knowledge of new media and their impact on society and culture.
- Students in **organizational communication** develop basic communication skills needed in organizations, such as speaking, interviewing, meeting management, and problem solving using different communication technologies for different purposes. They also learn about sources of communication problems in organizations, strategies for discovering and solving these problems, and current theories of organizational communication.
- Students in **public relations** complete requirements that reflect the demand for graduates who can write well, are fully acquainted with the wide range of available modes of communication (graphics, print, broadcast, oral discourse, digital/internet, and their many combinations), and are particularly skillful in at least one of them. Students also learn how to respond to common PR challenges such as announcing changes, promoting events, and responding to crises.
- Students in **social media strategy** focus on the strategies and tactics needed to advance organizational goals. Students will be prepared for long-term careers working as social media managers, specialists, curators, and content providers.
- Students in **sports communication** focus on the unique dynamics associated with sports media, organizations, teams, and players. Students will be prepared for long-term careers working as sport reporters, broadcasters, media specialists, or public relations professionals.

Major Area of Emphasis (p. 117)

Students must complete requirements in one of the following areas of emphasis:

- Generalist
- Health Communication
- Journalism
- Mass Media
- Organizational Communication
- Public Relations
- Social Media Communication
- Sports Communication

Minor

Community Health Education

(Bachelor of Science)

This 120-credit program, which aligns with the National Commission for Health Education Credentialing competencies, will create new career opportunities for students and partnerships with the community; opportunities and partnerships consistent with the University's Strategic Plan. As part of the Health Professions and Related Programs array, UW-Green Bay has numerous programs in this specialized area so, with the exception of six courses, the major is built from existing courses in related areas (i.e., sciences, health management, social work). Additionally, 65 credits within the supporting and major courses cover all but 15 credits of general education requirements.

The program utilizes high impact practices including a semester-long practicum at a community agency. Program graduates will be able to assess, plan, implement, and evaluate health education programs for a variety of populations.

Students entering the major may be new freshmen who come to UW-Green Bay because of this major or transfer students from other post-secondary institutions who find this major appealing. The Community Health Education program will not use a cohort model, block requirement plan, or seek accreditation. The UW-Green Bay program will offer students a curriculum grounded on understanding the intersection of governmental and non-

governmental healthcare organizations and how economics and policy influence health. The Community Health Education major will be an option for students who are not accepted into the Nursing program or prefer a non-clinical program.

As more organizations and communities focus on wellness and prevention, and with growth in the health industry, community health educators are sought after and in high demand. Graduates with a major in community health education find jobs in the health care industry (e.g., hospitals, public health departments, health insurance), non-profit organizations, government agencies, and private businesses.

According to the Bureau of Labor Statistics, overall employment of community health educators is projected to grow 11% from 2018 to 2028, which is much faster than the average for all occupations.

Computer Science

(Bachelor of Science)

Students interested in Computer Science have several options, including an emphasis in Information Assurance and Security (aka, cybersecurity), a more traditional emphasis in Software Engineering, and a minor. The two Computer Science emphases offer an expanding array of theoretical and applied work that prepares students to enter the job market or pursue graduate studies. The minor in Computer Science offers lower-level basic skills and an upper-level flexible approach that can be used to augment many majors, from business to the design arts and humanities.

The field of computer science is undergoing great changes as technology advances and the need for computer software increases. Students entering this field must not see a bachelor's degree in computer science as the culmination of study in the field. Rather, they must see it as the first step in a continuing education process that will last as long as they choose to stay in the field. The goal of the Computer Science major is to provide students with a strong foundation upon which they can continue to build as the field changes. Students can receive instruction in areas such as software design and project management, object-oriented programming, design of algorithms, operating systems, database management systems, neural networks, computer graphics, network programming, cybersecurity, and more.

Computer science courses are often mistaken for programming courses. In reality, they require much more than learning and mastering a programming language. The heart of software design is not the language, but the ability to define a problem, analyze various components, and project and evaluate potential solutions, all of which must be scalable and robust. This must also be done under the constraint that they are subject to limitations inherent in a given computer. Students must understand that in industry there must be more than just a working program. Good software must not only work but must be fully documented, clearly written, easily modifiable to meet changing and more extensive requirements, and engineered for stability, security, and correctness.

Equally important, the program provides a theoretical base for computer science and helps students understand there is more to computer science than software development. Students develop skills they can use upon graduation but they must be prepared to enter a field which is both diverse and rapidly changing and they must be able to adapt to new technologies. This requires a solid theoretical foundation with knowledge of how computers work and how they carry out tasks specified in applications software. It requires that students think beyond writing software and explore areas such as neural networks, computer graphics, algorithm analysis, or scientific applications. This knowledge is an important ingredient to professional development as it gives them the tools they need to analyze efficiency and evaluate various programming and data design options and to see the possible futures as computer science evolves. Simply providing them with skills necessary to enter the computing profession is not sufficient. Each student must be prepared to apply what he or she has learned in order to adapt to the inevitable changes that will occur. Each must also have the ability to learn new ideas and apply them.

Graduates of the Computer Science program are prepared to continue their education at the graduate level or to apply for entry-level positions in industry. Typical entry-level jobs are programmer or programmer/analyst positions.

All registered students have access to the University's computing facilities. Student accounts allow students to access a wide variety of both PC-compatible and Macintosh computers, Linux and database servers (for select courses), various software developer environments, and of course the internet. Labs are open seven days per week and are staffed by consultants who provide assistance in using the facilities. Classrooms also have network connections which allow demonstrations of software and internet applications to be integrated with classroom lectures. There is also a Computer Science teaching lab with 25 workstations and display facilities that support Computer Science instruction.

Computer Science courses have a strict prerequisite structure. It is imperative that students learn what courses are prerequisites for others and when they are offered. Students are strongly encouraged to talk to an adviser very early in their college career.

Students seeking information on teacher certification should contact the Education Office.

Major Area of Emphasis (p. 127)

Students must complete requirements in one of the following areas of emphasis:

- Information Assurance and Security
- Software Engineering

Criminal Justice

Criminal justice is an interdisciplinary minor that provides students with the opportunity to explore and analyze important community issues that will help enhance their civic responsibility and their ability to improve the current criminal justice system. Additionally, the program will enhance students' critical analysis skills and include opportunities to explore issues such as diversity and inclusion.

Students will begin by taking supporting courses in Public Administration, Sociology, and/or Political Science that will lay the groundwork for more advanced criminal justice course work. Core upper-level courses will help develop their ability to comprehend, synthesize, and critically analyze scientific evidence. In addition, these courses will enhance their abilities to critically engage in theory, practice, and policy in general, laying the groundwork for more advanced analysis in upper-level courses focusing on criminal justice administration and theory. Nine credits of upper electives will enable students to study focused topics in criminal justice and criminology in greater depth. A majority of the coursework will address and engage students in issues of equity and inclusion within the criminal justice system.

Overall, a minor in Criminal Justice is designed for students seeking careers in the public and nonprofit sectors such as probation and parole, law enforcement, pre-law, victim advocacy, and court services, and it is available to students majoring in any discipline at the University of Wisconsin-Green Bay. The program is housed within the Department of Public and Environmental Affairs under the oversight of the Public Administration program, though the curriculum is supported by eight different programs.

Democracy and Justice Studies

(Bachelor of Arts)

Democracy and Justice Studies explores diverse ideals and practices of democracy and justice in the United States and the world through interdisciplinary social and historical studies. Democracy and Justice Studies students look at how people past and present have sought in various ways to sustain and change political, economic, cultural, and social orders. We ask why and how societies develop and whether their political, economic, cultural and social relations and activities promote justice, freedom, equality, and democracy. By cultivating critical thinking and problem-focused thinking, we enable students to become engaged citizens and professionals.

Democracy and Justice Studies encourages students to put democracy and justice into action in the classroom, in internships, in research projects, in their volunteer lives, and in their eventual career choices. Along with substantive training in current and past social and political issues, students learn skills such as digital and textual literacy, the ability to express arguments and ideas clearly in speech and writing, critical thinking, and cultural competence. This program thus offers wide-ranging educational challenges and provides students with broadly applicable learning experiences useful for many career paths in the public, private and non-profit sectors. Democracy and Justice Studies is encouraged and appropriate for individuals interested in graduate work in the social sciences and humanities, law school, journalism, international business, and a variety of careers related to community development, social justice, social and environmental activism, women's and gender equity, and other social issues.

Graduates work in a wide range of careers including business, domestic and international development, education, non-profit work, journalism, law and criminal justice, library science, museum administration, philanthropy, and politics. Some have pursued advanced studies in fields such as anthropology, area studies, criminal justice, economics, history, international relations, law, library science, philosophy, political science, sociology, theology and women's and gender studies.

Majors select one or more areas of emphasis from among the following:

American Studies addresses historical and contemporary political problems, public issues, social criticism and strategies for change in the United States.

Criminal Justice considers the development of the institutions, ideas and processes of the criminal justice system, including questions of freedom, social control, punishment and inequality.

U.S. and the World focuses on the influence of the United States and essential American ideals, including democracy, equality, and social justice, abroad.

Legal Studies examines law and legal systems past and present, both in the United States and around the world, and their relationship to justice and democracy.

Women's and Gender Studies explores historical and contemporary perspectives on women and gender, emphasizing the ways varied and changing gender roles affect economic and social opportunity.

Students seeking a major or minor in Democracy and Justice Studies may choose to combine their programs with another field of study. Among fields most relevant are, business, communication, economics, education, environmental policy and planning, ethnic studies, First Nations studies, global studies, history, human development, journalism, political science, psychology, social work, sociology, urban and regional studies, and women's and gender studies.

We encourage students to study abroad or at other campuses in the United States through UW-Green Bay's participation in international exchange programs and National Student Exchange. Travel courses are another option for obtaining academic credits and completing requirements. For more information, contact the Office of International Education at (920) 465-2190 or see <http://www.uwgb.edu/international/>

Major Area of Emphasis (p. 131)

Students must complete requirements in one of the following areas of emphasis:

- American Studies
- Criminal Justice
- Legal Studies
- U.S. and the World
- Women's and Gender Studies

Minor

Design Arts

(Bachelor of Arts)

The Design Arts major is the study of the theory and practice of contemporary graphic design and environmental design. The graphic design curriculum includes a series of core courses in the history, applications, and influences of print, video, and interactive communications, while the environmental design area includes options for study in urban design and planning. The program emphasizes the design process as a creative decision-making tool. Students learn to develop and apply problem-solving methods and use design software and hardware along with traditional image-making and modeling techniques, to develop effective design solutions.

This major provides a contemporary liberal arts education and an array of skills for a range of careers and advanced study, including graphic design, advertising and marketing, publications management, art direction, creative direction, and multi-media and website design, among others. The environmental design focus provides opportunities in urban planning, graduate studies in architecture and environmental graphic design. The program has a practicum and internship component through which students can gain professional experience and portfolio development.

Students have access to a technology studio that features design and imaging software and hardware standard to the design profession. A general-access computer laboratory also supports the Design Arts program. Students have access to industry standard digital design software for producing illustrations, publication design as well as traditional model-building facilities.

Students may study abroad or at other campuses in the United States through UW-Green Bay's participation in international exchange programs and National Student Exchange. Travel courses are another option for obtaining academic credits and completing requirements. For more information, contact the Office of International Education at (920) 465-2190 or see <http://www.uwgb.edu/international/>.

Curriculum Guide

The following is a curriculum guide for a four-year Design degree program with an optional Communications Minor and is subject to change without notice. Students should consult a Design program advisor to ensure that they have the most accurate and up-to-date information available about a particular four-year degree option.

An example: Four year plan for **Design Arts Major**

120 credits necessary to graduate.

Plan is a representation and categories of classes can be switched. Check with your advisor.

Addie M Sorbo; Senior Lecturer; B.A., University of Wisconsin - Green Bay

Economics

(Bachelor of Science)

Economics underlies everything we do in societies around the globe. Given its focus on the allocation of scarce resources among competing desires, economics will always be critical for citizens to understand, regardless of the form or structure of the social institutions under which these individuals live. Those who study economics will develop a skill set that is useful in business, nonprofit, and governmental organizations. Graduates will be better able to function as individual decision-makers within our complex, interrelated society; they will be enabled as critical thinkers and socially responsible citizens.

Students who major or minor in Economics receive training in quantitative methods, economic theory, business decision making, and applied economic analysis. Students can tailor their academic programs to fit their strengths, interests, and career goals.

The Economics Program at UW-Green Bay has two areas of emphasis, financial economics and applied economics. These emphases have a common set of foundational courses and a subset of more focused courses allowing for specialization in financial affairs (e.g., finance and banking) or more applied and policy-oriented opportunities (e.g., government, nonprofit, and advocacy organizations). Either emphasis will support those desiring future studies at the graduate level, possibly seeking an MBA, MS, PhD or law school.

With appropriate program planning, graduates can also take an array of courses allowing them to obtain teaching certification at the secondary school level. Students seeking information on teacher certification should contact the Education Office.

The broad training received by Economics students in incentive-based decision making creates a variety of career opportunities. Economics majors enter careers in business, government, and nonprofit organizations. Individuals trained in economics are often employed by banks, investment firms, government agencies, market research firms, insurance companies, management consulting, advertising agencies, labor unions, and as private entrepreneurs. Others develop careers in real estate, land use planning, financial planning, credit and debt collection, statistical and systems analysis, politics, and public administration. Some graduates go on to further studies in graduate schools, where they receive advanced training in such fields as business, economics, law, public policy, and urban studies.

Major

Code	Title	Credits

Education

(Bachelor of Science)

UW-Green Bay's teacher education program is approved by the Wisconsin Department of Public Instruction. The program is designed to prepare entry-level teachers with relevant content, professional knowledge and skills to effectively meet the future learning needs of a changing school population.

At UW-Green Bay, students seeking early childhood (Early Childhood — Ages 0-8) or elementary-level (Early Childhood through Middle Childhood — Ages 0-11 or Middle Childhood through Early Adolescence — Ages 6-12/13) licensure are required to complete a major in Education. Students completing the Ages 6-12/13 license are also required to complete an approved minor. Graduates seeking these licenses receive a bachelor's degree in Education.

Students who desire secondary-level teaching licensure (Early Adolescence through Adolescence — Ages 10-21 or Early Childhood through Adolescence — All Ages) are required to complete a minor in Education to support a disciplinary major as required and approved by the Department of Public Instruction. Graduates seeking these licenses receive a bachelor's degree in their disciplinary major(s).

The interdisciplinary, problem-focused studies offered at UW-Green Bay provide uncommonly strong preparation for teaching. Students focus on excellence in the teaching/learning process through methods and field experience courses that provide the background, knowledge and instructional tools needed to become effective teachers. These studies complement strong academic coursework in communication, the arts, humanities, social studies, science and mathematics.

UW-Green Bay offers teacher license programs at these age levels:

- Early Childhood (Ages 0-8)
- Early Childhood through Middle Childhood (Ages 0-11)
- Middle Childhood through Early Adolescence (Ages 6-12/13)
- Early Adolescence through Adolescence (Ages 10-21)
- Early Childhood through Adolescence (All Ages)

Students may pursue a supplemental Bilingual/Bicultural Education and/or English as a Second Language license by completing a minor in Humanistic Studies with an emphasis in linguistics and any additional requirements set by the Wisconsin Department of Public Instruction. Contact the Professional Program in Education for a full list of certification requirements.

UW-Green Bay's teacher education program provides prospective teachers with an opportunity to work in a variety of educational settings throughout their program of study. These school-based experiences will include work with various ethnic, cultural and economic groups, and children with exceptional educational needs.

Who Should Seek an Education Major or Minor?

To declare a major or minor in Education, students must first be admitted to the Professional Program in Education. The process and requirements are listed below. Students must enjoy being around children and adolescents. However, a love of children does not guarantee a love of teaching! Teaching is a demanding but extremely rewarding profession. The best teachers are those who pursue a love of learning that does not end at graduation. Teaching is a calling, a commitment to educating, and not just a job.

Students interested in pursuing an Education major or minor must have the ability to communicate, inspire trust and confidence, and motivate students, as well as understand their educational and emotional needs. They also should be organized, dependable, patient, and creative.

Majors and Minors

For the student majoring in Education, a minor is required only when pursuing a Middle Childhood through Early Adolescence (Ages 6-12/13) license. Students thinking about teaching at the middle or high school level complete a minor in Education and major in the area they want to teach. Students must have a passion for their major program of study and a desire to actively engage others in the learning process.

Knowledge and Skills Gained in the Major and Minor

The requirements for both the Education major and minor include courses that address today's concerns in education: changes in the schools and schooling, changes in the nature and nurture of students, and changes in society and the workplace. Early clinical experiences allow prospective teachers to observe and participate in actual educational settings. These experiences will often include working with students from various ethnic, cultural and economic groups, adult learners, and exceptional needs children.

Students will learn and understand the central concepts, tools, and structures of their discipline. Students will also understand how children learn and develop and how children differ in their learning abilities. Teaching techniques and strategies of instruction are taught not only to educate children on subject matter, but also in an effort to encourage critical thinking and problem-solving.

What Can You Do with a Major or Minor in Education?

Education is a professional program, which primarily educates students to become entry-level teachers. However, there are many other career opportunities in education. The following are some but certainly not all of the career opportunities in the field of education: day care administrator, education management specialist, educational sales representative, education and training administrator, elementary school teacher, kindergarten teacher, librarian, preschool administrator, secondary school teacher, and tutor.

Program Admission Process and Requirements

Admission to the program is a two-step process. The first step is to be admitted as a candidate. Step two is final admission to the program. Complete information about admission requirements and all application materials can be obtained from the Education Program Office or on the program website (<http://www.uwgb.edu/education/>).

Applications for candidacy must be completed and submitted near the beginning of each semester for admission starting the next semester. A committee of Education program faculty reviews applications and makes admission decisions based on the criteria described below. Meeting the minimum requirements does not guarantee admission as a program candidate.

The process and requirements for admission as a candidate in the Professional Program in Education are as follows:

1. Apply and be accepted to the University of Wisconsin-Green Bay.
2. Complete a minimum of twenty-eight (28) university credits with a cumulative grade point average of at least 2.75.
3. Demonstrate communication competencies in Reading, Writing and Math through a variety of testing options and/or coursework. A complete list of accepted options can be found on the Application Process and Requirements section of the website (<http://www.uwgb.edu/education/admissions/application-process-and-requirements/>).
4. Complete EDUC 208 with a grade of "C" or better. The completion of EDUC 206 with a grade of "C" or better is strongly recommended at the time of application.
5. Complete and submit an Application for Candidacy with supporting documentation to the UW-Green Bay Professional Program in Education.

Only students who are candidates can apply for final admission to the program. A committee of Education program faculty members reviews applications and makes decisions on final admission based on the criteria described below. Meeting the minimum requirements does not guarantee final admission to the program.

The process and requirements for full admission to the program are as follows:

1. Be admitted as a teacher education program candidate.
2. Successfully complete all required courses in candidacy block including EDUC 290 with a grade of B or better.
3. Complete and submit an Application for Admission to the Professional Education Program.
4. Submit the K-12 Teacher Recommendation Form to the Education Program Office.
5. Submit the UW-Green Bay Instructor Recommendation Form to the Education Office.

Undergraduate - Graduate Accelerated Program Track

Following full admission to the education program, undergraduate students may apply to participate in an Undergraduate-Graduate Accelerated track.

Students meeting the requirements may request to enroll in coursework at the graduate level that will directly apply to their undergraduate degree and teaching license. Following graduation, students can request admission to the Master of Applied Leadership in Teaching and Learning graduate program and apply up to 9 previously earned graduate credits to this program of study. Once accepted to the graduate program, students adhere to all graduate student expectations and pay full graduate tuition rates.

Requirements for participation include:

- Full admission to the Professional Program in Education
- Junior standing at the completion of semester 1 in the Professional Program in Education
- Cumulative GPA of 3.25
- Education Faculty recommendation

A committee consisting of graduate faculty will review student applications for acceptance before enrollment at the graduate level may occur.

Applications must be submitted by October 1 or March 1 for participation in the following semester.

Teacher Licensing Requirements and Preparation

Students planning to pursue a teaching license should contact the Education Program Office, (920) 465-2137. Teacher licensing requirements are very specific and require ample credit hours. Also, Department of Public Instruction requirements change from time-to-time, making program requirements subject to change. Students must meet any new requirements before a license will be awarded. Students are responsible for being aware of current licensure requirements.

In addition to the requirements listed here, there are regulations about time limits, grade point averages, test scores and other program completion requirements. Credit hours necessary to fulfill the requirements for specific licenses vary, depending upon the major and/or minor selected, age level licensure sought, and other factors. The Education Office can provide specific requirements.

Individuals who already hold a bachelor's degree and are interested in pursuing a teaching license should contact the Education Office regarding special requirements that apply to them.

Following are summaries of academic program components required for each of the five teaching licenses offered at UW-Green Bay. A detailed listing of specific licensure requirements can be obtained from the Education Program Office.

Early Childhood (Ages 0-8) and Early Childhood through Middle Childhood (Ages 0-11)

- UW-Green Bay general education requirements
- Interdisciplinary major in Education
- Professional education course sequence
- Student teaching

Middle Childhood through Early Adolescence (Ages 6-12/13)

- UW-Green Bay general education requirements
- Interdisciplinary major in Education
- Approved minor
- Professional education course sequence
- Student teaching

Early Adolescence through Adolescence (Ages 10-21)

- UW-Green Bay general education requirements
- Content area major
- Interdisciplinary minor in Education
- Professional education course sequence
- Student teaching

Early Childhood through Adolescence (All Ages)

- For licenses in art, music, foreign languages, theatre only
- UW-Green Bay general education requirements
- Selected content area major
- Interdisciplinary minor in Education
- Professional education course sequence
- Student teaching

Students may study abroad or at other campuses in the United States through UW-Green Bay's participation in international exchange programs and National Student Exchange. Travel courses are another option for obtaining academic credits and completing requirements. For more information, contact the Office of International Education at (920) 465-2190 or see <http://www.uwgb.edu/international/>.

Major Area of Emphasis (p. 146)

Students must complete requirements in one of the following areas of emphasis:

- Early Childhood to Middle Childhood
- Middle Childhood to Early Adolescence
- Accelerated - Integrated with graduate Applied Leadership for Teaching and Learning program

Minor Area of Emphasis (p. 148)

Students must complete requirements in one of the following areas of emphasis:

- Early Childhood to Adolescence
- Early Adolescence to Adolescence

Pao Lor; Professor; Ph.D., University of Wisconsin-Madison

Christin A DePouw; Associate Professor; Ph.D., University of Illinois at Urbana-Champaign

Mary N Gichobi; Associate Professor; Ph.D., Iowa State University

Timothy U Kaufman; Associate Professor; Ph.D., Loyola University of Chicago

Mark T Kiehn; Associate Professor; Ph.D., University of Colorado-Boulder

Miranda L Schornack; Assistant Professor; Ph.D., University of Minnesota-Twin Cities

Education Major

Area of Emphasis

Students must complete requirements in one of the following areas of emphasis:

Electrical Engineering

(Bachelor of Science)

UW-Green Bay Engineering

One of the fastest-growing regions in the state and the Midwest for engineering jobs, Northeast Wisconsin will see tremendous growth in the need for and recruitment of new engineers. This region has the most open positions for engineers in the state and has seen an 18% increase in demand for engineers since 2010. Engineering as a career focuses on theoretical aspects of mathematical, scientific and engineering principals. New professionals

with a Bachelor of Science in Electrical Engineering from UW-Green Bay will be perfectly-timed and well-prepared to meet the swell in demand for engineers, leading to high-paying, rewarding careers in some of the region's most sought after employers.

Electrical Engineering

The University of Wisconsin-Green Bay is proud to announce the newest engineering program in Northeast Wisconsin, the Electrical Engineering program. Part of the College of Science, Engineering and Technology (CSET) and offered through the Richard J. Resch School of Engineering (RSE), the Bachelor of Science (B.S.) in Electrical Engineering is designed as a cutting-edge program that will offer students individualized attention from award-winning professors, a hands-on education with state-of-the-art equipment, and opportunities for research and internships with some of the largest companies and employers in the region.

Electrical engineering is the application of scientific and mathematical principles to the design, manufacture, and control of structures, machines, processes, and systems. In the past, the work of electrical engineers has had a direct and vital impact on people's lives. Electrical engineers have been responsible for the creation of electric power, modern electronics, computers, electronic communication systems, modern flight controllers, automated manufacturing, and medical diagnostic tools. An electrical engineering education continues to provide opportunities for solving problems of great social significance and for increasing people's quality of life. The electrical engineering program spans the disciplines of electronics, computers, circuits, electromagnetic fields, power systems, controls, communications, and signal processing.

Students will benefit from relationships with local technical colleges, and local industry to complete a B.S. in engineering in the Northeast Wisconsin area. Students may start earning their degree at UW-Green Bay or local technical colleges to give maximum flexibility in degree completion. In addition, the Northeast Wisconsin Educational Resource Alliance, NEW ERA, has established advisory boards linking leaders in regional industry and participating institutions to the major. Through these relationships students will have many opportunities for internships, co-op experiences, and employment after graduation.

Nabila Rubaiya; Lecturer; M.S., University of Wisconsin - Milwaukee

Electrical Engineering Technology

(Bachelor of Science)

UW-Green Bay Engineering Technology

Combine hands-on learning with academic coursework and get ready for high-demand jobs in the growing field of engineering technology. The University partners with regional leaders and technical colleges so that you will be prepared for an ever-changing industry. Get the technical skills that will make you an expert and the critical-thinking skills that will make you indispensable.

Engineering Technology Programs Mission

All of the Engineering Technology programs (Electrical, Mechanical and Environmental) include a strong liberal arts base along with a number of hands-on experiences, including a capstone experience or internship that often will be working with businesses and organizations within the community.

Electrical Engineering Technology

Electrical engineering technology (EET) is the field that implements and applies principles of electrical engineering. With a greater focus on application and implementation, electrical engineering technologists help design, develop, test, and manufacture electrical and electronic equipment such as communication equipment, radar and industrial systems, medical monitoring equipment, control devices, and computer technology. As the largest branch of engineering

technology, it includes a diverse range of disciplines including electronics, embedded systems, control systems, instrumentation, telecommunications, and power systems.

The Bachelor of Science (B.S.) degree in Electrical Engineering Technology at UW-Green Bay is a professional program that prepares students for careers in electrical engineering technology with the technical and managerial skills necessary to enter careers in the design application, installation, manufacturing, operation, and maintenance of electrical systems. Students specialize in product improvement, manufacturing, construction, and operational engineering functions. The focus of the program is the application of engineering principles to the solution of practical problems. Students will develop skills in hands on application labs and courses that explore the fundamentals of electronics, mathematics, physics, computers, and control systems. Teamwork, technical writing, and project management are also emphasized throughout the curriculum. The goal of the major is to develop well rounded engineering technologists that can adapt and succeed in a highly competitive workplace.

Students will benefit from relationships with local technical colleges, and local industry to complete a B.S. in engineering technology in the Northeast Wisconsin area. Students may start earning their degree at UW-Green Bay or local technical colleges to give maximum flexibility in degree completion. In addition, the Northeast Wisconsin Educational Resource Alliance, NEW ERA, has established advisory boards linking leaders in regional industry and participating institutions to the major. Through these relationships students will have many opportunities for internships, co-op experiences, and employment after graduation.

Electrical Engineering Technology Program Learning Outcomes

1. Program graduates will secure and maintain employment in appropriate EET positions industry-wide and perform all functions assigned to an electrical engineering technologist.
2. Graduates will apply their knowledge of mathematics, science, engineering technology, and computing to identify, analyze, and solve problems pertaining to design, development, and implementation of electronic systems.
3. Graduates will exhibit a desire for life-long learning through higher education, technical training, teaching, membership in professional societies, and other developmental activities and will achieve positions of increased responsibility through these activities.
4. Graduates will demonstrate high levels of oral and written communication skills, critical thinking, responsibility and ethical behavior, teamwork and appreciation for diversity, and leadership in their careers.

English

(Bachelor of Arts)

Courses in English develop students' understanding of important works of American, English, and world literatures, give them awareness of – and appreciation for – our literary heritage, provide them with historical and theoretical perspectives, and deepen their insight into their own experience. These courses also develop students' ability to express their ideas orally and in writing and to conduct research. The English program also offers courses in the writing of poetry and fiction, and an emphasis in creative writing.

Students enroll in English classes for a wide variety of reasons, ranging from personal growth and enrichment to preparation for a profession or career. Graduates in English have found employment in teaching, personnel work, public relations, business management, journalism, publishing, and many other fields requiring a strong liberal arts background and communication skills.

Students majoring in English often select minors in Humanistic Studies, Design Arts, or Arts Management, but may choose Human Development, Democracy and Justice Studies, or other appropriate programs. Students majoring in English who wish to teach in the secondary public schools must minor in Education.

Students seeking information on teacher certification should contact the Education Office.

Learning Outcomes

Students in the English major will:

- Critically read and interpret diverse literary texts using literary techniques, contextual information, scholarly research, and/or theoretical lenses.
- Create original works that demonstrate a unique voice, argument, and/or point of view and that reflect familiarity with key themes in the broader fields of literary studies and creative writing.
- Understand complex social and historical contexts that have shaped and continue to shape literature.
- Critique the systems of power and privilege that have shaped literature and our relationship to those systems.

In addition to the above-listed Outcomes for English majors, students in the Creative Writing emphasis in English will:

- Create, draft, and revise works in multiple genres and forms.
- Analyze the techniques and construction of various written expressions.
- Critique works by peers and published authors alike in various classroom settings, including the writing workshop.
- Situate their work within a larger audience of readers and publishing markets.

Major Area of Emphasis (p. 160)

Students must complete requirements in one of the following areas of emphasis:

- Creative Writing
- English Education
- Literature

Minor

Code	Title	Credits

ENGLISH 436	Major Author(s)

Total Credits **36**

¹ Satisfied for students with ACT English score of 32 or higher.

² Because course content may vary, some of the above may be repeated for credit. See adviser.

The courses used to fulfill the required 6 credits of supporting-level English electives and the 21 credits of upper-level English electives must be distributed so that the five criteria below are satisfied.

Criterion 1

Choose a minimum of 3 credits (either upper level or supporting level) from any primarily pre-1800 British literature course besides Shakespeare, such as:

Code	Title	Credits
ENGLISH 214	Introduction to English Literature I	3
ENGLISH 320	Major Drama	3
ENGLISH 335	Literary Eras	3

Criterion 2

Choose a minimum of 3 credits (either upper level or supporting level) from any primarily post-1800 British literature course, such as:

Code	Title	Credits
ENGLISH 215	Introduction to English Literature II	3
ENGLISH 315	The British Novel	3
ENGLISH 335	Literary Eras	3
ENGLISH 436	Major Author(s)	3

Criterion 3

Choose a minimum of 6 credits (either upper level or supporting level) from any American literature course, such as:

Code	Title	Credits
ENGLISH 216	Introduction to American Literature I	3
ENGLISH 217	Introduction to American Literature II	3
ENGLISH 322	Major Poetry	3
ENGLISH 331	Major American Prose Fiction	3

Criterion 4

Choose a minimum of 3 credits on the Study of Language, such as:

Code	Title	Credits
ENGLISH 226	Grammar	3
ENGLISH 340	History of the English Language	3

HUM STUD 321	Sociolinguistics	3
Minimum of six credits of college-level, non-English language courses		

Criterion 5

Choose a minimum of 3 credits (either upper level or supporting level) from any world literature course, such as:

Code	Title	Credits
ENGLISH 218	World Literatures	3
ENGLISH 219	World Literatures II	3
ENGLISH 338	World Literatures	3

Environmental Engineering Technology

(Bachelor of Science)

UW-Green Bay Engineering Technology

Combine hands-on learning with academic coursework and get ready for high-demand jobs in the growing field of engineering technology. The University partners with regional leaders and technical colleges so that you will be prepared for an ever-changing industry. Get the technical skills that will make you an expert and the critical-thinking skills that will make you indispensable.

Engineering Technology Mission

All of the Engineering Technology programs (Electrical, Mechanical and Environmental) include a strong liberal arts base along with a number of hands-on experiences, including a capstone experience or internship that often will be working with businesses and organizations within the community.

Environmental Engineering Technology

Environmental engineering technology is the application of engineering principles and interdisciplinary environmental sciences to address challenges associated with human impacts on the environment. This field characterizes the dynamic relationship between human activity and the environment to determine strategies to minimize negative impacts. Career opportunities as an environmental engineering technologist vary greatly including municipal and industrial treatment facility technologists, laboratory and environmental quality technicians, health and safety managers, environmental consultants, and sustainability managers for industry and governmental agencies.

The Bachelor of Science (B.S.) degree in Environmental Engineering Technology at UW-Green Bay is an interdisciplinary program that prepares students for careers in applied environmental engineering using critical problem solving skills needed in regional and national industries, manufacturing, governmental, and engineering services firms. The focus of the program is the application of engineering principles to the solution of practical problems. Students will develop skills in hands on applications and interdisciplinary coursework in engineering, mathematics, geoscience, chemistry, physics, and biology applied to a variety of environmental challenges. Students examine the effects of pollution on humans and ecosystems, form strategies to improve processes to prevent or minimize negative effects, and develop sustainable solutions to using available resources. Teamwork, technical writing, and project management are also emphasized throughout the curriculum. The goal of the major is to develop well rounded engineering technologists that can adapt and succeed in a highly competitive workplace.

Students will benefit from relationships with local technical colleges and local industry to complete a B.S. in engineering technology in the Northeast Wisconsin area. Students may start earning their degree at UW-Green Bay or local technical colleges to give maximum flexibility in degree completion. In addition, the Northeast Wisconsin Educational Resource Alliance, NEW ERA, has established advisory boards linking leaders in regional industry and participating institutions to the major. Through these relationships students will have many opportunities for internships, co-op experiences, and employment after graduation.

Environmental Engineering Technology Program Learning Outcomes

1. Program graduates will be employed as an environmental engineering technologist and perform all functions assigned to an environmental engineering technologist.
2. Graduates will apply multidisciplinary approaches including engineering, chemistry, mathematics, physics, geosciences, and biology to manage the unique challenges and balance the competing social, political, economic, and technical goals of environmental problems and solutions.
3. Graduates will exhibit a desire for life-long learning through higher education, technical training, teaching, membership in professional societies, and other developmental activities and will achieve positions of increased responsibility through these activities.
4. Graduates will demonstrate high levels of oral and written communication skills, critical thinking, responsibility and ethical behavior, and leadership in their careers.
5. Graduates will function effectively both as a leader and as a member of project teams and demonstrate an appreciation for diversity.

Environmental Policy and Planning

(Bachelor of Science)

Environmental Policy and Planning is an environmental studies program based in the social sciences. It is designed to prepare students for a variety of challenging professions involving the planning, analysis, design, and administration of policies and programs dealing with the natural and human-made environment. Students who major in Environmental Policy and Planning consider environmental challenges through the lens of law, politics, and economics. The program provides students with a solid background in environmental policy, environmental law, environmental planning, environmental

design, and an introduction to sustainable development and community-based environmental protection. It also prepares students for graduate work in environmental studies, public policy, public administration, law, community planning, and related fields.

Environmental Policy and Planning majors engage in both theoretical and applied study in their courses, and have flexibility to choose from different emphases. Students may serve as interns in planning agencies in local governments, work in teams with a professor to conduct community planning and design, work with environmental organizations, or develop programs for sustainable communities. The three program emphases from which majors can choose are public policy, environmental planning (managing resources in the natural environment), and environmental design (creating the built environment).

The major in Environmental Policy and Planning consists of two sets of requirements: 1) required supporting and analytical courses and 2) upper-level courses within an area of emphasis. Students should discuss these Emphases with their program advisor when establishing an academic plan.

The **public policy emphasis** focuses on environmental policy development and implementation; methods of policy analysis; and political, administrative, legal, and economic issues in environmental policy. It provides students with a strong background in the public policy and administrative aspects of environmental studies. This emphasis prepares students for employment in the public, nonprofit, and private market sectors as environmental policy analysts, specialists in public information, environmental management, government relations, and related careers, as well as for graduate work in environmental studies, public policy, public affairs, administration, and law.

The **environmental planning emphasis** focuses on sustainable and resilient land use and planning methods for human settlements and our surrounding environments in an era of climate change and resource scarcity. This emphasis teaches you skills in management of land and natural resources, techniques in geographic information systems, and how to adapt to the accelerating human influences on our environment. Students interested in learning skills in designing and planning community redevelopment; protection and management of farmland, forests, air, waters, flora and fauna at the community and regional levels; and developing comprehensive environmental impact studies may want to select this emphasis. It helps prepare students for careers and graduate work in environmental planning, community and regional planning, community-based environmental management, geography, and related fields.

The **regional planning and environmental design emphasis** focuses on creative problem-solving techniques in defining, analyzing, and solving problems in the built environment at human scale. Emphasizes basic graphic and verbal presentation techniques and relationships between form, the natural environment, people and function. Students interested in developing skills in the planning and urban design at the community and regional levels may want to select this emphasis. It helps prepare students for careers and graduate work in architecture, environmental planning, urban and regional planning, and community-based non-profit organizations that work in community development, geography, and related fields.

A **minor in Environmental Policy and Planning** is similar to the major in developing knowledge and skills in planning, decision-making, public policy, environmental design, political and economic processes, as well as the analytic capacities to participate in decision-making. An interdisciplinary minor in Environmental Policy and Planning is a good choice for students who wish to major in Environmental Science, Public Administration, Political Science, Economics, Urban Studies, Democracy and Justice Studies, or a number of other programs.

Considering a Double Major or Certificate?

Some students may want to consider a double major, combining Environmental Policy and Planning with Public Administration. Other popular second majors include Political Science, Urban Studies, and Economics. A double major or a minor in one of these fields complements the Environmental Policy and Planning curriculum, and makes students stronger candidates when seeking careers or entry into graduate programs.

A certificate in Environmental Sustainability and Business fits well with a major or minor in Environmental Policy and Planning. Likewise, students interested in working in a non-governmental or non-profit organization might explore the certificate in Nonprofit Management. Students should contact a faculty adviser early in their academic careers for advice on these options.

Students may study abroad or at other campuses in the United States through UW-Green Bay's participation in international exchange programs and National Student Exchange. Travel courses are another option for obtaining academic credits and completing requirements. For more information, contact the Office of International Education at (920) 465-2190 or see <http://www.uwgb.edu/international/>.

Major Area of Emphasis (p. 171)

Students must complete requirements in one of the following areas of emphasis:

- Regional Planning & Environmental Design
- Environmental Planning
- Environmental Policy
 - Environmental Policy (Accelerated) / Integrated with graduate Environmental Science & Policy program

Minor

Code	Title	Credits
Supporting Courses		11
Required:		

GEOG 250	Introduction to Geographic Information Systems (GIS)
PU EN AF 102	Environment and Society
Choose two of the following courses:	
ECON 203	Micro Economic Analysis
PU EN AF 202	Introduction to Public Policy
PU EN AF 215	Introduction to Public Administration
Upper-Level Courses	14-15
Complete these required courses:	
PU EN AF 301	Environmental Politics and Policy
PU EN AF 322	Environmental Planning
Complete three of the following courses:	
ECON 305	Natural Resources Economic Policy
GEOG 350	GIS in Public and Environmental Policy
PU EN AF 306	Regulatory Policy and Administration
PU EN AF 323	Sustainable Land Use
PU EN AF 324	Transitioning to Sustainable Communities
PU EN AF 351	Water Resources Policy and Management
PU EN AF 378	Environmental Law
PU EN AF 379	Natural Resources Policy, Law, and Administration
PU EN AF 408	Public Policy Analysis
PU EN AF 431	Building Sustainable Landscapes
PU EN AF 497	Internship

Total Credits **25-26**

Curriculum Guide

An academic plan for a major in Public Administration may vary, depending upon student interests, needs, and specialization within the major. The courses listed below, and the sequence in which they are listed, represent the faculty's recommendation for the general array of courses taken by all students in the program. Of particular importance is that lower-level prerequisites be completed before enrollment in upper-level courses. Students should pay particular attention to those required courses included in their academic plans that are offered only in alternate years.

As part of the general education requirements of the University, all majors will be completing 36 to 42 credits of work, including 9 credits or 3 courses each in the humanities, natural sciences, and social sciences, 3 credits in Other Cultures, 3 credits of Ethnic Studies and 4 courses certified for the Writing Emphasis requirement. Some of these requirements are satisfied by courses taken as part of the major. Beyond these, we encourage Public Administration majors to discuss their preferences for general education courses, as well as other electives, with the PEA faculty. In general, we recommend that students become thoroughly acquainted with the major ideas, findings, and methods of inquiry in each domain of knowledge. We especially encourage majors to take introductory courses in the social sciences beyond those required as lower-level prerequisites (e.g., in sociology, psychology, and political science).

An example: Four year plan for Environmental Policy and Planning Major

120 credits necessary to graduate.

Plan is a representation and categories of classes can be switched. Check with your advisor.

- # Students must be granted permission through the department to enroll in graduate level coursework. For more information, contact the Environmental Science & Policy graduate office or refer to the graduate catalog (<http://catalog.uwgb.edu/graduate/general-information/academic-rules-regulations/undergrad-in-accelerated/>).

Environmental Science

(Bachelor of Science)

The Environmental Science major prepares students to analyze, understand, and solve environmental problems. While many universities are just beginning to recognize the need for environmental science programs, UW-Green Bay has over 50 years of teaching and research experience in the field. This Environmental Science program was one of the first in the nation and the interdisciplinary focus allows students to have a diverse education.

The Environmental Science major is interdisciplinary, emphasizing an integrated approach to knowledge in the field. Because the study of environmental problems requires a sound understanding of scientific principles, the Environmental Science major is grounded in the natural sciences and mathematics. The curriculum also includes a social science component, enabling students to gain an understanding of environmental economic and policy issues. Field experiences, internships, practicums, independent research and travel courses are also emphasized throughout the program.

This major helps students: 1) understand fundamental physical and biological processes of the natural environment; 2) recognize relationships between humans and ecosystems at local, regional, and global scales; 3) apply knowledge from multiple disciplines to environmental challenges and opportunities; 4) build practical skills for scientific problem-solving, including familiarity with laboratory and field instrumentation, ability to use current computer technologies, and experience in statistical modeling techniques; 5) demonstrate competency in collecting, managing, evaluating, interpreting, and communicating information through hands-on research; and 6) critically evaluate strategies for sustainable management and restoration of environmental systems.

Students who plan to pursue this major will apply science and mathematics in their course work. Courses in biology, chemistry, geoscience, mathematics, and physics provide the needed background. They receive hands-on and practical learning experiences in both the laboratory and the field. A significant number of graduates of this major gain entry-level positions in the environmental science field. About one-third of these positions are in the public sector and two-thirds are in the private sector, including positions with industry, business, and engineering consulting firms. Numerous graduates have also successfully completed master's and doctoral degrees.

Faculty members are actively addressing current environmental problems and their solutions through research at the regional, national and international levels. This research keeps them up to date on current trends and topics in the field, while providing opportunities for undergraduates to become involved in their research projects and gain valuable knowledge and experience. Faculty members are highly involved in the students' education, both inside and outside of the classroom and laboratories.

Environmental Science students have access to modern computer facilities which are continually upgraded. Computing software resources emphasizing geographic information systems (GIS), mathematical modeling and statistical analysis tools also are available. In addition to general-access computer laboratories, students can also use a computer laboratory dedicated to the sciences. Students wishing to gain hands-on field experiences have access to the Cofrin Center for Biodiversity, which includes the 290-acre Cofrin Memorial Arboretum on campus and several natural areas in the region including Point au Sable, Tofts Point and Kingfisher Farms. The Gary A. Fewless Herbarium, and the Richter Museum of Natural History on campus include extensive collections of plant and animal specimens. Funding opportunities are also available through the Biodiversity Center for independent student research projects.

A variety of equipment is available for environmental measurements and monitoring. Laboratory instrumentation enhances student opportunities to perform chemical analyses which are important in environmental monitoring. Such instrumentation includes mass spectrometers, infrared and UV-visible spectrophotometers, nuclear magnetic resonance spectrometers, gas chromatographs, ion chromatographs, and high-performance liquid chromatographs. In addition to opportunities to monitor air and surface-water quality, students also have the opportunity to monitor ground water; three wells have been drilled on campus specifically for that purpose.

As industries recognize their responsibility to help create and maintain a sustainable environment, often achieving efficiencies in the process, they create positions dealing with waste management, pollution reduction, and other environmental responsibilities. Many UW-Green Bay Environmental Science graduates find employment in these industries or go on to advanced study in environmental science or other scientific disciplines. The following list represents some careers that have been pursued by Environmental Science graduates: agricultural scientist, botanist, ecologist, forest ranger, oceanographer, agricultural technician, engineering technician, forester, air and water quality manager, environmental analyst, park ranger, air pollution analyst, environmental consultant, environmental educator, geologist, project manager, environmental engineer, geophysicist, biologist, hazardous waste manager, hydrologist, environmental lawyer, chemical technician, soil conservation technician, chemist, management consultant, teacher, meteorologist, urban and regional planner, civil engineer, environmental planner, microbiologist/wastewater plant operator, natural resource specialist, wildlife manager, conservationist, zoologist.

Students may study abroad or at other campuses in the United States through UW-Green Bay's participation in international exchange programs and National Student Exchange. Travel courses are another option for obtaining academic credits and completing requirements. For more information, contact the Office of International Education at (920) 465-2190 or see <http://www.uwgb.edu/international/>.

Major Area of Emphasis (p. 179)

Students must complete requirements in one of the following areas of emphasis:

- General
- Environmental Science (Accelerated) - Integrated with graduate Environmental Science & Policy program

Minors (p. 181)

- Environmental Science Minor
- International Environmental Studies Minor

Curriculum Guide

The following curriculum guide is for a four-year Environmental Science degree program and is subject to change without notice. Students should consult an Environmental Science program advisor to ensure that they have the most accurate and up-to-date information available about a particular four-year degree option.

An example: Four year plan for **Environmental Science Major**

120 credits necessary to graduate.

Plan is a representation and categories of classes can be switched. Check with your advisor.

Engineering Dual Degree

Cooperative Program in Civil & Environmental Engineering with University of Wisconsin-Milwaukee

Advisers — John Katers, professor; Patricia A. Terry, professor and coordinator

Website: www.uwgb.edu/nas/ (<http://www.uwgb.edu/nas/>)

Dual Degree Program

UW-Green Bay and UW-Milwaukee also offer a Dual Degree Program in environmental science and civil and environmental engineering. Under this program a student completes three years of study in the Environmental Science major at UW-Green Bay, then transfers to UW-Milwaukee and continues

for two years in the civil/environmental engineering major. Upon completion of an outlined series of courses, the student receives both a B.S. degree from UW-Green Bay in Environmental Science and a B.S. degree from UW-Milwaukee in Civil/Environmental Engineering. Students wishing to enroll in this program should see an engineering adviser prior to registration in their freshman year.

Participants in the NEW Engineering Program typically complete 60 to 72 credits at UW-Green Bay toward the degree. This includes the completion of 18 credits of general education requirements specific to this program:

- 3 credits minimum in the arts
- 6 credits minimum in the humanities
- 6 credits minimum in the social sciences
- 3 credits in cultural diversity

General education courses are required of all students. These courses complement and enhance major coursework for additional exposure to other areas of knowledge and bring an understanding of the relationship among and between subject areas. At least 9 of the 18 required credits must be from courses at the 200-level or above or from 100-level courses that require at least one prerequisite.

A grade of C or better in WF 105 will satisfy UW-Milwaukee's English composition requirement.

UW-Green Bay students are eligible to apply for advancement into the major at UW-Milwaukee at the point of transfer. The UW-Green Bay Academic Advising Office has forms. The filing deadlines are October 1 for spring semester, February 15 for summer session, and June 1 for fall semester.

For information on other engineering options, refer to the Preprofessional Programs of Study section of this catalog or contact one of the engineering advisers listed above.

Requirements for the Cooperative Program

All engineering and dual degree majors must take:

Code	Title	Credits
Required Courses		
CHEM 211	Principles of Chemistry I	4
CHEM 212	Principles of Chemistry II	4
CHEM 213	Principles of Chemistry I Laboratory	1
CHEM 214	Principles of Chemistry II Laboratory	1
ENGR 213	Mechanics I	3
ENGR 214	Mechanics II	3
MATH 202	Calculus and Analytic Geometry I	4
MATH 203	Calculus and Analytic Geometry II	4
MATH 209	Multivariate Calculus	4
PHYSICS 201	Principles of Physics I	5
PHYSICS 202	Principles of Physics II	5
WF 100	First Year Writing	3
Total Credits		41

See an adviser for additional requirements in aerospace, chemical, nuclear, and petroleum engineering.

¹ An international Internship or a Study Abroad experience with an emphasis on environmental issues in the area of specialization. Study Abroad experiences may include but are not limited to the following programs: Chile (Environmental Sciences and Sustainability), Germany (RheinMain University of Applied Sciences) or Panama (Biology and Environmental Sciences) or any other approved Travel Course dealing with environmental issues and/or sustainability.

Finance

(Bachelor of Business Administration)

The Finance major at UW-Green Bay is designed to provide future financial professionals with practical and theoretical knowledge of various financial components, such as investments, corporate finance, capital markets, banking, risk management, international financial management, and personal financial planning. Graduates from the Finance program will be prepared to work as financial analysts, financial managers, financial advisors, security analysts, portfolio managers, insurance underwriters, stock brokers, mortgage underwriters, bank branch managers, and in other finance-related positions.

The program provides considerable exposure to the liberal arts and develops the critical thinking, problem-solving, interpersonal, communication, quantitative and computer skills needed by graduates to successfully serve as leaders within modern organizations. The program also addresses contemporary organizational issues such as global competition, social responsibility and ethics, sustainability, and the relationship between organizations and various environmental forces.

The supporting and core courses provide breadth and introduce each student to the foundations of business knowledge, including communication, economics, statistics, computers, accounting, finance, management, and marketing. Subject-focal upper-level courses prepare Finance students for

their professional careers by providing in-depth coverage of major areas in Finance, including Investments, Corporate Finance, Risk Management, Real Estate Finance, Financial Markets and Institutions, International Financial Management, and Personal Financial planning.

Finance students have extensive opportunities to meet business professionals and gain practical experience. Students will have access to the Willie D. Davis Finance and Investment Lab that is a state of the art facility that provides students with the opportunity to apply finance and investment knowledge in real-time. Students can apply to be part of the Student Managed Investment Fund (SMIF) course, in which students actively research and manage real dollars in order to acquire the skills necessary to be successful in the investment industry. Additionally, a vibrant Student Finance Association supports these efforts and helps students to meet others with like interests. Students have access to the Center for Personal Financial Planning; a hub station for financial literacy and financial wellness. It seeks to increase awareness of personal finance through a trusted space welcomes creative and academic student collaborations and inspires community service and outreach. The center fosters alumni and industry partnerships and encourages students career advancement, housing the Personal Financial Planning Association student organization. Students can access peer-to-peer Financial Consulting, where personal financial planning students offer financial coaching on fundamental personal finance areas to their peers at UW-Green Bay, empowering students to achieve their financial goals. Students have the opportunity to broaden their professional networks as organizational members, or to develop their leadership skills through service as student officers. Finance faculty are experts in their field and encourage students to participate in internship programs through which students learn and earn credits while working in real business settings.

Entrance and Exit Requirements

Students can add a Finance major at any time with any number of credits through a simple online process. Students should contact their Professional Advisor listed under the Program Advisors on the right-hand side of the SIS to start the process. Students will be required to read and accept an Honor Code (pre-declaration form). For students adding a major offered in the Cofrin School of Business, a faculty mentor who specializes in their program will be listed under their Program Advisors in SIS.

Students must maintain a cumulative GPA of 2.5 to proceed in the course progression for a Finance major. Students intending to graduate with this major must have a minimum 2.5 cumulative grade point average. All students must meet this program exit requirements to graduate.

First Nations Studies

(Bachelor of Arts)

First Nations Studies reflects the holistic worldview of the indigenous people of Turtle Island (North America). First Nations Studies is committed to the study of First Nations culture, philosophy, history, language, and the social, economic, and political status of indigenous people and their communities. The program is designed to preserve and promote the identity and sovereign status of indigenous people through the study and practice of decolonization. The program places particular emphasis on the nations in our region, the Western Great Lakes.

First Nations Studies incorporates the teaching and learning approaches of tribal people, offering students a new way to learn within the academy. The program places emphasis on the oral tradition of First Nations people as preserved and shared by tribal Elders. Students take part in oral traditional learning experiences within the university classroom and, also, in tribal communities learning from tribal people. First Nations Studies teaching and learning is centered on the four areas of learning in the tribal world – history, culture, sovereignty, laws and policies, and indigenous philosophy.

The program is of interest to both American Indian and non-Indian students who wish to learn more about the traditional cultures and knowledge of indigenous people as well as the changes experienced by First Nations as a result of Euro-American contact.

The program offers a major and a minor. The minor strengthens numerous degrees including those in Business, History, Education, Social Work, Psychology, and the natural and social sciences. The degrees prepare students to live and work in an increasingly diverse community and also equip students with skills to work collaboratively and effectively with tribal governments and businesses.

Curriculum Guide

The following is a curriculum guide for a four-year First Nations Studies degree program and is subject to change without notice. Students should consult a First Nations Studies program advisor to ensure that they have the most accurate and up-to-date information available about a particular four-year degree option.

An example: Four year plan for **First Nations Studies**

120 credits necessary to graduate.

Plan is a representation and categories of classes can be switched. Check with your advisor.

French and Francophone Studies

The French and Francophone Studies program is designed to help students develop practical language skills while they learn about the literature, culture and people of France and the French-speaking world. Knowing French opens the door to all the other cultures of the world where French is widely spoken — in Africa, the Middle East, Europe, Indochina.

French is the only language other than English spoken on five continents. Like English, French is truly a global language. French is the first or second language in over 40 countries, France is the world's sixth largest economy, and is the official working language of the United Nations, UNESCO, NATO, the International Olympic Committee and many more similarly important world organizations. According to the most recent U.S. Census, 1.9 million Americans speak French in the home.

In recent years, the U.S. was the second largest direct investor in France, and in 2002, France was the second largest foreign investor in the U.S. French is the foreign language spoken by our largest trading partner (Canada). In 2000, the United States exported more to countries having French as a national language than to countries having any other foreign language. Exports to Canada alone in that year were greater than the combined exports to all countries south of the United States. Among foreign countries doing business in the U.S., France employs the third largest number of Americans.

The world invests in France: In 2003, France was the second largest destination of foreign investment in the world. France is a leader in science and technology (nuclear physics, AIDS research, automobiles, electronics, aerospace, transportation, telecommunications and more). More tourists visit France than any other country in the world.

The broad training that is part of a program in French and Francophone Studies (including written and oral communication skills, reading and analyzing texts, history, geography and social studies) is an excellent means to personal growth and intellectual enrichment. It is also a fine preparation for entrance into the professional world. French and Francophone Studies majors have developed successful careers in many areas of business, the service professions (such as law or teaching), and government.

Along with the regularly scheduled array of courses, the French and Francophone Studies program also offers students the opportunity to earn degree credits while studying abroad. UW-Green Bay sponsors a semester program in Bordeaux and, with faculty approval, accepts credits from numerous other study-abroad programs. On campus, students can have frequent contact with authentic cultural materials both inside and outside the classroom via the internet, the latest multimedia equipment, and international television and radio reception.

Students who begin their French and Francophone Studies at UW-Green Bay should enroll in FRENCH 101. The normal sequence of language courses is:

Code	Title	Credits
FRENCH 101	Introduction to the French Language I	4
FRENCH 102	Introduction to the French Language II	4
FRENCH 201	Intermediate French Language I	3
FRENCH 202	Intermediate French Language II	3
FRENCH 320	Intermediate Composition and Conversation	3
FRENCH 325	Advanced French Conversation and Composition	3

Those who have studied French in high school should select a course appropriate to their level by counting a year of high school work as equivalent to one semester of college work, or they should consult a French adviser. Students seeking teacher certification must be admitted to the Education Program and should contact the Education Office for information and further requirements.

Students may study abroad or at other campuses in the United States through UW-Green Bay's participation in international exchange programs and National Student Exchange. Travel courses are another option for obtaining academic credits and completing requirements. For more information, contact the Office of International Education at (920) 465-2190 or see <http://www.uwgb.edu/international/>.

Retroactive Credit

Degree seeking students who have taken a second language in high school or who have acquired knowledge of a second language elsewhere may earn up to 14 additional credits for their previous language study by completing a foreign language course beyond 101 level. With a grade of "B" or better, credit will be given in that language for all of the courses in that language preceding the one in which the student has enrolled, to a maximum of 14

credits; with a grade of "BC" or "C," half-credit will be given for the courses preceding the one in which the student has enrolled, to a maximum of seven credits.

For example, with four years of high school French, students who complete FRENCH 320, with a grade of "B" will receive 14 retroactive credits for FRENCH 101, FRENCH 102, FRENCH 201, and FRENCH 202 in addition to the three credits for FRENCH 320; students who complete the course with a "C" will receive seven retroactive credits for FRENCH 101 (2 of the total 4 credits), FRENCH 102 (2 of the total 4 credits), FRENCH 201 (1.5 of the total 3 credits), and FRENCH 202 (1.5 of the total 3 credits).

Requests for retroactive credits in a student's native language are not generally accepted.

To determine eligibility for retroactive credit, students must consult with the appropriate language program chair or course instructor who will advise them regarding which foreign language course they should take. If a student meets the criteria above, the course instructor must complete the Retroactive Credit Form and submit it to the Registrar's Office. The appropriate courses and corresponding credits will then be recorded on the student's transcript.

Retroactive credit will not be awarded based on a student's performance on any sort of test. This includes, but is not limited to, AP, CLEP, or Challenge exams. Retroactive foreign language credits may only be earned by satisfactorily passing a course at UW-Green Bay or through an approved College Credit in the High School program as described above.

Retroactive credits earned at any UW System institution or from St. Norbert College courses will be honored and granted to transfer students. Retroactive foreign language credits awarded by other institutions will not be granted to students who transfer to UW-Green Bay. Students may request an exception to this policy by submitting a written appeal to the language coordinator of the department they wish to receive credit from.

If you're repeating a course, contact the French and Francophone Studies program chair for further information on retroactive credits.

Minor Area of Emphasis (p. 189)

Students must complete requirements in one of the following areas of emphasis:

- French and Francophone Studies
- French and Francophone Studies for Students Seeking Teaching Certification

Geography

Geography is an academic discipline that systematically studies the location, variation and interrelations of natural and cultural features of the earth. Its study exemplifies the University's mission to emphasize interdisciplinary, problem-focused education because Geography examines the world and its problems with a view to comprehensive understanding and critical thinking.

Geography students gain a broad education encompassing the sciences and the liberal arts.

Geography offers technical training for students who wish to work as professional geographers in government or industry, and provides background for advanced work in business, economics, history, planning, political science, the humanities, or in the biological and earth sciences, depending upon a student's individual needs. Students who want preparation to teach should seek advice early from advisers in Geography and Education to make sure they complete all requirements.

Depending on their career goals, students might effectively combine Geography with programs in Business Administration, Environmental Policy and Planning, Urban Studies, Human Development, Democracy and Justice Studies, or Humanistic Studies.

Students in Geography can expect to become acquainted with current technology in the field through courses introducing them to the concepts and uses of geographic information systems (GIS). In addition, students develop spatial analytical skills that are applied to problem solving projects. In this light, students are encouraged to gain practical experience through internships with local agencies and organizations in the region and through practical course projects.

Students are also encouraged to take advantage of the opportunities offered in the two travel courses offered under Urban and Regional Studies that will satisfy the Geography minor. Students apply what they learn in the classroom to the international experience. Geography minors study urban and regional issues in Ecuador, South America and the Galapagos Islands. Students seeking information on teacher certification should contact the Education Office.

Laurel E Phoenix; Associate Professor; Ph.D., State University of New York - College of Environmental Science and Forestry*

Geoscience

(Bachelor of Science)

Geoscience is the study of Earth materials (e.g., rocks, minerals, soil, water, and air), the processes that shape and alter those components, and the interplay between the biosphere and the Earth. The program strongly emphasizes the fundamentals of geoscience, but also places special emphasis on groundwater management, soils, and other earth system processes.

The Geoscience program takes an application-focused, interdisciplinary approach, known as earth system science, in which the physical environment is investigated as many interacting systems. Earth system science emphasizes the interactions between the different systems that make up the Earth. Although earth system science is considered a new approach at many institutions, it has been an integral part of the Geoscience program since the very founding of UW-Green Bay. Interested students should also check Environmental Science course listings for several courses on soils, field geology, and ground water.

Geoscientists can find career opportunities in state and federal government agencies, consulting firms, and private industry. Demand for geoscientists will continue into the future, as demand for resources and energy grow with increasing population. Furthermore, responsible mining practices, remediation of contaminated sites, and forecasting the evolution of Earth conditions requires well-trained geoscientists with a broad understanding of how the Earth works.

Students interested in planning, natural resource or land management, or environmental policy issues typically select interdisciplinary minors in Environmental Science, Public and Environmental Affairs, or Urban and Regional Studies. For those interested in an earth system science perspective in business, Geoscience may also be combined with Business Administration. Many states and localities now require geoscience in their curricula, and high schools offering geoscience courses, in addition to the traditional science courses, is becoming the norm. Geoscience education includes geology,

astronomy, oceanography, and weather and climate — with the goal of fostering a better understanding of our home, and encouraging responsible stewardship of our planet. Those seeking teacher certification can pursue several options:

- They can pursue a broad-field science certification in Education and take Geoscience courses to match their interests and employment goals.
- Students interested in elementary and middle school teaching can take an Education major and Geoscience minor.
- Students interested in teaching at the secondary level can take a Geoscience major and Education minor.

All Education students should consult with advisers in Geoscience and Education early in their studies to make sure that their academic program meets all state requirements for certification. Careful planning is essential since the Education course requirements are substantial and state requirements change periodically. Students seeking teacher certification in Geoscience should seriously consider satisfying the certification requirements in another discipline as well, because certification in additional fields will increase their employment opportunities.

Major Area of Emphasis (p. 193)

Students must complete requirements in one of the following areas of emphasis:

- Geoscience Emphasis
 - Geoscience Emphasis (Accelerated) - Integrated with graduate Environmental Science & Policy program
- Geoscience Emphasis for Students Seeking Teaching Certification

Minor Area of Emphasis (p. 196)

Students must complete requirements in one of the following areas of emphasis:

- Geoscience Emphasis
- Geoscience Emphasis for Students Seeking Teaching Certification

Curriculum Guide

An example: Four year plan for **Geoscience Major**

120 credits necessary to graduate. Participation in field courses, the Geology Club, internships, and/or independent studies are highly recommended. Plan is a representation and categories of classes can be switched. Check with your advisor.

Total Credits		31

¹ Candidates for teacher certification are strongly urged to also take CHEM 212 and CHEM 214.

German

(Bachelor of Arts)

The German program provides students with the opportunity to develop communication skills in both written and spoken German along with an understanding of and appreciation for German literature and culture. Students developing linguistic and cultural proficiencies are challenged by a curriculum which includes a variety of courses in beginning, intermediate and advanced language, literature, cinema, culture, business and translation studies, as well as travel courses, independent study courses, and internship experiences.

Although many students choose to study German primarily for personal growth and intellectual enrichment, the program is designed to prepare students to enter a variety of careers in, for example, teaching, business, industry and government, and to provide a basis for further study at the graduate level. German language and culture studies are of great professional value in such fields as international business, communications, translating and interpreting, personnel work, public relations, management, education, music, art, philosophy, law, history, anthropology, theology, social work, politics and the travel industry. Furthermore, proficiency in a modern language and understanding of other cultures are essential for peace and prosperity in a mutually interdependent world.

All students in the German program are strongly encouraged to spend as much time as possible in German-speaking cultures; to study a semester or a year at UW-Green Bay's German exchange university, Kassel Universität or at another university in Hessen; and/or to participate in the winter or summer travel course in Germany. Students have the opportunity to interact with German exchange students, attend film series and weekly German conversation tables, and to participate in a variety of German Club events and trips. The UW-Green Bay Language Resource Center has interactive audio-visual equipment and computers to support students' language acquisition and cultural awareness.

German students interested in the humanities may choose to minor in Humanities; students interested in teaching may choose an Education minor; those interested in business often choose Business Administration or International Business; and those interested in communication fields or creative fields may choose a minor in Design Arts or Arts Management. Depending on their personal preferences and career goals, students may combine other programs, such as Human Development or Democracy and Justice Studies.

Students who are beginning their study of German should enroll in Introduction to GERMAN 101. Students with previous German study should select a course appropriate to their level — GERMAN 102, GERMAN 201, GERMAN 202 or GERMAN 320 — by counting a year of high school work as equivalent to a semester of college work, or they should consult the German adviser.

Students seeking teacher certification must be admitted to the Education Program and should contact the Education Office for information and further requirements.

Students may study abroad or at other campuses in the United States through UW-Green Bay's participation in international exchange programs and National Student Exchange. Travel courses are another option for obtaining academic credits and completing requirements. For more information, contact the Office of International Education at (920) 465-2190 or see <http://www.uwgb.edu/international/>.

Retroactive Credit

Degree seeking students who have taken a second language in high school or who have acquired knowledge of a second language elsewhere may earn up to 14 additional credits for their previous language study by completing a foreign language course beyond the 101 level. With a grade of "B" or better, credit will be given in that language for all of the courses in that language preceding the one in which the student has enrolled, to a maximum of 14 credits; with a grade of "BC" or "C," half-credit will be given for the courses preceding the one in which the student has enrolled, to a maximum of seven credits.

For example, with four years of high school German, students who complete GERMAN 320, with a grade of "B" will receive 14 retroactive credits for GERMAN 101, GERMAN 102, GERMAN 201, and GERMAN 202 in addition to the three credits for GERMAN 320; students who complete the course with a "C" will receive seven retroactive credits for GERMAN 101 (2 of the total 4 credits), GERMAN 102 (2 of the total 4 credits), GERMAN 201 (1.5 of the total 3 credits), and GERMAN 202 (1.5 of the total 3 credits).

Requests for retroactive credit in a student's native language are not generally accepted.

To determine eligibility for retroactive credit, students must consult with the appropriate language program chair or course instructor who will advise them regarding which foreign language course they should take. If a student meets the criteria above, the course instructor must complete the Retroactive Credit Form and submit it to the Registrar's Office. The appropriate courses and corresponding credits will then be recorded on the student's transcript.

Retroactive credit will not be awarded based on a student's performance on any sort of test. This includes, but is not limited to, AP, CLEP, or Challenge exams. Retroactive foreign language credits may only be earned by satisfactorily passing a course at UW-Green Bay or through an approved CCHS program as described above.

Retroactive credits earned at any UW System institution or from St. Norbert College courses will be honored and granted to transfer students. Retroactive foreign language credits awarded by other institutions will not be granted to students who transfer to UW-Green Bay. Students may request an exception to this policy by submitting a written appeal to the language coordinator of the department they wish to receive credit from.

If you're repeating a course, contact the German program chair for further information on retroactive credits.

GERMAN 499	Travel Course	

HUM STUD 356	German Culture	
Total Credits		21

¹ Some upper-level courses are repeatable for credit when course topic varies. See adviser.

² It is recommended that only one of the two courses, HUM STUD 356 or GERMAN 357, be used to fulfill requirements for the minor.

German for Students Seeking Teaching Certification

This emphasis also requires:

- Admission to the Education Program.
- Completion of the Education major.
- An oral proficiency exam successfully completed before student can be approved for student teaching.
- Student is required to spend an appropriate period of time in a country where German is spoken or participate in an approved immersion program.

GERMAN 425	German Translation Studies	
HUM STUD 356	German Culture	
Total Credits		27

¹ Some upper-level courses may be repeated for credit when course content varies. See adviser.

Global Studies

The minor in Global Studies encourages students to become aware of how contemporary political, economic, social, and environmental problems affect vast regions and diverse communities. The curriculum links global awareness to local concerns, emphasizes the responsibilities of democratic citizenship, and engages the challenges of human rights and justice, values and ethics, resource flows, cultural resistances, and environmental crises. The requirements of 24 credits complement general education at the introductory level, promote sharp thematic study in the upper-level core, and encourage practical experiences outside the classroom.

Key questions are: What is globalization? What accounts for the phenomena of globalization? When did the world's polity, economy, environment, culture, and society become global? What analytical tools exist to help students understand globalization's influence on politics, cultures, values and ecosystems?

An interdisciplinary introduction provokes students to think about how globalization touches their lives and to analyze distinct responses to globalization's effects on societies, governments and natural resources. Introductory courses are drawn from existing general education requirements. Students should check carefully the prerequisites for upper-level courses in the minor before choosing lower-level general education courses.

Global Studies upper-level core courses help students acquire knowledge about globalization from a variety of interdisciplinary perspectives, historical experiences, and cultural preferences. Core requirements address the implications of globalization for citizens, states and communities around the world, include surveys of recent literature, and strengthen communication skills and critical thinking.

Students are encouraged to participate in travel courses and study abroad offered by the University. Some travel courses contain global content and may be applied to the Global Studies minor. Please contact an adviser concerning appropriateness of a specific travel course. At least two years of a modern foreign language is strongly recommended.

Health Information Management and Technology

(Bachelor of Science)

The Bachelor of Science in Health Information Management and Technology (HIMT) is designed to provide students with the knowledge and competencies required to meet the growing need for professionals to work in this rapidly expanding and evolving area of health care. The degree focuses on the information sector of the healthcare industry because it is one of the fastest growing and evolving segments of the industry. The new advances in health-related technologies, patient records, etc. bring with them new regulations and new concerns for privacy and security. Highly skilled professionals are needed to manage this area, and graduates of the HIMT degree will be very well positioned to meet that need. The online program is designed to meet the needs of adult learners.

HIMT is a degree completion program designed for adult learners who already have some college credits or a liberal arts-based associate degree. It is also ideal for adults who have completed a bachelor's degree in another domain and seek a second bachelor's in HIMT to gain entry to this high-growth field. You may be eligible for admission to this program if you have completed approximately 60 semester credits of transferable general education coursework with a 2.0 or better grade point average (GPA).

Additional admission requirements include completion of Introductory College Algebra, Introductory Biology, and Introductory Communications, or their equivalents, passed with grades of C or better; and completion of UW-Green Bay's lower-level General Education Program requirements.

The HIMT program will prepare knowledgeable and skillful professionals to assume leadership positions within the public and private sectors. Within organizations, a HIMT professional will be able to manage and administer health information technologies that span across divisions, departments and businesses.

Graduates of the HIMT program will be able to:

- Demonstrate knowledge of healthcare billing, coding and reimbursement policies.
- Demonstrate knowledge of healthcare terminology and medical conditions.
- Demonstrate knowledge of dynamic healthcare delivery systems and regulatory environments.
- Apply principles of healthcare privacy, confidentiality, legal, ethical issues and data security.
- Apply critical and creative thinking, problem solving, and effective inter-professional communication skills related to health information management.
- Evaluate, use, and integrate information technology to support medical decision making and processes.
- Apply quantitative methodologies to process healthcare information.
- Healthcare Management Emphasis —
Demonstrate the principles of leadership and management in the HIMT environment.
- Healthcare Technology Emphasis —
Demonstrate the application of information technology in the HIMT environment.

This program offers courses in conjunction with three partner campuses: UW-Parkside, UW-La Crosse and UW-Stevens Point.

Students admitted to the program will take 48 credits of core courses, designed to prepare them for the HIMT field. They will then select one of two emphases, either **healthcare management** or **healthcare technology**, to further focus their knowledge in one of these areas of specialization. Coursework will culminate in a capstone course, where students will complete an HIMT project in a field setting.

Major Area of Emphasis (p. 205)

Students must complete requirements in one of the following areas of emphasis:

- Healthcare Management
- Healthcare Technology

Faculty

History

(Bachelor of Arts)

History is an essential guide not only to the past, but to the present and the future. We cannot understand ourselves or our world without understanding the past. History also leads us to a greater awareness of the richness and complexity of our heritage.

A thorough training in history contributes to the foundation of a complete education and can directly prepare one for professional careers in many fields such as law, business, diplomacy, government service, journalism, teaching, and public relations, as well as graduate study. History's rigorous intellectual discipline and its emphasis on research and analysis nourish intellectual growth and critical thinking.

The History program fully supports and complements UW-Green Bay's mission, especially interdisciplinary and practical problem-solving. History provides information and structure to many other programs, especially in the humanities and social sciences, while receiving significant impulses from these and other disciplines. History contributes importantly to problem-solving by offering assistance in the recognition, definition, and investigation of problems, exploration of alternative solutions and guidance in their implementation.

History faculty have expertise in political, social, economic, cultural and intellectual history and an excellent record in teaching and scholarship. The University supports the History program with a good library, interlibrary loan facilities, and an exceptional collection of original documents in the Area Research Center.

Students seeking information on teacher certification should contact the Education Office.

History Major Learning Outcomes

Historical Knowledge and Understanding:

- Students will demonstrate an understanding of the significance of racial, ethnic, gender, and other forms of diversity in shaping human experiences and history.
- Students will display a breadth of historical knowledge and understanding with one or more chronological or geographical areas of depth.
- Students will exhibit an appreciation of how human societies are inextricably connected with local, regional, and global ecosystems.
- Students will demonstrate their own understanding of the significance of studying history and of the role of historical perspectives in engaged citizenship.
- Students will show awareness of how different approaches to studying history shape how we understand the past.
- Students will show an understanding of how power, hierarchies, and social arrangements shape society.

Historical Skills:

- Students will display an awareness of both continuity and change over time.
- Students will critically evaluate and analyze diverse historical sources (oral, written, visual, and material) and interpretations.

- Students will be able to conduct historical research, analyze evidence, and formulate arguments using historical evidence.
- Students will communicate clearly and effectively with various audiences using written, oral, and digital means.

Major

Students majoring in History and pursuing DPI certification within the Education program should check with the History adviser about any special History department requirements for prospective teachers.

Human Biology

(Bachelor of Science)

Human Biology focuses on the study of the **biological, physiological, nutritional, developmental, and evolutionary aspects** of humans. The major has an extensive range of offerings with core courses emphasizing human function, genetics, nutrition, and evolution.

Students who major in Human Biology gain extensive skills within the laboratory environment, including physiological, cellular, molecular, and statistical analyses. The laboratories house state-of-the-art instruments and equipment for students to gain valuable experience. Participation in faculty research projects or internships is strongly encouraged.

All Human Biology majors complete an area of emphasis within the program. There are five areas of emphasis within the major:

- The **health science emphasis** provides preparation for medical, dental, physician assistant and other health-related professional schools; for graduate programs in biological or biomedical sciences; or entry-level research positions with pharmaceutical or biotechnology companies.
- The **exercise science emphasis** provides a background for careers in physical therapy, occupational therapy, athletic training, strength and conditioning, exercise physiology, fitness, or bio-mechanics.
- The **nutritional sciences/dietetics emphasis** is accredited as a Didactic Program in Dietetics by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) of the Academy of Nutrition and Dietetics. Employment opportunities include healthcare, nutrition education, governmental and community health agencies, fitness facilities, public policy, agribusiness, and the food service industry. Students who successfully complete this program may apply for entry into a Dietetic Internship program, which is required to become a registered dietitian. Registered dietitians provide food and nutritional services with a focus on health promotion and disease prevention.
- The **applied health emphasis** provides preparation for careers in public health. Students interested in pursuing a MPH (Master's of Public Health) and/or working in community health will benefit from this curriculum. This includes students considering a career as a "health inspector" as it helps prepare them for the registered sanitarian exam. <http://www.weha.net/registeredsanitarianinfo.php>
- The **general emphasis** is appropriate for students seeking careers in industrial, managerial, or sales positions in biological or health-related industries.
- The **cytotechnology emphasis** is offered in affiliation with professional programs of cytotechnology at UW-Madison and the Mayo Clinic. Cytotechnology is the microscopic study of cells primarily for detection of cancer. This emphasis leads to a degree in Human Biology with eligibility for professional certification.

The Human Biology major/minor may be combined with other majors/minors for students interested in areas such as scientific journalism, scientific illustration, biological photography, genetic counseling, bioinformatics, public health administration, pharmaceutical sales, or other health-related professions.

Students may study abroad or at other campuses in the United States through UW-Green Bay's participation in international exchange programs and National Student Exchange. Travel courses are another option. For more information, contact the Office of International Education at (920) 465-2190 or see <http://www.uwgb.edu/international/>.

Major Areas of Emphasis (p. 212)

Students must complete requirements in one of the following areas of emphasis:

- Health Science
- Exercise Science
- Applied Public Health
- Nutritional Sciences/Dietetics
- General Human Biology
- Cytotechnology

Minor Areas of Emphasis (p. 222)

Students must complete requirements in one of the following areas of emphasis:

- Applied Human Biology
- General Human Biology

Curriculum Guides (p. 223)

The following are curriculum guides for the four-year Human Biology degree program and is subject to change without notice. Students should consult a Human Biology program advisor to ensure that they have the most accurate and up-to-date information available about a particular four-year degree option.

- Human Biology Major with Exercise Science Emphasis Curriculum Guide
- Human Biology Major with Health Science Emphasis Curriculum Guide
- Human Biology Major with Nutritional Sciences / Dietetics Emphasis Curriculum Guide

HUM BIOL 444	Endocrinology
NUT SCI 300	Human Nutrition
NUT SCI 327	Nutritional Biochemistry
NUT SCI 350	Life Cycle Nutrition
NUT SCI 427	Nutrigenomics and Advanced Nutrient Metabolism
NUT SCI 486	Medical Nutrition Therapy II: An Integrative and Functional Approach
Maximum of ONE Psychology course	
PSYCH 308	Physiological Psychology (Maximum of ONE Psychology Course)
PSYCH 435	Psychopathology
PSYCH 450	Health Psychology

Total Credits**73-77**

- ¹ It is highly recommended that as **freshmen**, pre-medical and pre-dental students take BIOLOGY 201, BIOLOGY 202 and CHEM 211, CHEM 212, CHEM 213, CHEM 214 and consult an advisor.
- ² Satisfied with an ACT English score of 32 or higher.
- ³ Requires a minimum of two upper-level laboratory courses within the Health Science electives

Exercise Science

Code	Title	Credits
Supporting Courses		27
BIOLOGY 201 & BIOLOGY 202	Principles of Biology: Cellular and Molecular Processes and Principles of Biology Lab: Cellular and Molecular Processes	
CHEM 207	Laboratory Safety (must take at the same time OR before taking chemistry)	
CHEM 211 & CHEM 213	Principles of Chemistry I and Principles of Chemistry I Laboratory	
CHEM 212 & CHEM 214	Principles of Chemistry II and Principles of Chemistry II Laboratory	

HUM BIOL 116	First Aid and Emergency Care Procedures (First Aid/CPR Requirement may be met with Red Cross Certification))
HUM BIOL 210	Prevention and Treatment of Athletic Injuries
MATH 260	Introductory Statistics
PHYSICS 103 or PHYSICS 201	Fundamentals of Physics I Principles of Physics I

Choose one (of 2) Anatomy and Physiology Options:

HUM BIOL 240 & HUM BIOL 241	Anatomy and Physiology and Anatomy and Physiology Lab
or BOTH	
HUM BIOL 221 & HUM BIOL 222	Anatomy and Physiology I and Anatomy and Physiology II

Writing Requirement ¹**0-3**

WF 105	Research and Rhetoric
--------	-----------------------

Choose one of the following 3 options:

COMM 133 or COMM 166	Fundamentals of Public Address Fundamentals of Interpersonal Communication
-------------------------	---

OR

Any literature course, e.g., English104 Introduction to Literature

OR

One year of any college-level foreign language

Strongly recommended, but not required.

NURSING 200	Fundamentals of Healthcare Terminology

Total Credits **60-66**

- 1 Satisfied with an ACT English score of 32 or higher
- 2 Select upper-level courses with assistance of a faculty adviser. A maximum of one PSYCH course can be applied to the major.
- 3 Verify 3 courses are Laboratory Elective

Cytotechnology

- UW-Green Bay is affiliated with two schools of cytotechnology: the Mayo Clinic and UW-Madison.
- Students complete 92 credits at UW-Green Bay, including all general education requirements, and then take an 11-month, 32-credit clinical internship at one of the cooperating institutions.
- After completion of the internship, students will graduate with a degree in Human Biology and be eligible for professional certification.

Human Resource Management

(Bachelor of Business Administration)

The Human Resource Management major in UW-Green Bay's Cofrin School of Business provides students with in-depth knowledge in the Human Resources Management domain through a rigorous curriculum with courses covering important topics in HR such as employee retention and development, recruitment and selection, compensation, job performance and cutting-edge topics such as HR Analytics.

The program provides considerable exposure to the liberal arts and develops the critical thinking, problem-solving, interpersonal, communication, quantitative and computer skills needed by graduates to successfully serve as leaders within modern organizations. The program also addresses contemporary organizational issues such as global competition, social responsibility and ethics, sustainability, and the relationship between organizations and various environmental forces.

In the HRM major students begin their studies by taking general education courses as well as introductory-level business courses. Additionally, students take courses providing an overall understanding of business such as the basics of Marketing, Accounting, Human Resources, Management and Finance among others. Finally, students take HRM-focused upper-level courses and complete a capstone course, prior to applying for graduation.

Our HRM faculty are experts in their field who use a variety of pedagogical practices and connect the classroom to the real-world. Students are also encouraged to complete internships for credit.

Entrance and Exit Requirements

Students can declare a major in Human Resources Management at any time with any number of credits through a simple online process. To declare, students must complete an online Declaration of Major/Minor/Certificate e-form (<https://www.uwgb.edu/registrar/forms-petitions/declaration-swap-forms/>), which includes reading and accepting an Honor Code (pre-declaration form). Your advisor will be assigned to you after the e-form is received.

Students must maintain a cumulative GPA of 2.5 to proceed in the course progression. All students must meet this exit requirement to graduate. Students intending to graduate with this major must have a minimum 2.5 cumulative grade point average.

Humanities

(Bachelor of Arts)

The Humanities is designed to help students develop a greater understanding of what it means to be human through the study of history, literature, philosophy, religion, languages, world cultures and civilizations. The Humanities program explores some of the central questions in life, such as the meaning of beauty, justice, and the "good life," as well as the importance of language, culture and artistic expression.

The Humanities comprise those fields that study human creations of all sorts, including literary studies, creative writing, linguistics, history, ancient and modern languages, cultural studies and philosophy.

The Humanities **Major** offers three areas of emphasis:

- The **Ancient and Medieval Studies emphasis**. In this track students will study the cultures and civilizations of the ancient and medieval worlds through courses in history, literature and philosophy as well as through interdisciplinary courses.
- The **Digital and Public Humanities emphasis**. In this track students will engage in an interdisciplinary study of the humanities with an emphasis on how we think about, and through, digital and public spaces. Students will use their training in the humanities to create digital and public humanities projects that further the public's knowledge of culture, society, and history.

- The **World Cultures emphasis**. This track leverages the power of the humanities to broaden and deepen students' insight into the human condition through the study of other cultural perspectives with the aim of creating better informed, more empathetic and culturally proficient graduates, able to engage intelligently in world cultures and issues

The Humanities **Minor** offers seven areas of emphasis:

- One area emphasizes **World Cultures**.
- Another area emphasizes **Ancient and Medieval Studies**.
- Another area emphasizes the **Environmental Humanities**.
- Another area emphasizes **Film and Cinema Studies**.
- Another area emphasizes **Humanities Online**.
- Another area emphasizes **Linguistics / Teaching English as a Second Language**.
- Another area emphasizes **Religious Studies**.

While the factual content of Humanities courses ranges widely in subject matter, all courses emphasize a distinct set of broadly useful skills. Among these are the ability to express one's ideas in a clear, organized, well-reasoned, and grammatically correct manner in speech, writing, and new media; to think critically and analyze texts; to make arguments and present them effectively; to understand context (how history and culture shape us); to recognize and appreciate nuance and complexity of meaning; and to understand and appreciate cultural diversity.

Designed to provide a broader understanding of interdisciplinary contexts, a major or minor in the Humanities complements other courses of study. Besides being a natural accompaniment to majors or minors in History, Philosophy, English, French, German or Spanish, as well as First Nations Studies, Art and Design, Theatre, and Women's and Gender Studies, a degree in Humanities also enhances majors and minors in business, education, social work, the social sciences and the natural sciences.

In conjunction with other courses of study, a Humanities major or minor is an excellent preparation for many graduate programs in the humanities and in law, medicine or engineering. The general intellectual skills emphasized in Humanities courses and the flexibility and versatility they impart help graduates succeed in today's rapidly changing, increasingly global job market, where specific factual knowledge can quickly become outdated. The two of the most common career paths of Humanities majors are in the fields of education and business, but the skills acquired by Humanities students are applicable to nearly any career.

Students may also study abroad at other campuses across the globe and in the United States through UW-Green Bay's participation in international exchange programs and the National Student Exchange. A wide selection of internships in the humanities and travel courses led by Humanities are another great option for obtaining academic credits and completing requirements.

Major Area of Emphasis (p. 236)

Students must complete one of the following areas of emphasis:

- Ancient and Medieval Studies
- Digital and Public Humanities
- World Cultures

Language Requirement

All Humanities majors are expected to fulfill the non-English language requirement by completing one of the following:

- Complete at least two college-level semesters of a non-English language. Students who have taken French, German or Spanish in high school or who have acquired a knowledge of the language elsewhere may receive credit for that preparation by passing an advanced-level UW-Green Bay course with a grade of "C" or better.
- Demonstrate the equivalent level of proficiency in a non-English language on a proficiency exam. NOTE: Students seeking to fulfill the language requirement through proficiency testing in French, German, or Spanish should contact the appropriate language coordinator. For skill assessment in other languages, students should contact the chair of Modern Languages.

Minor Areas of Emphasis (p. 240)

Students must complete one of the following areas of emphasis:

- Ancient and Medieval Studies
- Environmental Humanities
- Film and Cinema Studies
- Humanities Online
- Linguistics/Teaching English as a Second Language

- Religious Studies
- World Cultures

Individual Major

(Bachelor of Arts or Bachelor of Science)

An Individual Major is a self-designed program for students who find that their educational objectives cannot adequately be met by any of the University's existing majors. The Individual Major allows students to incorporate courses from several academic areas into a unique program of study intended to prepare them for employment or graduate study in a specific field of interest. In keeping with the interdisciplinary mission of the University, all Individual Majors are strongly encouraged to incorporate courses from several academic areas offered at UW-Green Bay.

To develop an Individual Major, students must meet with a faculty adviser and the Associate Dean of the College of Arts, Humanities, and Social Sciences to discuss their educational and career objectives. Students write a proposal which includes a statement of objectives, a list of proposed courses for the major, intended degree, and a rationale explaining how those courses form a coherent program of study. The proposal must be approved by the Associate Dean and faculty adviser before being submitted to the Individualized Learning Committee for final approval. Students completing an Individual Major must complete all University requirements for a degree, including general education, residency, and English and mathematics proficiency. It is highly recommended that students who wish to pursue this course of study have a cumulative GPA of 3.5 or above.

The minimum requirements for an Individual Major include 30 credits of upper-level credits focused on an area, and an appropriate array of supporting courses. Students should submit the proposal to the Associate Dean no later than the beginning of their junior year to ensure timely graduation.

Additional information and assistance in planning an Individual Major is available from the Office of the Dean of the College of Arts, Humanities, and Social Sciences.

Faculty

Sawa Senzaki; Associate Professor; Ph.D., University of Alberta

Information Technology and Data Science

(Bachelor of Science)

The Information Science (IS) program introduces students to complex information problems topics faced in the knowledge economy. Students will learn essential qualitative and quantitative skills demanded by employers in a digital media environment. Beyond these essential practical skills, students are taught the interpersonal and managerial skills needed to collaborate and coordinate among external stakeholders to achieve a common goal. Internships in Information Science provide qualified students with opportunities for faculty-supervised experience in professional settings outside the classroom. A major in Information Science provides the kind of integrative knowledge that is required for professional careers in a new and emerging media environment.

There are three emphases for the major: Data Science, Game Studies, and Information Technology.

- The Data Science emphasis is focused on data tools and analytical methods. Students learn to interpret and communicate their findings through courses from the social sciences, computer science, statistics and management. In data science students are trained for deep analytical talent positions in areas such as healthcare, logistics, and insurance industries.
- The Game Studies emphasis offers a diverse range of sub-disciplines to develop students into well-rounded game professionals. Students can choose from classes in computer science, communication, psychology, art, business, and music to prepare for careers in game journalism, game studies, game ethics, programming and design.
- The Information Technology emphasis offers a solid grounding in computing, mathematics, and communication skills and then builds on that grounding with a broad array of theoretical and applied approaches to information technologies. Students also are expected to be thoroughly equipped with problem solving, collaborative, and presentational skills to prepare for careers in areas such as, systems analysis, human resources, marketing and sales.

Students may study abroad or at other campuses in the United States through UW-Green Bay's participation in international exchange programs and National Student Exchange. Travel courses are another option for obtaining academic credits and completing requirements. For more information, contact the Office of International Education at (920) 465-2190 or see <http://www.uwgb.edu/international/>.

Major Area of Emphasis (p. 248)

Students must complete requirements in one of the following areas of emphasis:

- Data Science
- Game Studies
- Information Technology

Curriculum Guide

The following is only an example of a four-year Information Sciences degree program and is subject to change without notice. Students should consult a Information Sciences program advisor to ensure that they have the most accurate and up-to-date information available about a particular four-year degree option.

An example: Four year plan for **Information Sciences Major** (Data Science emphasis)

120 credits necessary to graduate.

Plan is a representation and categories of classes can be switched. Check with your advisor.

International Business

This collaborative program between the Cofrin School of Business and the College of Arts, Humanities, and Social Sciences prepares students for successful careers into today's global economy. The program provides foundational understanding in business and economics, coupled with advanced skills development in language proficiency, cultural competency, and international business and economics. The minor in International Business differentiates students among their peers, and provides a gateway into an exciting professional career.

Minor

In addition to coursework, students need to complete two requirements:

1. Two (2) years of college-level language courses or equivalent competency in a language other than English. See Chair of Modern Languages for approval.
2. International internship or participation in a study abroad program with a Business focus. See faculty adviser for approval.

Management

(Bachelor of Business Administration)

The Management major at UW-Green Bay provides students with in-depth knowledge in management through a rigorous curriculum with courses covering critical management topics such as leadership, organizational behavior, data science and decision-making, leading and functioning in teams, diversity, international business and globalization, change management and organizational culture.

The program provides considerable exposure to the liberal arts and develops the critical thinking, problem-solving, interpersonal, communication, quantitative and computer skills needed by graduates to successfully serve as leaders within modern organizations. The program also addresses contemporary organizational issues such as global competition, social responsibility and ethics, sustainability, and the relationship between organizations and various environmental forces.

In the management major, students start by completing general education and introductory-level business courses. Additionally, students take courses that provide an overall understanding of business, such as the basics of Marketing, Accounting, Human Resources, Management and Finance among others. Finally, students take management-specific upper-level courses and complete a capstone course prior to applying for graduation.

The Management major has expert faculty who use a variety of pedagogical practices and connect the classroom to the real-world. Students are also encouraged to complete internships for credit.

Entrance and Exit Requirements

Students can declare a Management major at any time with any number of credits through a simple online process. To declare, students must complete an online Declaration of Major/Minor/Certificate e-form (<https://www.uwgb.edu/registrar/forms-petitions/declaration-swap-forms/>), which includes reading and accepting an Honor Code (pre-declaration form). Your advisor will be assigned to you after the e-form is received.

Students must maintain a cumulative GPA of 2.5 to proceed in the course progression. All students must meet this exit requirement to graduate. Students intending to graduate with this major must have a minimum 2.5 cumulative grade point average.

Mathematics & Statistics

(Bachelor of Science)

The Mathematics discipline has programs of study in two emphasis areas: mathematics and statistics.

Students choosing the emphasis in mathematics will focus their studies in a discipline which has been an important part of our intellectual heritage for centuries. Students select this area of emphasis if they are interested in mathematics for its own sake (pure mathematics) or as a tool for analyzing and solving real-world problems (applied mathematics). Graduates may use their skills in many careers, including fields such as secondary education and engineering. Other typical areas of employment traditional for mathematicians are those requiring physics. Today, mathematical techniques are required in social, industrial, and management realms as well.

The emphasis in statistics provides applied courses in experimental design, multivariate statistical analysis, and applied regression analysis. Students also gain an extensive background in statistical computing. Students who wish to enter actuarial professions may prepare for the first two actuarial examinations by completing the calculus sequence, linear algebra sequence, and statistical theory sequence. Students who concentrate studies in statistics may find employment in business, industry, and government, as well as pursue further professional training in graduate school.

Program Entrance Requirements

The University of Wisconsin System placement examination in mathematics is used to advise entering freshmen about the level at which they should enter university courses. In rare cases, a student who has been accelerated and has mastery of calculus may, with advice of faculty, enter Calculus and Analytic Geometry II (MATH 203). Upon earning a "C" or better in MATH 203, an additional four credits are granted for MATH 202.

Credits for calculus at UW-Green Bay may also be awarded for satisfactory performance on an AP exam. More details are available at [https://www.uwgb.edu/otsa/credit-for-prior-learning/advanced-placement-\(ap\)-program/](https://www.uwgb.edu/otsa/credit-for-prior-learning/advanced-placement-(ap)-program/).

Retroactive credit for MATH 202 is not awarded to students who transfer to UW-Green Bay and have completed coursework deemed to be equivalent to MATH 203. If the student completes MATH 209 or MATH 305 at UW-Green Bay, they may submit an approved Retroactive Credit Form to the Registrar's Office to be awarded credit for MATH 202 only.

Mathematics majors often choose an additional minor. Examples are Environmental Science or Business Administration.

Students seeking information on teacher certification should contact the Education Office.

Area of Emphasis (p. 255)

Students must complete requirements in one of the following areas of emphasis:

- Mathematics Emphasis
- Statistics Emphasis

Minors (p. 256)

- Actuarial Science Minor
- Mathematics Minor: Students must complete requirements in one of the following areas of emphasis:
 - Mathematics Emphasis
 - Applied Mathematics Emphasis
 - Statistics Emphasis

Curriculum Guides (p. 258)

The following are only examples of four-year Mathematics degree programs and are subject to change without notice. Students should consult a Mathematics program advisor to ensure that they have the most accurate and up-to-date information available about a particular four-year degree option.

- Mathematics Emphasis
- Statistics Emphasis

Faculty

Gregory J Davis; Professor; Ph.D., Northwestern University*

Woo Jeon; Professor; Ph.D., University of Wisconsin - Madison, chair

Devin Bickner; Associate Professor; Ph.D., Iowa State University

Tetyana Malysheva; Associate Professor; Ph.D., University of Oklahoma

Megumi Onoda; Associate Professor; M.S., Southeastern Louisiana University

Yongjun Yang; Associate Professor; Ph.D., Colorado School of Mines

Dhanamalee Bandara; Assistant Professor; Ph.D., Texas Tech University

Mark Norfleet; Assistant Professor; Ph.D., University of Texas - Austin

Mary E Guy; Senior Lecturer; M.S., University of Wisconsin - Oshkosh

James M Meyer; Senior Lecturer; Ph.D., University of North Carolina

Katie M Burke; Lecturer; Ph.D., University of Iowa

Terrisa Deprez; Lecturer; M.S., University of Central Florida

Synde Krause; Lecturer; M.A., Saginaw Valley State University

Mechanical Engineering

(Bachelor of Science)

UW-Green Bay Engineering

One of the fastest-growing regions in the state and the Midwest for engineering jobs, Northeast Wisconsin will see tremendous growth in the need for and recruitment of new engineers. This region has the most open positions for engineers in the state and has seen an 18% increase in demand for engineers since 2010. Engineering as a career focuses on theoretical aspects of mathematical, scientific and engineering principals. New professionals with a Bachelor of Science in Mechanical Engineering from UW-Green Bay will be perfectly-timed and well-prepared to meet the swell in demand for engineers, leading to high-paying, rewarding careers in some of the region's most sought after employers.

Mechanical Engineering

The University of Wisconsin-Green Bay is proud to be home of the only Mechanical Engineering program in Northeast Wisconsin. Part of the College of Science, Engineering and Technology (CSET) and offered through the (<https://www.uwgb.edu/mechanical-engineering/stem-center/>)Richard J. Resch School of Engineering (RSE), the Bachelor of Science (B.S.) in Mechanical Engineering is designed as a cutting-edge program that will offer students individualized attention from award-winning professors, a hands-on education with state-of-the-art equipment, and opportunities for research and internships with some of the largest companies and employers in the region. The UW-Green Bay Mechanical Engineering program is housed in the newly constructed STEM Innovation Center building.

Mechanical engineering is a diverse and flexible engineering discipline. Mechanical engineers work in number of fields including design of machinery, controls, vibrations and acoustics, power generation, renewable energy, energy conservation, fluid flow and heat transfer applications, and air-conditioning. The program synthesizes math, science, engineering science, and engineering design. The program provides electives in several general areas, including thermal-sciences, mechanical design and manufacturing, robotics and automation, mechanical and environmental systems, and renewable energy. Students begin the practice of design in their freshman year and integrate it throughout their programs which culminate in a team-oriented capstone design project in the senior year. The program is geared to prepare students for the lifelong practice of mechanical engineering and for immediate entry to positions in industry or further studies in graduate schools.

Students will benefit from relationships with local technical colleges, and local industry to complete a B.S. in engineering in the Northeast Wisconsin area. Students may start earning their degree at UW-Green Bay or local technical colleges to give maximum flexibility in degree completion. In addition, the Northeast Wisconsin Educational Resource Alliance, NEW ERA, has established advisory boards linking leaders in regional industry and participating institutions to the major. Through these relationships students will have many opportunities for internships, co-op experiences, and employment after graduation.

Mechanical Engineering Program Learning Outcomes

1. Be employed as a mechanical engineer and perform all functions assigned to a mechanical engineer including completing engineering designs and other applications using both practical and theoretical knowledge characterized by their interdisciplinary strengths.
2. Function effectively both as a leader and as a mentor of project teams, demonstrating effective communication skills and ethical behavior.
3. Achieve positions of increased responsibility within an organization and practice continued education through advanced degree or certificate programs or participation in continuing education in engineering or related professional fields.
4. Adapt to changing industrial and technological advancements and be committed to continuous improvement.

Mechanical Engineering Technology

(Bachelor of Science)

UW-Green Bay Engineering Technology

Combine hands-on learning with academic coursework and get ready for high-demand jobs in the growing field of engineering technology. The University partners with regional leaders and technical colleges so that you will be prepared for an ever-changing industry. Get the technical skills that will make you an expert and the critical-thinking skills that will make you indispensable.

Engineering Technology Mission

All of the Engineering Technology programs (Electrical, Mechanical and Environmental) include a strong liberal arts base along with a number of hands-on experiences, including a capstone experience or internship that often will be working with businesses and organizations within the community.

Mechanical Engineering Technology

Mechanical engineering technology (MET) is the application of engineering principles and technological developments to new and existing manufacturing systems. Mechanical engineering technologists work with engineers in designing, testing, and manufacturing mechanical equipment or systems. There are many employment opportunities in mechanical design, manufacturing and industrial engineering technology, industrial management, computer aided design, applied research and sales and service.

The Bachelor of Science (B.S.) degree in Mechanical Engineering Technology at UW-Green Bay is a professional program that prepares students for careers in applied mechanical engineering using analytical and critical problem solving skills needed in regional and national industries, manufacturing, and engineering services firms. The focus of the program is the application of engineering principles to the solution of practical problems. Students will develop skills in hands on application labs and courses that explore the fundamentals of mechanics, mathematics, physics, materials technology, and

computer aided design. Teamwork, technical writing, and project management are also emphasized throughout the curriculum. The goal of the major is to develop well rounded engineering technologists that can adapt and succeed in a highly competitive workplace.

Students will benefit from relationships with local technical colleges, and local industry to complete a B.S. in engineering technology in the Northeast Wisconsin area. Students may start earning their degree at UW-Green Bay or local technical colleges to give maximum flexibility in degree completion. In addition, the Northeast Wisconsin Educational Resource Alliance, NEW ERA, has established advisory boards linking leaders in regional industry and participating institutions to the major. Through these relationships students will have many opportunities for internships, co-op experiences, and employment after graduation.

Mechanical Engineering Technology Program Learning Outcomes

1. Program graduates will secure and maintain employment in appropriate MET positions industry-wide and perform all functions assigned to an mechanical engineering technologist.
2. Graduates will apply their knowledge of mathematics, science, engineering technology, and computing to identify, analyze, and solve problems pertaining to design, development, and implementation of electronic systems.
3. Graduates will exhibit a desire for life-long learning through higher education, technical training, teaching, membership in professional societies, and other developmental activities and will achieve positions of increased responsibility through these activities.
4. Graduates will demonstrate high levels of oral and written communication skills, critical thinking, responsibility and ethical behavior, teamwork and appreciation for diversity, and leadership in their careers.

Music

(Bachelor of Music or Bachelor of Arts)

UW-Green Bay Music students benefit from the University's beautiful Weidner Center for the Performing Arts, one of Wisconsin's premiere performance venues with an acoustically superb environment. Most Music Department concerts and recitals are held in one of the Weidner Center's three performance spaces. Students have multiple opportunities to attend master classes, performances, and lectures by renowned guest artists who visit our campus each year. Practice rooms are ample and have acoustic technology and multi-media technology exists in all teaching spaces. The keyboard/technology lab and recording studio are available to music students interested in recording, composition, arranging, production, and music technology.

The Music program offers two degrees, a professional degree – the Bachelor of Music and a liberal arts degree – the Bachelor of Arts.

The **Bachelor of Music** degree prepares students to enter the music profession directly, or to pursue more advanced study in graduate school.

- The **Bachelor of Music in Music Education** prepares students to enter the teaching profession, with Wisconsin DPI licensure available in Pre-K-12 Choral & General Music, and Pre-K-12 Instrumental & General Music. Students seeking the Music Education degree must demonstrate a high level of musical and academic proficiency, and perform a half recital during the third year of applied study. Music Education majors select Education as a minor, leading to licensure in their chosen area(s), upon completion of student teaching. See more information regarding Education Program (p. 143) requirements.
- The **Bachelor of Music in Performance** is a professional degree that prepares students for a career in music performance or graduate study of their instrument or voice. Students are admitted to the performance program after their fourth semester of applied study and must demonstrate a very high degree of musical proficiency and academic ability in music. Performance majors receive intensive applied instruction at the upper levels and perform full recitals at the completion of each of these levels.

The **Bachelor of Arts** degree offers the study of music in a liberal arts framework. It is intended for students who wish to major in Music as a part of a liberal arts program. Students in this track may tailor their educational experience to their individual interests by selecting from four distinct emphases: Audio Production, Jazz Studies, Composition, and Individualized Studies. The degree helps students prepare for a broad array of career options and may also be appropriate for those intending to pursue advanced study in music. The B.A. in Music affords students the opportunity to pursue a second field of expertise within the credits required for graduation.

Students are admitted to the Music major and minor by audition. Majors take a sequence of theory, history, and skills courses to achieve a comprehensive intellectual understanding of music along with the development of solo and ensemble performance abilities. Individual applied instruction is available in voice, flute, oboe, clarinet, saxophone, bassoon, horn, trumpet, trombone, euphonium, tuba, percussion, piano, organ, guitar, string bass, and electric bass. Music majors may also pursue applied instruction in composition, arranging, musical theater, improvisation.

Music majors are encouraged to select an interdisciplinary minor in consultation with their faculty adviser. Music Education majors select Education as a minor, leading to licensure in their chosen area(s). Many Music majors choose an Arts Management minor or second major. Other students select minors that support various career aspirations and/or intellectual interests, such as Business Administration or Human Development.

It is also possible to choose Music as a minor, which provides breadth to a major. The Music minor may be especially appropriate for students who have an interest in studying music, but who intend to pursue careers in other fields.

All degree programs include large and chamber ensemble requirements. Performance opportunities in major ensembles include Wind Symphony, Symphonic Band, Chorale, and Concert Choir. Minor ensembles include Jazz Combo, Flute Ensemble, Woodwind Ensemble, Saxophone Ensemble, Brass Ensemble, Jazz Ensembles, Contemporary Percussion Ensemble, Hand Drumming, New Music Ensemble, Vocal Jazz Ensemble, Opera/Musical Theatre Workshop, and Chamber Singers.

The University of Wisconsin-Green Bay is accredited by the National Association of Schools of Music.

Major Area of Emphasis (BM) (p. 277)

Students must complete requirements in one of the following areas of emphasis:

- Music Education: Pre-K-12 Instrumental and General Music
- Music Education: Pre-K-12 Choral and General Music
- Instrumental Performance
- Vocal Performance

Major Area of Emphasis (BA) (p. 269)

Students must complete requirements in one of the following areas of emphasis:

All students seeking the Bachelor of Arts with a major in Music must complete a liberal arts requirement consisting of a minimum of 66 credits in addition to credits earned in Music courses. These 66 credits may include credits earned to fulfill requirements in an interdisciplinary major or minor and general education.

- Audio Production
- Composition
- Individual Studies
- Jazz Studies

Minor Area of Emphasis (p. 283)

Students must complete requirements in one of the following areas of emphasis:

- Music Performance
- Music Studies

Faculty

Michelle McQuade-Dewhirst; Professor; Ph.D., University of Chicago

Kevin J Collins; Associate Professor; M.M., University of Texas - Austin

Adam W Gaines; Associate Professor; D.A., Ball State University

Eric C Hansen; Associate Professor; M.M., University of Kentucky

Randall A Meder; Associate Professor; D.M.A., University of Illinois at Urbana - Champaign

Michael Rector; Associate Professor; D.M.A., Manhattan School of Music

William Sallak; Associate Professor; D.M.A., Arizona State University

Courtney J Sherman; Associate Professor; D.M.A., Arizona State University, chair

Christy Talbott; Associate Professor; Ph.D., Ohio State University

Luis Fernandez; Assistant Professor; D.M.A., University of Miami

Music Major (BA)

Area of Emphasis

Students must complete requirements in one of the following areas of emphasis:

All students seeking the Bachelor of Arts with a major in Music must complete a liberal arts requirement consisting of a minimum of 66 credits in addition to credits earned in Music courses. These 66 credits may include credits earned to fulfill requirements in another major or minor and general education.

- Audio Production
- Composition
- Individual Studies
- Jazz Studies

Audio Production

All students seeking the Bachelor of Arts with a major in Music must complete a liberal arts requirement consisting of a minimum of 66 credits in addition to credits earned in Music courses. These 66 credits may include credits earned to fulfill requirements in another major or minor and general education.

Nursing

(Bachelor of Science in Nursing)

Overview of the Nursing Programs at UW-Green Bay

Our mission is to transform communities by improving health and healthcare delivery. We offer high quality, student-centered nursing programs that inspire students to think critically and address complex health issues. The nursing programs are accredited by the Commission on Collegiate Nursing Education (CCNE). More information about the BSN programs can be found by clicking on the program tab.

Bachelor of Science in Nursing (BSN)

We offer several options to earn a BSN including the following:

- **Traditional BSN-** The traditional BSN program prepares nursing graduates to work in today's fast-paced healthcare environments. Building on a strong science and liberal arts base, the nursing curriculum uses a concept-based approach to enhance students' clinical reasoning. Using exemplars to illustrate each of the concepts, students learn to assimilate and sort information while recognizing patterns. The program is designed to be completed in 4 years.

Traditional BSN Program Learning Outcomes

By the end of the BSN program, the individual will be able to:

1. Engage in professional nursing practice that is patient-centered and culturally appropriate for individuals, families, and communities. (VIII, IX)
 2. Demonstrate clinical judgement through the delivery of evidence-based nursing care across the lifespan. (III & IX)
 3. Integrate principles of quality improvement, safety, and sustainability into nursing practice within healthcare organizations and systems. (II)
 4. Use knowledge sources effectively to deliver health promotion, disease prevention strategies designed to improve population health outcomes. (VII)
 5. Demonstrate leadership and caring behaviors via advocacy, fiscal awareness, and analysis of health policy in dynamic healthcare environments. (V, VIII)
 6. Engage in effective communication and interprofessional collaboration in the delivery of health care for quality patient outcomes. (VI)
 7. Use technologies for the management of information, delivery of patient care, and to support nursing innovation. (IV)
- **NURSE 1-2-1**- a program designed for high school seniors (apply fall semester senior year). Students admitted to the NURSE 1-2-1 program complete courses at UW-Green Bay in years 1 and 4 and earn their Associate Degree in Nursing (ADN) at Northeast Wisconsin Technical College (NWTC) in years 2 & 3.

For nurses with an Associate Degree in Nursing (ADN)

- **RN-BSN Completion**- Offered both online via the BSN@HOME Collaborative and on campus. Eligible students must have a current, unencumbered RN license from any state in the U.S.
- **BSN-MSN Accelerated Leadership Option**- designed for RN-BSN students with leadership experience. This option allows RN-BSN students to complete select graduate (MSN) courses that will satisfy the associated RN-BSN course requirements. This allows students to accelerate their path to the MSN Leadership and Management degree.

Program Outcomes for the RN-BSN Completion (including the NURSE 1-2-1 program)

The Baccalaureate program prepares the graduate to:

1. Use knowledge from liberal and interdisciplinary problem focused education as a basis for nursing practice.
2. Use knowledge and skills in leadership, quality improvement and patient safety to provide high quality healthcare.
3. Engage in a systematic process of evaluation, translation, and application of scientific evidence to inform nursing practice.
4. Recognize the role of information management and patient care technologies to improve patient care outcomes.
5. Examine how healthcare policies, including financial and regulatory, influence healthcare systems and nursing practices.
6. Integrate interprofessional communication and collaborative skills to optimize holistic patient care.
7. Apply health promotion, disease and injury prevention strategies to improve population health.
8. Promote professionalism and model the values of altruism, autonomy, caring, human dignity, integrity and social justice in nursing practice.
9. Synthesize previous and newly acquired knowledge, theory, skills, and attitudes to address health care needs of culturally diverse individuals and populations across the continuum of healthcare environments.

Master of Science in Nursing (MSN) Leadership & Management

The MSN Leadership & Management program is designed for nurses who aspire to nursing positions at all levels of leadership. In this program, students learn from experts in their fields. Students complete a leadership practicum working directly with nurse leaders. Click for more information <https://www.uwgb.edu/msn/>

MSN Program Outcomes

The MSN Leadership and Management in Health Systems program prepares the graduates to:

1. Integrate knowledge of sciences and humanities as a basis for leadership and nursing practice.
2. Apply concepts of organizational and systems leadership in decision making in the health care environment.
3. Enact a nurse leader role in safety and quality improvement in the health care environment.
4. Apply research evidence in nursing leadership and practice to enhance care and improve outcomes of nursing.
5. Utilize informatics and health care technologies to enhance care and outcomes of nursing.
6. Intervene at the systems level through policy, fiscal management, and advocacy to influence the health care environment.
7. Communicate and collaborate as a member and leader of interprofessional teams to optimize health care delivery.
8. Analyze the role of nurse leader to reduce health disparities and promote population health.
9. Evaluate personal growth as a professional nurse leader.
10. Influence health care outcomes through master's-level nursing practice, cognizant of environmental sustainability.

RN-BSN

Major Area of Emphasis (p. 295)

Students must complete requirements in one of the following areas of emphasis:

- RN-BSN Completion
- RN-BSN Completion (Accelerated) - Integrated with graduate Master of Science in Nursing Leadership and Management program

Overview of the RN-BSN Program

UW-Green Bay has a rich history of offering RN to BSN both **on campus and online** as a part of the collaborative UW BSN@HOME program. The RN-BSN program is designed for associate degree registered nurses looking to advance their career. This accredited, high quality program is designed to be nurse friendly, flexible, and meet the needs of adult learners and working registered nurses. Faculty employ innovative, media enhanced technologies to engage students.

The program consists of 120 credits for the BSN degree that builds on the foundation of the associate degree or diploma in nursing. Prior learning is acknowledged through liberal credit transfer. The RN transfers at least 60 credits through articulation agreements. Additional credits completed at other universities, colleges, or community colleges may also transfer. The curriculum includes general education (18 credits), nursing support courses (12-15 credits), and upper level RN-BSN courses (30 credits). The online upper level RN-BSN courses are offered in 7 and 14-week sessions including the summer term.

The curriculum is designed to help students:

- Discover the latest evidence based nursing practice
- Understand how health policy impacts practice
- Expand knowledge of population health through practicum experiences close to home
- Examine cultural and global health issues facing nurses
- Learn recent advances in informatics & innovative healthcare technologies

Admission Requirements:

- Earned Associate Degree in Nursing (ADN) or diploma in nursing
- Grade point average of 2.5 on a 4.0 scale (or equivalent) on post-secondary coursework
- Current, unencumbered RN license from any state

Nurse 1-2-1

This unique program is designed for high school students who would like to earn a BSN through the combined resources of the nursing programs at UW-Green Bay and Northeast Wisconsin Technical College (NWTC). Prospective high school students admitted to UW-Green Bay complete a NURSE 1-2-1 application in fall of their senior year. Students complete general education and support courses in Year 1 at UW-Green Bay; complete the Associate Degree in Nursing (ADN) at NWTC in Years 2 and 3; and return to UW-Green Bay Year 4 to complete the BSN degree.

BSN- MSN Accelerated Leadership Option

UW-Green Bay offers an accelerated path to the MSN Leadership and Management degree for qualified RN-BSN students (see below for eligibility criteria). Pay undergraduate tuition rates while you earn up to nine graduate credits. This option allows qualified undergraduate students to enroll in three specific MSN courses (**NUR 737** Leadership in Complex Systems; **NUR 734** Evaluation and Evidence-Based Practices; **NUR 760** Informatics for Nursing Leaders).

These courses:

- satisfy both the undergraduate (RN-BSN) and graduate course requirements (*after admission to the MSN program*),
- provide more advanced content than the equivalent undergraduate course. Refresher content is available for reference,

BSN-MSN Accelerated Leadership Option Eligibility Criteria

- Experience in a leadership role
- Completion of at least six RN-BSN upper level credits with a cumulative GPA of 3.25 or higher

For more information about the BSN-MSN Accelerated Leadership Option click here <https://www.uwgb.edu/rn-bsn/> ; For more information about the MSN program, click here <https://www.uwgb.edu/msn/>.

Traditional 4yr

Overview of the Traditional BSN Program

The Traditional BSN program prepares nurse generalists to work in hospitals, long-term care, and community settings. The professional (BSN) portion of the curriculum includes 65 credits and is designed to be completed in five semesters of full time study. A concept-based approach is used to foster development of clinical reasoning by assisting students to sort, analyze, and find connections in health information.

The concepts are categorized around three main categories: **Healthcare Recipient Concepts** (e.g., Functional Ability, Family Dynamics, Culture), **Health and Illness Concepts** (e.g., Homeostasis, Protection, Mood), and **Professional Nursing Concepts** (e.g., Nursing Roles, Collaboration, Population Health, Healthcare Economics). The concepts are introduced and reinforced throughout the curriculum using exemplars or case examples that a nurse will experience in their practice. For example, the concept of immunity may be taught as a primary or interrelated concept at several points in the curriculum using exemplars such as rheumatoid arthritis, vaccination of children and adults, allergic reactions, or when understanding the immunocompromised state a patient experiencing cancer treatment often faces. Students and faculty will engage in active learning strategies designed to emphasize application of material rather than rote memorization.

Graduates will be prepared to sit for the National Council of State Boards of Nursing Licensure Exam (NCLEX-RN).

Admission Requirements- Prospective nursing students apply in March the year prior to starting the Traditional BSN program.

To be considered for the Traditional BSN Program, applicants must have:

- **30 completed college credits** including at least 3 of the following 4 science courses completed or in progress
 - BIOLOGY 201 & BIOLOGY 202 or equivalent
 - CHEM 108 & CHEM 109 or equivalent
 - HUM BIOL 240 & HUM BIOL 241 or equivalent
 - BIOLOGY 323 & BIOLOGY 324 or equivalent
- **Minimum 3.0 college GPA** with no required science course grade lower than a "C"
- **Preferred criteria:**
 - Completion of Nursing Assistant Course (must be completed prior to starting nursing courses)
 - Healthcare experience
 - Community service/Volunteer experience
 - Bilingual

Admission to the Traditional Nursing program is competitive. Completion of the minimum requirements does not guarantee admission to the nursing major.

For application information including a link to the application click here <https://www.uwgb.edu/bsn-traditional/admission-requirements/>

Admitted students must complete a Criminal Background Check (cost incurred by student) and results must comply with standards required for clinical placement.

Traditional BSN Program Outcomes

By the end of the Traditional BSN program, graduates will be able to:

1. Engage in professional nursing practice that is patient-centered and culturally appropriate for individuals, families and communities.
2. Demonstrate clinical judgement through the delivery of evidence-based nursing care across the lifespan.
3. Integrate principles of quality improvement, safety, and sustainability into nursing practice within healthcare organizations and systems.
4. Use knowledge sources effectively to deliver health promotion, disease prevention strategies designed to improve population health outcomes.
5. Demonstrate leadership and caring behaviors via advocacy, fiscal awareness, and analysis of health policy in dynamic healthcare environments.

6. Engage in effective communication and interprofessional collaboration in the delivery of health care for quality patient outcomes.
7. Use technologies for the management of information, delivery of patient care, and to support nursing innovation.

RN-BSN Completion

Areas of Emphasis

Students must complete requirements in one of the following areas of emphasis:

- RN-BSN Completion
- Accelerated RN-BSN Completion with graduate MSN Leadership program

RN-BSN Completion

The RN-BSN Baccalaureate program prepares the graduate to:

1. Use knowledge from liberal and interdisciplinary problem focused education as a basis for nursing practice.
2. Use knowledge and skills in leadership, quality improvement and patient safety to provide high quality healthcare.
3. Engage in a systematic process of evaluation, translation, and application of scientific evidence to inform nursing practice.
4. Recognize the role of information management and patient care technologies to improve patient care outcomes.
5. Examine how healthcare policies, including financial and regulatory, influence healthcare systems and nursing practices.
6. Integrate interprofessional communication and collaborative skills to optimize holistic patient care.
7. Apply health promotion, disease and injury prevention strategies to improve population health.
8. Promote professionalism and model the values of altruism, autonomy, caring, human dignity, integrity and social justice in nursing practice.
9. Synthesize previous and newly acquired knowledge, theory, skills, and attitudes to address health care needs of culturally diverse individuals and populations across the continuum of healthcare environments.

¹ Satisfied by articulation agreements/transfer credits.

² Chemistry is required beginning September 1, 2007, if no previous college-level chemistry.

³ Critical thinking elective can be satisfied by certain humanities courses such as philosophy, or taken as a separate course.

⁴ Students must be granted permission to enroll in Graduate level coursework. For more information, please contact the Nursing department or refer to the Graduate catalog (<http://catalog.uwgb.edu/graduate/general-information/academic-rules-regulations/undergrad-in-accelerated/>)

Organizational Leadership

(Bachelor of Arts or Bachelor of Applied Studies)

Organizational leadership crosses disciplinary, organizational, community, and cultural boundaries and teaches students how to contribute as citizens in a complex, multi-cultural world. Program graduates are well-positioned to embark on new careers or further study in multiple fields, or to advance in their current careers. Organizational Leadership upper-level core coursework (18 credits) introduces students to the major theories and models of leadership, with a focus on how to use these theories and models to transform leadership in practice. Students also develop fundamental leadership skills such as communication, human resources management, financial management, and applied organizational research.

The **Bachelor of Arts** degree (B.A.) is suitable for:

- Students who already have an Associate of Arts & Sciences degree
- Students who have taken a few college courses and wish to transfer in some credits
- Students who are beginning college and select Organizational Leadership as their major

The **Bachelor of Applied Studies** degree (B.A.S.) requires that a student have an Applied Associate Degree. Students accepted into this program will be able to transfer coursework from any Wisconsin Technical College System campus and enter the University as juniors. Students then complete enough additional credits to satisfy UW-Green Bay general education requirements, requirements for the Organizational Leadership major, and all other degree requirements.

Learning Outcomes for the Organizational Leadership Major

1. Apply the principles and practices of leadership to interact positively with a wide range of individuals, groups, organizations, and communities.
2. Apply tools of leaders such as financial and risk management, organizational research/assessment, negotiation, planning, and communication strategies.

3. Use data and research to think critically and creatively about strategic opportunities and challenges to help organizations adapt effectively to changing contexts.
4. Understand and apply approaches to collaborating with individuals and groups to promote effective organizations.
5. Practice engaged, ethical, and socially responsible leadership in the context of social, cultural, and global diversity.

Areas of Emphasis (p. 300)

A unique feature of the Organizational Leadership major is the choice of an area of emphasis, which typically consists of four or five courses (12-18 credits) in a student's preferred area of focus. Areas of Emphasis include:

- Applied Communication
- Business Administration
- Early Childhood Education
- Emergency Management
- Environmental Policy & Planning
- Management in Health Systems
- Public and Nonprofit Management
- Self-Directed (must be approved by Program Chair/Coordinator)

Personal Financial Planning

A CFP Board Registered Approved program that prepares students for the financial planning profession to help future financial planning clients maximize life goals through financial advice. This program satisfies the educational requirements for students to be eligible to sit for the Certified Financial Planner™ exam. The program includes the planning domains of personal financial planning fundamentals and planning skills across retirement savings & income planning, tax & estate, household risk management & insurance, and financial plan development. This program helps students develop professional ethics and client communication skills that are particular to financial planning.

Philosophy

(Bachelor of Arts)

The study of philosophy increases our appreciation and awareness of the deep intellectual, ethical, logical, and aesthetic structure of our world. The discipline of philosophy, like mathematics, economics and chemistry, embodies formal thought, structural relationships, abstract models, symbolic languages, and deductive methods. Students who develop these skills develop a perspective which allows them to better address problems squarely, think through and devise deep and creative solutions, and better address and overcome unpredictable circumstances in life.

Philosophy students routinely score better than nearly all other majors on the Graduate Record Exam, GMAT and LSAT. This is not surprising, given that Philosophy students are taught how to read well and carefully difficult texts, how to extract and evaluate complex ideas and arguments, and how to express their own reasoning about these ideas in an articulate and detailed manner.

The true virtue of an education in philosophy, however, extends beyond the domain of personal and academic skills.

As the global community continues to shrink and corporate America restructures, careers will increasingly demand employees who can think critically, disclose hidden assumptions and values, formulate problems clearly, and discern the impact of ideas. Philosophy students are looked upon as assets to companies and organizations in a wide array of fields, including business, health care, politics, and higher education. The mental acuity and flexibility provided by a background in philosophy prepares our students well for the career challenges of their future.

Our undergraduate program in Philosophy is designed to complement the strengths of other programs and disciplines at UW-Green Bay.

A degree in Philosophy should help students realize the following aims:

1. Be familiar with the history of philosophical thought and able to identify the dominant figures and issues in the ancient, medieval, early modern and modern philosophical eras.
2. Be able to articulate and think carefully through questions about the structure and nature of reality, our place within it, and how we ought to act.
3. Be able to interpret and extract an author's arguments from a text and to offer novel, substantive commentary on philosophical positions.
4. Be able to offer a balanced and fair evaluation of major philosophical figures and issues in writing and public presentation.
5. Be able to compose and deliver to an audience a clear and cogent philosophical argument in defense of their preferred position.

Physics

Physics is the study of matter and energy, and their interactions in the areas of mechanics, heat, sound, optics, electricity, magnetism, radiation, and the atomic and sub-atomic world. Physics provides students with concepts and models for describing, understanding, and predicting many characteristics and phenomena of physical and biological systems. As such, it provides the foundation for many other sciences such as chemistry, astronomy, biology, geology, engineering, and medicine.

A minor in Physics is an appropriate choice for students pursuing majors in Environmental Science and Human Biology. It is also a good choice for students who plan to teach at the secondary level because there is a chronic shortage of qualified physics teachers.

Students seeking information on teacher certification should contact the Education Office.

Political Science

(Bachelor of Arts)

Political Science is concerned with the systematic study of political behavior, governmental institutions and policy-making processes, public policies and their implementation, and political values in local, state, national, cross-national and international settings.

The program acquaints students with the structure and operation of political systems; the cultural, social, economic, and ideological context of these systems; the major philosophical questions and relevance to understanding modern political phenomena; and the major methods of inquiry and analysis used in the contemporary study of politics, government and public policy.

Political Science is a major often chosen by students who plan to attend law school. It is useful as well for students anticipating careers in journalism, planning, education, business, foreign service, politics, and public service positions with private and public agencies at the local, state, regional, federal, and international levels.

Political Science majors have entered graduate study in political science, public administration, education, and related fields. Many students choose complimentary minors, such as Public Administration, Urban and Regional Studies, Environmental Policy and Planning, Communication, Democracy and Justice Studies, and Business Administration.

Students seeking information on teacher certification should contact the Education Office.

Psychology

(Bachelor of Science)

Psychology is the systematic and scientific study of behavior and mental processes (e.g., memory, emotion). It seeks to explain how physiological, personal, cultural, social, developmental, and environmental conditions influence thought and action. Research aims to understand, predict, and influence behavior.

In the past century, psychology has moved from being a branch of philosophy to being both an experimental science and an active helping profession.

Likewise, psychologists work in a variety of settings where their expertise in human behavior is applied to increase efficiency, assist in product design, improve work conditions, and more. To quote the American Psychological Association, "In every conceivable setting from scientific research centers to mental healthcare services, 'the understanding of behavior' is the enterprise of psychologists" (www.apa.org).

A strong grasp of psychology also requires knowledge of the approach and content of considered core to the field as a whole. Students gain this understanding by completing coursework in the primary areas of Psychology: Research Methods, Physiological/Cognitive, Social/Personality, Culture/Gender, and Clinical/Counseling. Students complete the major by choosing additional courses to meet individual needs with the help of their Professional Advisor. Students should consult with their Faculty Mentor about career planning and professional development.

The program offers special opportunities for qualified students to strengthen their professional preparation. Psychology faculty frequently work with students on collaborative research projects. Support for advanced student research is enhanced by technology in several research labs. Although all

courses are taught by faculty members, undergraduate teaching assistantships allow students to master course content and receive valuable training in the teaching of psychology. Internships can be acquired in a variety of university and community settings.

Psychology helps to deepen understanding of individual and social behavior and provides a strong general background for many careers. Psychology graduates are employed in a variety of positions with their bachelor's degree, including in social and community service, business, research, and education-related fields from after-school programs to college admissions. Because of the wide range of possibilities, students should select courses and pursue applied experiences relevant to the occupational area of greatest interest. Preparation for specialized professional work — such as testing, counseling, university teaching, consulting, and many research activities — usually requires a master's or doctoral degree. Psychology majors have pursued graduate school in many fields, including psychology sub-disciplines such as experimental, developmental, neuroscience, industrial/organizational, social, sport, exercise, and performance psychology, clinical, counseling, and school psychology, as well as the related fields of social work, education, medicine, law, and business.

There are many different complementary minors. They vary based on individual interests and future career or educational goals, so students are encouraged to discuss options with an advisor.

Psychology Learning Outcomes

Goal 1: Knowledge Base in Psychology

- 1.1 Describe key concepts, principles, and overarching themes in psychology
- 1.2 Develop a working knowledge of psychology's content domains
- 1.3 Describe applications of psychology

Goal 2: Scientific Inquiry and Critical Thinking

- 2.1 Use scientific reasoning to interpret psychological phenomena
- 2.2 Demonstrate psychology information literacy
- 2.3 Engage in innovative and integrative thinking and problem solving
- 2.4 Interpret, design, and conduct basic psychological research
- 2.5 Incorporate sociocultural factors in scientific inquiry

Goal 3: Ethical and Social Responsibility in a Diverse World

- 3.1 Apply ethical standards to evaluate psychological science and practice
- 3.2 Build and enhance interpersonal relationships
- 3.3 Adopt values that build community at local, national, and global levels

Goal 4: Communication

- 4.1 Demonstrate effective writing for different purposes
- 4.2 Exhibit effective presentation skills for different purposes
- 4.3 Interact effectively with others

Goal 5: Professional Development

- 5.1 Apply psychological content and skills to career goals
- 5.2 Exhibit self-efficacy and self-regulation
- 5.3 Refine project-management skills
- 5.4 Enhance teamwork capacity
- 5.5 Develop meaningful professional direction for life after graduation

Public Administration

(Bachelor of Science)

As a broad-based, interdisciplinary, social science major, Public Administration prepares students for challenging careers in **public and nonprofit organizations** and, if desired, further study in graduate programs. Students develop proficiency in organizational management and leadership, nonprofit management, fundraising, public policy analysis, human resources, program evaluation, policy development and implementation and budgeting.

With a broad skill-set, graduates work in public, nonprofit, and commercial organizations in positions as program directors, policy analysts, nonprofit executives, budget specialists, governmental affairs directors in commercial businesses, and municipal leaders. Many pursue graduate studies in public administration, law, political science, nonprofit management, public policy, and public affairs.

All Public Administration majors engage in high impact, problem-focused, applied learning. This major excels in internships: students can choose from a wide array of **strong internship placements** in city, county and state executive offices, non-profit organizations, and emergency management settings. Students are encouraged to gain experiences through independent study, community research projects, and an other individualized work with faculty.

Students majoring in Public Administration must choose an emphasis: **Public and Nonprofit Management** or **Emergency Management**. Students who want to focus specifically on the nonprofit sector should consider earning the free-standing **Nonprofit Management Certificate**. Students pursuing an Emergency Management emphasis can obtain a free-standing **Emergency Management Certificate**, which is offered in cooperation with campus Continuing Education and Community Engagement programs.

Please seek assistance from a faculty adviser in creating your own academic plan.

Learning Outcomes

Upon completion of a public administration major at UW-Green Bay, students will have :

- demonstrated an understanding of the process of public policy analysis and policy-making.
- developed the ability to collect, manage, evaluate, and apply data to make decisions and solve public and nonprofit problems.
- demonstrated knowledge of ethics and the importance of their application to everyday decision-making in public and nonprofit organizations and public affairs.
- demonstrated social responsibility in public service and other intentional engagement in the community.
- demonstrated core skills of public and nonprofit management including leadership, collaboration, financial management, program evaluation, and human resource management.
- applied approaches to collaborating productively with diverse individuals and groups to promote effective communities, organizations, programs, and policies.

Considering a Double Major or a Major and a Minor?

Many Public Administration students choose to complete double majors in Political Science, Environmental Policy and Planning, Organizational Leadership or Urban Studies. A second major complements the Public Administration curriculum and makes students stronger candidates when seeking careers or entry into graduate programs.

A minor in Public Administration fits well with majors in Political Science, Economics, Communication, Environmental Policy and Planning, Urban Studies, Democracy and Justice Studies, Psychology, Social Work, and many more. Please see a faculty adviser early in your academic career for advice on these options.

Students may study abroad or at other campuses in the United States through UW-Green Bay's participation in international exchange programs and the National Student Exchange program. Travel courses are another option for obtaining academic credits and completing requirements. For more information, contact the Office of International Education at <http://www.uwgb.edu/international/> (<http://www.uwgb.edu/international/>) (<http://www.uwgb.edu/international/>).

Major Area of Emphasis (p. 320)

Students must complete requirements in one of the following areas of emphasis:

- Emergency Management
- Public & Nonprofit Management

Minor

Total Credits **24**

¹ PU EN AF 497 can only be completed for 3 credits to satisfy the upper level elective requirement. A 2.75 GPA is required for internship participation.

Curriculum Guide

The following is only an example of a four-year Public Administration degree program and is subject to change without notice. Students should consult a Public Administration program advisor to ensure that they have the most accurate and up-to-date information available about a particular four-year degree option.

An example: Four year plan for **Public Administration Major**
120 credits necessary to graduate.

Plan is a representation and categories of classes can be switched. Check with your advisor.

¹ Each of these courses can count once for 3 credits each as major electives.

Social Work

(Bachelor of Social Work)

Social work is an exciting and dynamic profession. The major in Social Work, leading to the Bachelor of Social Work (BSW) degree, prepares a graduate for a career as a social worker working with a broad range of individuals, families, organizations, and communities. Graduates of the UW-Green Bay Social Work Professional Program secure positions in programs serving populations that include older adults, children and their families, persons challenged by developmental and other disabilities, juvenile and adult offenders, persons experiencing mental or physical health issues, and other groups identified in this ever-evolving field. Social workers provide direct service and work for social justice through advocacy and, for example, social policy development and change.

The Social Work Professional Program has full accreditation from the Council on Social Work Education. The BSW degree from UW-Green Bay allows the graduate to obtain state certification and provides a broad range of employment opportunities.

Majors may elect to enroll in the child welfare emphasis, preparing for a career in child welfare practice. Students who have an interest in a career in public or tribal child welfare can apply for a stipend through The Child Welfare Education Program.

Majors may elect to enroll in the substance abuse emphasis, preparing for a career in working in the substance abuse field or within behavioral health.

A Bachelor of Social Work degree provides advanced status for students seeking a Master's Degree in Social Work.

Program Entry Requirements

Students who wish to major in Social Work must make formal application for admission to the program. This applies to those transferring from other institutions as well as students continuing at UW-Green Bay. Students may apply to the Social Work program at the March application date for fall admission. Application materials are available from the UW-Green Bay Social Work website (<http://www.uwgb.edu/socwork/>).

To apply to the BSW degree program, students must first be admitted to the University of Wisconsin-Green Bay. They must have completed at least 27 credits before applying, and 48 credits before beginning the Social Work program. These credits must include at least four supporting courses for the major, with an overall cumulative grade point average of at least 2.5. Applicants must also have demonstrated an interest in the profession by volunteering in the field or through relevant employment, as indicated by the letter of reference and the essay accompanying their application.

Prospective Social Work majors should seek early advising from Social Work faculty by contacting the Social Work office, 920-465-2049, to schedule an appointment.

Major Area of Emphasis (p. 324)

Students must complete requirements in one of the following areas of emphasis:

- Social Work Child Welfare Emphasis
- Social Work General Emphasis
- Social Work Substance Abuse Emphasis

Faculty

Sherry Warren; Assistant Professor; Ph.D., University of Kansas*

Social Work Major

Area of Emphasis

Students must complete requirements in one of the following areas of emphasis:

- Social Work Child Welfare Emphasis
- Social Work General Emphasis
- Social Work Substance Abuse Emphasis

Child Welfare

As a program accredited by the Council on Social Work Education, classroom and field activities assist students in the BSW Program to attain practice competency in nine different areas with demonstration of skill and learning across the dimensions of knowledge, values, skills, and cognitive-affective integration. The competencies listed below are the learning objectives for the program.

Competency 1: Demonstrate Ethical and Professional Behavior

Competency 2: Engage Diversity and Difference in Practice

Competency 3: Advance Human Rights and Social, Economic, and Environmental Justice

Competency 4: Engage In Practice-informed Research and Research-informed Practice

Competency 5: Engage in Policy Practice

Competency 6: Engage with Individuals, Families, Groups, Organizations, and Communities

Competency 7: Assess Individuals, Families, Groups, Organizations, and Communities

Competency 8: Intervene with Individuals, Families, Groups, Organizations, and Communities

Competency 9: Evaluate Practice with Individuals, Families, Groups, Organizations, and Communities

Sociology & Anthropology

Sociology is the systematic study of social organization and social life. Sociologists use scientific and humanistic approaches to explain and understand social behavior and social systems. Topics include collective behavior and social movements; deviant behavior, crime and punishment; gender and human sexuality; race and ethnicity, community and urban society; and social class and status.

Anthropology is the comparative study of human diversity through time and across the world. Its scope spans the humanities, the social sciences, and the biological, physical, and evolutionary sciences. As a social science, anthropology aims at uncovering the patterns of past and present societies; from a humanistic perspective, .seeks to understand the ways cultural meaning and political power have shaped human experience.

Students in the Sociology & Anthropology program learn a variety of research methods and social theories used to study both large-scale and small-scale patterns of social relationships, as well as the processes by which these patterns change. A minor in Sociology & Anthropology will provide additional breadth of perspective for students with majors in Democracy and Justice Studies, Environmental Planning and Policy, Public Administration, Urban Studies, and Business Administration. It also provides preparation for students going on to graduate work in programs such as sociology, social work, urban studies, and other social science programs.

Spanish and Latin American Studies

(Bachelor of Arts)

The Spanish and Latin American Studies program provides students with communication skills in both written and spoken Spanish and gives them an understanding of and appreciation for the peoples, literatures, and cultures of Spain and Latin America. Stronger ties with the Spanish-speaking world and the growing number of Spanish-speakers in the United States have significantly increased the need for teachers and speakers of Spanish.

Although some students choose to study Spanish primarily for personal growth and intellectual enrichment, graduates in Spanish and Latin American Studies have found satisfying careers in teaching, international business, translating and interpreting, personnel work, public relations, business management, social work, government service, and other fields. The Spanish and Latin American Studies major is also excellent preparation for graduate study. Proficiency in a foreign language and understanding of other cultures are essential for peace and prosperity in an interdependent world.

Learning a new language is a life-long endeavor, only part of which can be accomplished in the classroom. All students of Spanish and Latin American Studies are strongly encouraged to pursue the opportunities faculty provide for travel and study in Spain, Mexico, Guatemala, and South America. Additionally, ways exist to interact with the Hispanic community of Green Bay. A language laboratory with interactive audio equipment, computers, and international television reception helps language learning and cultural awareness. Spanish conversation groups meet periodically to offer the opportunity to practice the language. Students are encouraged to become members of the student-led Spanish Club.

Many students majoring in Spanish and Latin American Studies will also choose a complimentary minor. Students may choose Humanities; students interested in the arts or the performing arts may choose Design Arts or Arts Management. Depending on their preferences and goals, students may find other minors appropriate, such as Human Development or Democracy and Justice Studies. Students desiring teacher preparation in Spanish must combine their studies in Spanish with the secondary Education minor.

Students who begin Spanish and Latin American Studies study at UW-Green Bay should enroll in SPANISH 101. Students with previous Spanish should select a course appropriate to their level by counting a year of high school work as equivalent to a semester of college work, or consult the Spanish and Latin American Studies adviser. If more than two semesters have elapsed between your high school Spanish classes and when you will be enrolling in college Spanish courses, you are required to take the UW placement test for appropriate placement.

Students seeking teacher certification must be admitted to the Education Program and should contact the Education Office for information and further requirements.

The following is required of all students seeking teacher certification in Spanish and Latin American Studies:

- An oral proficiency exam must be successfully completed before student can be approved for student teaching.
- Student is required to spend an appropriate period of time in a country where Spanish is spoken or participate in an approved immersion program.

Students may study abroad or at other campuses in the United States through UW-Green Bay's participation in international exchange programs and National Student Exchange. Travel courses are another option for obtaining academic credits and completing requirements. For more information, contact the Office of International Education at (920) 465-2190 or see <http://www.uwgb.edu/international/>.

Retroactive Credit

Degree seeking students who have taken a second language in high school or who have acquired knowledge of a second language elsewhere may earn up to 14 additional credits for their previous language study by completing a foreign language course beyond the 101 level. With a grade of "B" or better, credit will be given in that language for all of the courses in that language preceding the one in which the student has enrolled, to a maximum of 14 credits; with a grade of "BC" or "C," half credit will be given for the courses preceding the one in which the student has enrolled, to a maximum of seven credits.

For example, with four years of high school Spanish, students who complete SPANISH 225, with a grade of "B" will receive 14 retroactive credits for SPANISH 101, SPANISH 102, SPANISH 201, and SPANISH 202 in addition to the three credits for SPANISH 225; students who complete the course with a "C" will receive seven retroactive credits for SPANISH 101 (2 of the total 4 credits), SPANISH 102 (2 of the total 4 credits), SPANISH 201 (1.5 of the total 3 credits), and SPANISH 202 (1.5 of the total 3 credits).

Requests for retroactive credit in a student's native language are not generally accepted.

To determine eligibility for retroactive credit, students must consult with the appropriate language program chair or course instructor who will advise them regarding which foreign language course they should take. If a student meets the criteria above, the course instructor must complete the Retroactive Credit Form and submit it to the Registrar's Office. The appropriate courses and corresponding credits will then be recorded on the student's transcript.

Retroactive credit will not be awarded based on a student's performance on any sort of test. This includes, but is not limited to, AP, CLEP, or Challenge exams. Retroactive foreign language credits may only be earned by satisfactorily passing a course at UW-Green Bay or through an approved CCHS program as described above.

Retroactive credits earned at any UW System institution or from St. Norbert College courses will be honored and granted to transfer students. Retroactive foreign language credits awarded by other institutions will not be granted to students who transfer to UW-Green Bay. Students may request an exception to this policy by submitting a written appeal to the language coordinator of the department they wish to receive credit from.

If you're repeating a course, contact the Spanish and Latin American Studies program chair for further information on retroactive credits.

Major Area of Study (p. 332)

This major requires completion of one of the following areas of emphasis:

- Spanish and Latin American Studies
- Spanish and Latin American Studies for Students Seeking Teaching Certification

Minor Area of Study (p. 334)

Students must complete requirements in one of the following areas of emphasis:

- Spanish and Latin American Studies
- Spanish and Latin American Studies for Students Seeking Teaching Certification

Curriculum Guide (p. 335)

Sustainability

Since the early years of the University of Wisconsin-Green Bay, the focus of the university has expanded and changed. However, the value of sustainability and environmental stewardship continues to be reflected in the university today, from its outdoor spaces and buildings to its academic programs, general education policies, environmentally focused student organizations, and its recently revised Select Mission statement.

Sustainability and Sustainable Development has been defined in many ways, but the most frequently quoted definition is from Our Common Future, also known as the Brundtland Report: "Sustainable development is development that meets the needs of the present without compromising the ability of future generations to meet their own needs." That report outlined 17 Sustainable Development Goals with a target date of achievement by 2030. With only 10 years remaining for that target, our students will have an active role to play in reaching those goals.

An interdisciplinary minor in sustainability encourages students to become aware of how intersecting economic, social, and environmental problems affect the global, regional, and local communities and the necessary pathways to address those problems.

Students pursuing the minor may find the following suggested courses to be helpful.

Suggested Supporting Courses and the General Education Requirement Satisfied:

ANTHRO 100: Varieties of World Culture (Global Culture/Social Sciences)

BUS ADM 202: Business and its Environment (Social Sciences)

ECON 102: Economics of the Modern World (Social Sciences)

ECON 203: Micro Economic Analysis (Social Sciences/Quantitative Literacy)

ENV SCI 102: Introduction to Environmental Science (Natural Sciences)

HISTORY 220: American Environmental History (Sustainability)

POL SCI 102: Introduction to Politics (Social Sciences)

POL SCI 202/PU EN AF 202: Introduction to Public Policy (Social Sciences)

PU EN AF 215: Introduction to Public Administration (Social Sciences)

Minor

Theatre and Dance

(Bachelor of Arts)

Students pursuing the bachelor's degree in Theatre will choose one of four areas of emphasis:

- Design/Technical Theatre
- Musical Theatre
- Performance
- Theatre Studies

Each emphasis provides a rigorous artistic/academic environment for the study and production of all forms of theatre. Techniques learned in the classroom are applied in production work giving students an abundance of practical experience. Each year a combination of classic, modern, experimental, musical theatre and dance pieces are selected to give students a diverse background in dramatic literature and styles.

The interdisciplinary focus of the University is an ideal setting for the highly collaborative study and practice of theatre. Many of our productions involve collaborations with University academic programs and student or community organizations.

Theatre faculty members at UW-Green Bay believe that the best way to learn theatre is to create theatre. Students are encouraged to participate in the five mainstage (faculty or guest artist directed and designed) productions each year. Studio (student directed and designed) productions provide additional opportunities for involvement. University Theatre production work is open to all students and practicum credit is available for work on mainstage productions. The Theatre program is an active participant in the Kennedy Center's American College Theatre Festival (<http://web.kennedy-center.org/education/kcactf/Home/>), a national organization in support of excellence in university theatre.

Our facilities in Theatre Hall include the 450-seat proscenium University Theatre, Theatre 110 - Experimental Theatre & design studio, acting/ rehearsal studio, dance studio with a new sprung floor, a CAD & Sound Design lab with plotter, and well equipped scene and costume shops. Two of our Mainstage productions each year are performed in our 90-seat Jean Weidner Theatre in The Weidner Center for the Performing Arts. We periodically produce musicals and theatre for young audiences in the 2,000-seat Cofrin Family Hall of the Weidner Center.

Students receive training from working professionals and guest artists in a welcoming environment with small class sizes that assure personal attention. Opportunities afforded by the Weidner Center on campus include master classes, discounted tickets, and internship and work opportunities. Alternate Theatre, the student theatre organization, sponsors free workshops and affordable trips to regional theatres. Scholarships for incoming and returning Theatre and Dance students require application and audition or interview.

UW-Green Bay Theatre graduates pursue jobs in the entertainment industry and related fields. Students benefit greatly from internship opportunities prior to graduation and advanced course work in audition and portfolio preparation prepares them for the competitive challenges ahead.

UW-Green Bay Theatre & Dance Mission

The UW-Green Bay Theatre and Dance program is a community of professional artists, educators and students that provides professional training in the related performing arts of Theatre, Dance and Design in the context of a broad, liberal arts education. Our program offers high impact learning practices that cultivate creativity, critical thinking, communication skills, and collaboration within and outside the program and delivers a rigorous academic and problem focused environment that seeks to produce work that **challenges the mind, engages the heart and delights the senses**.

Core Values

Collaboration

Working together, we value the contribution of the individual to the collective vision of the team and strive for a cooperative and collegial realization of our artistic goals.

Professional Practice

We seek excellence in all our endeavors, training students to take their place as professionals. Faculty strives to remain up to date on current technologies and practices.

Community

We work to create engaging partnerships with our community, providing support and exchanging ideas as well as information, with our colleagues, our audience and the world at large. Students are taught to see the value of becoming engaged members of their community.

Diversity

Works written by and about persons of all abilities and communities, including BIPOC, LGBTQ, and other members of historically and currently marginalized communities that are under-represented or misrepresented, are studied and staged. Traditional and non-traditional UWGB students from any major or discipline are encouraged to participate in productions.

Discovery

As an art form, theatre seeks to explore and comprehend the human condition. We encourage and support creativity, curiosity, intellectual and aesthetic development, invention and innovation in the pursuit of understanding.

Academic and Creative Freedom

We believe that freedom of inquiry is essential to academic and creative pursuits and our program supports intellectual and creative activities without restriction.

Student Opportunities

In all areas of emphasis, we strive to provide all students with opportunities to experience live theatre and to put classroom learning into practical application.

Working Alumni

The application of theory and skills are core values held by the UW-Green Bay Theatre and Dance Program. Graduates of our program apply their training to careers in live performance, entertainment technology, film, television, education, arts management, scholarship, and business. UW Green Bay Theatre and Dance graduates have successfully found work with organizations that include - Steppenwolf Theatre Company, Goodman Theatre, Chicago Shakespeare Theater, Lookingglass Theatre, 5th Avenue Theatre, Seattle Repertory Theatre, Guthrie Theatre, Alley Theatre, Oregon Shakespeare Festival Theatre, Utah Shakespeare Festival, Cirque du Soleil, Peninsula Players Theatre, Door Shakespeare and Dreamworks. Our graduates are on Broadway, in national and international production and concert tours, and educational institutions around the country, providing a far-reaching network of industry professionals. UW Green Bay Theatre and Dance graduates have also had great success in creative entrepreneurship, taking their talents in new directions.

Major Area of Emphasis (p. 340)

Students must complete requirements in one of the following areas of emphasis:

- Design/Technical Theatre
- Musical Theatre
- Performance

Theatre Curriculum Guides

The following are curriculum guides for a four-year Theatre degree program and is subject to change without notice. Students should consult a Theatre program advisor to ensure that they have the most accurate and up-to-date information available about a particular four-year degree option.

- Theatre Major with Emphasis in Design/Technical; Minor in Design Arts
- Theatre Major with Emphasis in Performance; Minor in Humanities
- Theatre Major with Emphasis in Theatre Studies; Minor in Humanities

Theatre Major with Emphasis in Design/Technical; Minor in Design Arts

An example: Four year plan for **Theatre Major with an emphasis in Design/Technical; Minor in Design Arts**
120 credits necessary to graduate.

Plan is a representation and categories of classes can be switched. Check with your advisor.

Urban Studies

(Bachelor of Arts)

Urban Studies develops individuals who want to make a difference in their community: a difference in what happens to older neighborhoods in transition, a difference in what happens as new suburban communities are planned and built, a difference in the lives and well-being of persons across metropolitan and rural regions. It offers undergraduates an opportunity to become familiar with concepts that will be useful whether they become community organizers, lawyers, city or regional planners, architects, teachers, economic development specialists, journalists, city managers, or enter careers in business and real estate.

Urban Studies offers students an opportunity to develop the insight, knowledge, and technical skills needed to deal effectively with the far-reaching challenges of contemporary urban society. It prepares students to become educated world citizens through a solid foundation of core courses emphasizing skills and tool subjects, broad introductory courses at the freshman and sophomore level, and more demanding courses at the junior and senior level which explores topics at a greater depth.

Faculty bring together urban and regional perspectives from a variety of disciplines, including economics, ethnic studies, physical and human geography, political science, and sociology. Urban Studies faculty have traveled widely and have lived and conducted research in many countries outside of the United States. In addition to teaching in the program, faculty are active in applied work in Northeast Wisconsin, working with community and grass-roots organizations, participating in city and county task forces and planning committees, and consulting for government and international agencies.

Students should meet with the faculty adviser in Urban Studies to discuss their academic and career interests. Students are encouraged to select courses which emphasize particular areas within the program, including community economic development, ethnic studies, and urban and regional planning. Internships in this program are especially encouraged, as are applied research projects in the Urban Studies laboratory and in independent study courses, as well. Internship experiences have proven to be an important enhancement to graduate school applications, and they also increase opportunities for employment after graduation.

This major also provides excellent preparation for graduate study in master's and doctoral programs such as architecture, geography, political science, public administration, public policy, sociology, urban and regional planning, urban studies, economic development and related fields.

Urban Studies majors are encouraged to enroll in travel and study abroad programs. The department offers travel courses to Italy, the Ecuadorean Andes and Amazon, and the Galapagos Islands. These travel courses are developed with Urban and Regional Studies students in mind. For more information, please contact Urban and Regional Studies faculty directly, and or see the Urban and Regional Studies website. Students may study abroad (for semester or year long) or at other campuses in the United States through UW-Green Bay's participation in international exchange programs and the National Student Exchange. For more information on these programs contact the Office of International Education at (920) 465-2190 or see <http://www.uwgb.edu/international/>.

Water Science

(Bachelor of Science)

Overview of the Program

The UW-Green Bay Water Science program is an integrated program designed to provide students with the tools necessary to solve the water related challenges of today and tomorrow. Students may complete program requirements in four years. The curriculum is interdisciplinary, with a core set of courses drawn from geoscience, chemistry, environmental science, biology, physics, math and statistics, and public and environmental affairs. In addition, a diverse set of elective courses allow students to focus on subdisciplines in water science that can meet their career needs and interests. The major requirements are comprised of 71 credits, which include 33 credits of supporting courses, 22 credits of upper level core courses, and 16 credits of upper level electives. The comprehensive major has a principal focus on water's role in natural processes in Earth's systems. These skills include a solid understanding of the chemistry, surface water hydrology, groundwater, and biology of freshwater systems. UW-Green Bay Water Science majors have opportunities to work as research assistants on faculty projects, develop internships, or to conduct their own independent projects. UW-Green Bay faculty members are very active in research on water and wastewater treatment, runoff pollution, stream hydrology, groundwater quantity and quality, limnology, and aquatic ecology.

Student Learning Outcomes and Program Objectives

1. Students will be able to describe the role water plays in the lithosphere, hydrosphere, cryosphere, atmosphere, and biosphere, with emphasis on interactions between these reservoirs.
2. Students will apply the scientific method to investigations of hydrologic processes, Earth systems, and interactions among the various physical and biological realms utilizing standard scientific field and laboratory methods.
3. Students will demonstrate an understanding of the hydrology of streams and lake systems and the role water has in landscape-forming processes that act on the Earth's surface.
4. Students will be able to describe the processes of and importance of groundwater flow and aquifer systems.
5. Students will be able to compare chemical interactions that occur in various hydrologic settings and their importance to water resources, geological and biological systems, and water/wastewater treatment.
6. Students will be able to describe the role water plays in atmospheric systems and the climate system.
7. Students will be able to describe the interactions between water systems and ecosystems.
8. Students will be able to describe the challenges of maintaining surface and ground water quality.
9. Students will apply their knowledge base and research skills to current issues pertaining to water resources, management, and remediation, with emphasis on related economic, social, and public policy dimensions.
10. Students will analyze, interpret, and report on laboratory and field findings using appropriate statistical techniques and computer applications.

Major Area of Emphasis (p. 356)

Students must complete requirements in one of the following areas of emphasis:

- General
- Accelerated- Integrated with graduate Environmental Science & Policy program

Curriculum Guide

The following is an example of a four-year Water Science program and is a representation of one possible pathway. Students are encouraged to plan ahead and check with your advisor to ensure that they have the most accurate and up-to-date information available about a particular four-year degree option. Because some courses are fall/spring and even/odd year basis, timing of certain courses may vary. Students are encouraged to consider a minor that pairs well with Water Science. 120 credits necessary to graduate.

Women's, Gender, and Sexuality Studies

Women's, Gender, and Sexuality Studies (WGSS) explores:

- women's past and present contributions to societies as persons, creators, and thinkers.
- the intersectional diversity--racial, economic, sexual, religious, generational—of women's, men's, and nonbinary individuals' experiences.
- scholarship exposing the structural and institutional factors that perpetuate sexism, racism, classism, heteronormativity, and transphobia.

While WGSS is a discipline in its own right, our interdisciplinary program draws upon methods and content from a wide range of programs and majors, including anthropology, literature and the arts, biology, economics, history, political science, psychology, religion, and sociology. Our minor prepares students to:

- better understand individuals, particularly but not only women, and the social structures that impact the lives of individuals.
- think critically about the intersectional issues which they will face in their lives professionally and personally.
- extend their intellectual development by helping them to understand women's accomplishments and capabilities, and by looking beyond the limits of traditional gender-differentiated roles.
- think, research, and write while using strong interdisciplinary skills.

Thus, Women's, Gender, and Sexuality Studies is an essential component of a liberal arts education.

Any student may elect Women's, Gender, and Sexuality Studies as a minor in addition to their chosen major. The minor is excellent preparation for further study in law as well as for graduate programs in WGSS, psychology, social work, literature, and education. Graduates with WGSS minors are working in a variety of fields, including business, child and family services, education, journalism, and social service administration.

Women's, Gender, and Sexuality Studies Program Learning Outcomes

A student who completes a Women and Gender Studies minor at UWGB will demonstrate the ability to:

- critically read, recognize, and analyze the gendered identities presented to them;
- understand how gender expectations function in culture, history, and social dynamics
- investigate how gender constructs impact their everyday lives and issues within their major or current field of study
- begin to appreciate/understand other cultures and peoples through investigation of the role that gender plays in their societies
- construct alternative ways to analyze, synthesize, and evaluate their views of their major and related fields
- initiate positive change in terms of gender definition/stereotypes
- enhance their overall general education by synthesizing the various disciplines through this minor's pedagogical approach

Writing and Applied Arts

(Bachelor of Fine Arts)

Overview

Series like *Game of Thrones* and *Harry Potter* spend decades on bestseller lists. Movies inspired by comic books break box office records. Markets are exploding for literary fiction, sci-fi and fantasy, poetry, screenplays, game narratives, graphic memoirs, podcasts, and YA fiction. To meet industry demand for exceptional writing skills infused with creativity, UW-Green Bay offers the first and only degree of its kind in the UW-System: The Bachelor of Fine Arts in Writing and Applied Arts.

Craft-Focused Workshops, Community-Facing Opportunities

The B.F.A. in Writing and Applied Arts is a craft-focused, community-facing program offering a range of writing workshops, including novel writing, novel revision, romance writing, poetry, screenwriting, creative nonfiction, memoir, and flash fiction. Small class sizes (10 to 25 students) place student work at the center of discussion. Students can write and revise a novel, poetry manuscript, or memoir with mentored feedback for class credit. In addition, through its focus on Applied Arts, the BFA in Writing and Applied Arts offers opportunities for students to discover and tell our region's untold stories—connecting a student's love of reading and writing to real-world problem-solving, advocacy, and change.

The Business of Writing

According to the U.S. Bureau of Labor Statistics, employment of writers is projected to rise 8 to 14% over the next seven years in fields like technical writing, public relations, nonprofit fundraising, social media, library sciences, and community relations. Markets are growing for books in all formats and platforms. As emerging professionals, B.F.A. students develop expertise transferrable to any workplace. They also gain skills in communication, audience awareness, listening, empathy, communicating complex ideas and critical thinking — skills ranked in the top 10 most sought-after qualities by job recruiters. In the final year of the B.F.A. in Writing and Applied Arts, students engage in at least nine credit hours of hands-on expertise in areas such as small press publishing, copywriting, grant writing, podcasting, project development, journal editing, digital and social media, and marketing.

Choose One of Three Emphases

Students choose one of three interdisciplinary emphases:

- **Community-Outreach Emphasis.** Students in the Community-Outreach Emphasis bring writing to broader communities by organizing regional events, developing community workshops, and advocating to tell untold stories.
- **Editing and Publishing Emphasis.** Students in the Editing and Publishing Emphasis learn the business of storytelling in preparation to become copyeditors, content developers, comic book publishers, and promotional and marketing professionals.
- **Digital and Public Humanities Emphasis.** Students in the Digital and Public Humanities Emphasis gain hands-on experience digitizing, researching, and making texts available and accessible in preparation for careers in podcasting, digital storytelling, graphic book designers, library science, museum curation, or further scholarly research.

Program Outcomes for B.F.A. Students

- Students will create, draft, and revise original works in multiple genres and forms.
- Students will analyze the techniques, construction, and production of various written expressions.
- Students will critique works by peers and published authors alike in various classroom settings, including the writing workshop.
- Students will situate their work and the works of other writers within multiple larger audiences of readers, writers, the publishing industry, and other relevant markets.
- Students will identify sources of funding for arts and humanities projects, including their own individual projects.
- Students will interpret, research, and evaluate works of literature and related media by placing them in historical, philosophical, psychological, intertextual, and other contexts appropriate to the discipline.
- Students will articulate their aesthetic choices using appropriate artistic and professional terms.
- Students will develop proficiency in producing, copyediting, selecting content for, and disseminating various kinds of projects in an effort to engage communities within and outside of UWGB.

- Students will use reading, writing, editing, and producing literary texts or related media as an opportunity to deepen their insight into their own experiences and as vehicles for personal intellectual and imaginative growth.

Certificates

The Registrar's office transcribes certificates earned on an academic record when a student completes a degree. The Registrar's office does not transcribe a certificate on the academic record for students who do not earn a degree, but who complete a series of classes that are a part of a certificate program. Typically academic departments are responsible for printing and awarding a certificate of completion.

A

- Applied Politics (p. 363)

Digital Marketing and Sales Management

Certificate Program

The Digital Marketing and Sales Management Certificate is a 15-credit certificate for professionals working in the marketing functional area who desire to update their skills and knowledge. Our expert faculty use real-world examples, case studies and timely discussions to help marketing professionals become more proficient in digital aspects such as online advertising and managing social media portals while also enabling them to enhance the selling strategy of their organization. The courses in the certificate include sales-focused courses coupled with others that support the digital transformation of the marketing function.

Emergency Management

Certificate Program

Faculty, Public and Environmental Affairs – Marcelo Cruz, David Helpap, Ray Hutchison, Thomas Nesselin, Laurel E. Phoenix, John Stoll, Lora Warner, Aaron Weinschenk, Elizabeth Wheat

Website: www.uwgb.edu/pea/ (<http://www.uwgb.edu/pea/>)

There is a nationwide effort within the Emergency Management industry today toward requiring bachelor's degrees for professionals working in the field. This translates into more jobs in the future requiring advanced knowledge, critical thinking skills, and academic preparation – in short, a college degree. A degree from the University of Wisconsin-Green Bay with this added certificate will give you the edge you need to compete and succeed.

The risk of hazardous events is increasing dramatically as a consequence of our growing ability to alter our environment.

- Tornadoes, floods, fires, disease and other natural hazards endanger people and property each year.
- Homeland security is now a major focus for our federal, state and local governments. The events of September 11, 2001 brought home the acute necessity of planning for the social and economic impact of man-made disasters in the form of potential terrorist attacks.
- Technological hazards are on the increase. Complex industrial processes using hazardous materials are becoming more common in the workplace.

Experts project that emergencies causing catastrophic loss of life, property and resources will occur more frequently in the future. Devastation and losses from a disaster can be lessened when businesses, emergency personnel and governments put organized, developed plans in place. Such planning requires skills in budgeting, administration, management and emergency operation procedures.

Entrepreneurship

Certificate Program

Faculty – Vallari Chandna, Dept. of Marketing & Management

A certificate in Entrepreneurship is available to students in all academic programs. It consists of a four-course structure. Entrepreneurship skills keep organizations viable through innovation, and are greatly valued in the workplace. Students learn about problem solving, resourcefulness, and entrepreneurial tools, as well as develop independent, creative and critical thinking skills. The final component of the certificate program is an intensive scalable business startup and pitch experience (ENTRP 485) where students will start a real business. Students may need to declare for an Entrepreneurship Certificate prior to course registration.

Environmental Sustainability and Business

Certificate Program

Faculty, Business – Vallari Chandna, Amulya Gurtu, David Radosevich, John Stoll

Faculty, Environmental Science – Greg Davis, Kevin Fermanich, Patricia Terry, Michael Zorn

Faculty, Nursing – Christine Vandenhouten

Faculty, Public and Environmental Affairs – David Helpap, Elizabeth Wheat

The Environmental Management and Business Institute (EMBI) in conjunction with faculty from Business Administration, Natural and Applied Sciences, and Public and Environmental Affairs offers a broad-based certificate which documents that students have achieved an understanding of the importance of sustainable practices in business activities and community affairs, regardless of what area of emphasis a student's degree program may be centered upon. Understanding that our global future rests upon creating a citizenry that is aware of the need for economic, environmental, and social responsibility is critical for our world economy.

A certificate in Environmental Sustainability and Business is available to students in all academic programs. It consists of a supporting course structure that is complementary to the existing general education requirements and consistent with current credit-load requirements, and thereby will not delay a student's graduation. The main component of the certificate program is an intensive business internship or co-op experience.

Foundations of Education

The Accelerated Degree program has been designed with built-in flexibility and personalized advising, specially developed to expedite professional growth, while making it possible to manage a job, family and home. The Accelerated Degree allows for the option of completing an emphasis in Foundations of Education.

Foundations of Education anticipates the demand for teachers and instructors inside and outside the classroom at the elementary, high school, postsecondary and professional levels. An Accelerated Degree with an Education Emphasis will meet the requirements needed for students to apply for a substitute teacher license.

Health Information Management

Certificate Program

The Certificate of Degree represents an in-program certificate within the existing and established collaborative online BS in Health Information Management and Technology (BS-HIMT) program. The Certificate of Degree will be offered as a fully online, asynchronous curriculum comprised of existing BS-HIMT curriculum. The curriculum complies with the Commission on Accreditation for Health Information and Informatics Management (CAHIIM) Education standards currently being followed by the BS-HIMT program. Upon successful completion of the Certificate of Degree, students with an existing bachelor's degree will be eligible to sit for professional credentials offered thru The American Health Information Management Association (AHIMA). Credentials earned thru AHIMA are the gold-standard for Health Information Management professionals.

The Certificate of Degree program will serve as an option for BS-HIMT degree-seeking students with a prior bachelor's degree, as well as a freestanding certificate program for non-degree (i.e. certificate-only) students with an earned bachelor's degree who may or may not elect to pursue the full BS-HIMT degree following completion of the certificate. To assure academic rigor, "**Certificate** of the Degree programs must be in compliance with the 2018 Accreditation Standards for Baccalaureate Degree Programs and therefore must assure the achievement of all competencies as required by the 2018 HIM Curricula Competencies for Baccalaureate **Degree** programs. This coherent and complete program offers a pathway to the HIM profession for **prospective students that hold a previously earned baccalaureate degree or higher from an academic institution.**" (CAHIIM, 2021)

Following the collaborative model, students will select and enroll at a home campus from which they will receive full academic supports and the certificate is conferred. Academic advising will be provided by the designated BS-HIMT academic director at each institution.

Program Requirements and Curriculum:

Admission requirements for the Certificate of Degree in HIMT will include a Bachelor's degree or concurrent enrollment in the BS-HIMT program. Program prerequisites will include coursework in College level Statistics, Communications, Biology, Medical Terminology and Body Systems, and Survey of Disease Treatments.

Below outlines the 24-credit curriculum for the certificate. Students must successfully complete all eight courses to earn the certificate. Course syllabi have been included for informational purposes. Syllabi provided contain the basic information of the courses/course content.

Code	Title	Credits
Required Courses:		24
HIMT 301	Digital Literacy in Healthcare	
HIMT 340	Ethical issues, Security Management and Compliance	
HIMT 380	Healthcare Billing, Coding and Reimbursement	
HIMT 400	Healthcare Information and Technology - Data	
HIMT 415	Human Resource Management in Healthcare	
HIMT 420	Healthcare Systems: Project Management	

HIMT 430	Quality Assessment and Improvement
HIMT 440	Group Processes, Team Building and Leadership

Total Credits**24****Program Learning Outcomes:**

As defined above, the certificate program will consist exclusively of existing HIMT courses.

Lesbian, Gay, Bisexual, Transgender, and Queer Studies Certificate Program

The Lesbian, Gay, Bisexual, Transgender, and Queer (LGBTQ) Studies Certificate Program, housed administratively in the Women's, Gender, and Sexuality Studies Program (WGSS), is a campus-wide program open to students in any major. Consistent with UWGB's problem-focused, interdisciplinary traditions, course work is available across a broad range of fields, including, but not limited to WGSS, Democracy and Justice Studies, Human Development, History, English, and Humanities. The certificate also includes additional training in diversity and the development of a participant-directed, high-impact practice such as an internship, research project, or other practicum.

The LGBTQ Studies Certificate Program provides participants with a background in the history and lived experiences of Gender, Sexuality, and Romantic Minorities (GSRMs). The Certificate is participant-driven, allowing those enrolled to select courses and experiences directed by areas of interest (e.g., persons interested in the helping professions may seek a relevant internship in Human Development, Social Work, or Psychology; literary fans could study GSRMs through English electives and stage a reading of Oscar Wilde; the possibilities are endless). As such, the Certificate allows participants to work with an Advisor to cater the Certificate to their interests. For some, this could involve completing coursework across a number of different program areas; others will find that clustering coursework within a narrow field is most appropriate.

The certificate is available to current students majoring in any field and members of the community who wish to think informatively and critically about the lives and contributions of LGBTQ people, to respect the dignity of LGBTQ people, and to understand and interact with a culture that contributes to the diversity of our world. A defining feature of this Certificate is completion of a participant-directed, high-impact practice, some examples include activities such as a(n):

- independent study: Queer Theory symposium; contribute to building the LGBTQ archive at the Cofrin Library
- honors project: stage a public reading of a play by Oscar Wilde
- internship: volunteer at a local organization working with at-risk LGBTQ youth; develop and promote LGBTQ-themed programs for the Student Union
- research assistantship: assisting a faculty member on relationship study with same-sex couples; oral history of LGBTQ elders

Participants completing an LGBTQ Studies Certificate should demonstrate knowledge of the following concepts and issues:

1. The socio-cultural and historical construction of gender and sexual identities.
2. Intersectionality of gender and sexuality with race/ethnicity, religion, class, and nationality.
3. How to effectively challenge bigotry, inequality, and systems of oppression, including those based on gender and sexuality.
4. Major issues pertaining to the lives of LGBTQ people, historically and in contemporary societies (e.g. representations of LGBTQ individuals; the impact of queer culture on the dominant culture; violence; relationships between LGBTQ individuals/communities and institutions such as the medical and mental health professions, the law, religion, the media, education, and the military; family; and the LGBTQ Community and work.

Students must complete Ally Training I and II prior to declaring the certificate.

¹ e.g., internship, independent study, TA, RA, etc.

² Students may work with their certificate advisor to substitute other courses relevant to their content area and area of interest.

Management in Health Systems

Certificate Program

Description of the Certificate: This 15 credit certificate is for professionals working, or desiring to work, in the healthcare field. This is designed to serve professionals without any post-secondary education and/or experience in healthcare management. It will provide an overview of the various aspects of healthcare management including: operational management skills and knowledge, budgeting and finance, healthcare economics and population management. As the needs of professional healthcare managers and administrators continue to increase, a Management in Health Systems Certificate will provide the skills to meet the changing needs of today's healthcare industry.

Format: The Management in Health Systems certificate is offered in an online format, which allows students to balance their work and/or family obligations while advancing their education and career.

Course Credits: Five 3-credit, undergraduate courses are required for the Management in Health Systems certificate. These five courses are also included in UW-Green Bay's Organizational Leadership major with the Management in Health Systems area of emphasis. Courses completed toward the certificate will apply toward the Organizational Leadership major with the Management in Health Systems emphasis for degree-seeking students who choose this major.

Upon successful completion of the Management in Health Systems Certificate, students will receive a digital badge as a form of credentialing.

Rationale for the Certificate: Healthcare is the nation's fastest growing field and is projected to consistently grow statewide and nationally over the next 10 years. The Bureau of Labor Statistics forecasts 1.9% annual growth in the healthcare sector through 2024, more than twice the projected rate for almost every other industry. As hospitals and healthcare organizations continue to grow, there is an increased demand for managers to possess the necessary skills to take on leadership responsibilities that include business, technology and healthcare concepts. Creating an online healthcare management emphasis/certificate will help meet the workforce shortage and challenge of matching available talent with staffing needs, particularly in the leadership and management areas. The online format provides flexibility which will allow students to balance their work and/or family obligations while advancing their education and career.

Pre-requisite:

- High School Diploma or equivalent

Expectations:

- All candidates must have high school level analytical ability
- Proficient in reading, writing and math
- Proficient in computer skills and technology
- Experience with Microsoft Word, ability to write reports
- Take online exams using a laptop/PC

Nonprofit Management

Certificate Program

Faculty, Public and Environmental Affairs – Marcelo Cruz, David Helpap, Ray Hutchison, Kerry Kuenzi, Thomas Nesslein, Laurel Phoenix, John Stoll, Lora Warner, Aaron Weinschenk, Elizabeth Wheat

Lecturer - Pat Hicks

The faculty of the Public and Environmental Affairs department, along with its Center for Public Affairs, offers a broad-based certificate to demonstrate that students have achieved an understanding of the management principles for nonprofit organizations. Regardless of one's chosen major or degree, many graduates will find themselves working in or directing nonprofit enterprises. Understanding principles of nonprofit management and developing tools for such management is critical to future success.

A certificate in Nonprofit Management is available to students in any academic program. It consists of supporting courses that complement academic plans of students in the Organizational Leadership degree program who have chosen to pursue a Public/Nonprofit emphasis. This certificate program is also attractive to students who have chosen other majors, such as Arts Management, Psychology, Political Science, Democracy & Justice Studies, Public Administration, Social Work or others but desire to earn a free-standing certificate in nonprofit management. In addition to coursework, a critical element of the certificate program is the internship experience. The department has a wide array of strong internship partnerships with community agencies.

Physical Education

Including Coaching Certification

Faculty - Mark Keihn, Tim Kaufman, Pao Lor

The physical education unit does not offer a major or minor. However, physical education credits are included in a student's grade point average and may be applied toward a degree where approved by a program or as elective credits.

Enrollment in physical education activity presumes a student's health status is appropriate for the course selected. A physical examination and the filing of a health history form with the office of Student Health Services are recommended.

Coaching Certification

The coaching certification program consists of a minimum of 17 credits to prepare students for coaching responsibilities and is approved by the Wisconsin Department of Public Instruction for athletic coaching preparation for the public schools of Wisconsin. Youth-sport coaches are encouraged to acquire similar training.

Students desiring certification may normally complete requirements within two academic years, but it is wise to begin coaching certification coursework early. Completion of the coaching certification program is noted on your transcript.

Some coaching certification courses are appropriate for interdisciplinary study and many students select individual courses without completing the entire program. Persons already teaching and/or coaching may take courses to expand their personal and professional background.

UW-Green Bay's coaching certification program is consistent with the recommendations of the National Council of State High School Coaches, the National Association for Girls and Women in Sport, and the American Alliance of Health, Physical Education, Recreation and Dance.

Professional Ethics

Certificate Program

Certificate in Professional Ethics is available to students in any academic program. It is designed for a broad range of professions, including business, engineering, politics, law, medicine, nursing, social work, counseling, and teaching. Topics covered include ethical theory, professional codes of conduct, moral reflection, and ethical argumentation and debate. The emphasis and ultimate goal of the program is the development of a deeper understanding of oneself as a responsible professional.

Requirements: To attain the certificate, students will need to complete four courses (12 credits), with:

- at least one course from Category A,
- at least two courses from Category B,
- and a fourth course from any category (including Category C)

Courses within Category A involve profession-specific coursework and provide students the opportunity to consider applied ethical issues in the fields of business, medicine, engineering, and environmental policy. The courses within this category introduce students to a variety of concrete problems and case studies, ranging from euthanasia, physician-assisted suicide, and organ transplantation (for those pursuing medical degrees) to corporate social responsibility, environmental sustainability, and the ethical permissibility of whistleblowing (for those pursuing degrees in business, engineering, or environmental policy), to name just a few.

Such issues, however, gesture at deeper and more profound questions, and the courses in Category B provide students with the opportunity to consider these more abstract problems, answers to which are necessary for any informed and rigorous approach to applied ethics. What, for instance, are the ethical merits or demerits of capitalism? Which of the main normative ethical theories should one utilize when approaching applied issues? What is the nature of happiness and the good life? The courses in Category B offer students the opportunity to reach informed and reasoned convictions about such questions.

Finally, the courses in Category C permit students the flexibility to pursue topics unique to their chosen career path or field of interest. Students are not required to choose from Category C to attain the certificate; they may choose from among Categories A and B to satisfy this fourth-course requirement.

Learning Outcomes: By completing a professional ethics certificate, students will be able to

- enhance their careers by attaining a greater knowledge of ethics,
- develop an ability to recognize and address ethical questions,
- learn to make ethical decisions on the basis of sound reasoning and informed thinking, and
- become familiar with various ethical case studies as it pertains to the professions.

Students must attain at least a B in all courses and can pursue these courses in any order.

Code	Title	Credits

¹ Students may instead opt to choose a course not already used from Category A or B to satisfy the overall 12 credit requirement.

Rising Leadership

Certificate Program

To complement the Org Lead core classes, the Rising Leadership Certificate offers options for all students (not just women) to expand their understanding of issues of gender in organizations and to equip individuals with leadership aspirations with the ability to develop an inclusive workplace with special focus on gender equity.

Prior to the pandemic, the representation of women in leadership positions was growing at a slow but steady pace. While women represent half of the labor force and have eclipsed men in earning college degrees, women still hold only 25% of corporate leadership roles (McKinsey & Company, 2020). Moreover, research is beginning to show the disproportionate impact the COVID-19 pandemic has had on working women. Businesses and organizations of all types face the challenge of retaining and supporting our female team members at all levels, ages and life situations--especially African American women. No one is experiencing business as usual, but women, especially mothers, senior-level women and Black women – have faced distinct challenges as indicated in McKinsey & Company's 2020 report.

To address these challenges, both ongoing and recent, organizations need to develop women as leaders by providing support and education for women at all career stages. Organizational leaders need to understand the barriers and challenges facing women and how to utilize leadership strategies to create policies and cultures that promote success of employees. Employers are looking for credentialed programs to educate and support women at many levels and in many contexts so that they can advance into top leadership positions.

The purpose of the Rising Leadership Certificate is to prepare early-career/emerging leaders with key knowledge, perspectives and skills relating to gender and equity to promote career development in the workplace. With a focus on women and gender inclusivity, it will address societal, organizational, and personal issues that enable an individual to thrive as a leader and professional. It will be offered for credit-seeking undergraduate students as well as for community members as a non-credit option.

This Certificate will augment the existing Organizational Leadership Emphasis options for students. Currently, the flexible major requires core courses in leadership (Leadership in Organizations, HR, Org Research, Org Behavior, Budgeting) coupled with choice of Emphasis composed of 4-5 courses (9 choices, currently, including Public/NP Mgt, Healthcare Mgt, Business, Communications, and more).

The Certificate has been developed by the Organizational Leadership program in collaboration with the Institute for Women's Leadership (IWL) at UW-Green Bay, a new university-wide initiative that will offer an array of opportunities designed to develop the leadership potential of professional women in Wisconsin (and beyond). The Rising Leadership Certificate aims to serve mostly undergraduate students pursuing a degree. Many students pursuing the Organizational Leadership major can select the emphasis entitled Rising Leadership which also earns them the Certificate. Students with any other major declared can also pursue this Certificate. At the same time, community members can enroll in the five courses to obtain a stand-alone, non-credit Certificate in Rising Leadership.

Spanish/English Translation and Interpretation

This undergraduate Certificate in Spanish/English Translation and Interpretation provides UW-Green Bay students with a broad exposure to the theory and practice of the growing field of translation studies. Students can complement any major or minor with this Certificate. The Certificate does not substitute for or counts as a major or minor. However, Spanish courses completed towards the Certificate can also count towards a major or minor in Spanish.

To be eligible for the Certificate, students must be candidates for a B.A. or a B.S. degree at UW-Green Bay or have already completed such a degree at UW-Green Bay or elsewhere. Students must be declared Spanish majors and possess advanced linguistic proficiency in both English and Spanish.

Supply Chain Management

Certificate Program

Certificate in Supply Chain Management (SCM) is a 15 credit certificate for professionals working or desiring to work in the supply chain management function. This is designed to serve professionals with or without formal education and/or experience in SCM. It will provide an overview of the various aspects of SCM, improve the understanding of various principles and its applications in global supply chain management. This certificate will also provide exposure to logistics, transportation, packaging, operations planning, inventory management, lean and six-sigma and enterprise resource planning (ERP) among others.

SCM 434	Logistics Management	3
Total Credits		15

Teaching English as a Second Language

Certificate Program

The certificate of completion in Teaching English as a Second Language (TESL) is offered under the auspices of the Humanities program as an 18-credit program of study. It is designed for students who want to teach in situations that **do not** require Wisconsin public school teacher licensure, such as teaching English overseas or in adult literacy programs or tutorial programs sponsored by community service organizations or private companies. It can be a useful complement to training in other areas such as community and regional development, science and technology, or international business — wherever English is an important access language or a medium for training or cross-cultural communication.

This certificate is not equivalent to a professional licensure program for teaching in public elementary or secondary schools in Wisconsin. It can, however, be a first step toward obtaining that qualification. UW-Green Bay does offer professional licensure in English as a Second Language that is approved by the Wisconsin Department of Public Instruction. A full description of the ESL teacher licensure program and requirements at UW-Green Bay is available from the professional program in Education.

To be eligible for the TESL certificate of completion program, students must either be candidates for a B.A. or B.S. degree or have already completed such a degree.

Requirements for the Certificate

Preprofessional Programs

'Programs' Rather Than 'Majors'

UW-Green Bay provides excellent preparation for professional study in a variety of specialized fields.

This being the case, it is worth noting there are no separate listings in the majors-and-minors section of this catalog for pre-professional programs.

That is because UW-Green Bay avoids the designations pre-law, pre-med or "pre-anything" for specific undergraduate majors and minors. Instead, the institution encourages students to tailor their own preprofessional courses of study with the aid of knowledgeable academic advisers.

This puts the University in the higher education mainstream which holds that the best approach to preprofessional study involves flexibility.

For instance, while it is common to hear college students identify themselves as "pre-law," it typically means only that they plan to apply to a law school. Few universities anywhere offer an actual undergraduate major titled "pre-law." At those that do, the prescribed course of study represents only an opinion as to the most favored path; those most knowledgeable of law school admission practices maintain there is no such advantage.

Preparation for medical school admission is another example. A rigid menu of recommended courses might actually interfere with a student's ability to discover a special interest, excel and achieve academic distinction that otherwise would have enhanced his or her application for admission. In addition, most medical schools accept candidates from a relatively wide range of undergraduate majors. Preferred academic preparation will vary from school to school, and admissions board to admissions board.

In select fields of study, students may — through careful planning with the help of a knowledgeable adviser — develop a one-, two- or three-year course of study in preparation for transfer into a professional program. In many fields, however, the typical path involves choice of an appropriate undergraduate major and supporting courses, completion of a bachelor's degree, and pursuit of graduate-level studies.

It is important to remember that completion of any undergraduate program does not guarantee later admission to a professional school.

Admission to professional schools is competitive and is based upon a combination of requirements that includes grade point average, program-specific admission tests, letters of recommendation and, in many cases, related experience outside the classroom. It is a student's responsibility to contact the professional school for current information regarding requirements and application deadlines.

Dietetics

UW-Green Bay offers attractive options for those interested in becoming dietetic professionals and practicing the science of nutritional services with a focus on health promotion and disease prevention.

Through its Human Biology academic program, the University offers an accredited didactic program in nutrition and dietetics as well as a dietetic internship.

To become a registered dietitian, a student must complete a minimum of a bachelor's degree including coursework accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) of the Academy of Nutrition and Dietetics. The accredited coursework in dietetics is what is known as the didactic program. After a student completes the didactic program, he or she needs to complete an ACEND-accredited supervised practice experience or, in other words, a dietetic internship. A supervised practice program is typically between six to twelve months in length. Completion of the practice program makes a student eligible to take the National Registration Examination for Dietitians administered by the Commission on Dietetic Registration.

Students who wish to participate in a dietetic internship program must apply to that program upon completion of the didactic program. Students who graduate from the didactic program at UW-Green Bay are eligible to apply to the dietetic internship program at UW-Green Bay or accredited, supervised practice programs offered elsewhere. It is the student's responsibility to contact each dietetic internship program for current requirements and application procedures. Most internship applications are due in February each year.

Course requirements for the didactic program in nutrition and dietetics at UW-Green Bay are located in this catalog under the Human Biology major (p. 211).

Engineering

UW-Green Bay provides degrees in mechanical engineering, electrical engineering, three engineering technology majors, and solid preparation and numerous opportunities for those interested in beginning work toward other engineering degrees.. A student at UW-Green Bay can also pursue pre-professional studies with the intent of transferring into engineering programs at other institutions, with several listed below.

Required engineering courses will vary, depending on the engineering program from which a student expects to earn the degree. Generally, a student spends a minimum of two years in engineering studies at UW-Green Bay before transferring to the professional engineering school. Required coursework is typically drawn from mathematics, physics, chemistry, engineering materials, engineering mechanics and other related courses, as well as liberal arts coursework in the humanities, fine arts and social sciences.

Students should expect rigorous requirements and competitive entry for engineering programs. Students should also seek early advice from the various engineering programs and UW-Green Bay's Academic Advising Office.

UW System institutions grant engineering degrees offer courses leading to the degrees both at their home campuses and several satellite sites. The universities are:

- UW-Madison – degrees in agricultural, biomedical, biological systems, chemical, civil, computer, electrical, geological, industrial, materials science, mechanical and nuclear engineering, and engineering mechanics.
- UW-Milwaukee - degrees in civil/environmental engineering and mechanics, electrical, industrial and manufacturing, materials and mechanical engineering.
- UW-Platteville – degrees in civil, electrical, environmental, mechanical, industrial, software engineering, general engineering and engineering physics.
- UW-Stevens Point - degree in paper science and chemical engineering
- UW-Stout - degrees in computer, mechanical, manufacturing, and plastics engineering

Advisers from engineering schools annually visit UW-Green Bay to answer questions and advise prospective students.

Suggested courses for students planning to complete engineering degrees at another institution:

Health Sciences

Dentistry, Medicine, Optometry, Physical Therapy, Physician Assistant, Chiropractic

With a reputation for strength in the natural sciences dating to the institution's founding, along with experienced faculty members and exceptional classroom and laboratory facilities, UW-Green Bay places a good number of students and alumni into professional schools in the health sciences each year.

Students seeking admission to these schools typically complete a bachelor's degree at UW-Green Bay with a major in Human Biology (health science emphasis) or a major in Biology or Chemistry with a minor in Human Biology. Other combinations are possible, however, as most professional schools in health sciences will consider a range of undergraduate majors.

Competition for admission to schools of medicine and other health fields is often intense; typically, the number of applicants exceeds the number of positions for professional school openings. Given these circumstances, students should plan undergraduate programs that provide maximum flexibility for pursuing post-baccalaureate opportunities.

Those pursuing a career in medicine will typically follow their UW-Green Bay bachelor's degree with four years of medical school and at least three but as many as eight additional years of internship and residency, depending on the specialty. Students are highly encouraged to volunteer at local hospitals or clinics to gain practical experience in the health professions.

Most dental-school applicants have at least a bachelor's degree, although a few are accepted to dental school after two or three years of college and complete their bachelor's while attending dental school. Dental school usually lasts four academic years.

The doctor of optometry degree requires the completion of a four-year program at an accredited optometry school. As with dental school, most students hold a bachelor's degree or higher, but a small number of applicants will be admitted following at least three years of focused pre-optometric study.

Education programs for physician assistants are two-year programs at the master's degree level. Admission requirements vary, but many programs require some volunteer hours or work experience in the healthcare field.

According to the American Physical Therapy Association, there are about 200 accredited physical therapist programs in the United States, split between programs offering master's degrees and those awarding doctoral degrees. Specialized courses in biomechanics, neuroanatomy, human growth and development, and therapeutic procedures are required, and students receive supervised clinical experience.

Most state boards overseeing chiropractic require at least two years of undergraduate education; an increasing number are requiring a four-year bachelor's degree. All boards require the completion of a four-year program at an accredited chiropractic college leading to the doctor of chiropractic degree.

Typically, health-profession schools express a preference for students who have a long record of consistently high-level performance and come highly recommended by the undergraduate school. Personal references are important. UW-Green Bay undergraduates interested in professional schools in the health sciences are encouraged to take advantage of opportunities to assist faculty members with high-level research, and to pursue their own research projects. Historically, such experience has been extremely helpful to UW-Green Bay students who were successful professional-school candidates.

Admission committees — particularly for medical schools — tend to seek applicants who give evidence of having the ability to be critical thinkers, problem solvers and lifelong learners. A well-rounded record of campus and community involvement, and intellectual curiosity across multiple fields, are other positive factors. Also subject to evaluation are perceived personality traits including capacity for compassion, decision-making and coping skills, communication ability and personal determination, among other attributes.

The best advice for UW-Green Bay students is to seek preprofessional faculty advisers in their interest area early in their academic careers for help in selecting courses and, later, in studying for professional school admission tests and applying to professional schools.

A good starting point for new freshmen is to review the University's Human Biology major which encompasses five areas of emphasis:

- Health science emphasis – recommended for preparation for medical, dental or other health-related professional schools, or for graduate programs in biological or health sciences.
- Exercise science emphasis – provides background for careers in exercise physiology/fitness, sports medicine, biomechanics, physical therapy or occupational therapy.
- The cytotechnology emphasis – leads to professional certification as a registered cytotechnologist (specialist in the microscopic study of cells, primarily for the detection of cancer).
- The nutritional sciences/dietetics emphasis – provides a focus on the biological and physical principles of nutrition. See the "Dietetics" listing on the previous page for additional information.
- General emphasis – appropriate for sales, managerial and other positions in the health sciences including entry-level research positions with pharmaceutical or biotechnology companies.

Refer to the Human Biology, Biology and Chemistry majors described elsewhere in this catalog for additional information.

Law

Students attending UW-Green Bay with the intention of earning a bachelor's degree and continuing on to law school receive excellent preparation.

The University's commitment to broad-based liberal arts education, multiple perspectives and hands-on learning correlates directly with skills seen as valuable for those pursuing careers in law. Those skills include intellectual curiosity, critical thinking and problem-solving ability.

Commonly chosen majors at UW-Green Bay include Democracy and Justice Studies, Public Administration, Urban and Regional Studies, Humanistic Studies, Political Science, History, English, and Business Administration. Unlike some professional schools, law schools do not recommend a specific undergraduate major.

The American Bar Association advises pre-law candidates that the law is "too multi-faceted" to be limited to one particular major or a narrow list of courses in preparation for law school. The ABA maintains an excellent pre-law advising page (https://www.americanbar.org/groups/legal_education/resources/pre_law/).

Most law schools tell potential students that the best preparation is a solid liberal arts education. Essential core skills and values include analytic and problem-solving skills, critical reading abilities, writing skills, oral communication and listening abilities, general research skills, task organization and management skills, and the values of serving faithfully the interests of others while also promoting justice.

In general, law schools assume their students will have a basic knowledge of American politics and history, as well as extensive experience in writing, reading and interpreting difficult texts. Polished communication skills — in particular the ability to excel in oral discussion — are imperative.

In conclusion, the ABA recommends, "Taking difficult courses from demanding instructors is the best generic preparation for legal education."

Admission to law school is competitive. Law schools consider college record, grade point average, honors or awards, faculty recommendations, and scores on the Law School Admissions Test (LSAT). Students are advised to take the LSAT in the junior year or early in the senior year; most law

schools group their entering cohorts for fall-only starts. The Law Society, a UW-Green Bay student organization, organizes an LSAT preparatory course and offers various pre-law events such as guest speakers and field trips to law schools.

Military Science

Reserve Officers Training Corp (ROTC) Program

Instructor – SSG Billie Sabel - Military Science Instructor
E-mail: sabelb@uwgb.edu (predern@uwgb.edu); Phone: (920) 224-2354

Military science is concerned primarily with the exploration and development of leadership and management. Students who want to develop such skills pursue studies in military science in addition to their majors and minors. Students register for these courses at UW-Green Bay and the classes are conducted at UW-Green Bay and St. Norbert College.

Military science consists of a core curriculum of military skills and professional knowledge integrated in both basic and advanced courses. The ultimate purpose of the program is to provide college-trained officers for the U.S. Army, Army Reserve and Army National Guard. The program encourages participants to more fully develop personal qualities, including sense of duty, integrity, loyalty, respect, selfless service and honor, necessary for military leadership.

The program is conducted by the Reserve Officers Training Corp (ROTC) located at St. Norbert College. Completion of the advanced ROTC courses and a baccalaureate degree provides opportunities for full- or part-time careers as officers in the U.S. Army, Army National Guard, or Army Reserve.

Courses

MIL SCI 101. Leadership and Military Science I. 2 Credits.

This is an introductory course designed to focus on the fundamental components of service as an officer in the United States Army. Students are familiarized with individual values, leadership traits and the fundamentals of officer ship. Students also learn "life skills" of physical fitness, communication applications, both oral and written, as well as interpersonal relationships. The lab provides basic instruction on squad movement techniques and the six-squad tactical missions of patrolling, attack, defense, ambush, reconnaissance, and squad battle drills. Additionally, students learn basic map reading, first aid, physical fitness, and military formations to include basic marching techniques.

Fall Only.

MIL SCI 102. Leadership and Military Science II. 2 Credits.

This course is an orientation to leadership theory and the fundamentals of decision-making process by learning how to solve problems and develop critical thinking skills. Students develop followership skills and the ability to learn goal-setting techniques while working in a group interaction setting. The lab continues to provide basic instruction on squad movement techniques and the six-squad tactical missions of patrolling, attack, defense, ambush, reconnaissance and squad battle drills. Students are introduced to the operations order format.

Spring.

MIL SCI 103. Introduction to Military Science I. 1 Credit.

An introductory course designed to focus on the fundamental components of service as an officer in the United States Army. Students are familiarized with individual values, leadership traits and the fundamentals of officer ship. Students also learn "life skills" of physical fitness, communication applications, both oral and written, as well as interpersonal relationships. The course provides basic instruction on squad movement techniques and the six-squad tactical missions of patrolling, attack, defense, ambush, reconnaissance, and squad battle drills. Additionally students learn basic map reading, first aid, physical fitness, and military formations to include basic marching techniques. Students are eligible to attend Fox Valley Battalion events to include; Ranger Challenge, Commanders Cup competition and the Military Dining In.

Fall Only.

MIL SCI 104. Introduction to Military Science II. 1 Credit.

Further development of leadership skills and the orientation of the ROTC program designed to focus on the fundamental components of service as an officer in the United States Army. Students are familiarized with individual values, leadership traits and the fundamentals of officer ship. Students also learn "life skills" of physical fitness, communication applications, both oral and written, as well as interpersonal relationships. the course provides basic instruction on squad movement techniques and the six-squad tactical missions of patrolling, attack, defense, ambush, reconnaissance, and squad battle drills. Additionally students learn basic map reading, first aid, physical fitness, and military formations to include basic marching techniques. Students are eligible to attend Fox Valley Battalion events to include: Ranger Buddy, Northern Warfare Challenge, Norwegian Foot March, German Armed Forces Badge Competition and the Military Ball.

Spring.

MIL SCI 183. Military Conditioning. 1 Credit.

Students participate in the United States Army's military conditioning and fitness program designed to develop both individual fitness and the leadership skills and knowledge essential to the management of an effective organizational physical fitness program. Course is repeatable for credit; may be taken 8 times for a total of 8 credits.

Fall and Spring.

MIL SCI 201. Basic Leadership and Management I. 3 Credits.

Students learn how to resolve ethical problems by applying leadership theory and principles. Students learn self-development techniques such as the importance of stress management, time management and the ability to solve problems. Lastly, students apply communication theory and skills in a leadership study focusing on problem solving. The lab applies basic leadership theory and decision making during practical exercises in a field environment. Students continue to develop basic map reading, first aid, physical fitness and military formations to include basic march techniques.

P: Mil Sci 101 and Mil Sci 102

Fall Only.

MIL SCI 202. Basic Leadership and Management II. 3 Credits.

Students focus primarily on leadership with an extensive examination of the unique purpose, roles and obligations of commissioned officers. Students also focus, in detail, on the origin of our institutional values and their practical application in the decision-making process and leadership theory. Students use case studies to learn the Army's ethical decision-making process. The lab continues to apply basic leadership theory and decision making during practical exercises in a field environment. Students continue to develop basic map reading, first aid, physical fitness and military formations to include basic march techniques.

P: Mil Sci 101 and Mil Sci 102

Spring.

MIL SCI 301. Advanced Leadership and Management I. 4 Credits.

Students are introduced to the Leader Development Program that will be used to evaluate their leadership performance and provide developmental feedback for the remainder of their cadet years. Cadets are taught how to plan and conduct individual and small unit training, as well as basic tactical principles. Cadets will also learn reasoning skills and the military specific application of these skills in the form of the Army's troop. The lab reinforces small unit tactical training while employing the troop leading procedure to accomplish planning and decision-making. Students continue to learn basic map reading, first aid, physical fitness and military formations to include basic march techniques.

P: Mil Sci 101, 102, 201, and 202

Fall Only.

MIL SCI 302. Advanced Leadership and Management II. 4 Credits.

The course focus is doctrinal leadership and tactical operations at the small unit level. Students are provided opportunities to plan and conduct individual and collective training for Army operations. Synthesizing training, leadership and team building is the primary focus. Upon completion, students possess the fundamental confidence and competence of leadership in a small unit setting. The lab continues reinforcing small unit tactical training while employing the troop leading procedures to accomplish planning and decision-making. Students also continue basic map reading, first aid, physical fitness and military formations to include basic march techniques.

P: Mil Sci 101, 102, 201 and 202

Spring.

MIL SCI 401. Applied Leadership and Management I. 4 Credits.

This course concentrates on leadership, management and ethics to begin the final transition from cadet to lieutenant. Students focus on attaining the knowledge and proficiency in several critical areas they need to operate effectively as Army Officers. These areas include coordinating activities with staff, counseling theory and practice within the Army Context, training management and ethics. Students develop and possess the fundamental skills, attributes and abilities to operate as competent leaders in a cadet battalion. They must confidently communicate to subordinate cadets their preparedness to shoulder the responsibilities entrusted to them.

P: Mil Sci 301 and Mil Sci 302

Fall Only.

MIL SCI 402. Applied Leadership and Management II. 4 Credits.

Students learn the legal aspects of decision-making and leadership. Instruction introduces the student to the organization of the Army from the tactical to the strategic level. Students learn administrative and logistical management focusing on the fundamentals of soldier and unit level support. Practical exercises require the student, both individually and collectively, to apply their knowledge to solve problems and confront situations commonly faced by junior officers. The lab continues to sharpen the student's leadership skills. Students normally change leadership positions to hone their skills, attributes and abilities as leaders. Again, they must confidently communicate to subordinate cadets their preparedness to shoulder the responsibilities entrusted to them.

P: Mil Sci 301 and Mil Sci 302

Spring.

MIL SCI 498. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. A student wishing to study or conduct research in an area not represented in available scheduled courses should develop a preliminary proposal and seek the sponsorship of a faculty member. The student's advisor can direct him or her to instructors with appropriate interests. A written report or equivalent is required for evaluation, and a short title describing the program must be sent early in the semester to the registrar for entry on the student's transcript.

P: fr or so st with cum gpa > or = 2.50; or jr or sr st with cum gpa > or = 2.00.

Pharmacy

UW-Green Bay offers courses satisfying requirements for admission into a professional program in pharmacy. There are two schools in Wisconsin: UW-Madison and Concordia University.

The practice of pharmacy is regulated by law and requires that a candidate be a graduate of an accredited professional school, complete an internship and pass a licensure examination. Pharmacy programs grant the degree of doctor of pharmacy, which requires a minimum of six years of postsecondary study. National statistics show most students have at least three years of undergraduate experience prior to entering the four-year course of study.

Advisers from UW-Madison usually visit UW-Green Bay each year to help pre-pharmacy students plan their programs. Admission to the School of Pharmacy is based on completion of prerequisite courses, grade point average, letters of recommendation, and Pharmaceutical College Admissions Test (PCAT) scores. Grade point averages in mathematics and science courses are particularly important.

Licensure involves rigorous requirements, including completion of 1,500 hours of internship to qualify for licensure. Following completion of the internship requirement, prospective pharmacists must pass an examination administered by the Wisconsin Pharmacy Examining Board. Graduates of the UW program pursue careers in community pharmacy, hospital pharmacy, and home care, assisted-living, extended care, and long-term care pharmacy. Other career opportunities include research and discovery in the pharmaceutical industry or education. In addition, studies in pharmacology (concerned with the properties, effects, and mechanisms of the action of drugs, and with the interactions between chemical agents and biological systems) and toxicology, the science of poisons, are available.

For more information about pre-pharmacy studies, contact the Human Biology Department. (<https://www.uwgb.edu/human-biology/>)

Veterinary Medicine

Each school of veterinary medicine establishes its own requirements; therefore, students pursuing careers as veterinarians need to plan both preprofessional coursework and practical experiences to enhance their chances of acceptance. Veterinary schools value experience in working with animals as well as evidence of academic ability in preprofessional courses.

Wisconsin has a college of Veterinary Medicine at UW-Madison. The School of Veterinary Medicine does not offer a bachelor's degree program. However, the school does offer a number of courses that are available to undergraduates, and it offers residency, master's, Ph.D., and doctor of veterinary medicine (DVM) degrees. Scores from the Graduate Record Exam (GRE) must be submitted at the time of application. In addition to grade point average and GRE scores, evidence of motivation, promise of effective performance, communication skills, and breadth of experience, particularly that relate to veterinary practice, are taken into consideration.

At UW-Green Bay, most students pursuing this career path major in Biology with a Human Biology or Environmental Science minor. For more information about pre-veterinary medicine studies, contact the Biology Department (<https://www.uwgb.edu/biology/>).

Undergraduate Course Descriptions

Accounting (ACCTG)

Courses

ACCTG 201. Principles of Financial Accounting. 3 Credits.

Principles, concepts and terminology of financial accounting including coverage of the measurement and recording of business income and transactions, current and long-term assets, current and long-term liabilities, corporate equity, and financial statement analysis. Ethical considerations and analysis of company statements are integrated into the course.

P: 15 credit hours with sophomore standing recommended

Fall and Spring.

ACCTG 202. Principles of Managerial Accounting. 3 Credits.

The use and understanding of management accounting information for planning, control, performance evaluation, decision making; product costing using traditional and activity based costing techniques, just-in-time, cost-profit-volume relationships, budgeting, variance analysis, decentralization, relevant costing, and ethics.

P: ACCTG 201 and sophomore standing.

Fall and Spring.

ACCTG 297. Internship. 1 Credit.

Supervised practical experience in an organization or activity appropriate to a student's career and educational interests. Internships are supervised by faculty members and require periodic student/faculty meetings. Course is repeatable for credit; may be taken 3 times for a total of 6 credits.

ACCTG 298. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. A student wishing to study or conduct research in an area not represented in available scheduled courses should develop a preliminary proposal and seek the sponsorship of a faculty member. The student's advisor can direct him or her to instructors with appropriate interests. A written report or equivalent is required for evaluation, and a short title describing the program must be sent early in the semester to the registrar for entry on the student's transcript. Course is repeatable for credit.

P: fr or so st with cum gpa > or = 2.50; or jr or sr st with cum gpa > or = 2.00.

Fall and Spring.

ACCTG 299. Travel Course. 1-6 Credits.

Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.

P: cons of instr & prior trip arr & financial deposit.

ACCTG 301. Intermediate Accounting I. 3 Credits.

The course is the first of three intermediate accounting courses. Focus is on financial accounting theory, concepts, principles and procedures relating to the measurement and reporting of cash, receivables, inventories, and property, plant, and equipment and intangibles. Review and deep understanding of the full accounting cycle including journal entries, adjusting and closing entries, trial balance, and preparation and understanding of the balance sheet, income statement, statement of comprehensive income, and statement of cash flows.

P: ACCTG 201 with at least a "BC" grade and an overall minimum GPA of 2.5

Fall and Spring.

ACCTG 303. Seminar in Accounting Professionalism. 2 Credits.

Seminar in Accounting Professionalism is designed to familiarize prospective accounting majors with their profession. Topics will include various career paths in accounting, professional demeanor, and professional ethics.

P: Acctg 201 and Bus Adm major or minor or Acctg major or minor and an overall minimum GPA of 2.5

Fall Only.

ACCTG 313. Intermediate Accounting II. 3 Credits.

The course is the second of three intermediate accounting courses. Emphasis is on developing financial statements that clearly and accurately depict a company's performance. Focus is directed on revenue recognition, investments, current liabilities, bonds, and leases.

P: ACCTG 301 with at least a BC grade and an overall minimum GPA of 2.5

Fall Only.

ACCTG 314. Advanced Accounting. 3 Credits.

Accounting for long-term investments; business combinations; preparation of consolidated financial statements; inter-company profit issues; inter-company debt issues; earnings-per-share calculations; accounting for foreign operations and partnerships.

P: ACCTG 301 with at least a BC grade and an overall minimum GPA of 2.5; REC: ACCTG 313.

Spring.

ACCTG 316. Governmental and Nonprofit Accounting. 3 Credits.

Recommended for students planning to take the CPA exam. Financial and managerial accounting concepts, theory and terminology related to state and local governmental entities and not for profit organizations including universities, health care organizations, voluntary health and welfare organizations and other not for profit entities. Analysis of actual municipal financial statements. Case studies, group work and/or class presentations emphasize application of theory to actual situations including ethical considerations.

P: ACCTG 301 with at least a C grade and an overall minimum GPA of 2.5

Fall and Spring.

ACCTG 323. Intermediate Accounting III. 3 Credits.

The course is the third of three intermediate accounting courses. Emphasis is on developing financial statements that clearly and accurately depict a company's performance. Focus is directed on accounting for income taxes, pensions and other postretirement benefits, share-based compensation and EPS, accounting changes and error corrections, and an in-depth review of the statement of cash flows.

P: ACCTG 301 with at least a BC grade and an overall minimum GPA of 2.5. REC: ACCTG 313

Spring.

ACCTG 410. Introduction to Income Tax Theory and Practice. 3 Credits.

Federal income taxation, especially tax rules and the determination of taxable income for individuals. Topics include: exclusions, deductions, passive activity losses, property transactions, nontaxable exchanges, capital gains and losses.

P: ACCTG 201 with at least a C grade and an overall minimum GPA of 2.5

Fall Only.

ACCTG 411. Accounting Information Systems. 4 Credits.

Principles of systems design, emphasizing organizational structure; internal control; flow charts and the impact of people on systems studies; systems requirements of the procedural areas of accounting systems, such as cash, purchasing, inventory management, sales, and billing.

P: ACCTG 202 with at least a BC grade and an overall minimum GPA of 2.5

Fall Only.

ACCTG 412. Auditing Standards and Procedures. 4 Credits.

Audit standards, professional ethics, legal liability of auditors; audit procedures relating to assets, liabilities, equity, revenue and expense accounts; review of computer applications in auditing, statistical sampling and internal auditing.

P: ACCTG 411 and an overall minimum GPA of 2.5

Spring.

ACCTG 413. Income Tax Practicum (VITA). 3 Credits.

Students will work in the community to prepare tax returns for students, low income individuals and families, and the elderly.

P: ACCTG 201 and Bus Adm major or minor or Acctg major or minor and an overall minimum GPA of 2.5; REC: ACCTG 410

Spring.

ACCTG 414. Cost Accounting. 4 Credits.

Expands and broadens the cost accounting concepts and methods presented in ACCTG 202. The class includes accounting for Process and ABC product costing systems, standard costing, variance analysis, Balanced Scorecard and strategy measurement, inventory costing and management, cost allocations, quality, target costs and transfer pricing.

P: ACCTG 202 with at least a BC grade and an overall minimum GPA of 2.5. REC: MATH 260 or BUS ADM 220 or PSYCH 205

Fall and Spring.

ACCTG 415. Advanced Income Tax Theory and Practice. 3 Credits.

Recommended for students planning to take the CPA exam. Advanced topics in federal taxation, with emphasis on the federal taxation of corporations, partnerships, and exempt organizations. Estate and gift taxation and the income taxation of estates and trusts.

P: ACCTG 301 and ACCTG 410 with at least a C grade and an overall minimum GPA of 2.5

Spring.

ACCTG 423. Advanced Income Tax Practicum (VITA). 3 Credits.

This is a service learning course working in the community that provides free tax preparation for students, low income individuals and families, and the elderly, in conjunction with the IRS. Students apply their knowledge of tax law to the preparation and e-filing of advanced income tax returns. Advanced students also review the work of undergraduate preparers, and assist in the supervision and training of undergraduate preparers. This course is graded pass/no pass only.

P: ACCTG 410 and ACCTG 413, and an overall minimum GPA of 2.5

Spring.

ACCTG 452. Accounting Data Analytics. 3 Credits.

Accounting analytics develops new insights and understanding of financial and non-financial performance by examination of large data sets pertaining to past financial and non-financial information and events. This course is intended to provide students with an understanding of data analytic thinking and terminology as well as hands-on experience with data analytics tools and techniques. Students should leave this course with the skills necessary to translate accounting and business problems into actionable proposals that they can competently present to managers and data scientists.

P: ACCTG 301 with at least a BC grade; BUS ADM 220 or MATH 260 or PSYCH 205; and an overall minimum GPA of 2.5

Fall Only.

ACCTG 478. Honors in the Major. 3 Credits.

Honors in the Major is designed to recognize student excellence within interdisciplinary and disciplinary academic programs.

P: min 3.50 all cses req for major and min gpa 3.75 all UL cses req for major.

Fall and Spring.

ACCTG 495. Teaching Assistantship. 1-6 Credits.

The student and supervising teacher must prepare a statement that identifies the course with which the assistantship will happen, objectives for the assistantship, and expectations in order to fulfill the course objectives. Students are not eligible to receive credit in both the course they assist the instructor with and the teaching assistantship in the same semester. Typically student has previously taken the course prior to enrollment in the assistantship. Course is repeatable for credit.

ACCTG 496. Project/Research Assistantship. 1-6 Credits.

The student must prepare a research proposal, and both parties should identify the research arrangement and how the student will complete the work to fulfill the course objectives within the assigned term.

P: jr st.

ACCTG 497. Internship. 1-12 Credits.

Supervised practical experience in an organization or activity appropriate to a student's career and educational interests. Internships are supervised by faculty members and require periodic student/faculty meetings. Course is repeatable for credit.

P: soph st and major/minor in Acctg; min 2.5 GPA.

ACCTG 498. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. A student wishing to study or conduct research in an area not represented in available scheduled courses should develop a preliminary proposal and seek the sponsorship of a faculty member. The student's advisor can direct him or her to instructors with appropriate interests. A written report or equivalent is required for evaluation, and a short title describing the program must be sent early in the semester to the registrar for entry on the student's transcript. Course is repeatable for credit.

P: Bus Adm major or minor or Acctg major or minor and an overall minimum GPA of 2.5

Fall and Spring.

ACCTG 499. Travel Course. 1-6 Credits.

Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.

P: cons of instr & prior trip arr & financial deposit.

Anthropology (ANTHRO)

Courses

ANTHRO 100. Varieties of World Culture. 3 Credits.

The variety of ways of life that exist in the world and the concepts of culture, cultural relativity, and ethnocentrism. Representative case studies of world cultures are considered.

Fall and Spring.

ANTHRO 150. Food Culture & Identity. 3 Credits.

Food is the very core of life and one of the most culturally prescribed areas of human experience. This course will study the role of food in human history, and the biocultural construction of what is classified as food. We will examine the meaning of food across cultures with particular attention to how cultural and ethnic (e.g. Asian American, Native American) identities are associated with particular types of food. Rituals, religions and family celebrations, and secular holidays all include the deliberate preparation, serving and sharing of food (or abstinence from food). We will explore food consumption and health, the gendered dimension of food, and the social hierarchies and power relations associated with the commodification of food. Class projects are designed to connect the student to various community and ethnic groups through the study of farmer's markets, food banks, stores and restaurants. We will think about food in new and provocative ways and in the process practically apply theoretical concepts.

ANTHRO 250. Women in Cross-Cultural Perspectives. 3 Credits.

Study of women in a variety of cultures around the world, both past and present. Includes consideration of the sexual division of labor, marriage systems, child rearing, relationships between men and women, systems of myth and ideology concerning women's roles, and the effects of socio-economic development and rapid social change. Not recommended for first-semester students.

ANTHRO 291. Selected Topics in Anthropology. 3 Credits.

A specific topic in an instructor's area of special competence. When offered, the particular topic is indicated in the campus timetable. Course is repeatable for credit if topics differ; may be taken 2 times for a total of 6 credits.

P: Previous Anthropology course or cons. instr.

ANTHRO 298. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. A student wishing to study or conduct research in an area not represented in available scheduled courses should develop a preliminary proposal and seek the sponsorship of a faculty member. The student's advisor can direct him or her to instructors with appropriate interests. A written report or equivalent is required for evaluation, and a short title describing the program must be sent early in the semester to the registrar for entry on the student's transcript. Course is repeatable for credit.

P: fr or so st with cum gpa > or = 2.50; or jr or sr st with cum gpa > or = 2.00.

Fall and Spring.

ANTHRO 304. Family, Kin, and Community. 3 Credits.

A cross-cultural comparison of the form and function of such social institutions as marriage and the family; age, sex and kin groups; task groups; caste and class.

P: Junior standing REC: Anthro 100

Fall Only.

ANTHRO 306. Environmental Anthropology. 3 Credits.

This course focuses on the complex relations between people and their environment. Environmental anthropology has become more important since the 1990s due to issues like climate change. The course addresses the ways a population affects the environment and how these relations influence the social, economic, and political life of a culture. The topics covered in this class are particularly relevant in an era bombarded with concerns about environmental degradation. Environmental anthropology, utilizing research methodology of the discipline, uses a multidisciplinary and cross-cultural approach in a search for sustainable solutions to problems.

P: Anthro 100 or consent of instructor

Fall and Spring.

ANTHRO 307. Anthropological Theory. 3 Credits.

Explores the historical contexts of the development of theory in anthropology in the attempt to define and understand human biological, linguistic, social and cultural universals and variations. The major schools of anthropological theory are studied by reading and discussing original 19th and 20th century anthropological texts.

P: ANTHRO 100

Spring.

ANTHRO 314. Cultures of the World. 3 Credits.

Ethnographic survey of the world's peoples and their cultures. Major regions of the world considered in an attempt to outline the variety, richness, significance and persistence of cultural traditions.

P: Junior standing or consent of instructor.

ANTHRO 320. Myth, Ritual, Symbol and Religion. 3 Credits.

Mythology, ritual, and symbolism in the belief systems of a variety of cultures around the world; a survey of anthropological theory relating to belief systems.

P: jr st and Anthro 100.

Fall Only.

ANTHRO 348. Economic Anthropology. 3 Credits.

Economic Anthropology explores human engagement in systems of production, distribution, and consumption of goods. This course surveys the ways in which economic activities are enmeshed in local cultural rituals and obligations and form the basis of global economic exchanges. Students will examine a variety of past and contemporary economies at the local (subcultures including minority groups within the United States) as well as global level.

ANTHRO 495. Teaching Assistantship. 1-6 Credits.

The student and supervising teacher must prepare a statement that identifies the course with which the assistantship will happen, objectives for the assistantship, and expectations in order to fulfill the course objectives. Students are not eligible to receive credit in both the course they assist the instructor with and the teaching assistantship in the same semester. Typically student has previously taken the course prior to enrollment in the assistantship. Course is repeatable for credit.

Fall and Spring.

ANTHRO 497. Internship. 1-12 Credits.

Supervised practical experience in an organization or activity appropriate to a student's career and educational interests. Internships are supervised by faculty members and require periodic student/faculty meetings. Course is repeatable for credit.

P: so st; and Anthro 100, 210 or 215.

Fall and Spring.

Arabic (ARABIC)

Courses

ARABIC 101. Introduction to the Arabic Language I. 4 Credits.

Development of basic ability in understanding, reading, speaking and writing in Arabic.

Fall Only.

ARABIC 102. Introduction to the Arabic Language II. 4 Credits.

Development of basic ability in understanding, reading, speaking and writing in Arabic.

P: Arabic 101 or 1 year h.s. or 1 semester college Arabic.

Spring.

ARABIC 497. Internship. 1-12 Credits.

Supervised practical experience in an organization or activity appropriate to a student's career and educational interests. Internships are supervised by faculty members and require periodic student/faculty meetings. Course is repeatable for credit.

P: jr st.

Art (ART)

Courses

ART 101. Tools, Safety, and Materials. 1 Credit.

Acquaints students with a wide range of materials and safe working practices and methods.

Fall and Spring.

ART 102. History of the Visual Arts: Ancient to Medieval. 3 Credits.

Survey of the visual arts: prehistoric to the late Gothic period.

Fall Only.

ART 103. History of the Visual Arts II: Renaissance to Modern. 3 Credits.

Survey of the visual arts: early Renaissance to the modern period.
Spring.

ART 105. Introductory Drawing. 3 Credits.

Introduction to the fundamental concepts of drawing; emphasis on two-dimensional artwork employing various drawing techniques in black and white media. Students are required to purchase a list of supplies for the class.
Fall and Spring.

ART 106. Three Dimensional Design. 3 Credits.

Investigates spatial design as a decision-making and problem-solving process bounded by criteria which include human sensory systems, basic structural systems and materials.
P: None
Fall and Spring.

ART 107. Two-Dimensional Design. 3 Credits.

Design studio art work and fundamental concepts of art structure and composition, color and design, applying the elements and principles of design. Students are required to purchase a list of supplies for the class.
Fall and Spring.

ART 198. First Year Seminar. 3 Credits.

First Year Seminar, topics vary.
Reserved for New Incoming Freshman.

ART 202. Modern Art. 3 Credits.

Key concepts of modern art, the visual art which emerged and the corresponding issues they raise; explores the wider cultural matrix in which modern artistic ideas develop.
Spring.

ART 203. Contemporary Art. 3 Credits.

Investigation of art works and concepts from 1960 to the present.
P: None. REC: ART 202
Fall Only.

ART 210. Introduction to Painting. 3 Credits.

Introduction to acrylic painting techniques, principles of composition, and color mixing. Emphasis on observational painting with an introduction to abstraction.
P: Art 105 or 107; REC: Art 101 and 106.
Fall and Spring.

ART 220. Introduction to Sculpture. 3 Credits.

Survey of various sculpture media, processes, and stylistic approaches; aesthetics and history of sculpture.
P: Art 101 and 106; REC: Art 105 and 107.
Fall and Spring.

ART 230. Introduction to Ceramics. 3 Credits.

Survey of various ceramic forming and firing processes, stylistic approaches; traditional and contemporary aesthetics, and history of ceramics.
P: none; REC: Art 105 and 106 and 107.
Fall and Spring.

ART 235. Introduction to Woodworking and Furniture Design. 3 Credits.

Students explore a variety of woodworking processes, from use of hand tools to basic use of machines. Focus is placed on the student's ability to build technical skills and on aesthetic approaches to using wooden materials.
P: None. REC: ART 105, 106, and 107
Fall and Spring.

ART 243. Introduction to Photography. 3 Credits.

The creative process in photography is studied to develop visual perception and photographic design ability through active participation, photographic exercises, and discussions analyzing student work. Camera is required for course. Option 1: Digital SLR camera with viewfinder, interchangeable lenses, ability to manually adjust focus, aperture, shutter speed and white balance. Option 2: 35mm) film camera with the ability to function in all manual mode.
Fall and Spring.

ART 250. Introduction to Fibers/Textiles. 3 Credits.

An introductory overview of the field of textiles and fiber arts. Students will learn basic processes as well as some of the intellectual, philosophical and historical considerations specific to the study of art cloth, fiber sculpture, textile construction, and embellishment.
P: none; REC: Art 105, 106 and 107.
Fall and Spring.

ART 260. Introduction to Jewelry/Metals. 3 Credits.

Designing and creating jewelry projects using varied metal techniques, processes and metal media; forming, shaping and designing of jewelry.

P: none; REC: Art 105, 106 and 107.

Fall and Spring.

ART 270. Introduction to Printmaking. 3 Credits.

Concept development as it integrates with the exploration of various printmaking media such as relief, monoprint, collagraph, and intaglio.

P: Art 105; REC: Art 106 and 107.

Spring.

ART 298. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. A student wishing to study or conduct research in an area not represented in available scheduled courses should develop a preliminary proposal and seek the sponsorship of a faculty member. The student's advisor can direct him or her to instructors with appropriate interests. A written report or equivalent is required for evaluation, and a short title describing the program must be sent early in the semester to the registrar for entry on the student's transcript. Course is repeatable for credit.

P: fr or so st with cum gpa > or = 2.50; or jr or sr st with cum gpa > or = 2.00.

Fall and Spring.

ART 299. Travel Course. 1-6 Credits.

Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.

P: cons of instr & prior trip arr & financial deposit.

ART 302. Intermediate Drawing. 3 Credits.

Investigation of drawing processes and structures in two-dimensional media; includes drawing the human figure; drawing techniques in black, white, and color media.

P: Art 105, 106 and 107.

Fall Only.

ART 304. Figure Drawing. 3 Credits.

Exploration of the figure/body as concept, expression, structure, and subject matter in drawing media. Course is repeatable for credit; may be taken 2 times for a total of 6 credits.

P: Art 105, 106, 107; REC: Art 210

Spring.

ART 309. Intermediate Painting: Oil Painting. 3 Credits.

Exploration of the oil painting medium with emphasis on pictorial construction as it relates to images and concepts of the figure/body, landscape, and still life.

P: Art 101, 105, 106, 107 and 210 REC: Art 302 & 304

Fall Even.

ART 310. Intermediate Painting: Media Exploration. 3 Credits.

Experimentation with a variety of painting media (encaustic, egg tempera, watercolor, handmade acrylic paint, acrylic mediums & additives) as a way to connect process, material, and concept. Reciprocal influence of studio areas is encouraged.

P: Art 101, 105, 106, 107, and 210 REC: Art 302 & 375

Fall Odd.

ART 311. Intermediate Painting: Contemporary Approaches. 3 Credits.

Students will study the conceptual framework, compositional structures, and techniques/materials used in contemporary painting as a springboard for developing their own paintings.

P: Art 101, 105, 106, 107 and 210.

Spring.

ART 320. Art and Ideas. 3 Credits.

Art is created to serve many purposes and may be viewed in many ways. This course will investigate diverse examples of visual culture, their contexts, and strategies for viewing and understanding art.

ART 321. Intermediate Sculpture. 3 Credits.

Intermediate work in sculpture including fabrication, casting, carving, and/or modeling; development of individual expression.

P: Art 101, 105, 106, 107 and 220.

Fall and Spring.

ART 331. Intermediate Ceramics. 3 Credits.

Intermediate work in ceramic media: mold work, wheel work or hand building; aesthetics, history and technology of ceramics.

P: Art 105, 106, 107 and 230.

Fall and Spring.

ART 335. Intermediate Woodworking & Furniture Design. 3 Credits.

This course is designed to provide an in-depth concentration on wooden materials and technique through creating functional furniture projects. Historical and contemporary issues in furniture design are discussed through lectures, slide presentations and critiques, and students are introduced to a wide variety of functional forms. Students explore structural system and appropriate joinery in furniture design. Preliminary drawings, both small and full scale, are required.

P: ART 235

Spring.

ART 343. Photography II. 3 Credits.

Black-and-white photography, printing practices, and analysis of student work. Cameras available for checkout through the instructor at no cost or students may use their own 35mm film camera or medium format film camera with the ability to function in all manual mode.

P: ART 107 and ART 243

Fall and Spring.

ART 344. Photography III. 3 Credits.

Creative applications of digital photography including advanced understanding of digital cameras, photoshop, large format printing and photographic documentation. Cameras available for checkout for at no cost through the instructor or students may use their own digital SLR with the ability to function in full manual mode.

P: Art 343.

Fall Only.

ART 355. Intermediate Fibers/Textiles. 3 Credits.

Expanded exploration of the cloth matrix and fiber media. Textile construction using felting, papermaking and other off-loom techniques. Processing and manipulation of fibers into three-dimensional sculptural forms.

P: Art 105, 106, 107 and 250.

Fall and Spring.

ART 364. Intermediate Jewelry/Metals. 3 Credits.

Intermediate jewelry and art metals techniques: casting, fabricating and assembling mixed-media objects.

P: Art 260 REC: Art 106.

Fall and Spring.

ART 370. Professional Practices in Art. 3 Credits.

Study of professional practices in the contemporary art world: opportunities, exhibitions, studio practice, writing, visual documentation and presentation, social media, ethics, and business of art. This course aims to give students the skills to navigate the multi-faceted art world. Recommended for students who plan on participating in the senior exhibition.

P: Sophomore standing and minimum of one lower level studio course.

Spring.

ART 373. Intermediate Printmaking. 3 Credits.

Expanded idea development as it relates to hand and digital/photo-based print processes, such as relief, intaglio, monoprint, lithography or combined print applications. Course print techniques rotate semester by semester to allow a deeper exploration into particular areas. Student responsibilities include readings, discussions, one presentation, and print creation.

P: ART 105, ART 107 and ART 270. REC: ART 106, ART 302, ART 304

Fall Only.

ART 375. Screen Printing. 3 Credits.

Studio work in the art of screen printing, including print concept development, basic materials and equipment and processes including: blockout stencil and photo-emulsion.

P: ART 105, ART 106 and ART 107; and ART 270 or ART 243 or DESIGN 231

Spring.

ART 376. Modern American Culture. 3 Credits.

Outsider Art, Folk Art, Fads, fashion and popular art: the media, music, advertising and entertainment as they express the intimate unguarded concerns of modern America.

P: Jr st. or Art, Design Arts, Arts Management or Theatre major

Fall Even.

ART 377. Lithography. 3 Credits.

Concept development integrated with lithography process including: Traditional stone lithography, plate lithography, waterless and photo litho plate lithography, and "mokuhanaga" (lithography on wood plates) using hand-drawn images and digital/photo-based images.

P: Art 105, 106, 107 and 270.

Fall and Spring.

ART 379. Women, Art and Image. 3 Credits.

Examines the impact women have made on art historically as of artists, muses, models, dealers, benefactors and critics with emphasis on images of women in visual culture, deconstructing notions of identity, others and beauty in contemporary society and in the past.

P: jr st; REC: Art 202 or WOST 241

Spring Odd.

ART 380. History of Photography. 3 Credits.

This course surveys the major historical, technical, conceptual and theoretical movements within the history of fine art photography. Students will learn photography's role in reflecting and shaping the cultural, social, political, economic, and scientific contexts from 5th century B.C.E. to the present.

P: Junior standing

Fall Odd.

ART 381. Art of the First Nations. 3 Credits.

An upper-level survey of the arts of the First Nations peoples of North America. The historical and cultural contexts in which Native American arts were, and are, produced will be examined. Modern and contemporary arts will be incorporated throughout the semester.

P: junior standing

Fall Odd.

ART 382. Precolumbian Art of Mesoamerica. 3 Credits.

An upper-level survey of the Precolumbian art of Mexico and Central America. The course will examine the art and culture of the major civilizations in the region including the Olmec, Zapotec, Teotihuacan, Maya, Toltec, Mexica (Aztec), and the West Coast chiefdoms. While form and technique will be covered, the principal emphasis will be upon understanding the differing contexts (both religious and secular) in which art was created in this region.

REC: Art 102

Spring Even.

ART 383. African Art. 3 Credits.

This class offers a general survey of the traditional & non-traditional arts of sub-Saharan Africa with an emphasis on the Western and Central regions. The religious, social, historical, and performative contexts in which African arts were, and are, produced will be examined. The course will emphasize the historic development of regional art styles on the continent, the role of gender in performance and artistic production, as well as the legacy of European colonialism.

P: Junior standing

Fall Even.

ART 384. Asian Art. 3 Credits.

Survey of art and architecture of India, Southeast Asia, China, Korea, and Japan. Each country has a distinctive characteristic in art forms, materials, styles and purposes in creating art. Students will become familiar with major monuments of Asian countries in historical contexts, and develop their skills in analyzing differences in religion, culture, and aesthetics in each country. Students will acquire basic knowledge on artists, key vocabularies, styles of traditional arts, and religious and iconographic concepts of Asian arts.

P: Junior standing

Spring Odd.

ART 402. Advanced Drawing. 3 Credits.

Development of personalized imagery with continuing conceptual, formal, and technical exploration; encourages reciprocal influence of studio areas and learning experiences. Course is repeatable for credit; may be taken 3 times for a total of 9 credits.

P: ART 302 or ART 304 or permission of instructor

Fall Even.

ART 403. Special Topics in Drawing. 3 Credits.

An upper-level drawing course with changing topics that offers in-depth investigation into the expanding field of drawing. Course is repeatable for credit if topics differ; may be taken 2 times for a total of 6 earned credits.

P: ART 302 & ART 304, special permission of instructor

Fall Odd.

ART 410. Advanced Painting. 3 Credits.

Development of personalized imagery with continuing conceptual, formal, and technical exploration; encourages reciprocal influence of studio areas and learning experiences. Course is repeatable for credit; may be taken 3 times for a total of 9 credits.

P: Art 309 or 310, AND 311, OR permission of instructor

Fall and Spring.

ART 421. Advanced Sculpture. 3 Credits.

Exploration and refinement of sculptural investigations towards a meaningful and personal body of work. Course is repeatable for credit; may be taken 3 times for a total of 9 credits.

P: Art 321.

Fall and Spring.

ART 431. Advanced Ceramics. 3 Credits.

Extension and development of ceramic techniques and aesthetics into a significant and personal body of work. Course is repeatable for credit; may be taken 3 times for a total of 9 credits.

P: Art 331.

Fall and Spring.

ART 435. Advanced Woodworking & Furniture Design. 3 Credits.

After exploring the boundaries of woodworking at the intermediate levels, students in this course develop a portfolio-quality body of work through intensive technical and aesthetic approaches to ceramics. Students develop skills for writing artist statement and proposals, as well as presenting their own work in a professional fashion. Course is repeatable for credit; may be taken 3 times for a total of 9 earned credits.

P: ART 235 and ART 335

Spring.

ART 443. Advanced Problems in Photography. 3 Credits.

Participants identify an area of interest and the problems implied and are directed to appropriate resources. Seminars support production of a major photographic portfolio. Cameras available for checkout for at no cost through the instructor or students may use their own camera of any format appropriate to the direction of their portfolio. Course is repeatable for credit; may be taken 3 times for a total of 9 credits.

P: ART 344

Spring.

ART 453. Advanced Fibers/Textiles. 3 Credits.

Exploration of one area of textiles or fiber art such as papermaking, weaving, surface design or applied techniques in directed study with emphasis on development of a personal artistic voice in the media. Course is repeatable for credit; may be taken 3 times for a total of 9 credits.

P: Art 355.

Fall and Spring.

ART 463. Advanced Jewelry/Metals. 3 Credits.

Advanced techniques in jewelry; creative research and investigation of metals and jewelry media. Course is repeatable for credit; may be taken 3 times for a total of 9 credits.

P: Art 364.

Fall and Spring.

ART 470. Advanced Printmaking. 3 Credits.

Advanced techniques and individual expression in one area of printmaking: intaglio, relief, lithography or screen printing. Course is repeatable for credit; may be taken 3 times for a total of 9 credits.

P: ART 373 or ART 375

Fall and Spring.

ART 478. Honors in the Major. 3 Credits.

Honors in the Major is designed to recognize student excellence within interdisciplinary and disciplinary academic programs.

P: min 3.50 all cses req for major and min gpa 3.75 all UL cses req for major.

Fall and Spring.

ART 481. Advanced Topics in Art History. 3 Credits.

An upper-level art history course with changing topics that will offer in-depth investigation of a particular period or subject within the history of art from a global perspective. Course is repeatable for credit if topics differ; may be taken 3 times for a total of 9 credits.

P: 6 credit hours of art history

Fall Only.

ART 495. Teaching Assistantship. 1-6 Credits.

The student and supervising teacher must prepare a statement that identifies the course with which the assistantship will happen, objectives for the assistantship, and expectations in order to fulfill the course objectives. Students are not eligible to receive credit in both the course they assist the instructor with and the teaching assistantship in the same semester. Typically student has previously taken the course prior to enrollment in the assistantship. Course is repeatable for credit.

P: Cumulative GPA 2.75 or above; Declared Art Major; Minimum 6 credits upper level coursework in specified studio area; Permission of Supervising Faculty Member; ART 101

Fall and Spring.

ART 496. Project/Research Assistantship. 1-6 Credits.

The student must prepare a research proposal, and both parties should identify the research arrangement and how the student will complete the work to fulfill the course objectives within the assigned term.

P: jr st.

ART 497. Internship. 1-12 Credits.

Internship with an outside museum or gallery. Activities are determined by the curator of art and a professional in the sponsoring institution. Course is repeatable for credit.

P: jr st.

Fall and Spring.

ART 498. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. A student wishing to study or conduct research in an area not represented in available scheduled courses should develop a preliminary proposal and seek the sponsorship of a faculty member. The student's advisor can direct him or her to instructors with appropriate interests. A written report or equivalent is required for evaluation, and a short title describing the program must be sent early in the semester to the registrar for entry on the student's transcript. Course is repeatable for credit.

P: fr or so st with cum gpa > or = 2.50; or jr or sr st with cum gpa > or = 2.00.

Fall and Spring.

ART 499. Travel Course. 1-6 Credits.

Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.

P: cons of instr & prior trip arr & financial deposit.

Arts Management (ARTS MGT)

Courses

ARTS MGT 256. Understanding the Arts. 3 Credits.

An introduction to the language of the visual and performing arts, including direct experience of art forms, and incorporating comparative studies of the elements and structural principles employed among the arts. Development of student's aesthetic literacy, and their ability to articulate informed responses to art forms.

Spring.

ARTS MGT 257. Arts in the Community. 3 Credits.

The role of arts and cultural activities within a community's social, political, and economic structures. Emphasis on cultural delivery systems in urban, rural and suburban settings; evaluation of artistic quality in a community context, and models for intergration of culture into civic life.

Fall Only.

ARTS MGT 298. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. A student wishing to study or conduct research in an area not represented in available scheduled courses should develop a preliminary proposal and seek the sponsorship of a faculty member. The student's advisor can direct him or her to instructors with appropriate interests. A written report or equivalent is required for evaluation, and a short title describing the program must be sent early in the semester to the registrar for entry on the student's transcript.

P: fr or so st with cum gpa > or = 2.50; or jr or sr st with cum gpa > or = 2.00.

Fall and Spring.

ARTS MGT 354. Managing Arts and Cultural Organizations. 3 Credits.

An overview of the field of arts management with an emphasis on not-for-profit arts and cultural organizations and the role of the professional manager within the field, including governance, planning, assessment, audience development, fund-raising and advocacy.

P: Arts Mgt major or minor or permission by instructor. REC: Arts Mgt 261 or Arts Mgt 257

Spring.

ARTS MGT 355. Funding and Financial Issues in the Arts. 3 Credits.

Investigation of a variety of financial issues, including earned and contributed income, sponsorships, foundations and grants; introduction to standard budget and accounting terminology and principles as applied in arts management.

P: Arts Mgt 354.

Fall Only.

ARTS MGT 356. Promoting the Arts. 3 Credits.

Approaches to promoting the arts, developing audiences through marketing, using various public relations and advertising tools and techniques.

P: Arts Mgt 354.

Spring.

ARTS MGT 357. Gallery & Museum Studies. 3 Credits.

Standards, practices and methods of the museum and art gallery profession: planning, promotion, and publicity; development of educational materials and programs; exhibition design and installation; proper handling and treatment of works of art and historical artifacts. Course is repeatable for credit; may be taken 3 times for a total of 9 credits.

P: ARTS MGT major or minor. REC: Arts Mgt 257

Fall and Spring.

ARTS MGT 455. Practicum in Arts Management. 3 Credits.

Practical work in completion of student-directed arts management projects, working both in teams and individually. Projects may deal with marketing, audience analysis and development, funding, and/or educational aspects of arts management.

P: Cons of instr. Rec: Arts Mgt 355 and 356.

Fall and Spring.

ARTS MGT 478. Honors in the Major. 3 Credits.

Honors in the Major is designed to recognize student excellence within interdisciplinary and disciplinary academic programs.

P: min 3.50 all cses req for major and min gpa 3.75 all UL cses req for major.

Fall and Spring.

ARTS MGT 480. Arts Management Seminar. 1 Credit.

Exploration of issues pertinent to arts management using research, case studies and practical applications. Course is repeatable for credit; may be taken 6 times for a total of 6 credits.

P: Arts Mgt 354; Arts Management Maj/Min

Fall and Spring.

ARTS MGT 495. Teaching Assistantship. 1-6 Credits.

The student and supervising teacher must prepare a statement that identifies the course with which the assistantship will happen, objectives for the assistantship, and expectations in order to fulfill the course objectives. Students are not eligible to receive credit in both the course they assist the instructor with and the teaching assistantship in the same semester. Typically student has previously taken the course prior to enrollment in the assistantship. Course is repeatable for credit.

ARTS MGT 496. Project/Research Assistantship. 1-6 Credits.

The student must prepare a research proposal, and both parties should identify the research arrangement and how the student will complete the work to fulfill the course objectives within the assigned term.

P: jr st.

ARTS MGT 497. Internship. 1-12 Credits.

Instruction and experience in a professional environment where students work in any aspect of the field appropriate to their academic preparation and career goals under professional and faculty supervision. Course is repeatable for credit. No more than 3 credits may be used to meet requirements for a major or minor.

P: jr st and 3.0 gpa in major emphasis (dept will monitor gpa req).

Fall and Spring.

ARTS MGT 498. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. A student wishing to study or conduct research in an area not represented in available scheduled courses should develop a preliminary proposal and seek the sponsorship of a faculty member. The student's advisor can direct him or her to instructors with appropriate interests. A written report or equivalent is required for evaluation, and a short title describing the program must be sent early in the semester to the registrar for entry on the student's transcript. Course is repeatable for credit.

P: fr or so st with cum gpa > or = 2.50; or jr or sr st with cum gpa > or = 2.00.

Fall and Spring.

Biology (BIOLOGY)

Courses

BIOLOGY 198. First Year Seminar. 3 Credits.

First Year Seminar, topics vary.

Reserved for New Incoming Freshman

Fall Even.

BIOLOGY 200. Principles of Biology Discussion: Cellular and Molecular Processes. 1 Credit.

This discussion course is designed to supplement the concepts presented in BIOLOGY 201. Activities will focus on deeper exploration of the biology of organisms at the molecular and cellular level and will emphasize skills necessary for success in the introductory biology sequence.

P: Concurrent enrollment in BIOLOGY 201

Fall and Spring.

BIOLOGY 201. Principles of Biology: Cellular and Molecular Processes. 3 Credits.

Study of biological principles, focusing on macromolecules and biological chemistry, cellular structure and function, energy metabolism, gene expression, genetics, and cell division. This course is intended for science majors and is taught with the expectation that students have a solid background in biology and chemistry gained through prior classes taken at the high school or college level and/or an ACT Science Score of 24 or greater. For students without this background, it is strongly suggested that HUM BIO 102 or BIOLOGY 203 are taken before BIOLOGY 201, or that BIOLOGY 200 is taken concurrently.

P: CHEM 207 (or conc enrl) AND BIOLOGY 202 (or conc enrl). REC: ACT science score 24 or greater OR completion of AP Bio course OR completion of 4 science courses in HS (including a minimum of 2 Bio courses and 1 Chem course) OR conc enrl in BIOLOGY 200

Fall and Spring.

BIOLOGY 202. Principles of Biology Lab: Cellular and Molecular Processes. 1 Credit.

This lab course offers an introduction to the biology of organisms at the molecular and cellular level. Labs will focus on the chemical, genetic, and microscopic properties shared by cells. This is a beginning biology course for students who wish to major in Biology, Human Biology or Environmental Science.

P: CHEM 207 (or concurrent enrollment) AND grade of C or better in BIOLOGY 201 (or concurrent enrollment).

Fall and Spring.

BIOLOGY 203. Principles of Biology: Organisms, Ecology, and Evolution. 3 Credits.

Survey of the evolution and diversity of life, with focus on general biological principles, anatomy and physiology, and consideration of interactions from the cellular to organismal level.

P: CHEM 207 or concurrent enrollment AND BIOLOGY 204 or concurrent enrollment

Fall and Spring.

BIOLOGY 204. Principles of Biology Lab: Organisms, Ecology, and Evolution. 1 Credit.

Hands-on laboratory reinforcing material covered in Biology 203. Laboratory activities explore the structure of seed plants, comparative morphology of animal phyla, dichotomous taxonomic keys, phylogeny, and experimental approaches to plant and animal physiology. This writing emphasis course covers the process and techniques of scientific writing.

P: CHEM 207 or concurrent enrollment AND BIOLOGY 203 or concurrent enrollment.

Fall and Spring.

BIOLOGY 298. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. A student wishing to study or conduct research in an area not represented in available scheduled courses should develop a preliminary proposal and seek the sponsorship of a faculty member. The student's advisor can direct him or her to instructors with appropriate interests. A written report or equivalent is required for evaluation, and a short title describing the program must be sent early in the semester to the registrar for entry on the student's transcript. Course is repeatable for credit.

P: fr or so st with cum gpa > or = 2.50; or jr or sr st with cum gpa > or = 2.00.

Fall and Spring.

BIOLOGY 299. Travel Course. 1-6 Credits.

Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.

P: cons of instr & prior trip arr & financial deposit.

BIOLOGY 303. Genetics. 3 Credits.

Mechanisms of heredity and variation, their cytological and molecular basis and their implications in biological technology.

P: Biology 201/202 with at least a C grade; Chem 108 or 212 with at least a C grade; Math 260 with at least a C grade;

Fall and Spring.

BIOLOGY 304. Genetics Laboratory. 1 Credit.

Basic techniques of genetic research; laboratory investigation and analysis of animal, plant, and human patterns of inheritance.

P: Biology 303 with at least a C grade AND Chem 207 or concurrent enrollment

Fall Only.

BIOLOGY 306. Principles of Ecology. 4 Credits.

Ecological principles governing interactions of plants and animals in their physical and biotic environments. Focuses on organisms and their environment, populations, communities, ecosystems, and global dimensions.

P: MATH 104 or Math Placement of MATH 202 or greater; MATH 260 or enrolled concurrently in MATH 260; BIOLOGY 203 all with a C or better

Fall and Spring.

BIOLOGY 307. Cell Biology. 3 Credits.

A study of the fundamental biological processes that occur within a cell and its normal environment. Topics include cellular molecules and metabolic processes; membranes and organelles; synthesis and regulation of macromolecules; protein sorting and transport, cytoskeleton; signal transduction, cellular interactions, cell cycle and growth of normal and neoplastic cells.

P: Biology 201 with at least a C grade; AND Chem 108 or 212 with at least a C grade; AND Biology 303 or Hum Biol 310

Fall and Spring.

BIOLOGY 308. Cell Biology Laboratory. 1 Credit.

A laboratory course examining the microscopic, biochemical and molecular approaches used to investigate cellular structure and function.

P: Biology 202 with at least a C grade; AND Chem 108 or 212 with at least a C grade; AND MATH 260 with at least a C grade; AND Biology 307 with at least a C grade or conc enr; AND Chem 207 or conc enr

Fall and Spring.

BIOLOGY 309. Evolutionary Biology. 3 Credits.

Patterns and processes of biological evolution and their significance for modern biology. Topics include the history of life, population genetics, speciation, and evolution in populations today.

P: Biology 201/202 with at least a C grade and either Biology 203 or Human Biology 240/241 with at least a C grade

Fall and Spring.

BIOLOGY 310. Plant Biodiversity. 4 Credits.

An introduction to the diversity of vascular plants, with an emphasis on flowering plants. Lectures cover both organismal and phylogenetic/evolutionary perspectives on plant systematics, including the use of genetic and genomic data for understanding plant evolution. The laboratory presents a survey of vascular plant diversity, covering structural characteristics of major plant families and the identification of seed plants of Wisconsin to the species level.
P: Biology 201/202 with at least a C grade and Biology 203/204 with at least a C grade, or transfer cse Biology 003.
Spring Even.

BIOLOGY 311. Plant Physiology. 4 Credits.

General physiology of vascular plants within the context of a plant life cycle: seed dormancy and germination, metabolism, transport systems, mineral nutrition, patterns of plant growth and development, growth regulators, reproduction and senescence.
P: Biology 201/202 with at least a C grade and Biology 203 with at least a C grade, or transfer cse Biology 003; and Chem 212.
Fall Only.

BIOLOGY 312. Mycology. 4 Credits.

Broad taxonomic survey of fungi. Morphology, reproduction, physiology, genetics, evolution, and ecology. Role in nutrient cycling, plant disease, human welfare and biotechnology. Techniques in collection, identification, pure culture isolation, and nucleic acid applications.
P: Biology 201/202 with at least a C grade or transfer cse Biology 003.
Fall Odd.

BIOLOGY 320. Field Botany. 4 Credits.

Identification and natural history of plants indigenous to the Great Lakes region. Students will become proficient at using keys to identify unknown plants to the species level, be able to identify at sight the woody plants of northeastern Wisconsin, be able to recognize major plant communities of Wisconsin, and gain an understanding of basic organismal botany. An all-day field trip during one weekend day in mid-September is required.
P: Biology 201/202 with at least a C grade and Biology 203/204 with at least a C grade, or transfer course Biology 003.
Fall Even.

BIOLOGY 322. Environmental Microbiology. 4 Credits.

This course will focus on the diversity and role of microorganisms in diverse and complex environments, including the use and management of these organisms for the benefit of ecosystems and society.
P: BIOLOGY 201/202 with at least a C AND CHEM 207 or conc enr
Spring.

BIOLOGY 323. Principles of Microbiology. 3 Credits.

Microorganisms and their activities; their form, structure, reproduction, physiology, metabolism, and identification; their distribution in nature and their relationship to each other and other living things.
P: BIOLOGY 201 & BIOLOGY 202 with at least a C grade
Fall and Spring.

BIOLOGY 324. Principles of Microbiology Laboratory. 1 Credit.

Laboratory Course that accompanies BIOLOGY 323.
P: BIOLOGY 323 or concurrent enrollment AND CHEM 207 or concurrent enrollment
Fall and Spring.

BIOLOGY 340. Comparative Anatomy of Vertebrates. 4 Credits.

A lecture and laboratory course examining the anatomy of organs and organ systems of the vertebrates with emphasis on adaptations. Specimens primarily studied in the lab are the shark and cat.
P: Biology 201/202 with at least a C grade and Biology 203/204 with at least a C grade; OR transfer cse Biology 002; AND CHEM 207 or conc enr.
Fall Only.

BIOLOGY 341. Ichthyology. 4 Credits.

An examination of the biology of fishes including classification, phylogeny, functional morphology and population characteristics. Aspects of the ecology of the fishes will be studied in relation to behavior, distribution, diversity and production in freshwater environments.
P: BIOLOGY 306
Spring Even.

BIOLOGY 342. Ornithology. 4 Credits.

Overview of avian biology, emphasizing adaptation and ecology. Identification of North American bird species and other avian families. Region's most interesting birding areas.
P: Biology 201/202 with at least a C grade and Biology 203/204 with at least a C grade, or transfer cse Biology 002.
Spring Even.

BIOLOGY 343. Mammalogy. 4 Credits.

Comprehensive study of mammals, including systematics, anatomy, physiology, behavior, and ecology. Laboratory studies include work with specimens from the Richter Natural History Museum.
P: BIOLOGY 201, BIOLOGY 202, BIOLOGY 203, and BIOLOGY 204 with at least a C grade
Spring Odd.

BIOLOGY 345. Animal Behavior. 3 Credits.

Biology of animal behavior patterns; behavioral interactions of animals with their environment.

P: Biology 201/202 with at least a C grade.

Spring Even.

BIOLOGY 346. Comparative Physiology. 3 Credits.

Ways in which dissimilar organisms perform similar functions. Behavioral, physiological, and biochemical solutions to problems imposed on invertebrate and vertebrate animals by their environment.

P: (BIOLOGY 201 & BIOLOGY 202 with at least a C grade) AND (BIOLOGY 203 & BIOLOGY 204 with at least a C grade or HUM BIOL 240 & HUM BIOL 241 with at least a C grade or HUM BIOL 222 with at least a C grade); AND CHEM 212

Spring.

BIOLOGY 355. Entomology. 4 Credits.

Structure, function, diversity, and ecology of insects, as well as their impact on human society. Lab develops ability to identify Wisconsin insects, both in the field and by examining microscopic anatomy.

P: Biology 201/202 with at least a C grade and Biology 203/204 with at least a C grade, or transfer cse Biology 002; REC: Biology 353.

Fall Odd.

BIOLOGY 357. Marine Biology. 4 Credits.

The Ocean covers about 71% of the Earth's surface and so is obviously a huge part of the functioning biosphere. Life emerged in the Ocean but since we are terrestrial beings, Ocean life remains less well known than terrestrial life. This course serves as an overview of marine biodiversity and marine ecosystems in which the concepts learned in general biology courses can be applied to marine life. We will cover the abiotic functioning of the Ocean in order to understand the unique challenges that marine organisms face, and we will focus on an understanding of the diverse array of marine organisms, how they interact ecologically, and how humans are affecting marine ecosystems worldwide.

Fall Even.

BIOLOGY 360. Early Life History of Fish. 3 Credits.

This course covers the early life history of freshwater, estuarine, and marine fishes from reproduction through metamorphosis. Students will extensively cover topics such as: egg and larval development, metamorphosis, larval feeding, behavior, growth, predation and starvation, and factors affecting these processes. Fish larval ecology, factors determining recruitment and sampling methods will also be covered. The course will include a laboratory section where we will study both living and fixed gonads, eggs, larvae and juveniles from selected species.

P: None. REC: BIOLOGY 341 with at least a C grade

Spring Even.

BIOLOGY 361. Introduction to Aquaculture. 3 Credits.

This course will help students develop an understanding of the history and principles of raising fish, shellfish, and plants in one of the most ancient forms of husbandry. Topics will include commonly used culture systems, biotic and abiotic factors regulating aquaculture success, ideal aquaculture species, fundamental concerns in aquaculture operations, and the role of aquaculture in natural resource management. The course will also allow students to gain an appreciation of the role of aquaculture in providing protein worldwide and its roles in natural resource management, sustainability, and economic prosperity.

P: BIOLOGY 202, BIOLOGY 203

Fall Even.

BIOLOGY 365. Aquatic Invertebrates. 4 Credits.

An exploration of the biology, ecology and importance of freshwater invertebrates, with an emphasis on aquatic insects.

P: BIOLOGY 201 & BIOLOGY 202 with at least a C grade and BIOLOGY 203 & BIOLOGY 204 with at least a C grade

Spring Odd.

BIOLOGY 370. Fisheries Research and Management. 3 Credits.

Field and laboratory techniques for fishery research and management. Principles of designing research projects, assessing and managing aquatic ecosystems. Students will learn the fundamentals of testing hypotheses, sampling fish, analyzing fishery data, reporting results in both written and oral forms, and defending their research and management decisions.

P: ENV SCI 102/103

Fall Odd.

BIOLOGY 375. Conservation Genetics. 3 Credits.

This course focuses on the application of genetic analyses tools and bioinformatics to management and recovery of species of interest. This course will include extensive use of public-domain genetic analysis programs to address general questions in wildlife and fisheries management. Throughout this course, students will gain an understanding of molecular markers and their application in a conservation context as well as methods of analysis.

P: BIOLOGY 303 or HUM BIOL 310

Spring Even.

BIOLOGY 401. Fish and Wildlife Population Dynamics. 4 Credits.

The course will introduce students to principles of population ecology and how such principles relate to basic models of wildlife and fish population dynamics. This course will also give students practical experience manipulating population dynamics models using computer applications.

P: BIOLOGY 203. REC: ENV SCI 302

Spring Odd.

BIOLOGY 402. Advanced Microbiology. 4 Credits.

Study of viruses, bacteria, and viruses in relationship to their environment.

P: Biology 302 with at least a C grade; Math 260 with at least a C grade; AND Chem 207 or conc enr
Fall Only.

BIOLOGY 407. Molecular Biology. 3 Credits.

Molecular approaches to biological problems, emphasizing study of informational macro molecules. Topics include replication, control, expression, organization, and manipulation of genes; RNA processing; protein processing; transposons; oncogenes, growth factors; genetic control of development and the immune system.

P: Biology 303 with at least a C grade or Chem 330 with at least a C grade; REC: Chem 300 or 303.
Spring Odd.

BIOLOGY 408. Molecular Biology Laboratory. 1 Credit.

Molecular biology of nucleic acids and the techniques that form the basis of biotechnology. Topics include electrophoresis, restriction mapping, hybridization, plasmid analysis, and DNA cloning (recombinant DNA library construction, screening, and mapping).

P: Biology 407 or conc enr; and Chem 207 or conc enr
Spring Odd.

BIOLOGY 410. Developmental Biology. 3 Credits.

This course covers both the classical experiments that contributed to our understanding of developmental biology and the recent explosion of information about development made possible by a combination of genetic, cellular, and molecular approaches. Examples from vertebrate and invertebrate systems will be used to illustrate underlying principles and concepts. Topics include axis formation, induction, morphogenesis, embryonic pattern formation, cell differentiation, and organogenesis.

P: Biology 303 or 307 or Hum Biol 310 with at least a C grade.
Spring.

BIOLOGY 411. Developmental Biology Laboratory. 1 Credit.

Laboratory will introduce descriptive and experimental embryological techniques using a variety of model organisms.

P: Biology 410 with at least a C grade or concurrent enrollment; AND Chem 207 or conc enr
Spring.

BIOLOGY 449. Wetland Ecology. 3 Credits.

This course explores the ecology and conservation of wetlands, including biological, physical, chemical and hydrological attributes of wetland ecosystems. The curriculum will survey major wetland types in both freshwater and marine environments, the general biogeochemical dynamics of wetland ecosystems, and the ecological diversity of wetland vegetation and fauna. Field trips and in-class exercises will provide training in the identification of wetland types and features, including biological and physical characteristics of wetlands in the western Great Lakes. A field project will focus on wetland delineation and assessment of wetland quality, including analysis of restoration methods and conservation management.

P: BIOLOGY 306 or consent of instructor
Spring Even.

BIOLOGY 450. Ecological Restoration. 3 Credits.

Overview of how ecological and biological processes can inform and guide restoration of degraded systems. What can the science of ecology bring to the practice of restoration? Exploration of case studies and on-the-ground field experiences.

Spring Even.

BIOLOGY 461. Advanced Aquaculture. 3 Credits.

This course will build on the foundations of Introduction to Aquaculture (BIOLOGY 361). Coursework will cover more advanced aquaculture concepts including systems engineering and design, broodstock development, larval husbandry, live feeds / algae, culture of Great Lakes fishes, and biosecurity. The course will include a laboratory section in which students will have the opportunity to complete a laboratory project concerning the rearing of juvenile fish.

P: BIOLOGY 361 with at least a C grade
Spring Odd.

BIOLOGY 469. Conservation Biology. 4 Credits.

Overview of the major issues and ecological principles underlying the field of conservation of biology, including patterns and measurement of biological diversity from genetic to community scales.

P: BIOLOGY 306 with at least a C grade or consent of instructor
Fall Only.

BIOLOGY 478. Honors in the Major. 3 Credits.

Honors in the Major is designed to recognize student excellence within interdisciplinary and disciplinary academic programs.

P: min 3.50 all cses req for major and min gpa 3.75 all UL cses req for major.
Fall and Spring.

BIOLOGY 490. Biology Seminar. 1 Credit.

This course provides an interdisciplinary capstone experience for upper-level students majoring in biology. Class activities introduce students to academic and professional infrastructures, career opportunities, and major conceptual issues in the biological sciences, including the socioeconomic impacts of new advances in biology. During a significant part of the course, students will read and discuss current articles from the primary scientific literature. Teams of students will lead class discussions about cutting-edge discoveries and new concepts conveyed in the selected articles. Presentations will fulfill the communication objective for a capstone experience in the UW-Green Bay General Education curriculum. The class discussions will address the interdisciplinary implications of new biology discoveries and their relevance to current socioeconomic problems. Course is repeatable for credit; may be taken 3 times for a total of 3 credits.

P: Biology major with jr st
Fall and Spring.

BIOLOGY 495. Teaching Assistantship. 1-6 Credits.

The student and supervising teacher must prepare a statement that identifies the course with which the assistantship will happen, objectives for the assistantship, and expectations in order to fulfill the course objectives. Students are not eligible to receive credit in both the course they assist the instructor with and the teaching assistantship in the same semester. Typically student has previously taken the course prior to enrollment in the assistantship. Course is repeatable for credit.

BIOLOGY 496. Project/Research Assistantship. 1-6 Credits.

The student must prepare a research proposal, and both parties should identify the research arrangement and how the student will complete the work to fulfill the course objectives within the assigned term.

P: Chem 207 and approval by faculty mentor
Fall and Spring.

BIOLOGY 497. Internship. 1-12 Credits.

Supervised practical experience in an organization or activity appropriate to a student's career and educational interests. Internships are supervised by faculty members and require periodic student/faculty meetings. Course is repeatable for credit.

P: jr st.
Fall and Spring.

BIOLOGY 498. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. A student wishing to study or conduct research in an area not represented in available scheduled courses should develop a preliminary proposal and seek the sponsorship of a faculty member. The student's advisor can direct him or her to instructors with appropriate interests. A written report or equivalent is required for evaluation, and a short title describing the program must be sent early in the semester to the registrar for entry on the student's transcript. Course is repeatable for credit.

P: fr or so st with cum gpa > or = 2.50; or jr or sr st with cum gpa > or = 2.00.
Fall and Spring.

BIOLOGY 499. Travel Course. 1-6 Credits.

Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.
P: cons of instr & prior trip arr & financial deposit.

Business Administration (BUS ADM)

Courses

BUS ADM 130. Spreadsheet and Information Systems. 3 Credits.

This course presents an overview of information concepts through a variety of quantitative problem-solving experiences using Microsoft Excel. Introductory business and statistical models are examined, as students identify appropriate ways to find, evaluate, and use the information for decision-making. The course also discusses the management of information and technology within organizational environments. Content explores the role of information and technology solutions in the management of operations and innovations.
Fall and Spring.

BUS ADM 198. First Year Seminar. 3 Credits.

First Year Seminar, topics vary.
Reserved for New Incoming Freshman.

BUS ADM 201. Principles of Sustainability in Business. 3 Credits.

This is an introductory course in sustainability in business. This course is intended to provide high-level concepts business managers are expected to know about sustainability. These concepts will include the triple bottom line of sustainability, carbon footprint, dangers of not paying attention to the environment and society while making business decisions.
P: Sophomore standing
Fall and Spring.

BUS ADM 202. Business and Its Environment. 3 Credits.

The major components of the business enterprise and its resources, competitive and regulatory environment; pricing, profit, finance planning, controls, ethics, environmental impact, social responsibility and other important concepts; environmental issues that challenge the business leader.
Fall and Spring.

BUS ADM 206. Law and the Individual. 3 Credits.

The American legal system; its principles, processes, language, ethics and laws from the viewpoint of the individual, including family, personal injury, property, consumer, privacy, probate and administrative laws.
Fall and Spring.

BUS ADM 210. Professional Skills for Your Career. 1 Credit.

Students learn how to search for careers that are personally satisfying and how to develop important professional skills, including: creating a successful resume; effective professional correspondence; appropriate business phone and email etiquette; developing interview and presentation skills; and networking.

P: Sophomore status
Fall and Spring.

BUS ADM 220. Business Statistics. 3 Credits.

The course prepares students to examine descriptive statistics, sampling and sampling distributions. Students will become proficient in analyzing statistical data and interpreting descriptive statistics results.

P: Freshman standing. REC: Freshman standing
Fall and Spring.

BUS ADM 297. Internship. 1-6 Credits.

Supervised practical experience in an organization or activity appropriate to a student's career and educational interests. Internships are supervised by faculty members and require periodic student/faculty meetings. The course is repeatable for credit; may be taken 6 times for a total of 6 credits.

P: Min 2.0 GPA
Fall and Spring.

BUS ADM 298. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. A student wishing to study or conduct research in an area not represented in available scheduled courses should develop a preliminary proposal and seek the sponsorship of a faculty member. The student's advisor can direct him or her to instructors with appropriate interests. A written report or equivalent is required for evaluation, and a short title describing the program must be sent early in the semester to the registrar for entry on the student's transcript. Course is repeatable for credit.

P: fr or so st with cum gpa > or = 2.50; or jr or sr st with cum gpa > or = 2.00.
Fall and Spring.

BUS ADM 299. Travel Course. 1-6 Credits.

Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.

P: cons of instr & prior trip arr & financial deposit.

BUS ADM 305. Legal Environment of Business. 3 Credits.

Laws affecting business, emphasizing the Uniform Commercial Code. Introduction to law and the legal process, contracts, agency, property, landlord-tenant and real estate laws, sales and consumer protection laws, secured transactions, negotiable instruments, corporation and partnership law, and estate and bankruptcy law.

P: Sophomore status
Fall and Spring.

BUS ADM 306. Business Law. 3 Credits.

Recommended for students planning to take the CPA exam. Builds upon basic concepts covered in Bus Adm 305 to further explore the legal implications of business transactions. Deals with federal and widely adopted uniform law. Topics include state law regulation of the corporation and other business associations, sales, agency, debtor and creditor relations, negotiable instruments and property law.

P: BUS ADM 305 and Bus Adm major or minor or Acctg major or minor and an overall minimum GPA of 2.5
Spring.

BUS ADM 320. Advanced Business Statistics. 3 Credits.

This is an advanced course built on BUS ADM 220. It revises the contents of BUS ADM 220 and prepares students to do advanced statistical analyses such as hypothesis testing, independent and paired t-tests, analysis of variance, regression, chi-square, and variance comparisons. The course will also expose students to statistical applications such as SPSS.

P: BUS ADM 220. REC: Sophomore Standing
Fall and Spring.

BUS ADM 378. Leadership Transformation. 3 Credits.

This course focuses on leadership transformation for increased effectiveness by engaging in specific skills and critical thinking necessary for authentic leadership in today's business climate.

P: None.

BUS ADM 435. Foundations of Strategic Information Management. 3 Credits.

Information Technology (IT) is an integral part of all organizations and plays a vital role in all functional areas such as marketing, accounting, finance, human resources, operations, and supply chain. It also serves in enabling key applications such as business intelligence, data analytics, security, internal controls, and new-product planning among others. Owing to the dynamic nature of IT, it is imperative that organizations continuously reevaluate their strategic alliance with IT. Thus a well-designed, and strategically managed IT has the potential to dramatically improve a business's competitive advantage. The course discusses the significant managerial aspects of IT's increasing impact on today's organizations, along with IT trends and their business implications, security, privacy and ethical issues.

P: BUS ADM 130 or Business Analysis Emphasis

Spring.

BUS ADM 436. Analysis & Design of Business Information Systems. 3 Credits.

The competence in business information systems analysis and design (SA&D) is critical to not only information technology professionals but also to business managers since the fit between information technology and organizational business needs is argued to be a key determinant of firm performance. Students will learn system analysis and design concepts and technologies required to develop business information systems. The emphasis is on system life cycle concepts ranging from a system's planning to its discontinuance. The course will also attempt to evaluate the ethical issues involved as well as the business reasons why some IT projects succeed while others fail.

P: BUS ADM 435 and Bus Adm major or minor or Acctg major or minor and an overall minimum GPA of 2.5.

Fall Only.

BUS ADM 452. Business Analytics. 3 Credits.

This course focuses on concepts pertaining to business analytics and its application in the business environment using various techniques. Upon completion of this course, the student will gain the knowledge of data summarization and visualization, descriptive and predictive data analytics and decision making along with a variety of analytics terminologies. The course covers various topics such as data description, data visualization, regression models, data mining, optimization models and simulations. Students also will be expected to learn how to apply analytic methods to real business data through performing hands-on examples and projects over the course of semester and using statistical packages (e.g., R, Tableau, XLMiner).

P: BUS ADM 220 or MATH 260; and BUS ADM 130 or BUS ADM 230 and Bus Adm major or minor or Acctg major or minor and an overall minimum GPA of 2.5

Fall and Spring.

BUS ADM 464. Data Visualization and Storytelling. 3 Credits.

This course discusses the art and science of turning data into readable graphics. Students will learn to evaluate the effectiveness of visualization based on principles from graphic design, visual art, perceptual psychology, and cognitive science. Students will also learn to think critically about each design decision, such as choice of color and choice of visual encoding. Students will create their own data visualizations, and learn to use Tableau. Finally, students will learn to tell engaging data stories that clearly depict the points that they want to make through data visualization.

P: BUS ADM 220 or MATH 260; BUS ADM 130 and an overall minimum GPA of 2.5

Fall and Spring.

BUS ADM 478. Honors in the Major. 3 Credits.

Honors in the Major is designed to recognize student excellence within interdisciplinary and disciplinary academic programs.

P: min 3.50 all cses req for major and min gpa 3.75 all UL cses req for major.

Fall and Spring.

BUS ADM 495. Teaching Assistantship. 1-6 Credits.

The student and supervising teacher must prepare a statement that identifies the course with which the assistantship will happen, objectives for the assistantship, and expectations in order to fulfill the course objectives. Students are not eligible to receive credit in both the course they assist the instructor with and the teaching assistantship in the same semester. Typically student has previously taken the course prior to enrollment in the assistantship. Course is repeatable for credit.

Fall and Spring.

BUS ADM 496. Project/Research Assistantship. 1-6 Credits.

The student must prepare a research proposal, and both parties should identify the research arrangement and how the student will complete the work to fulfill the course objectives within the assigned term.

Fall and Spring.

BUS ADM 497. Internship. 1-12 Credits.

Supervised practical experience in an organization or activity appropriate to a student's career and educational interests. Internships are supervised by faculty members and require periodic student/faculty meetings. Course is repeatable for credit; may be taken 12 times for a total of 12 credits.

P: Junior standing, 54 credits, 2.50 GPA

Fall and Spring.

BUS ADM 498. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. A student wishing to study or conduct research in an area not represented in available scheduled courses should develop a preliminary proposal and seek the sponsorship of a faculty member. The student's advisor can direct him or her to instructors with appropriate interests. A written report or equivalent is required for evaluation, and a short title describing the program must be sent early in the semester to the registrar for entry on the student's transcript. Course is repeatable for credit.

P: fr or so st with cum gpa > or = 2.50; or jr or sr st with cum gpa > or = 2.00.

Fall and Spring.

BUS ADM 499. Travel Course. 1-6 Credits.

Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.

P: cons of instr & prior trip arr & financial deposit.

Community Health Education (CHE)

Courses

CHE 310. Foundations of Community Health Education. 3 Credits.

This course introduces students to information, perspectives, and competencies necessary to promote health in community, school, workplace, and health care settings. Key concepts related to health and health education will be covered including determinants of health, health equity and various physical, mental, and environmental health conditions. The course will cover the history of the profession, role of a community health educator, and Certified Health Education Specialist competencies.

P: sophomore standing

Spring.

CHE 320. Methods and Strategies for Community Health Education. 3 Credits.

This course covers health education and health behavior theories, methods and strategies to plan and implement health education and health promotion programs. Students will develop an understanding of learning styles, health literacy and communication to positively impact the norms and behaviors of individuals and communities. Certified Health Education Specialist competencies will be emphasized throughout. Students will work on projects involving social marketing and development of culturally relevant health education materials.

P: CHE 310

Fall Only.

CHE 330. Program Planning and Evaluation in Community Health Education. 3 Credits.

This course actively engages students in the process of program planning and evaluation. Student teams will work to assess community needs and resources of a population of interest and plan a health education or health promotion program. Professional literature and data collection will be used in the assessment process. Development of a program evaluation will be part of the process. Responsibilities and competencies of a health education specialist will be emphasized in all phases of this project.

P: CHE 310. REC: CHE 320

Spring.

CHE 410. Grant Writing. 2 Credits.

This course introduces students to grant writing including common components of grant writing for community health organizations, including development of goals, objectives, methods, evaluation plans, and budgets. Students will review calls for grant proposals and engage in writing a mock grant proposal, employing critical thinking and practicing writing skills throughout the various phases of grant proposal development.

P: Sophomore standing

Fall Only.

CHE 440. Capstone Seminar. 3 Credits.

This course is designed as a culminating course that will engage students in synthesizing the skills and concepts they developed throughout the program curriculum. Students will apply the profession's areas of responsibility as well as ethical standards in a Capstone Portfolio. In addition, students will 1) review selected community health topics; 2) be introduced to current issues in community health education, public health, and population health; 3) be introduced to the employment, educational, and political environments in selected occupational settings; and 4) synthesize the concepts of the community health educator (assessment, planning, implementation, evaluation and research, advocacy, communication, leadership and management, ethics and professionalism).

P: CHE 310, CHE 320, CHE 330, and CHE 410

Spring.

CHE 450. Community Health Education Field Practicum. 9 Credits.

Students engage in practical fieldwork experience as a community health educator intern to utilize skills and knowledge acquired in previous courses. This fieldwork experience is designed to further develop skills in some, but not necessarily all, of the following areas: program planning, implementation, promotion and evaluation, oral and written communication, collaboration, and networking.

P: CHE 310, CHE 320, CHE 330, and CHE 410

Spring.

Chemistry (CHEM)

Courses

CHEM 104. Survey of General Chemistry. 4 Credits.

A one-semester introductory course in college chemistry.

P: Concurrent enrollment with CHEM 106.

CHEM 105. Survey of Organic and Biochemistry. 3 Credits.

A foundational course in the chemical makeup and metabolic processes of living organisms. Consists of lectures and may also include discussions and demonstrations.

P: CHEM 104 with at least a C grade; and CHEM 107 or concurrent enrollment

Spring.

CHEM 106. Survey of General Chemistry Lab. 1 Credit.

Laboratory to accompany CHEM 104

P: CHEM 104 or conc enr; and CHEM 207 or conc enr.

CHEM 107. Survey of Organic and Biochemistry Lab. 1 Credit.

Laboratory to accompany CHEM 105.

P: CHEM 106 with at least a C grade; and CHEM 105 or concurrent enrollment; and CHEM 207 or conc enr.

Spring.

CHEM 108. Survey of General, Organic and Biochemistry. 3 Credits.

Chemistry and measurements; states of matter and changes of state; atoms and elements; ionic and molecular compounds; chemical reactions; solutions; acids, bases and pH; organic nomenclature; introduction to organic functional groups, physical properties and reactions; carbohydrate structure and function; amino acids and protein structure and function; lipid structure and function; nucleic acid structure and function.

P: MATH 101 with at least a C, or WPT-MFND score >465 and WPT-AALG score >525, or ACT Math score >24, or SAT Math score >590: and CHEM 109 or conc enr

Spring.

CHEM 109. Survey of General, Organic, and Biochemistry Laboratory. 1 Credit.

Laboratory Course that accompanies Chem 108.

P: CHEM 108 or concurrent enrollment; CHEM 207 or concurrent enrollment

Fall and Spring.

CHEM 168. Sustainability Chemistry. 3 Credits.

Studying how chemistry and sustainability can relate to and improve our lives and our environment is a focus of this course. Specific topics that will be covered include scientific literacy, green chemistry, climate change, pollution, recycling, chemical usage in industry, best practices in sustainability, and more.

Spring.

CHEM 198. First Year Seminar. 3 Credits.

First Year Seminar, topics vary.

Reserved for New Incoming Freshman.

CHEM 201. Math for Chemistry Discussion: Principles of Chemistry I. 1 Credit.

This discussion course is designed to supplement the concepts presented in CHEM 211/213. Activities will focus on early exposure to math concepts in time for use in CHEM 211/213, deeper explorations of the mathematics and chemistry concepts addressed in these courses, and mathematics and chemistry skills necessary for success in CHEM 211/213.

P: Concurrent enrollment in CHEM 211/213.

Fall Only.

CHEM 202. Math for Chemistry Discussion: Principles of Chemistry II. 1 Credit.

This discussion course is designed to supplement the concepts presented in CHEM 212/214. Activities will focus on early exposure to math concepts in time for use in CHEM 212/214, deeper explorations of the mathematics and chemistry concepts addressed in these courses, and mathematics and chemistry skills necessary for success in CHEM 212/214.

P: Concurrent enrollment in CHEM 212/214.

Spring.

CHEM 207. Laboratory Safety. 1 Credit.

This course examines safety within the science laboratory with emphasis on practical application. Topics include current safety regulations, identification of hazards, chemical labeling and storage, waste management, personal protective equipment, ventilation, spill response, and biosafety.

P: BIOLOGY 201 or BIOLOGY 203 or CHEM 108, CHEM 211 or CHEM 212 or HUM BIOL 241 or conc enr

Fall and Spring.

CHEM 211. Principles of Chemistry I. 4 Credits.

Chemistry and measurement; atoms, molecules, and ions; chemical formulas, equations, and reactions; gaseous state; thermochemistry; quantum theory of the atom; electron configurations and periodicity; ionic and covalent bonding; molecular geometry and chemical bonding; and states of matter; liquids and solids.

P: MATH 104 or greater or eq or conc enr in MATH 104 or WPT-MFND score >465 and WPT-AALG score >525 and WPT-TAG score >525 or ACT Math score >26 or SAT Math score >630 & CHEM 213 or concurrent enrollment; can't repeat until open enrollment begins.

Fall and Spring.

CHEM 212. Principles of Chemistry II. 4 Credits.

Solutions; kinetics; chemical equilibrium; acids and bases; acid-base equilibrium, solubility and complex ion formation; thermodynamics and equilibrium; electrochemistry; and nuclear chemistry.

P: MATH 104 with at least a C grade or WPT-MFND score >465 and WPT-AALG score >525 and WPT-TAG score >525 or ACT Math score >26 or SAT Math score >630; and CHEM 211 and CHEM 213 with at least a C grade; and conc enr in CHEM 214

Fall and Spring.

CHEM 213. Principles of Chemistry I Laboratory. 1 Credit.

Laboratory Course that accompanies Chem 211.

P: CHEM 211 or concurrent enrollment; and CHEM 207 or concurrent enrollment

Fall and Spring.

CHEM 214. Principles of Chemistry II Laboratory. 1 Credit.

Laboratory Course that accompanies Chem 212

P: CHEM 212 or concurrent enrollment; and CHEM 207 or concurrent enrollment

Fall and Spring.

CHEM 298. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. A student wishing to study or conduct research in an area not represented in available scheduled courses should develop a preliminary proposal and seek the sponsorship of a faculty member. The student's advisor can direct him or her to instructors with appropriate interests. A written report or equivalent is required for evaluation, and a short title describing the program must be sent early in the semester to the registrar for entry on the student's transcript.

P: fr or so st with cum gpa > or = 2.50; or jr or sr st with cum gpa > or = 2.00.

Fall and Spring.

CHEM 299. Travel Course. 1-6 Credits.

Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.

P: cons of instr & prior trip arr & financial deposit.

CHEM 300. Bio-Organic Chemistry. 3 Credits.

Those aspects of the field pertinent to students entering the biologically related disciplines: Basic organic chemistry, natural products and molecules important to biological systems. Full credit not given for both Chem 300 and Chem 302 or Chem 303.

P: Chem 212 & 214 with at least a C grade or Chem 108 & 109 with at least a C grade.

Spring.

CHEM 301. Bio-Organic Chemistry Laboratory. 1 Credit.

Optional laboratory course to accompany Chem 300. Credit not granted for both Chem 301 and 304.

P: Chem 300 or conc enr; and Chem 207 or conc enr

Spring.

CHEM 302. Organic Chemistry I. 3 Credits.

The chemistry of carbon compounds: structure, reactions, synthesis, stereochemistry, reaction mechanisms, spectroscopy, nomenclature and physical properties of both aliphatic and aromatic compounds; covers all common functional groups and natural products. Full credit will not be awarded for both Chem 300 and 302 or 303.

P: Chem 212 and 214 with at least a C grade.

Fall and Spring.

CHEM 303. Organic Chemistry II. 3 Credits.

The chemistry of carbon compounds: structure, reactions, synthesis, stereochemistry, reaction mechanisms, spectroscopy, nomenclature and physical properties of both aliphatic and aromatic compounds; covers all common functional groups and natural products. Full credit will not be awarded for both Chem 303 and 300.

P: Chem 302 with at least a C grade.

Fall and Spring.

CHEM 304. Organic Chemistry Laboratory I. 1 Credit.

Basic and intermediate synthesis, basic and intermediate instrumental techniques in organic chemistry. Credit will not be granted for both Chem 304 and 301.

P: CHEM 212 and CHEM 214 with at least a C grade; and CHEM 302 with at least a C grade or conc enr; and CHEM 207 or conc enr

Fall and Spring.

CHEM 305. Organic Chemistry Laboratory II. 1 Credit.

Basic and intermediate synthesis, basic and intermediate instrumental techniques in organic chemistry.

P: Chem 303 or conc enr; and Chem 304 with at least a C grade; and Chem 207 or conc enr
Fall and Spring.

CHEM 306. Organic Chemistry Lab I & II. 2 Credits.

Basic laboratory techniques for organic chemistry including commonly used synthetic methods, purification and characterization of reaction products.

CHEM 311. Analytical Chemistry. 4 Credits.

Theory and practice of chemical analysis. Statistics; gravimetric analysis; acid-base chemistry; precipitation, complexometric and redox titrations; electrochemistry; spectrophotometry; atomic absorption; emission methods; separation methods (gas/liquid chromatography).

P: Chem 212 and 214 with at least a C grade; and Chem 207 or conc enr
Spring.

CHEM 320. Thermodynamics and Kinetics. 3 Credits.

Temperature, heat and work, thermodynamic properties of gases, solids and solutions; homogeneous and heterogeneous equilibria; thermodynamics of electrochemical cells; statistical thermodynamics; calculation of thermodynamic properties; chemical kinetics.

P: Chem 212 and 214 with at least a C grade and Physics 202 with at least a C grade and Math 203 with at least a C grade.
Fall Only.

CHEM 321. Structure of Matter. 3 Credits.

Integrated approach to the concepts of physical chemistry and modern physics: introduction to quantum theory, symmetry, atomic and molecular structure, spectroscopy, X-rays, properties of gases, liquids and solids.

P: Chem 212 and 214 with at least a C grade and Physics 202 with at least a C grade and Math 203 with at least a C grade.
Spring.

CHEM 322. Thermodynamics and Kinetics Laboratory. 1 Credit.

Laboratory course to accompany Chem 320.

P: Chem 320 or conc enr; and Chem 207 or conc enr
Fall Only.

CHEM 323. Structure of Matter Laboratory. 1 Credit.

Laboratory course to accompany Chem 321.

P: Chem 321 or conc enr or Physics 321 or conc enr.; and Env Sci 207 or conc enr or Hum Biol 207 or conc enr.
Spring.

CHEM 330. Biochemistry. 3 Credits.

Nature and function of the important constituents of living matter, their biosynthesis and degradation; energy transformation, protein synthesis and metabolic control.

P: Chem 303 with at least a C grade (or concurrent enrollment) and Biology 201/202 with at least a C grade; or Chem 300 with at least a C grade and 301 with at least a C grade and Biology 201/202 with at least a C grade.
Fall and Spring.

CHEM 331. Biochemistry Laboratory. 1 Credit.

Laboratory course to accompany Chem 330.

P: CHEM 330 or conc enr; and CHEM 207 or conc enr
Fall and Spring.

CHEM 355. Chemistry in the World. 3 Credits.

Focuses on chemistry of modern issues: air pollution, atmospheric ozone, global warming, energy utilization, water as a natural resource, acid rain, and nuclear energy.

P: MATH 101.

CHEM 402. Advanced Organic Chemistry. 3 Credits.

Advanced study of the structures of organic compounds, synthetic strategies, and the mechanisms of reactions will be emphasized. Topics will include molecular orbital theory, stereochemistry, linear free energy relationships, isotope effects, and natural and pharmaceutical products, among others.

P: Chem 303 with at least a C grade
Fall Odd.

CHEM 403. Advanced Organic Chemistry Laboratory. 1 Credit.

Synthesis of a natural pharmaceutical product. Learn the modern strategies and techniques involved in multi-step organic synthesis; run reactions, purify products, and use instruments to characterize products.

P: CHEM 305 with a C or better; Chem 207 with a C or better
Fall Odd.

CHEM 410. Inorganic Chemistry. 3 Credits.

Survey of the elements including coordination and organometallic compounds. Modern bonding theories, group theory and periodic properties extended and applied to chemical systems and reactions. General acid-base theory and non-aqueous solvent systems.

P: Chem 212 and Chem 302 with at least a C grade; REC: Chem 303.

Spring Odd.

CHEM 411. Inorganic Chemistry Laboratory. 1 Credit.

Laboratory course to accompany Chem 410.

P: Chem 410 or conc enr.; Chem 304 with at least a C grade; Env Sci 207 or conc enr of Hum Biol 207 or conc enr.; REC: Chem 305

Spring Odd.

CHEM 413. Instrumental Analysis. 4 Credits.

Theory and practice of analysis by instrumental methods, including methods based on absorption and emission of radiation, electroanalytic methods, chromatographic methods and surface analysis methods.

P: Chem 311 with at least a C grade; and Chem 207 or conc enr. REC: Chem 303.

Fall Only.

CHEM 417. Nuclear Physics and Radiochemistry. 3 Credits.

Properties and reactions of atomic nuclei; application of the properties of radioactive nuclei to the solution of chemical, physical, biological and environmental problems.

P: Chem 212 and 214 with at least a C grade and Physics 202 with at least a C grade: REC: Chem 321.

Fall Odd.

CHEM 420. Polymer Chemistry. 3 Credits.

An introduction to the synthesis, characterizations, and properties of industrial polymers.

P: Chem 300 or 303 or 321 or Physics 321.

Fall Even.

CHEM 423. Polymer Chemistry Laboratory. 1 Credit.

Laboratory course to accompany CHEM 420

P: CHEM 420 or conc. enr.

Fall Even.

CHEM 478. Honors in the Major. 3 Credits.

Honors in the Major is designed to recognize student excellence within interdisciplinary and disciplinary academic programs.

P: min 3.50 all cses req for major and min gpa 3.75 all UL cses req for major.

Fall and Spring.

CHEM 495. Teaching Assistantship. 1-6 Credits.

The student and supervising teacher must prepare a statement that identifies the course with which the assistantship will happen, objectives for the assistantship, and expectations in order to fulfill the course objectives. Students are not eligible to receive credit in both the course they assist the instructor with and the teaching assistantship in the same semester. Typically student has previously taken the course prior to enrollment in the assistantship. Course is repeatable for credit.

Fall and Spring.

CHEM 496. Project/Research Assistantship. 1-6 Credits.

The student must prepare a research proposal, and both parties should identify the research arrangement and how the student will complete the work to fulfill the course objectives within the assigned term.

P: Chem 413.

CHEM 497. Internship. 1-12 Credits.

Supervised practical experience in an organization or activity appropriate to a student's career and educational interests. Internships are supervised by faculty members and require periodic student/faculty meetings. Course is repeatable for credit.

P: jr st.

Fall and Spring.

CHEM 498. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. A student wishing to study or conduct research in an area not represented in available scheduled courses should develop a preliminary proposal and seek the sponsorship of a faculty member. The student's advisor can direct him or her to instructors with appropriate interests. A written report or equivalent is required for evaluation, and a short title describing the program must be sent early in the semester to the registrar for entry on the student's transcript. Course is repeatable for credit.

P: fr or so st with cum gpa > or = 2.50; or jr or sr st with cum gpa > or = 2.00.

Fall and Spring.

CHEM 499. Travel Course. 1-6 Credits.

Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.

P: cons of instr & prior trip arr & financial deposit.

Chinese (CHINESE)

Courses

CHINESE 101. Introduction to the Chinese Language I. 4 Credits.

Elementary modern Mandarin, for students with no previous training in the language.

CHINESE 102. Introduction to the Chinese Language II. 4 Credits.

Development of basic ability in understanding, reading, speaking and writing Chinese.

P: none;. REC: 1 yr of high school Chinese or 1 semester of college Chinese.

Spring.

Communication (COMM)

Courses

COMM 102. Introduction to Communication. 3 Credits.

Communication is the means by which individuals learn about themselves and the world around them. This course is an introduction to Communication, which emphasizes the understanding of messages in various settings, including interpersonal, small group, organizational, and mass communication. Such topics as the interplay between American society and mass media are discussed.

Fall and Spring.

COMM 133. Fundamentals of Public Address. 3 Credits.

Examination of the principles of oral message preparation and presentation. Students will prepare and present actual public communications.

Fall and Spring.

COMM 166. Fundamentals of Interpersonal Communication. 3 Credits.

Principles of personal interaction as a basis of communication: role of communication in interpersonal relationships; role of identity and self-concept in communication behavior; significance of information reception and evaluation in the effectiveness of communication.

Fall and Spring.

COMM 185. Business and Media Writing. 3 Credits.

Business and Media Writing teaches students basic business and media writing skills; resumes, business proposals, memos, reports, press releases, fact sheets, and electronic communications.

Fall and Spring.

COMM 198. First Year Seminar. 3 Credits.

First Year Seminar, topics vary.

Reserved for New Incoming Freshman.

COMM 205. Elements of Media. 3 Credits.

Exploring contemporary commercial media; analyzing the business and creative forces behind motion pictures, television, radio and new media; examining regulatory and ethical issues; identifying visual components of persuasive media and the communication strategies involved.

REC: COMM 243.

Fall and Spring.

COMM 237. Small Group Communication. 3 Credits.

The role communication plays in small group processes; focuses on development of the special communication skills needed in the small group setting.

REC: COMM 166.

Fall and Spring.

COMM 290. Communication Problems and Research Methods. 3 Credits.

This course provides students with the necessary critical thinking and research skills to excel in the upper level communication curriculum. The course focuses on creating an understanding of the scientific method and learning how to properly investigate communication problems. Issues covered include how to conduct background research, interview sources, create surveys, conduct focus groups and interpret research results.

P: none; REC: one prior comm cse.

Fall and Spring.

COMM 298. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. A student wishing to study or conduct research in an area not represented in available scheduled courses should develop a preliminary proposal and seek the sponsorship of a faculty member. The student's advisor can direct him or her to instructors with appropriate interests. A written report or equivalent is required for evaluation, and a short title describing the program must be sent early in the semester to the registrar for entry on the student's transcript.

P: fr or so st with cum gpa > or = 2.50; or jr or sr st with cum gpa > or = 2.00.

Fall and Spring.

COMM 299. Travel Course. 1-6 Credits.

Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.

P: cons of instr & prior trip arr & financial deposit.

COMM 301. How to Create Great Social Media Content. 3 Credits.

This course provides an overview of how to create great social media content. It will focus on: 1) understanding the basics of social media strategy, 2) learning how to craft great content, 3) analyzing content prior to launch, 4) successfully launching your content and 5) evaluating social media results.

Course is repeatable for credit; may be taken 2 times for a total of 6 credits.

P: None. REC: Junior Standing

Fall and Spring.

COMM 302. News Reporting and Writing. 3 Credits.

Researching, interviewing and writing various news stories for print and electronic media, with an emphasis on accuracy, fairness, objectivity, and ethics.

P: at least 15 credits of core supporting courses in Communication

Fall Only.

COMM 304. Sports, Media, and Society. 3 Credits.

Sports are a massive part of our personal, social, and professional lives. This course navigates the often complex web of connections, issues, and relationships that characterize our relationship with sports, with a particular focus on communication and media-based issues. We will discuss the nature of fandom, the mythology of sports and how media professionals cover these issues. The course will also take a deeper look at special topics in sports, including the performance of race and gender in sports, the connection between sports and nationalism, and how we use sports as communication shorthand. This course is intended to develop your media literacy and critical thinking skills, as well as a keen appreciation of the aspects of sports that, while not often discussed in the mainstream, are vital to any professional involvement in sports education.

P: At least 15 credits in COMP SCI, INFO SCI or COMM

Fall Only.

COMM 305. Principles of Public Relations/Corporate Communications. 3 Credits.

An overview of topics, issues, concepts, and practices of public relations/corporate communications; individual and group case work.

P: at least 15 credits of core supporting courses in Communication

Fall and Spring.

COMM 306. Radio Broadcasting. 3 Credits.

Commercial and non-commercial radio as a communications medium and as a business enterprise: radio audiences, audience ratings, programming and program formats, news, advertising, promotion and sales.

P: at least 15 credits of core supporting courses in Communication

Spring.

COMM 307. Video Production. 3 Credits.

Exploration of various uses of television as an informative, persuasive, and entertainment medium. Combines analysis of current uses of the medium in a professional context with practical experience in planning and producing a finished product for television.

P: at least 15 credits of supporting core courses in Communication

Fall and Spring.

COMM 308. Information Technologies. 3 Credits.

A survey of information technologies, their operations and limitations, and how the major electronic technologies are changing and affecting both the workplace and the household.

P: 15 credits of Comp Sci, Info Sci or Comm

Fall and Spring.

COMM 309. Mass Media Advertising. 3 Credits.

TV/media/Internet advertising as a unique form of communication. Through the use of both individual and team/group projects, the demands and rigors of the strategic creative process are revealed. Legal, ethical and Internet considerations are also discussed.

P: at least 15 credits of core supporting courses in Communication

Fall Only.

COMM 333. Persuasion and Argumentation. 3 Credits.

Awareness, appreciation, understanding, and skill in contemporary forms and methods of oral persuasion and argumentation.

P: at least 15 credits of supporting core courses in Communication

Spring.

COMM 335. Organizational Communication. 3 Credits.

Communication in the modern organization: communication variables in the context of organizational theory; development of a systems perspective regarding functions, structures and levels of communication in the organization; use of evaluation tools and training strategies.

P: at least 15 credits of core supporting courses in Communication

Fall Only.

COMM 336. Theories of the Interview. 3 Credits.

Basic theory behind conducting effective interviews. Specific types of interviews are discussed, such as selection, counseling, exit, discipline, appraisal, mass media and research interviews, from both the interviewer's and the interviewee's perspective.

P: at least 15 credits of core supporting courses in Communication

Fall Only.

COMM 340. Mediation and Conflict Resolution. 3 Credits.

The student and practice of alternative dispute resolution strategies. Mediation is emphasized as the primary third-party conflict intervention strategy. Students are certified as basic mediators.

P: at least 15 credits of core supporting courses in Communication

Fall Only.

COMM 366. Media Planning and Selling. 3 Credits.

This course examines the processes used in connecting advertisers' messages with their target audiences. Through lecture, readings, and two case studies, students prepare and present a comprehensive media plan and a media sales package. Traditional media channels (e.g., newspapers, TV) and new media (e.g. the Internet) are included.

P: at least 15 credits of core supporting courses in Communication

Spring.

COMM 370. Health Communication Campaigns and Strategies. 3 Credits.

We will focus on communication research and theory as it relates to health communication campaigns. This is a useful class for students who are interested in understanding how communication campaigns are planned, implemented, and evaluated. This course is targeted at students that want to study a growing area in applied communication studies, or who are considering a career in the health care field. This course focuses on the important role communication plays in the delivery of effective health campaign messages.

P: at least 15 credits of core supporting courses in Communication

Fall Only.

COMM 375. Communication Skills: Language of Metaphor. 3 Credits.

Examines metaphors and the metaphoric process and seeks to develop skills in creating and understanding metaphors, especially those that have become an unconscious part of our language and culture.

P: none; REC: Gen Ed req in Arts & Humanities.

Spring.

COMM 378. Advanced Video Production. 3 Credits.

This course focuses on advanced video production and editing techniques, with a specific focus on documentary storytelling and hands-on video experience outside of a studio setting. Students should complete COMM 307 before enrolling in this course.

P: at least 15 credits of supporting core courses in Communication

Fall and Spring.

COMM 380. Communication Law. 3 Credits.

Freedom of the press and broadcast media, problems of gag orders, contempt, privacy, censorship, libel and slander. Overview of copyright law, the Federal Communications Act and other laws affecting communication.

P: at least 15 credits of core supporting courses in Communication

Fall and Spring.

COMM 382. Public Relations Campaigns. 3 Credits.

This course provides students with professional preparation for the writing required for a public relations career. Students will learn strategies for creating, delivering, and evaluating the many different types of P.R. writing, including social media, news releases, media kits, PSAs, magazine queries, newsletters, pitches and backgrounders.

P: at least 15 credits of core supporting courses in Communication, COMM 305

Spring.

COMM 390. Sports Writing, Promotion, and Public Relations. 3 Credits.

This course is one of the practical components of the Sports Communication emphasis in the UWGB Communication department and is aimed at helping you develop hands-on skills in the promotion, media, and public relations branches of sports communication. In this class you will learn about the unique challenges of strategic communication in sport, from the organizational requirements of different sports communication outlets to the demands of marketing and public relations in the field as well as how to write interviews and other stories for sports media. You will also develop examples of different forms of strategic sports communication to add to your portfolio or demo reel.

P: 15 credits of Comp Sci, Info Sci or Comm

Spring.

COMM 396. Advanced Reporting. 3 Credits.

Development of advanced-level reporting, interviewing, writing, and editing of investigative stories, in-depth articles, and copy for the new world of online journalism.

P: at least 15 credits of core supporting courses in Communication, COMM 302

Spring.

COMM 425. Digital Journalism. 3 Credits.

Development of advanced-level reporting, conceptualizing, writing and editing news stories suited for the digital journalism world.

P: at least 15 credits of core supporting courses in Communication, COMM 302

Spring.

COMM 430. Information, Media and Society. 3 Credits.

The role of information in society, including interpersonal, mass, and institutional sources, in producing a range of effects on individuals, groups, and society as a whole; critical examination of the changing information environment in legal, economic, political, and social contexts.

P: at least 15 credits of core supporting courses in Communication or declared student in Information Sciences.

Fall and Spring.

COMM 440. Service Learning in Conflict Resolution. 3 Credits.

This course is designed to meet the upper-level requirement of the Communication emphasis in Conflict Resolution or the Culminating Application Experience requirement of the Peacebuilding and Conflict Resolution Certificate Program. The course integrates the students' prior learning in alternative dispute resolution to applied settings. Students will participate in applied experiences in selected public or private organizations in the community or in campus-related programs to make use of their conflict resolution training.

P: Comm 340

Spring.

COMM 445. Human Communication Theory. 3 Credits.

Integration of a variety of theories to promote sensitivity to and understanding of the complexity of human communications; examines the construction of various communication theories, contexts and processes in communication.

P: at least 15 credits of core supporting courses in Communication

Spring.

COMM 470. Health Communication and the Internet. 3 Credits.

This course examines how Internet technology has impacted the healthcare system and personal health management. We will focus on how people are using (and misusing) the Internet for their health needs and the resulting impact this is having on communication. More specifically, we will examine online health information sources, online health information-seeking practices, provider-patient communication, personal health management, health care consumerism, computer-mediated social support, telemedicine, privacy management, online personal health records, and the impact of social media on health information and communication.

P: at least 15 credits of core supporting courses in Communication

Spring.

COMM 474. Media Workshop I. 3 Credits.

Supervised hands-on experience as a staff member of the Fourth Estate, the campus newspaper. Students become part of a hybrid newsroom in order to experience the worlds of online, social media and print journalism and PR. Students will apply the skills learned in previous Journalism and PR courses: newswriting, feature writing, photojournalism, videojournalism, layout, management, editing, designing and implementing PR campaigns. Involves one-on-one work with professor and editors.

P: at least 15 credits of core supporting courses in Communication, COMM 302

Fall and Spring.

COMM 475. Media Workshop II. 3 Credits.

Supervised hands-on experience as a staff member of the Fourth Estate, the campus newspaper. Students become part of a hybrid newsroom in order to experience the worlds of online, social media and print journalism and PR. Students will apply the skills learned in previous Journalism and PR courses: newswriting, feature writing, photojournalism, videojournalism, layout, management, editing, designing and implementing PR campaigns. Involves one-on-one work with professor and editors.

P: at least 15 credits of core supporting courses in Communication, COMM 302

Fall and Spring.

COMM 477. Social Media Strategies. 3 Credits.

This course provides an overview of social media strategies. It will focus on the interconnections between a) historical ideas about strategy, b) networking principles, and c) contemporary research on social media. Particular emphasis is placed on evaluating and creating social strategies for various objectives.

P: at least 15 credits of core supporting courses in Communication

Fall and Spring.

COMM 478. Honors in the Major. 3 Credits.

Honors in the Major is designed to recognize student excellence within interdisciplinary and disciplinary academic programs.

P: min 3.50 all cses req for major and min gpa 3.75 all UL cses req for major.

Fall and Spring.

COMM 480. Cases in Communications and Media Management. 3 Credits.

This course examines the strategies and practices of communications and media management in organizations. Students integrate their knowledge of oral, written, and visual communication to solve real-world cases.

P: at least 15 credits of core supporting courses in Communication, COMM 305

Fall and Spring.

COMM 495. Teaching Assistantship. 1-6 Credits.

The student and supervising teacher must prepare a statement that identifies the course with which the assistantship will happen, objectives for the assistantship, and expectations in order to fulfill the course objectives. Students are not eligible to receive credit in both the course they assist the instructor with and the teaching assistantship in the same semester. Typically student has previously taken the course prior to enrollment in the assistantship. Course is repeatable for credit.

P: Jr. st.

Fall and Spring.

COMM 496. Project/Research Assistantship. 1-6 Credits.

The student must prepare a research proposal, and both parties should identify the research arrangement and how the student will complete the work to fulfill the course objectives within the assigned term.

P: Jr. st. REC: Comm 200.

COMM 497. Internship. 1-12 Credits.

Supervised practical experience in an organization or activity appropriate to a student's career and educational interests. Internships are supervised by faculty members and require periodic student/faculty meetings. Course is repeatable for credit.

P: jr st.

Fall and Spring.

COMM 498. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. A student wishing to study or conduct research in an area not represented in available scheduled courses should develop a preliminary proposal and seek the sponsorship of a faculty member. The student's advisor can direct him or her to instructors with appropriate interests. A written report or equivalent is required for evaluation, and a short title describing the program must be sent early in the semester to the registrar for entry on the student's transcript. Course is repeatable for credit.

P: fr or so st with cum gpa > or = 2.50; or jr or sr st with cum gpa > or = 2.00.

Fall and Spring.

COMM 499. Travel Course. 1-6 Credits.

Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.

P: cons of instr & prior trip arr & financial deposit.

Community Sciences (COMM SCI)

Courses

COMM SCI 145. 21st Century Citizen. 3 Credits.

In this course students will develop their capacities to become true stakeholders in their education and in their communities. We will explore the diverse contexts impacting learning and engaged citizenship, examine relevant social problems from an interdisciplinary perspective, and identify a problem to address via a large-scale service project in our spring GPS class. Along the way, students will build leadership and communication skills, self-awareness, and the habits of mind required to get the most from your college experience.

P: Participation in the GPS (Gateways to Phoenix Success) Program

Fall Only.

COMM SCI 146. GPS Spring Seminar. 3 Credits.

This course will serve as a capstone to the GPS program first year experience, and will challenge students to apply the knowledge and skills they've gained thus far in GPS to address a real-world problem. Students will develop and implement a service learning project with their class over the course of the semester, and will continue the work to build knowledge and skills critical to personal and career success.

P: Participation in the GPS program

Spring.

COMM SCI 148. GNSS Support Protocol. 1 Credit.

One-credit course that will give incoming veterans an introduction to what to expect in the college environment, information about how to connect with university resources and local VA services, and to develop skills to be successful in their academic work at the university.

Fall Only.

COMM SCI 198. First Year Seminar. 3 Credits.

First Year Seminar, topics vary.

Reserved for New Incoming Freshman.

COMM SCI 200. Civic Scholars Practicum. 3 Credits.

The Civic Scholars program prepares sophomore and transfer students to become civic professionals and citizen leaders through sustained interdisciplinary civic engagement and scholarship with a focus on the City of Green Bay. Through workshops in the fall semester, students will visit community organizations with specific sector focuses such as education, environment, arts, history, and more. The actual visits are preceded by learning about community partners and followed by guided reflections about the role and function of the particular organization in the greater Green Bay community and the need for its existence. The practicum prepares them for a Spring semester service internship and for completing the yearlong program with a certificate.

P: Reserved for sophomores or transfer students

Fall Only.

COMM SCI 298. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. A student wishing to study or conduct research in an area not represented in available scheduled courses should develop a preliminary proposal and seek the sponsorship of a faculty member. The student's advisor can direct him or her to instructors with appropriate interests. A written report or equivalent is required for evaluation, and a short title describing the program must be sent early in the semester to the registrar for entry on the student's transcript. Course is repeatable for credit.

COMM SCI 299. Travel Course. 1-6 Credits.

Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.

P: cons of instr & prior trip arr & financial deposit.

COMM SCI 301. Foundations for Social Research. 3 Credits.

An integrated examination of the nature of science, theory and statistics. Emphasizes identifying and interpreting relationships between social phenomena by applying the conceptual tools provided in the course to specific problems.

P: PSYCH 205 or MATH 260 or BUS ADM 220

Fall and Spring.

COMM SCI 493. Peer Mentor for First Year Seminars. 3 Credits.

In this course, students will work in First Year Seminar classes as peer mentors for first year students. Peer mentors will help promote the development of skills relevant to student success, will encourage student engagement with the university, and will act as a role model for first year students. Through this work, peer mentors will learn about college student development and effective practices in teaching and learning, will develop professional and interpersonal skills such as communication and leadership, and will have the opportunity to apply this knowledge in their work with first year students. Course is repeatable for credit; may be taken 2 times for a total of 6 credits.

P: Approval of instructor

Fall Only.

COMM SCI 495. Teaching Assistantship. 1-6 Credits.

The student and supervising teacher must prepare a statement that identifies the course with which the assistantship will happen, objectives for the assistantship, and expectations in order to fulfill the course objectives. Students are not eligible to receive credit in both the course they assist the instructor with and the teaching assistantship in the same semester. Typically student has previously taken the course prior to enrollment in the assistantship. Course is repeatable for credit.

COMM SCI 497. Internship. 1-12 Credits.

Supervised practical experience in an organization or activity appropriate to a student's career and educational interests. Internships are supervised by faculty members and require periodic student/faculty meetings. Course is repeatable for credit.

COMM SCI 498. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. A student wishing to study or conduct research in an area not represented in available scheduled courses should develop a preliminary proposal and seek the sponsorship of a faculty member. The student's advisor can direct him or her to instructors with appropriate interests. A written report or equivalent is required for evaluation, and a short title describing the program must be sent early in the semester to the registrar for entry on the student's transcript. Course is repeatable for credit.

P: fr or so st with cum gpa > or = 2.50; or jr or sr st with cum gpa > or = 2.00.

COMM SCI 499. Travel Course. 1-6 Credits.

Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.

P: cons of instr & prior trip arr & financial deposit.

Computer Science (COMP SCI)

Courses

COMP SCI 198. First Year Seminar. 3 Credits.

First Year Seminar, topics vary.

Reserved for New Incoming Freshman.

COMP SCI 201. Introduction to Computing & Internet Technologies. 3 Credits.

Introduction to the history of computing, overview of computers, how they work, and relevant applications, especially to web site creation. Introduction to procedural programming using Microsoft Web Development tools part of the Microsoft Visual Studio.NET programming environment, the basics of HTML, CSS, and JavaScript.

Fall and Spring.

COMP SCI 221. Database Design & Management. 3 Credits.

This introductory course focuses on how databases and database systems work and how they are used in various data-driven applications. The course covers relational databases, SQL, different ways of designing databases, and management of databases. The course provides hands-on experience with exercises using modern database management systems such as SQL Server and/or MySQL and includes group discussions. The course also introduces some advanced topics, including database security, data privacy, data analytics, and big data. Working knowledge of Microsoft Office suite and Windows is required for this course.

P: COMP SCI 201 or COMP SCI 256 with at least a C grade

Fall Only.

COMP SCI 231. Introduction to IT Operations. 3 Credits.

This course covers the basic knowledge and skills needed to plan, design, control and monitor Information Technology services and infrastructure.

Topics include the fundamentals of asset management, service provisioning, and functional operations. This course serves as an introduction to careers in the IT field.

Fall and Spring.

COMP SCI 240. Discrete Mathematics. 4 Credits.

Study of topics in mathematics that do not depend upon the limit process, including: number systems, set theory, logic, counting techniques, matrix manipulation, recursion, mathematical induction, graph theory, recurrence relations, and finite state machines. Techniques, computations, and data representations to facilitate problem-solving by hand and by computer.

P: MATH 104 with at least a C grade or WPT-MFND score >465 and WPT-AALG score >525 and WPT-TAG score >525

Fall and Spring.

COMP SCI 256. Introduction to Software Design. 4 Credits.

Students will learn a language common to software design and be introduced to software design techniques. This includes the problem statement, solution design, program testing, implementation, debugging, and final documentation.

P: None

Fall and Spring.

COMP SCI 292. Introduction to Mobile Platforms and Apps. 3 Credits.

An introduction and survey to the world of mobile computing. Each student will design, develop and produce their own app. Topics covered will include areas such as models of mobile information, GPS services, social networking, casual gaming, networked games, business apps, and information gathering -- all from the perspective of mobile platforms.

P: COMP SCI 201 and COMP SCI 256 with at least a C grade in both.

Fall Only.

COMP SCI 295. Special Topics. 1-3 Credits.

Computer Science Special Topics is designed to provide access to additional learning in the area of software engineering. Topics include Algorithmic complexity, No-SQL, professional software development frameworks/libraries and additional Computer Science principles. Course is repeatable if topics differ; may be taken 3 times for a total of 9 earned credits.

COMP SCI 297. Internship. 1-6 Credits.

Supervised practical experience in an organization or activity appropriate to a student's career and educational interests. Internships are supervised by faculty members and require periodic student/faculty meetings. Course is repeatable for credit; may be taken 3 times for a total of 6 credits.

P: Cumulative GPA of 2.0 or higher

Fall and Spring.

COMP SCI 298. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. A student wishing to study or conduct research in an area not represented in available scheduled courses should develop a preliminary proposal and seek the sponsorship of a faculty member. The student's advisor can direct him or her to instructors with appropriate interests. A written report or equivalent is required for evaluation, and a short title describing the program must be sent early in the semester to the registrar for entry on the student's transcript.

P: fr or so st with cum gpa > or = 2.50; or jr or sr st with cum gpa > or = 2.00.

Fall and Spring.

COMP SCI 299. Travel Course. 1-6 Credits.

Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.

P: cons of instr & prior trip arr & financial deposit.

COMP SCI 316. Advanced Software Design. 4 Credits.

A continuation of COMP SCI 256, this course deals with larger projects, more complex problems, and group work. It introduces linear data structures and their implementations. It also develops the object oriented design paradigm to include inheritance and polymorphism.

P: COMP SCI 256 with at least a C grade

Fall and Spring.

COMP SCI 351. Data Structures. 4 Credits.

Concepts involved in designing software with creation, storage, and retrieval of complete data, analyzing algorithms to determine time and space complexity, Using Abstract Data Types (ADTs) such as generalized lists, stacks, queues, trees and graphs, Hash tables, Searching and Sorting algorithms, Binary Search Tree, Balanced Trees, Recursion.

P: COMP SCI 240 AND COMP SCI 316 with at least a C grade in both.

Fall and Spring.

COMP SCI 352. Computer Graphics and Animation. 3 Credits.

Basic techniques of computer graphics, such as point and line plotting, clipping and windowing using the OpenGL platform. Use of graphics hardware; construction of graphics packages. Basic animation techniques.

P: COMP SCI 240 with at least a C grade. REC: COMP SCI 371

Fall Odd.

COMP SCI 353. Computer Architecture and Organization. 3 Credits.

Data representation, assembly language, procedure call protocols, memory, cache, and bus organizations, comparison of processor architectures, I/O systems, logic circuits, Boolean algebra.

P: COMP SCI 240 and COMP SCI 256 with at least a C grade in both.

Fall and Spring.

COMP SCI 357. Theory of Programming Languages. 3 Credits.

Comparison of several common languages and discussion of advantages and disadvantages of compiling and interpreting. Discussion of language design and syntax, data types, variables, constants, binding and scope of a variable and data handling procedure.

P: COMP SCI 316 with at least a C grade.

Fall Only.

COMP SCI 358. Data Communication and Computer Networks. 3 Credits.

Transmission media, analog and digital signals, modulation, compression, error detection methods, security and encryption protocols, Ethernet standards, TCP/IP protocols, routing algorithms, Internet and streaming applications.

P: Comp Sci 256 with at least a C grade.

Spring.

COMP SCI 361. Information Assurance and Security. 3 Credits.

An exploration of the fundamentals of information assurance and security (IAS). The course will introduce the underlying concepts of IAS in context of today's society. It will explore the security & ethical issues in information and computing from the perspective of today's computing world. It will discuss the appropriate remedies and defense strategies in the wake of today's security threats and attacks. Class topics will focus on physical security, cyber security, network security and software security through lectures and hands on experiments. This course will be of interest to students, who wish to obtain an understanding of the basic principles and practices in IAS. It will cover the fundamental concepts in IAS necessary for understanding the threats to security as well as various defenses against those threats.

P: COMP SCI 256 with at least a C grade.

Fall Only.

COMP SCI 371. Advanced Object-Oriented Design. 4 Credits.

Advanced object oriented design techniques in C++, including: objects, classes, class design and class relationships, inheritance, and polymorphism. Additional coverage of C/C++ topics such as pointers and pointer arithmetic, C strings, dynamic memory management, memory leaks, exception handling and operator overloading.

P: COMP SCI 316 with at least a C grade.

Fall and Spring.

COMP SCI 372. Software Engineering. 3 Credits.

Design and programming techniques for large and complex data-driven projects, using C++. Design based on Design Patterns. Use of Software Engineering metrics and formal methodologies. Fundamentals of component-based software development and software deployment techniques.

P: COMP SCI 201 and COMP SCI 221 with at least a C grade for both. REC: COMP SCI 316

Spring.

COMP SCI 450. Theory of Algorithms. 3 Credits.

Design, analysis and comparison of algorithms; divide and conquer techniques, greedy method, dynamic programming and smart searching.

Applications to optimization with constraints and decision problems. Theory of computability including examples of NP-complete problems such as the "traveling salesman" problem.

P: COMP SCI 240, COMP SCI 316, MATH 202 with at least a C grade in all three.

Spring.

COMP SCI 451. Database Systems and Big Data Processing. 3 Credits.

This course covers advanced relational database concepts, data warehousing, and distributed database management systems. It introduces students to unstructured data and NoSQL databases and discusses the basics of real-time storage and processing of massive datasets using Hadoop ecosystems. The course includes hands-on exercises with Hadoop ecosystem and SQL Server.

P: COMP SCI 221 with at least a C grade
Spring.

COMP SCI 452. Operating Systems Using Linux. 3 Credits.

Methods and philosophies behind management of computing resources, including: memory management, process management, scheduling, process signaling, process synchronization, mutual exclusion; interprocess communication, introduction to the Linux Operating System and environment, shell scripting, C programming, process management, and message passing.

P: COMP SCI 240 with at least a C grade. REC: COMP SCI 371
Spring.

COMP SCI 464. Artificial Intelligence. 3 Credits.

Introductions to the fundamental types of Artificial Intelligence (AI) and their practical applications, Problem Solving by Searching, Adversarial Search, Constraint Satisfaction Problem, Neural Networks, Machine Learning, Decision Trees, Computer Vision, Reinforcement Learning, Implications of the use of AI.

P: COMP SCI 240 with at least a C grade. REC: COMP SCI 351 and MATH 202
Fall Only.

COMP SCI 474. Game Engines. 3 Credits.

This course provides students with an introduction to the theory and practice of video game programming. Students will participate in individual hands-on lab exercises, and also work together like a real game development team to design and build their own functional game using an existing game engine (e.g. Unity, Ogre).

P: COMP SCI 256 with at least a C grade.
Spring Odd.

COMP SCI 478. Honors in the Major. 3 Credits.

Honors in the Major is designed to recognize student excellence within interdisciplinary and disciplinary academic programs.

P: min 3.50 all cses req for major and min gpa 3.75 all UL cses req for major.
Fall and Spring.

COMP SCI 490. Capstone Essay in Computer Science. 3 Credits.

A project course in which a student does reading in computer science journals and produces a major research paper.

P: COMP SCI 358 and COMP SCI 361 with at least a C grade in both.
Fall Only.

COMP SCI 495. Teaching Assistantship. 1-6 Credits.

The student and supervising teacher must prepare a statement that identifies the course with which the assistantship will happen, objectives for the assistantship, and expectations in order to fulfill the course objectives. Students are not eligible to receive credit in both the course they assist the instructor with and the teaching assistantship in the same semester. Typically student has previously taken the course prior to enrollment in the assistantship. Course is repeatable for credit.

COMP SCI 496. Project/Research Assistantship. 1-6 Credits.

The student must prepare a research proposal, and both parties should identify the research arrangement and how the student will complete the work to fulfill the course objectives within the assigned term.

P: jr st.

COMP SCI 497. Internship. 1-12 Credits.

Supervised practical experience in an organization or activity appropriate to a student's career and educational interests. Internships are supervised by faculty members and require periodic student/faculty meetings. Course is repeatable for credit.

P: jr st.

Fall and Spring.

COMP SCI 498. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. A student wishing to study or conduct research in an area not represented in available scheduled courses should develop a preliminary proposal and seek the sponsorship of a faculty member. The student's advisor can direct him or her to instructors with appropriate interests. A written report or equivalent is required for evaluation, and a short title describing the program must be sent early in the semester to the registrar for entry on the student's transcript. Course is repeatable for credit.

P: fr or so st with cum gpa > or = 2.50; or jr or sr st with cum gpa > or = 2.00.

Fall and Spring.

COMP SCI 499. Travel Course. 1-6 Credits.

Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.

P: cons of instr & prior trip arr & financial deposit.

Design Arts (DESIGN)

Courses

DESIGN 131. Introduction to Design and Culture. 3 Credits.

The history of the relationship between the consumer, manufacturing and the role design plays in the development of products and other forms of design that impact the economic, environmental and social spheres of contemporary life.

Spring.

DESIGN 231. Graphic Design Studio I. 3 Credits.

Problem-solving techniques in graphic communication; development of visual, verbal and project management skills applied in graphic design. Development of design and technological skills using digital tools.

P: Art 106, Art 107 and Design 131 with at least a C grade; REC: Art 105 or Art 243

Fall and Spring.

DESIGN 236. Environmental Design Studio I. 3 Credits.

Introduces use of creative problem solving techniques in defining, analyzing, and solving problems in the built environment at the scale of the individual. Emphasizes basic graphic and verbal presentation techniques and relationships between form, the natural environment, people, and function.

P: ART 105, UR RE ST 100

Fall Only.

DESIGN 298. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. A student wishing to study or conduct research in an area not represented in available scheduled courses should develop a preliminary proposal and seek the sponsorship of a faculty member. The student's advisor can direct him or her to instructors with appropriate interests. A written report or equivalent is required for evaluation, and a short title describing the program must be sent early in the semester to the registrar for entry on the student's transcript.

P: fr or so st with cum gpa > or = 2.50; or jr or sr st with cum gpa > or = 2.00.

Fall and Spring.

DESIGN 332. Graphic Design Studio II. 3 Credits.

Project based problem-solving techniques in graphic communication: expansion of design and technological skills. Intermediate and advanced design techniques using digital design tools.

P: Design 231 with at least a C grade

Fall and Spring.

DESIGN 431. Graphic Design Studio III. 3 Credits.

Advanced methods in design research, problem-solving, design theory and technology use applied in graphic design and visual communications. Perspectives on portfolio development and presentation. Course is repeatable for credit; may be taken 2 times for a total of 6 credits.

P: Design 332 with at least a C grade.

Fall Only.

DESIGN 433. Advanced Studio. 3 Credits.

Applying concepts and skills in advanced communications projects such as web design and epublication, filmmaking and storytelling. Course is repeatable for credit if topics differ; may be taken 3 times for a total of 9 credits.

P: Design 332 with at least a C grade or with consent of instructor.

Fall and Spring.

DESIGN 435. Design Arts Publication Workshop. 3 Credits.

A comprehensive experience in the design and production of a magazine format publication from the early stages of design through to the finished printed product. Combines conventional design skills developed in the graphic communications studios and use of desktop publishing technology.

Course is repeatable for credit; may be taken 3 times for a total of 9 credits.

P: jr st and DESIGN 332 with at least a B grade

Fall and Spring.

DESIGN 437. Environmental Design Studio II. 3 Credits.

Analysis and design of group spaces, such as houses, classrooms, waiting rooms and other spaces intended for occupancy by groups of people.

P: DESIGN 236

Spring.

DESIGN 438. Environmental Design Studio III. 3 Credits.

Projects at the urban scale: design teams analyze physical, social, economic, historical, and administrative aspects of specific problems. Students formulate urban design programs and produce policies, plans, and designs.

P: DESIGN 437

Fall Only.

DESIGN 439. Environmental Design Studio IV. 3 Credits.

Each student proposes, designs and executes a design/research project of an elected topic. Individual projects are acceptable in some instances; projects by design teams are encouraged.

P: DESIGN 438

Spring.

DESIGN 478. Honors in the Major. 3 Credits.

Honors in the Major is designed to recognize student excellence within interdisciplinary and disciplinary academic programs.

P: min 3.50 all cses req for major and min gpa 3.75 all UL cses req for major.

DESIGN 495. Teaching Assistantship. 1-6 Credits.

The student and supervising teacher must prepare a statement that identifies the course with which the assistantship will happen, objectives for the assistantship, and expectations in order to fulfill the course objectives. Students are not eligible to receive credit in both the course they assist the instructor with and the teaching assistantship in the same semester. Typically student has previously taken the course prior to enrollment in the assistantship. Course is repeatable for credit.

DESIGN 496. Project/Research Assistantship. 1-6 Credits.

The student must prepare a research proposal, and both parties should identify the research arrangement and how the student will complete the work to fulfill the course objectives within the assigned term.

P: jr st.

DESIGN 497. Internship. 1-12 Credits.

Instruction and experience in a professional environment where students work in any aspect of the field appropriate to their academic preparation and career goals under professional and faculty supervision. Course is repeatable for credit. No more than 3 credits may be used to meet requirements for a major or minor.

P: jr st and 3.0 gpa in major emphasis (dept will monitor gpa req).

Fall and Spring.

Democracy and Justice Studies (DJS)

Courses

DJS 101. Introduction to Democracy and Justice Studies. 3 Credits.

This team-taught course will introduce students to a variety of theories about democracy and justice and offer examples of those who have attempted to put democracy and justice into practice, as well as the opportunity to apply these theories and examples in a high-impact experience.

Fall and Spring.

DJS 198. First Year Seminar. 3 Credits.

First Year Seminar, topics vary.

Reserved for New Incoming Freshman

Fall and Spring.

DJS 200. Mentoring for Equity and Inclusion. 3 Credits.

Students will serve as mentors for Green Bay high school students participating in the Federal TRIO Upward Bound program. Mentors will help promote the development of skills critical to academic success, will encourage students to aspire to college, will help overcome barriers to college attainment, and will act as a role model and resource for the underrepresented students served by TRIO programs. A critical component of mentoring will involve learning about the barriers that have historically limited access to college, including low income, racism, and sexism. Mentors will work with local TRIO students at least four hours per week for twelve weeks and will provide mentoring as well as tutoring support.

Fall and Spring.

DJS 204. Freedom and Social Control. 3 Credits.

Explores definitions, concepts and theories used to explain and understand central features of social power. Themes include the struggle for social justice, the history of punishment in Western society, and the legal and extralegal management and disciplining of individuals and groups.

Fall and Spring.

DJS 221. American Law in Historical Perspective. 3 Credits.

Americans hold equality to be one of the central principles of our democracy. Our Declaration of Independence articulates the ideal that "all men are created equal." And our courts are intended to embody the principle that justice is blind - all are to be equal before the law. At the same time, our nation has embraced profound legal inequalities from the moment of its inception - most conspicuously in the law of slavery, but also in the legal regimes that governed the status of women, immigrants, wage earners, Native Americans, and others. This course examines the ideal of legal equality in historical perspective, beginning with the colonial era and ending in the present day. In units on the law of personal status, the impact of the Fourteenth Amendment, ideals of citizenship and belonging, and modern civil rights, we will investigate how Americans from the colonial era to the modern era have understood their legal rights and obligations to one another. We will investigate transformations in the legal meaning of citizenship and civil rights over time and consider the terms in which we uphold "equality" in our own historical moment.

Spring.

DJS 298. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. A student wishing to study or conduct research in an area not represented in available scheduled courses should develop a preliminary proposal and seek the sponsorship of a faculty member. The student's advisor can direct him or her to instructors with appropriate interests. A written report or equivalent is required for evaluation, and a short title describing the program must be sent early in the semester to the registrar for entry on the student's transcript.

P: fr or so st with cum gpa > or = 2.50; or jr or sr st with cum gpa > or = 2.00.

Fall and Spring.

DJS 299. Travel Course. 1-6 Credits.

Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.

P: cons of instr & prior trip arr & financial deposit.

DJS 303. Criminal Justice Process. 3 Credits.

A study of the components, relations, and processes of U.S. criminal justice. The criminal justice system is theoretically linked to larger social arrangements, including class and race-ethnic stratification. Ethical problems, such as group disparities in arrest and sentencing, are given special attention.

P: Pol Sci 101 and Sociol 101

Fall Only.

DJS 320. Constitutional Law. 3 Credits.

This course examines the development of constitutional law across a variety of issue areas in the United States Supreme Court, focusing on civil liberties and civil rights. It is taught using the case law method, which consists of reading judicial opinions. In addition to learning about our individual freedoms and rights, we will identify, analyze, and evaluate the legal questions and legal arguments raised in Supreme Court cases.

P: POL SCI 101

Fall Only.

DJS 325. Law and Society. 3 Credits.

Explores how the courts can either promote or inhibit progressive social, political, and economic changes in contemporary American society. There is a great deal of emphasis placed on how to use theory to better understand the relationship between law and society.

P: History 206 or Pol Sci 100 or 101 or Sociol 101

Spring.

DJS 348. Gender and the Law. 3 Credits.

The changing legal status of women and LGBTQ+ people in relationship to other social forces; major historical landmarks in the development of their legal rights and current status in such areas as property rights, family law and employment opportunity; legal tools in the struggle for equality.

P: sophomore standing

Fall Even.

DJS 361. Historical Perspectives on American Democracy. 3 Credits.

Examination of historical thinking in scholarly work and public life and study of the making of modern American freedom, equality and democracy, past and present.

Fall Only.

DJS 362. Power and Change in America. 3 Credits.

Study of the dynamic relations between political economy and social structure and the formation and impact of social movements, politics and ideologies in modern America.

P: Pol Sci 101 or Sociol 202.

Spring Odd.

DJS 363. Topics in Democracy and Justice. 3 Credits.

Explores a single theme pertaining to democracy and justice from an interdisciplinary perspective. Variable content. Course is repeatable for credit if topics differ; may be taken 3 times for a total of 9 credits.

REC: DJS 101

Fall and Spring.

DJS 371. Gender and Economic Justice. 3 Credits.

This course serves as an introduction to the field of contemporary feminist approaches to economics. Questions range from conceptualization of the economy, work, well-being, and the gendered implications of policy at both micro and macro levels. The course includes an examination of contemporary economic inequalities between men and women (also differentiated by race and class), with a focus on the United States.

P: DJS/WOST 241

Spring Even.

DJS 400. Mentoring for Equity and Inclusion. 3 Credits.

Students will serve as mentors for Green Bay high school students participating in the Federal TRIO Upward Bound program. Mentors will help promote the development of skills critical to academic success, will encourage students to aspire to college, will help overcome barriers to college attainment, and will act as a role model and resource for the underrepresented students served by TRIO programs. A critical component of mentoring will involve learning about the barriers that have historically limited access to college, including low income, racism, and sexism. Mentors will work with local TRIO students at least four hours per week for twelve weeks and will provide mentoring as well as tutoring support. 400 Level students will complete an additional substantive project.

P: DJS 101

Fall and Spring.

DJS 461. Social and Political Criticism. 3 Credits.

Operating as a seminar, we examine the role of the American social critic and the practice of social criticism on the political left, right and center. Then, operating as a writing workshop, we compose pieces of political, social and cultural criticism for possible publication.

P: DJS 360 or 361 or Sociol 302 or 307.

Spring.

DJS 470. Senior Seminar in Democracy and Justice Studies. 3 Credits.

Rigorous analysis of an important social change issue or of the work of an important social change theorist. This capstone includes high impact experiences such as community-based learning, collaborative assignments, or undergraduate research. Course is not repeatable for credit.

P: Junior Status

Fall and Spring.

DJS 478. Honors in the Major. 3 Credits.

Honors in the Major is designed to recognize student excellence within interdisciplinary and disciplinary academic programs.

P: min 3.50 all cses req for major and min gpa 3.75 all UL cses req for major.

Fall and Spring.

DJS 483C. Chicana/x and Latina/x History: Comparative and Transnational Working-Class Lives. 3 Credits.

Experimental Course Development

P: DJS 101 or HIST 205 or HIST 206 or POL SCI 101.

DJS 495. Teaching Assistantship. 1-6 Credits.

The student and supervising teacher must prepare a statement that identifies the course with which the assistantship will happen, objectives for the assistantship, and expectations in order to fulfill the course objectives. Students are not eligible to receive credit in both the course they assist the instructor with and the teaching assistantship in the same semester. Typically student has previously taken the course prior to enrollment in the assistantship. Course is repeatable for credit.

DJS 496. Project/Research Assistantship. 1-6 Credits.

The student must prepare a research proposal, and both parties should identify the research arrangement and how the student will complete the work to fulfill the course objectives within the assigned term.

P: jr st.

DJS 497. Internship. 1-12 Credits.

Supervised practical experience in an organization or activity appropriate to a student's career and educational interests. Internships are supervised by faculty members and require periodic student/faculty meetings. Course is repeatable for credit.

P: jr st.

Fall and Spring.

DJS 498. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. A student wishing to study or conduct research in an area not represented in available scheduled courses should develop a preliminary proposal and seek the sponsorship of a faculty member. The student's advisor can direct him or her to instructors with appropriate interests. A written report or equivalent is required for evaluation, and a short title describing the program must be sent early in the semester to the registrar for entry on the student's transcript. Course is repeatable for credit.

P: fr or so st with cum gpa > or = 2.50; or jr or sr st with cum gpa > or = 2.00.

Fall and Spring.

DJS 499. Travel Course. 1-6 Credits.

Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.

P: cons of instr & prior trip arr & financial deposit.

Economics (ECON)

Courses

ECON 102. Economics of the Modern World. 3 Credits.

An introduction to the study of economics that examines economic systems, global interdependence, and provides an orientation to economic concepts. Among the topics included are competitiveness of markets, measures of economic output, structure of the U.S. financial system, and global trade, as well as types of failure within economic systems, social equity and economic justice. Emphasis is placed upon problems, current issues, and the rationale for economic policy.

Fall and Spring.

ECON 202. Macro Economic Analysis. 3 Credits.

Introduction to the behavior of our economy in the aggregate, focusing upon the process by which the economy achieves a certain level of output and employment.

P: None. REC: ECON 102

Fall and Spring.

ECON 203. Micro Economic Analysis. 3 Credits.

The decision-making processes of individuals and business firms associated with the determination of what products will be produced, how they will be produced, and what prices specific goods and services will command.

P: None. REC: ECON 102

Fall and Spring.

ECON 208. Economics WTCS Bridge. 3 Credits.

An examination of the decision-making processes of individuals and business firms associated with the determination of what products will be produced, how they will be produced, and what prices specific goods and services will command. This examination leads into the behavior of our economy in aggregate, focusing upon processes by which the economy measures, attains, and influences overall output, employment, and prices.

P: 10-809-195 offered by the Wisconsin Technical College System (WTCS); Professional advisor consent required to enroll in course

Fall and Spring.

ECON 210. Quantitative Methods for Economics and Business. 3 Credits.

Economists and businesses utilize quantitative techniques to both express abstract concepts and to bring such concepts to real life through application. Logically consistent models are constructed using mathematical tools. This course is introductory. Its purpose is to introduce students to the application of quantitative methods and develop their skills in the usage of such methods. Topics will range from basic mathematical principles to specific sub-components of more advanced mathematics courses, topics having application to economic optimization problems, calculation of total values, marginal analysis, and present/future values for economic decision making.

P: University Math competency

Fall Only.

ECON 298. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. A student wishing to study or conduct research in an area not represented in available scheduled courses should develop a preliminary proposal and seek the sponsorship of a faculty member. The student's advisor can direct him or her to instructors with appropriate interests. A written report or equivalent is required for evaluation, and a short title describing the program must be sent early in the semester to the registrar for entry on the student's transcript.

P: fr or so st with cum gpa $>$ or $=$ 2.50; or jr or sr st with cum gpa $>$ or $=$ 2.00.

ECON 299. Travel Course. 1-6 Credits.

Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.

P: cons of instr & prior trip arr & financial deposit.

ECON 302. Intermediate Macro Economic Theory. 3 Credits.

Theories of national income distribution as a basis for an examination of policy proposals to deal with inflation, unemployment, economic fluctuations and economic growth at national and international levels.

P: ECON 202.

Fall and Spring.

ECON 303. Intermediate Micro Economic Theory. 3 Credits.

Theories used in explaining the behavior of consumers and producers in choices relating to the production, exchange and distribution of output.

P: ECON 203.

Fall and Spring.

ECON 305. Natural Resources Economic Policy. 3 Credits.

Examines 1) the economic rationale for policy, 2) the various types of policy approaches used, and 3) alternative policy options for managing the development and sustainable use of natural resources (broadly defined to include environmental resources). Particular attention is paid to the longer time horizon required for sustainability and maintenance of quality ecosystems, a necessary condition, or precursor, to having a dynamic and vibrant economic system over time.

P: ECON 102 or ECON 202 or ECON 203

Fall Only.

ECON 309. Urban and Regional Economics. 3 Credits.

Basic concepts in the economics of regions and urban areas, such as industrial location theory, central place theory, land rent theory, economic base theory, and input-output analysis; applications to problems of economic development, urbanization and place prosperity.

P: ECON 203 and jr st; REC: ECON 202.

Spring.

ECON 310. Introduction to Econometrics. 3 Credits.

An introduction to econometric techniques in the analysis of economic phenomena that incorporates the use of mathematical and statistical tools.

P: ECON 202 or ECON 203; ECON 210 or MATH 202; and BUS ADM 220 or COMM SCI 205 or MATH 260

Spring.

ECON 330. Money, Banking and Financial Markets. 3 Credits.

Analysis of money as an economic institution, the organizational structure of the commercial and central banking system, and its functioning in the U.S.; monetary theory and policy in the national and international setting. The course will also examine key financial markets such as the bond, stock, and foreign exchange markets. In addition, the course will provide an introduction to the role of other key financial institutions such as insurance companies, securities firms, and government-sponsored financial enterprises.

P: ECON 102 or ECON 202 (strongly preferred) or ECON 203

Fall and Spring.

ECON 340. Economics of Land Use. 3 Credits.

Economic relationships between humans and land. Principles governing land use and conservation and the institutional arrangements of this basic resource. Application of principles in policy-making in land valuation, taxation and zoning in the context of regional economic development.

Spring.

ECON 402. Environmental Economics. 3 Credits.

Applications of tools such as cost-benefit analysis and other economic concepts in current public decision making, with special emphasis upon common property resources management.

P: ECON 303 or ECON 305

Spring.

ECON 403. International Economics and Finance. 3 Credits.

Theory and concepts of international trade and finance; contemporary conditions and problems in international economic relations.

P: ECON 202 and ECON 203 and jr st.

Fall and Spring.

ECON 409. Public Finance and Fiscal Policy. 3 Credits.

Effects of government spending and taxation on resource allocation, incomes, prices and employment. Includes consideration of the uses and effects of fiscal policy.

P: ECON 203

Fall Odd.

ECON 453. Cost Benefit Analysis. 3 Credits.

Application of tools and concepts in current economic decision making, with special emphasis upon Natural Resource management, environmental problems, market failure, and public policy approaches.

P: Completion of 53 credits (Junior status) or permission of instructor. REC: ECON 102, ECON 202, or ECON 203.

ECON 478. Honors in the Major. 3 Credits.

Honors in the Major is designed to recognize student excellence within interdisciplinary and disciplinary academic programs.

P: min 3.50 all cses req for major and min gpa 3.75 all UL cses req for major.

Fall and Spring.

ECON 480. Capstone: Seminar in Economic Literature and Issues. 3 Credits.

The purpose of this seminar is to examine a range of theoretical and empirical contributions to the economic literature, both classic contributions as well as major contemporary contributions.

P: Senior standing

Spring.

ECON 485. Managerial Economics. 3 Credits.

Applications of the basic theoretical tools of micro- and macro-economic analysis to the problems of business management, including such topics as demand, production, costs, pricing and forecasting as well as current economic issues such as environmental policies and regulations.

P: ECON 202 and ECON 203

Fall Only.

ECON 495. Teaching Assistantship. 1-6 Credits.

The student and supervising teacher must prepare a statement that identifies the course with which the assistantship will happen, objectives for the assistantship, and expectations in order to fulfill the course objectives. Students are not eligible to receive credit in both the course they assist the instructor with and the teaching assistantship in the same semester. Typically student has previously taken the course prior to enrollment in the assistantship. Course is repeatable for credit.

Fall and Spring.

ECON 497. Internship. 1-12 Credits.

Supervised practical experience in an organization or activity appropriate to a student's career and educational interests. Internships are supervised by faculty members and require periodic student/faculty meetings. Course is repeatable for credit.

P: jr st.

Fall and Spring.

ECON 498. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. A student wishing to study or conduct research in an area not represented in available scheduled courses should develop a preliminary proposal and seek the sponsorship of a faculty member. The student's advisor can direct him or her to instructors with appropriate interests. A written report or equivalent is required for evaluation, and a short title describing the program must be sent early in the semester to the registrar for entry on the student's transcript. Course is repeatable for credit.

P: fr or so st with cum gpa > or = 2.50; or jr or sr st with cum gpa > or = 2.00.

Fall and Spring.

ECON 499. Travel Course. 1-6 Credits.

Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.

P: cons of instr & prior trip arr & financial deposit.

Education (EDUC)

Courses

EDUC 198. First Year Seminar. 3 Credits.

First Year Seminar, topics vary.

Reserved for New Incoming Freshman.

EDUC 203. Environmental Education in K-12 Schools. 2 Credits.

Philosophies, teaching/learning processes, and resources for environmental education. Focus on hands-on/minds-on activities and multidisciplinary environmental education theory and practice; examination of ways to apply learning to future teaching roles in and out of the classroom.

P: Adm to teacher educ and Educ 361

Fall and Spring.

EDUC 206. Culturally Responsive Teaching and Learning. 3 Credits.

Overview of causes, effects of racism, sexism, and other systems of oppression and advantage in U.S. society and its institutions; study of Wisconsin First Nations' histories, cultures, sovereignty, and contemporary issues; examination of multiple racial, cultural communities through lens of education; and application of culturally responsive perspectives in future educational practice.

Fall and Spring.

EDUC 208. Concepts, Issues, and Field Experience in Education. 3 Credits.

This course teaches the practical skills and dispositions needed to effectively work with children, teachers, staff and administrators in a K-12 setting. Through extensive field work, students learn the necessary behaviors needed to develop successful relationships with 6th through 12th graders, and experience early classroom involvement and individual interactions. This course is designed to introduce new and informed ways of thinking about teaching and learning. The class requires 35 hours of service in area public schools, reliable transportation needed.

P: Caregiver background check and TB test required

Fall and Spring.

EDUC 209. Phuture Phoenix Service Learning. 1-3 Credits.

This course teaches the practical skills and dispositions needed to effectively work with children, teachers, staff and administration in a K-12 setting. Through extensive field work, students learn the necessary behaviors needed to develop successful relationships with 6th through 12th graders, and experience early classroom involvement and individual interactions. This course is designed as a continuation of EDUC 208; Phuture Phoenix Field Experience and will expand the student's way of thinking about teaching and learning. Students will participate in 1, 2 or 3 components of the overall experience which will define the credit hours earned. Course is repeatable for credit; may be taken 6 times for a total of 6 credits.

P: EDUC 208, Phuture Phoenix Field Experience and instructor approval; Caregiver background check and TB test required
Fall and Spring.

EDUC 281. Conceptual Foundations of Elementary Mathematics I. 3 Credits.

Foundations of mathematics, particularly those concepts common to the mathematics curriculum of elementary schools. Explores the processes of abstraction, symbolic representation, notational manipulation and modeling in all arithmetic contexts; examines non-arithmetic topics such as geometry, probability, statistics, algebra, and programming concepts.

Fall and Spring.

EDUC 282. Conceptual Foundations of Elementary Mathematics II. 3 Credits.

Foundations of mathematics, particularly those concepts common to the mathematics curriculum of elementary schools. Explores the processes of abstraction, symbolic representation, notational manipulation and modeling in all arithmetic contexts; examines non-arithmetic topics such as geometry, probability, statistics, algebra, and programming concepts. May not be taken on a pass/no credit basis.

P: Full admission to the Education program, EDUC 281 (or concurrent) and concurrent enrollment with EDUC 324
Fall and Spring.

EDUC 290. Introduction to Educational Inquiry. 3 Credits.

An intensive exploration of educational theories, teaching methodologies, and other critical practices required to be an effective educator. This course is accompanied by a field practicum course, EDUC 291.

P: Departmental Approval required; concurrent enrollment with EDUC 291; and caregiver background check and TB test required
Fall and Spring.

EDUC 291. Educational Inquiry Field Practicum. 3 Credits.

This course provides an opportunity to extend theoretical learning by examining and implementing it in the field practicum. This course is accompanied by a lecture course, EDUC 290.

P: Departmental Approval required; concurrent enrollment with EDUC 290; caregiver background check and TB test required.
Fall and Spring.

EDUC 295. Special Topics. 1-3 Credits.

Course is repeatable for credit if topics differ.

EDUC 298. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. A student wishing to study or conduct research in an area not represented in available scheduled courses should develop a preliminary proposal and seek the sponsorship of a faculty member. The student's advisor can direct him or her to instructors with appropriate interests. EDUC 299. Travel Course. 1-6 Credits.

Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.

P: cons of instr & prior trip arr & financial deposit.

EDUC 302. Teaching Social Studies in Elementary and Middle Schools. 3 Credits.

Addresses social studies standards, assessments, curriculum content, and instructional strategies including concepts, classroom environment, scope and sequence and other forces influencing the social studies program.

P: adm to teacher educ and Educ 361.

Fall and Spring.

EDUC 304. Teaching Music in the Elementary and Middle Schools. 3 Credits.

Identification of children's musical needs; materials and methods to assist classroom teachers in meeting these needs; includes practical experience with basic elements of music for the classroom teacher's competency and self-confidence.

P: adm to teacher educ and Educ 361.

Fall and Spring.

EDUC 307. Teaching Reading in the Elementary and Middle Schools. 3 Credits.

Teaching methods in developmental reading: nature of the reading process, reading readiness, vocabulary, comprehension and study-skills development. Techniques for diagnosis and instruction of diverse learners.

P: Admission to teacher education and EDUC 361 (or concurrent enrollment); Concurrent enrollment with EDUC 309 and EDUC 421

Fall and Spring.

EDUC 309. Teaching Language Arts in the Elementary and Middle Schools. 3 Credits.

Develops a language arts model, rationale, basic processes and skills and assessment procedures for the language arts classroom.
 P: Admission to teacher education and EDUC 361 (or concurrent enrollment); Concurrent enrollment with EDUC 307 and EDUC 421
 Fall and Spring.

EDUC 310. Teaching Communication Arts in the Middle and Secondary Schools. 3 Credits.

Theoretical and practical considerations in teaching communication arts. Development of a communication arts model, rationale, basic processes and skills, and assessment procedures for the communications arts classroom.
 P: adm to teacher educ and Educ 361 REC: concurrent enrollment in EDUC 351
 Fall Only.

EDUC 311. Teaching World Languages. 3 Credits.

Principles and methods of teaching foreign languages to students of all ages; evaluation of texts and other materials; simulation of planning for one semester's teaching.
 P: adm to teacher educ and EDUC 361 REC: concurrent enrollment with EDUC 351
 Spring Even.

EDUC 312. Teaching Social Studies in the Middle and Secondary Schools. 3 Credits.

Addresses social studies standards, assessments, curriculum content, and instructional strategies including concepts, classroom environment, scope and sequence and other forces influencing the social studies program.
 P: adm to teacher educ and Educ 361 REC: concurrent enrollment with EDUC 351
 Spring.

EDUC 313. Teaching Mathematics in Middle and Secondary Schools. 3 Credits.

Principles, methods and materials for teaching mathematics and computer science; development of mathematical concepts and skills, selection and use of materials, motivation, lesson and unit planning and evaluation.
 P: adm to teacher educ and Educ 361 REC: concurrent enrollment with EDUC 351
 Fall Only.

EDUC 314. Teaching Science in Middle and Secondary Schools. 3 Credits.

The nature of middle and high school science curricula, recent innovations in science teaching, classroom teaching techniques, and evaluation.
 P: adm to teacher educ and Educ 361 REC: concurrent enrollment with EDUC 351
 Fall Only.

EDUC 315. Teaching English as a Second Language. 3 Credits.

Basic methods of teaching English to non-native speakers and the underlying theories from linguistics, psychology, education and sociolinguistics; development and evaluation of lessons for the ESL classroom.
 P: none; REC: one 300 level linguistics cse.
 Fall Only.

EDUC 316. Teaching Art in the Middle and Secondary Schools. 3 Credits.

Methodology, procedures and strategies for teaching art; motivation techniques, preparation of art lessons and lesson plans, evaluation of art learning experiences; creativity, visual awareness and perception techniques; curriculum development in art.
 P: adm to teacher educ; REC: Educ 361.

EDUC 317. Teaching Music in the Middle and Secondary Schools. 3 Credits.

Philosophical and curricular issues in secondary school music; review of secondary school materials and methodologies; developing rehearsal objectives for a performance-oriented music curriculum.
 P: adm to teacher educ; REC: Educ 361.
 Fall Odd.

EDUC 319. Adolescent Literature in Middle and Secondary School Reading. 3 Credits.

Design and content of effective adolescent literature programs; analysis and evaluation of adolescent literature; current practices in literacy curricula; adolescent literature and personal development; literature and social issues.
 P: Admission to Education minor or Candidacy Status
 Spring.

EDUC 324. Teaching Mathematics in the Elementary and Middle Schools. 3 Credits.

Educational research and practices related to methods, materials, evaluation techniques; mathematics curriculum development, implementation and evaluation, teaching mathematical concepts, facts, skills, problem-solving, use of calculators and computers; error patterns and remediation.
 P: adm to teacher educ; EDUC 361 or EDUC 363; concurrent enrollment with EDUC 282
 Fall and Spring.

EDUC 325. Teaching Science in the Elementary and Middle Schools. 3 Credits.

Teaching methods, materials, evaluation techniques, curriculum development, implementation and evaluation in elementary and middle school science concepts, processes and problem-solving; the nature of science, the role of science standard in instruction.
 P: adm to teacher educ and Educ 361.
 Fall and Spring.

EDUC 326. Music, Movement and Core Arts Pedagogy. 3 Credits.

Principles and methods of integrating music, movement and arts instruction with other core subjects in the Elementary and Middle Schools; includes practical experience with basic elements for the classroom teacher's competency and self-confidence.

P: Admission to teacher education and EDUC 361

Fall and Spring.

EDUC 327. Urban Education and Culturally Responsive Pedagogy. 3 Credits.

This course will examine legal and social histories of urban education as well as contemporary policies, and theories relevant to urban education. Within this context, the course will specifically engage key concepts related to culturally responsive pedagogy (CRP) in urban educational settings.

P: EDUC 206

Fall and Spring.

EDUC 333. Curriculum & Assessment in Early Childhood. 3 Credits.

Overview of all early childhood (3-4 yrs) developmental and instructional assessment methods, curriculum and instructional planning based on assessments. This course requires field work.

P: Admission to Education or candidacy status required; TB test and criminal background check OR admission to the Organizational Leadership major Fall Only.

EDUC 334. Teaching General Music in the Elementary and Middle Schools. 3 Credits.

Philosophical and learning theories of music education. Children's developmental and music needs; curriculum development; traditional and contemporary methods and selection of appropriate literature is emphasized.

P: adm to teacher educ and Educ 361 and Music 254

Fall Even.

EDUC 340. Supporting Learning and Behavior in the Classroom. 3 Credits.

Course provides pre-service teachers with an understanding of how students learn in educational contexts. Learning theories reviewed, & learning strategies to enhance learning and prevent/manage behaviors are introduced and applied in direct interaction with a learner. Course may be repeated 2 times for a total of 6 credits.

P: adm to teacher educ or candidate and conc enr! Educ 290.

Fall and Spring.

EDUC 342. Teaching Methods for Diverse Learners. 2 Credits.

A study of instructional methods and materials for teaching diverse learners.

P: adm to teacher educ and Educ 361.

Fall Odd.

EDUC 343. Educational Assessment. 2 Credits.

This course will focus on the study of the principles, procedures, interpretation, and administration of formal and informal student assessment.

P: adm to teacher educ and Educ 361.

Fall Odd.

EDUC 347. Classroom and Behavior Management Strategies. 2 Credits.

This course will address various theories and models for organizing and maintaining an effective classroom as well as strategies for working with individuals and groups.

P: adm to teacher educ and Educ 361.

EDUC 351. Field Project in School Settings. 1 Credit.

Thirty clock hours of direct experience with school children/youth in educational settings, focusing on specific educational projects identified by education faculty, school faculty, and other educators. Fulfills part of the 100-hour pre-student-teaching clinical experience requirement.

P: adm to teacher educ REC: concurrent enrollment in Educ 310, 311, 312, 313, 314, 316 or 317

Fall and Spring.

EDUC 352. Social and Family Influences on Development and Learning. 3 Credits.

This course is designed for future and currently practicing teachers and other professional members of community organizations. The goal is to develop a better understanding of the many social influences in young children's development that lead to success or failure in the early school years (pre K-primary grades). Factors in the lives of young children which lead to positive or negative outcomes in childhood and beyond will be identified; their influence will be explained within such frameworks and approaches as Erikson's theory of psychosocial development and family systems theory. Strategies for helping young children and their families as well as knowledge of community resources will be stressed.

P: Admission to Education or candidacy status required; OR admission to the Organizational Leadership major

Spring.

EDUC 361. Introduction to the Art and Science of Teaching. 3 Credits.

This course provides pre-service teachers with a foundation for understanding the teaching profession and the nature of learners. The course combines both theory and practice in the art and science of teaching.

P: Adm to teacher educ; grade of B or better in EDUC 290, 291 and 340; OR admission to the Organizational Leadership major

Fall and Spring.

EDUC 405. Student Teaching. 6-12 Credits.

Supervised student teaching or internships in a PK-12 classroom at a level corresponding to the license. Offered on a pass/no credit basis only. Additional special course fee required for students exercising options for extra administrative and travel costs. Course is repeatable for credit.

P: Adm to teacher educ.

Fall and Spring.

EDUC 406. Evaluation and Testing in Education. 2-3 Credits.

Techniques for constructing tests and measurement systems; statistical procedures applied to classroom data; monitoring and assessing individual and group learning situations; using and interpreting data from standardized tests.

P: jr st.

Spring Odd.

EDUC 414. Seminar in Student Teaching/Internship. 2 Credits.

This two-credit seminar is intended to provide student teachers and interns with the opportunity to complete Department of Public Instruction certification requirements as well as to provide student teachers and interns with the experience of interacting with and learning from each other. Class meetings will be four all day sessions, either on Saturdays or during the week preceding the start of the University semester and the student teaching/interning experience in the classroom.

P: conc enr in Educ 401, 402, 403, 404 or 405.

Fall and Spring.

EDUC 415. Counseling Role of the Classroom Teacher. 3 Credits.

Specific counseling and guidance skills necessary for guidance effectiveness of the classroom teacher and their implementation in the classroom.

P: adm to teacher educ.

EDUC 416. Principles of Coaching. 2 Credits.

The materials, drills, offenses, and defenses of specific sports gained through the literature of the field, personal interviews and observations, staff lectures and/or conferences.

Fall Only.

EDUC 417. Philosophy of Athletics and Coaching. 2 Credits.

This course is designed to enable students to develop their philosophies of coaching. A thorough examination of the role of athletics in education and/or society is integral. An attempt is made to assure that the prospective coach has objectives that are consistent with our educational systems.

Fall Only.

EDUC 418. Organization and Administration of Athletics. 2 Credits.

This course is designed to encompass the various phases of organizing and administering of an athletics program with application to interscholastic, collegiate and nonacademic environments such as sports clubs and public athletics. This course will focus on real-world leadership issues such as hiring coaches; budget development; retaining officials; recruiting workers for athletics contests; booster club coordination; and supervision of coaches and athletics.

Spring.

EDUC 419. Field Experience in Coaching. 2 Credits.

Culminates study and preparation for practical coaching experience. Participation in practice, competitive and other coaching experiences under the supervision of an experienced cooperation coach. Student coach maintains daily log and consults with and is observed by CCP adviser.

P: EDUC 416

Spring.

EDUC 420. Workshop in Economics Education. 1-3 Credits.

Workshop is designed to provide information on selected current economic topics and concepts; enables educators to examine new instructional materials and curriculum guides; and develop learning activities appropriate to their instructional responsibilities. Different topics are selected each year. Required for secondary social studies licensure. Topic will be identified by subtitle with each offering. May be repeated for credit.

EDUC 421. Literacy and Language Development in Young Children. 3 Credits.

Acquisition of reading skills and development of language in preschool through primary grades; analysis of instructional and diagnostic strategies for listening and reading comprehension, vocabulary development, word identification strategies and approaches to beginning reading. Field experience required.

P: Admission to teacher education and EDUC 361 (or concurrent enrollment); Concurrent enrollment with EDUC 307 and EDUC 309

Fall and Spring.

EDUC 422. Reading in the Content Areas. 3 Credits.

Practical guidelines for classroom teachers in subject areas: English, social studies, mathematics, science, etc. Suggestions for teaching reading and study skills related to content, specialized and technical vocabulary, dealing effectively with reading problems in the content areas as it relates to the Common Core State Standards (CCSS).

P: adm to teacher educ

Fall and Spring.

EDUC 425. The Early Years of Literacy and Language Development. 3 Credits.

This course will provide a critical examination of how to help children read and write, particularly in ELL contexts. During this course, students will have opportunities to examine a variety of issues related to teaching literacy to young children, including oral/written language development, emergent literacy/biliteracy, reading fluency, reading comprehension, phonics and vocabulary development, early writing acquisition, differentiation of instruction, children's literature, assessment in early literacy, effective reading/writing strategies, parental involvement, and reading-writing connections. Also, different theories and philosophies regarding children's language/literacy development will be addressed. Developmentally appropriate practices will be also integrated throughout the course.

P: Admitted to the BAS-ILS with ECE emphasis program

Fall Only.

EDUC 441. Infants & Toddlers: History, Philosophy & Current Programs. 3 Credits.

Students implement guided observations and learning experiences with infants and toddlers while learning about the historical and current approaches, models and issues.

P: Education Candidacy Status or admission to Education

Fall Only.

EDUC 443. Teaching Kindergarten: Curriculum and Assessment. 3 Credits.

Development of variety of teaching strategies, assessment strategies and resources for appropriate, standards-based learning in full day kindergarten programs. Field Hours are required for this course.

P: Admission to teacher Education or candidacy status required; TB test and criminal background check req

Spring.

EDUC 444. Current Trends in Early Childhood Education. 3 Credits.

This course provides an opportunity to explore the critical trends and issues being debated within the field of Early Childhood Education. Further, this course will examines current trends, historical origins, recurring issues, research findings, and resulting program developments in the field of Early Childhood Education. The topics will be examined through historical and contemporary theory and practices with emphases on themes linked to policy and advocacy. This course examines trends, issues from multiple perspectives, and serves as an impetus to students understanding of the current tensions in the field. Finally, this course will provide students with a deeper understanding of current trends and will also develop the skills needed to critique ideas and issues surrounding early education.

P: ORG LEAD major with Early Childhood Education emphasis OR ELEM EDUC major with Early Childhood to Middle Childhood emphasis OR Candidacy status

Spring.

EDUC 445. Working and Communicating With Families of Young Children. 3 Credits.

Students will learn to work with families from diverse backgrounds in non-intrusive partnership, to communicate successfully using basic Hmong, Spanish and sign, and develop knowledge of resources and referral networks for families.

P: early chldhd tchnng minor.

EDUC 446. Trends in Bilingual Education. 3 Credits.

Designed for pre-service teachers and practicing educators, this course is a comprehensive approach to the current trends in Bilingual Education (Spanish/English) that bridges pedagogical theory and practice. Students will be introduced to essential concepts and theories, including effective teaching methodologies, curriculum design and assessment tools. This course will help students develop a sociocultural perspective about the contexts and realities of bilingual learners.

Fall Only.

EDUC 452. Principles of Middle Level Education. 3 Credits.

Provides students with an overview of middle level students, teachers, schools, and curriculum. Suggests instructional strategies to meet student needs. Addresses issues related to middle level education.

P: adm to teacher educ.

Advanced practice in the writing of poetry, including group criticism of student work. Course is repeatable for credit; may be taken 2 times for a total of 6 credits.

P: ENGLISH 301.

Spring Odd.

ENGLISH 304. Creative Nonfiction Writing. 3 Credits.

Advanced study and workshop of creative nonfiction genres such as memoir, essay, book review, and interview.

P: Jr standing; English 290 or concurrent enrollment; Eng Comp 105 or ACT English score of 32 or higher; REC: English 212 or 301 Fall Odd.

ENGLISH 305. Novel Writing Workshop. 4 Credits.

Advanced study in the development and writing of the novel, including group critique of student work.

P: ENGLISH 212 with a grade of at least a B; WF 105 (or ACT of 32). REC: ENGLISH 301 Fall Even.

ENGLISH 306. Novel Revision Workshop. 4 Credits.

Revision, structuring, development, and marketing of a 50,000+ word novel draft, including group critique of student work.

P: ENGLISH 305 or permission of instructor; Note: All students must enter this class with a completed novel draft of at least 50,000 words. REC: ENGLISH 212 Spring Odd.

ENGLISH 310. Topics in Game Writing. 3 Credits.

Advanced study and workshop of digital and analog genres incorporating the structural and formal elements of game design, including individual and group criticism of student work. Topics may include digital writing, interactive literature, transmedia work, collaborative worldbuilding, and more. Course is repeatable for credit if topics differ; may be taken 2 times for a total of 6 credits.

P: ENGLISH 212 or INFO SCI major or DPH major.

ENGLISH 312. Topics in Creative Writing. 3 Credits.

Study and writing of a single topic in creative writing (for example: fairytales, flash fiction, graphic narrative, playwriting, or screenwriting), including individual and group criticism of original student materials in workshop context. Course is repeatable for credit if topics differ; may be taken 2 times for a total of 6 credits.

P: Junior standing; WF105 or ACT score of 32 or higher. REC: ENGLISH 212.

ENGLISH 315. The British Novel. 3 Credits.

Survey of British novels and their adaptations, spinoffs, and fan culture from the genre's beginnings through the present day. Includes study of both significant and cult novels by a diverse array of British authors, such as Jane Austen, James Hogg, Oscar Wilde, Jeanette Winterson, Caryl Phillips, Sarah Waters, Monica Ali, and Zadie Smith.

P: English 290 or concurrent enrollment, Jr st. Fall Only.

ENGLISH 320. Major Drama. 3 Credits.

Study of one or more British, Irish or American dramatists and dramatic works. Course is repeatable for credit if topics differ; may be taken 2 times for a total of 6 credits.

P: English 290 or concurrent enrollment, Jr st. Fall Odd.

ENGLISH 322. Major Poetry. 3 Credits.

Significant non-dramatic poetry from England, Ireland, and/or America. Course is repeatable for credit if topics differ; may be taken 2 times for a total of 6 credits.

P: English 290 or concurrent enrollment, Jr st. Fall Only.

ENGLISH 323. Topics in Literary Criticism. 3 Credits.

In-depth examination of one or more topics, issues, or approaches in literary criticism or theory. May be repeated for credit when a different topic is studied.

P: jr st and English 290, or concurrent enrollment Fall Odd.

ENGLISH 324. Sheepshead Review Practicum. 3 Credits.

Hands-on experience in the production of the Sheepshead Review, UW-GB's journal of the arts, from selecting submissions to editing the finished product. Projects include soliciting manuscripts and researching the literary market. Course is repeatable for credit; may be taken 2 times for a total of 6 credits.

P: None. REC: English 212 Fall and Spring.

ENGLISH 326. Topics in Publishing. 3 Credits.

Specialized study of a single topic publishing and publications history, such as Meddling Editors, The Book Arts, Russian Print Culture, or #WeNeedDiverseBooks. Repeatable for credit if topics differ; may be taken 2 times for a total of 6 credits.

P: English 290 or Hum Stud 200 Spring Even.

ENGLISH 331. Major American Prose Fiction. 3 Credits.

Study of American prose fiction including examples of novels, short stories and satire; includes works by such authors as Melville, Twain, Fitzgerald, Hemingway, Wright and Bellow. Course is repeatable for credit if topics differ.

P: English 290 or concurrent enrollment, Jr st.

Spring.

ENGLISH 333. Literary Themes. 3 Credits.

Explores a single theme such as fantasy, war, revolution, love or alienation through the literature of one or several nations. Course is repeatable for credit if topics differ; may be taken 3 times for a total of 9 credits.

P: Junior standing and English 290 or concurrent enrollment

Spring.

ENGLISH 335. Literary Eras. 3 Credits.

Studies the works of a number of writers in relation to their time; includes poetry, prose and drama. Course is repeatable for credit if topics differ.

P: English 290 or concurrent enrollment, Jr st.

Fall Only.

ENGLISH 336. American Ethnic Literature. 3 Credits.

The study of literature which examines the experience of ethnic groups in America, such as African, Asian, Hispanic, and Jewish Americans, and American Indians. Course is repeatable for credit if topics differ; may be taken 2 times for a total of 6 credits.

P: ENGLISH 290 or concurrent enrollment, Jr st.

Spring.

ENGLISH 338. World Literatures. 3 Credits.

A study of selected works from world literatures. A variable content course. Course is repeatable for credit if topics differ; may be taken 2 times for a total of 6 credits.

P: English 290 or concurrent enrollment, Jr st.

Spring.

ENGLISH 340. History of the English Language. 3 Credits.

The origins, development, and cultural background of pronunciation and spelling, grammar, vocabulary, meaning and usage in Old, Middle, and Modern English, including contemporary English dialects.

P: none; REC: Hum Stud 160.

Spring Odd.

ENGLISH 344. African American Literature. 3 Credits.

Study of African American literature, exploring the aesthetic dimensions and cultural contexts of poetry, fiction, drama, and essays. Course is not repeatable for credit.

P: ENGLISH 290 or concurrent enrollment, Jr st.

Fall Even.

ENGLISH 345. LGBTQ Literature. 3 Credits.

This course examines the experiences and perspectives of LGBTQ people through works of literature, including, potentially, the study of poetry, short stories, novels, plays, cinema, music, biographies, coded texts, popular culture, and political essays. Course is repeatable for credit if topics differ; may be taken 2 times for a total of 6 credits.

Fall Odd.

ENGLISH 364. Literary Topics. 3 Credits.

The study of topics, through literature, with a focus on individual and social values. Topics may include subjects (i.e., the natural environment, calamities), genres (i.e., memoirs, detective novels), and adaptations (i.e., Shakespeare and opera). May be repeated for credit when content is different.

P: jr st.

ENGLISH 400. English Capstone. 3 Credits.

This course explores a topic in creative writing, literature, and/or editing and publishing from an interdisciplinary perspective and engages students with both literary and local communities.

P: English 290; Senior standing

Fall Only.

ENGLISH 424. Book Editing Practicum. 3 Credits.

Practical, hands-on experience editing and producing book-length texts. Depending on course topic, texts may be digital editions or print; skills may include copyediting, developmental editing, digital encoding, annotation, book design, layout, binding, trimming, budgeting, and/or marketing. Course is repeatable for credit if topics differ; may be taken 2 times for a total of 6 credits.

P: English 290, or a declared emphasis in Digital and Public Humanities.

ENGLISH 431. Shakespeare. 3 Credits.

Study of a representative selection of Shakespeare's poetry and plays, including comedies, tragedies and histories.

P: English 290 or concurrent enrollment, Jr st.

Fall Only.

ENGLISH 436. Major Author(s). 3 Credits.

Study of one or more important writers in British, Irish, or American literature. Course is repeatable for credit if topics differ; may be taken 2 times for a total of 6 credits.

P: English 290 or concurrent enrollment, Jr st.

Spring Even.

ENGLISH 478. Honors in the Major. 3 Credits.

Honors in the Major is designed to recognize student excellence within interdisciplinary and disciplinary academic programs.

P: min 3.50 all cses req for major and min gpa 3.75 all UL cses req for major.

Fall and Spring.

ENGLISH 495. Teaching Assistantship. 1-6 Credits.

The student and supervising teacher must prepare a statement that identifies the course with which the assistantship will happen, objectives for the assistantship, and expectations in order to fulfill the course objectives. Students are not eligible to receive credit in both the course they assist the instructor with and the teaching assistantship in the same semester. Typically student has previously taken the course prior to enrollment in the assistantship. Course is repeatable for credit.

Fall and Spring.

ENGLISH 497. Internship. 1-12 Credits.

Supervised practical experience in an organization or activity appropriate to a student's career and educational interests. Internships are supervised by faculty members and require periodic student/faculty meetings. Course is repeatable for credit.

P: jr st.

Fall and Spring.

ENGLISH 498. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. A student wishing to study or conduct research in an area not represented in available scheduled courses should develop a preliminary proposal and seek the sponsorship of a faculty member. The student's advisor can direct him or her to instructors with appropriate interests. A written report or equivalent is required for evaluation, and a short title describing the program must be sent early in the semester to the registrar for entry on the student's transcript. Course is repeatable for credit.

P: fr or so st with cum gpa > or = 2.50; or jr or sr st with cum gpa > or = 2.00.

Fall and Spring.

ENGLISH 499. Travel Course. 1-6 Credits.

Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.

P: cons of instr & prior trip arr & financial deposit.

Engineering (ENGR)

Courses

ENGR 104. Engineering Graphics. 1 Credit.

This course introduces students to the creation of 2D engineering drawings using AutoCAD software. Topics covered include line types, drawing sheet layouts, sketching, orthographic projections, section views, isometric drawing, dimensioning, tolerances, and threads and fasteners.

P: MATH 101 with a C or higher OR WPT-MFND score >465 and WPT-AALG score >525, and declared major in Mechanical Engineering.

Fall Only.

ENGR 120. Electrical Circuits I. 3 Credits.

This course uses theory, laboratory investigation, and circuit simulation software to introduce basic electrical and circuit analysis principles. Emphasis is placed on direct current (DC) circuits containing voltage and current sources and resistor networks in series, parallel, and series-parallel configurations. This course also introduces the concepts of electric and magnetic fields in the context of capacitors and inductors and their transient responses in DC circuits. A section on basic alternating current (AC) resistive circuits with sinusoidal sources is included.

P: MATH 104 with a C or higher, and declared major in Electrical Engineering Technology or Electrical Engineering or Mechanical Engineering.

Spring.

ENGR 121. Electrical Circuits I Lab. 1 Credit.

This course is a laboratory course based on ENGR 120 Electrical Circuits I. In this course, both simulation and implementation of DC circuits will be conducted.

P: MATH 104 with a C or higher, ENGR 120 with a C or higher or concurrent enrollment, and declared major in Electrical Engineering Technology or Electrical Engineering or Mechanical Engineering.

Spring.

ENGR 198. First Year Seminar. 3 Credits.

First Year Seminar, topics vary.
Reserved for New Incoming Freshman
Fall Only.

ENGR 201. Engineering Materials. 2 Credits.

This course covers the basic behavior and processing of engineering materials, including metals, ceramics, plastics, and alloys. Phase behavior of alloys, response to applied loads, crystalline and noncrystalline behavior are included.
P: ET 206 with a C or higher.
Fall Only.

ENGR 202. An Introduction to Smart Cities. 3 Credits.

It is anticipated that in the near future a significant portion of world population will live in cities. Cities of the future need to be smart, sustainable, and efficient. This course introduces students to the concept of Smart Cities and explains the technologies, infrastructure, transportation, healthcare systems, and security that must be considered in economic and sustainable development policies. Case studies of a diverse selection of present day smart cities are included to demonstrate the aspects of smart cities in the present and future.
Spring.

ENGR 204. Programming for Engineers. 2 Credits.

This course introduces students to the fundamental principles of programming for solving engineering problems and familiarizes students with the process of computational thinking and translation of real life engineering to computational problems. Programming languages covered include MATLAB and Python.
P: MATH 202 with a C or higher, and declared Mechanical Engineering major or Mechanical Engineering Technology major.
Spring.

ENGR 210. Electrical Circuits II. 3 Credits.

This course deals with the fundamentals of alternating current (AC) circuits including theories, analyses, and design of AC circuits and their applications. This course should be useful in building the knowledge foundation for several future courses on electrical and electronic engineering.
P: ENGR 120 with a C or higher, ENGR 121 with a C or higher, and declared major in Electrical Engineering Technology or Electrical Engineering.
Fall Only.

ENGR 211. Electrical Circuits II Lab. 1 Credit.

This course is a laboratory course based on ENGR 210 Electrical Circuits 2. In this course, both simulation and implementation of alternating current (AC) circuits will be conducted.
P: ENGR 121 with a C or higher, ENGR 210 with a C or higher or concurrent enrollment, and declared major in Electrical Engineering Technology or Electrical Engineering.
Fall Only.

ENGR 213. Mechanics I. 3 Credits.

Elementary vector operations, resultant of two- and three-dimensional force systems, centroid, hydrostatic forces, equilibrium of trusses and frames, laws of friction and impending motion, moments of inertia, virtual work, stability.
P: MATH 202 with a C or higher and declared major in either Mechanical Engineering or Mechanical Engineering Technology
Fall Only.

ENGR 214. Mechanics II. 3 Credits.

Displacement, velocity and acceleration components, kinematics of particles using rectilinear and curvilinear coordinates, relative motion, solution and plane motion of rigid bodies, work and potential energy of particles and rigid bodies, linear and angular impulse and momentum, central force motion.
P: ENGR 213
Spring.

ENGR 216. Basic Manufacturing Processes. 3 Credits.

This course introduces machining, stamping, casting, forming, and joining of materials. It covers basic machine processes use to form materials to desired specifications and includes manufacturing of materials, heat treatment, foundry work, and shaping processes.
P: ENGR 201 with a C or higher, and declared Mechanical Engineering Technology major or Mechanical Engineering major
Spring.

ENGR 220. Mechanics of Materials. 3 Credits.

This course teaches how to design and analyze simple structures for predetermined strength and deformation requirements. Topics include theory of stress-strain; Hooke's law; analysis of stresses and deformations in bodies loaded by axial, torsional, bending, and combined loads; and analysis of statically indeterminate systems.
P: ENGR 213 with a C or higher; Major in Mechanical Engineering Technology or Mechanical Engineering
Spring.

ENGR 221. Mechanics of Materials Lab. 1 Credit.

This lab teaches students an applied analysis of the distribution of forces in static structures; analysis of axial, torsional, and bending stresses; and loading analysis of systems.
P: ENGR 220 or concurrent enrollment
Spring.

ENGR 222. Electronic Devices. 3 Credits.

This course introduces semiconductor materials and manipulation to create several types of basic electronic devices such as diodes, bipolar junction transistors, field effect transistors, operational amplifiers and their circuit models for the design and analysis of electronic circuits.

P: ENGR 210 with a C or higher, and ENGR 211 with a C or higher

Spring.

ENGR 223. Electronic Devices Lab. 1 Credit.

In this course students will perform experiments to verify practically the theories and concepts learned in the Electronic Devices course.

P: ENGR 222 with a C or higher OR concurrent enrollment

Spring.

ENGR 224. Electrical Codes, Safety, and Standards. 2 Credits.

This course provides an interpretive survey of various codes, safety procedures, and standards as applied to the electrical construction industry. These include discussions on the National Electrical Code (NEC) and related safety organizations and standards guidelines, for instance, OSHA, IEEE, IEC, ISA, ANSI, and UL. Topics also include an overview of electrical wiring, switches and receptacles, metallic and non-metallic sheathed cables, light fixtures, equipment wiring, and conduits. This course also emphasizes electrical safety procedures and up-to-date electrical codes. The National Electrical Safety Code (NESC) would also be introduced.

P: ENGR 120 with a C or higher, ENGR 121 with a C or higher, and declared major in Electrical Engineering Technology or Electrical Engineering

Spring.

ENGR 236. Technical Writing. 3 Credits.

This course will prepare students to be competent technical writers, both for the scientific community and the general public. Students will learn how to construct well researched and organized papers and lab reports that meet proper grammar guidelines. This will include appropriate use of figures and tables in technical communications. Students will also learn how to write technical directions for assembly and use of equipment.

P: Declared major in Environmental Engineering Technology or Electrical Engineering Technology or Mechanical Engineering Technology or Electrical Engineering or Mechanical Engineering or Computer Science.

Fall and Spring.

ENGR 260. Introduction to Engineering Ethics. 3 Credits.

This course presents a philosophical examination of the nature of engineering practice and applied technology. The fundamental philosophy of ethics will be covered with application specific to engineering practice. The course will consider how the societal functions of engineers and applications of technology relate to basic ethical and intellectual values, what ethical obligations are implied by the uses and creation of technology, and what ethical duties engineers have in the practice of their careers. Case studies will be used to illustrate concepts.

ENGR 298. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. A student wishing to study or conduct research in an area not represented in available scheduled courses should develop a preliminary proposal and seek the sponsorship of a faculty member. The student's advisor can direct him or her to instructors with appropriate interests. A written report or equivalent is required for evaluation, and a short title describing the program must be sent early in the semester to the registrar for entry on the student's transcript.

P: fr or so st with cum gpa \geq 2.50; or jr or sr st with cum gpa \geq 2.00.

Fall and Spring.

ENGR 308. Electrical and Electronic Circuits. 3 Credits.

This course provides an introduction to DC and AC electrical circuit analysis, electronic devices and circuits, transducers, electric machines, and power transmission. This course includes both lecture and lab.

P: PHYSICS 202 with a C or higher OR Concurrent enrollment, AND declared Mechanical Engineering Technology major OR declared Mechanical Engineering major.

Fall Only.

ENGR 310. Digital Logic Design. 3 Credits.

This course introduces digital electronics, the operation of logic gates, and the theory of combination logic circuits, programmable logic devices, Karnaugh mapping, encoders, decoders, multiplexers, register and counter, A/D and D/A converters and timer circuits. Introduction to transistor level design of digital circuits.

P: ENGR 222 with a C or higher, and ENGR 223 with a C or higher

Fall Only.

ENGR 311. Digital Logic Design Lab. 1 Credit.

In this course students will perform experiments to verify practically the theories and concepts learned in the Digital Logic Design course.

P: ENGR 310 with a C or higher OR concurrent enrollment

Fall Only.

ENGR 312. Engineering Measurements. 2 Credits.

This course teaches students instrumentation and techniques for measurement of mechanical phenomena. It includes generalized measurement systems, characteristics of dynamic signals, calibration, recording systems, error and statistical analysis.

P: ENGR 308 with a C or higher OR concurrent enrollment, and ENGR 326 with a C or higher

Spring.

ENGR 320. Energy Conversion. 3 Credits.

Electromechanical energy conversion and operating principles of electric machines such as induction machines, synchronous machines, direct current machines, and special machines.

P: ENGR 210 with a C or higher, and ENGR 211 with a C or higher
Spring.

ENGR 321. Energy Conversion Lab. 1 Credit.

In this course students will perform experiments to verify practically the theories and concepts learned in the Energy Conversion course.

P: ENGR 320 with a C or higher OR concurrent enrollment
Spring.

ENGR 322. Engineering Measurements Lab. 1 Credit.

This course introduces students to the laboratory analysis of Engineering Measurements including instrumentation and measurement systems, calibration, error and statistical methods applied to engineering processes.

P: ENGR 312 with at least a C or concurrent enrollment
Spring.

ENGR 324. Engineering Thermodynamics. 3 Credits.

This course teaches student engineering applications of thermodynamics including the first and second laws, behavior of condensable and non-condensable substances, analysis of open and closed systems, equations of state, and power and refrigeration cycles.

P: PHYSICS 202 with a C or higher, ET 206 or CHEM 211, CHEM 212, CHEM 213, and CHEM 214 with a C or higher; declared major in Mechanical Engineering or Mechanical Engineering Technology
Spring.

ENGR 326. Numerical Methods. 3 Credits.

This course teaches students applied numerical analysis for linear and non-linear engineering problems; systems of linear equations, non-linear equations, eigen value problems, and optimization techniques; approximate numerical integration and differentiation; developing numerical methods; and solving for initial and boundary value problems. The course includes both a lecture and a lab.

P: MATH 305 with a C or higher OR concurrent enrollment, MATH 209 with a C or higher, and ENGR 204 with a C or higher
Fall Only.

ENGR 328. Microcontrollers and Programmable Logic Controllers. 3 Credits.

This course introduces embedded computer systems and mid-range micro-controller peripherals, including electric motor control components, using assembly and C programming. PLC topics such as troubleshooting, timers, counters, sequencers, data move, math, and analog input and output are covered. Ladder logic programming is also introduced.

P: ET 142 with a C or higher, and ENGR 310 with a C or higher
Spring.

ENGR 329. Microcontrollers and Programmable Logic Controllers Lab. 1 Credit.

In this course students will perform experiments to verify practically the theories and concepts learned in the Microcontrollers and PLCs course.

P: ENGR 328 with a C or higher OR concurrent enrollment
Spring.

ENGR 334. Industrial Decision Processes. 3 Credits.

Industrial decision processes, or operations research, is an applied science that deals with quantitative decision making, usually involving the allocation and control of limited resources. Its focus is using advanced analytical methods for industrial decision making via mathematical optimization and statistical analysis. This course will provide students with the tools and concepts to analyze real world problems in terms of economics and risk.

P: MATH 104 with a C or better or higher level math placement and junior standing. REC: MATH 260 or other introductory statistics course
Spring.

ENGR 336. Fluids. 3 Credits.

This course provides an introduction to fluid properties, fluid statics, and fluid dynamics; potential flow; dimensional analysis; closed conduits and external flow; boundary-layer theory; compressible flows; and turbomachinery.

P: ENGR 214 with a C or higher, MATH 209 with a C or higher, and MATH 305 with a C or higher
Fall Only.

ENGR 337. Fluids Lab. 1 Credit.

This laboratory course introduces students to the experimental analysis of Fluid Dynamics concepts including measurement of fluid properties, applications of Bernoulli's equation, and fluid power systems.

P: ENGR 336 with a C or higher or concurrent enrollment
Fall Only.

ENGR 340. Analysis of Dynamic Systems. 3 Credits.

This course introduces students to mathematical modeling and analysis of dynamic systems with mechanical, thermal, and fluid elements. Topics include time and frequency domain solutions, linearization techniques, state space modeling and solutions.

P: ENGR 204 with a C or higher, ENGR 214 with a C or higher, MATH 209 with a C or higher, and MATH 305 with a C or higher
Spring.

ENGR 342. Signals and Systems. 3 Credits.

This course provides an introduction to analysis techniques for continuous-time and discrete-time signals and typical model systems. Topics include signals and systems definitions and properties as well as signal processing techniques and applications. Signals and systems representations and applications to circuit analysis will also be performed using MATLAB software package.

P: MATH 203 with a C or higher, ENGR 210 with a C or higher, and declared major in Electrical Engineering
Fall Only.

ENGR 343. Signals and Systems Lab. 1 Credit.

This course provides a laboratory session for the analysis techniques for continuous-time and discrete-time signals and typical model systems.

P: ENGR 342 with a C or higher OR concurrent enrollment
Fall Only.

ENGR 344. Mechanical Vibration. 3 Credits.

Mechanical structures and systems are susceptible to vibrations, i.e. periodic changes in the physical state. Vibrations can both be a hindrance and a benefit to machines. This course studies about modeling and analyzing single and multiple degrees of freedom systems. Vibrations of machine elements. Design vibration isolation systems. Balance rotating machinery. Random excitation and response of mechanical structures. Students will utilize basic MATLAB skills to solve problems related to vibrations. Students who completes this course should have a clear understanding of vibrations and modeling of mechanical systems. They will analyze free and forced vibrations and will develop mathematical techniques to model and design mechanical systems.

P: MATH 305 with a C or higher or concurrent enrollment, MATH 209 with a C or higher, and ENGR 214 with a C or higher
Fall Only.

ENGR 346. Electrical Power Systems. 3 Credits.

This course covers characteristics of three phase power configurations and utility systems interconnections from power generation through distribution systems, including renewable energy sources, transmission lines, utility grid, device coordination, metering, protective relays, fuses, breakers, and fault circuit interrupting.

P: ENGR 320 with a C or higher
Spring.

ENGR 348. Electromagnetic Fields and Applications. 3 Credits.

This course introduces electromagnetic vector quantities and vector operations in different coordinate systems; electric field concepts; potential, dielectrics, magnetic fields, magnetic properties; Maxwell's equations and electromagnetic waves.

P: MATH 203 with a C or higher, ENGR 210 with a C or higher, ENGR 211 with a C or higher, and declared major in Electrical Engineering
Fall Only.

ENGR 402. Smart Cities: Engineering the Future. 3 Credits.

Cities are now a major hub of human populations and in the near future a majority of the world's population will live in cities. To meet growth needs, future cities must be engineering to be smart, sustainable, and efficient. This course characterizes features of smart cities, particularly the role of engineering and technology in the design of infrastructure, transportation, health care, and the security and privacy required in smart systems. Case studies will be used to assess and analyze the economics, policy making, and sustainability of smart city design.

P: MATH 104 or higher with at least a C or graduate standing. REC: ENV SCI 102 or ENV SCI 260 or ET 101 or ENGR 198
Fall and Spring.

ENGR 408. Finite Element Analysis. 3 Credits.

Applying introductory concepts of finite element methods like direct stiffness, energy and/or weighted residual methods in analytically solving linear and nonlinear structural and thermal problems. Introduces common finite element programs used in academia and industry. Formulate 1D, 2D and 3D elements models. Comparison of exact solutions with approximate finite element predictions

P: ET 207 with a C or higher, and ENGR 220 with a C or higher
Fall Only.

ENGR 412. Communications Systems. 3 Credits.

This course presents the major concepts necessary to understand the data communications field. The principles of data communication technologies, transmission media, interfaces, channel capacity, error control, flow control, multiplexing, synchronization, circuit switching, and packet switching are the main focus of this course. The course presents the communication systems in terms of their physical and data link layers and then touches upon some selected topics on communications systems and standards. Finally, it is anticipated that introductions to a few selected and special topics in the emerging fields of data communication and networking would also be presented in this course.

P: ENGR 342 with a C or higher
Fall Only.

ENGR 414. Power System Analysis and Protection. 3 Credits.

Electrical power flow analysis, short-circuit analysis, symmetrical and unsymmetrical fault analysis, transient stability analysis, economic load dispatch, and general technical problems of electric power systems.

P: ENGR 346 with a C or higher
Fall Only.

ENGR 420. Machine Component Design I. 3 Credits.

Detailed design and selection of machine components such as shafts, fasteners, springs, and gears. Analysis of stresses and deformation of the machine components under combined static and dynamic loads, stress concentrations, and fatigue.

P: ENGR 220 with a C or higher

Fall Only.

ENGR 422. Machine Component Design II. 3 Credits.

Design of advanced machine elements such as bearings, gears, brakes, clutches, flywheels, and flexible mechanical elements. Application of mechanics, materials and machine components principles and methods to design mechanical devices and assemblies.

P: ENGR 420 with a C or higher

Spring.

ENGR 426. Wireless Communications. 3 Credits.

This course presents the main concepts to understand the principles of wireless communications systems. The introductory concepts of wireless communications systems, radio wave propagation, channel models and capacity analysis, as well as the performance of wireless communications systems are the main focus of this course. This course should build upon the backgrounds on communications systems and further the knowledge towards wireless communications fields. This course would also include some emerging topics in the field of wireless communications. Therefore, this course should be useful to students who are or would be pursuing careers in the wireless communications and networking fields.

P: ET 350 with a C or higher OR ENGR 412 with a C or higher

Spring Even.

ENGR 428. Wireless Networks. 3 Credits.

This course presents the main concepts to understand the principles of wireless networks. The introductory concepts of wireless networks, wireless transmission techniques, wireless network topologies, routing, and advanced topics in the fields of wireless and cellular communication networks are the main focus of this course. This course should build upon the backgrounds on communications systems and further the knowledge towards data and wireless networks fields. This course would also include some advanced topics in the field of emerging wireless networks. Therefore, this course should be useful to students who are or would be pursuing careers in the wireless communications and networking fields.

P: ET 350 with a C or higher OR ENGR 412 with a C or higher

Spring Odd.

ENGR 430. Heat Transfer. 3 Credits.

This course teaches students fundamental concepts of steady-state and transient conduction, convection, and radiation. It also includes an introduction to heat exchanger principles and applications.

P: ENGR 324 with a C or higher, MATH 209 with a C or higher, and MATH 305 with a C or higher

Spring.

ENGR 431. Thermal Lab. 1 Credit.

This laboratory course includes thermodynamic experiments such as gas laws and internal combustion engines, and heat transfer experiments on conduction, convection and radiation.

P: ENGR 430 with a C or higher or concurrent enrollment

Spring.

ENGR 432. Automatic Controls. 3 Credits.

This combined lecture and lab course gives students an introduction to feedback control system concepts; mathematical modeling of mechanical, hydraulic, electro-mechanical, and servo systems; feedback system characteristics and performance; stability; design; and compensation of control systems.

P: ENGR 308 with a C or higher, and ENGR 340 with a C or higher

Fall Only.

ENGR 434. Power Electronics. 3 Credits.

This course covers the fundamental concepts of power electronics, characteristics of static power semiconductor devices (BJT, MOSFET, IGBT, Thyristors), AC/DC power converters: uncontrolled and controlled rectifiers (single phase and three phase), dual converter, AC/AC power converters: phase-controlled converters (single phase and three phase), AC switch, cycloconverter. DC/DC converters: choppers (step down and step up), switching regulators (buck, boost, buck-boost), DC/AC converters: single phase and three phase inverters, and various power control applications.

P: ENGR 310 with a C or higher

Spring.

ENGR 438. Microprocessors and Embedded Systems. 3 Credits.

This course will provide an introduction to microprocessor and embedded systems. Basic instructions, features, and architecture of a typical microprocessor system will be studied in this course. Topics on microprocessor programming and assembly language programming will be included. Finally, applications of microprocessors and embedded systems will be studied.

P: ENGR 328 with a C or higher

Spring.

ENGR 460. Senior Design. 3 Credits.

Senior design is the mechanical engineering synthesis course in which students complete a senior design process that includes project proposal, design definition, design analysis, design completion, oral presentation, and a written report.

P: Senior standing in Mechanical Engineering major or Mechanical Engineering Technology major
Spring.

ENGR 462. Senior Design Project. 3 Credits.

This is the electrical engineering synthesis course in which students complete a capstone design process that includes project proposal, design definition, design analysis, design completion, oral presentation, and a written report.

P: Senior standing in Electrical Engineering
Fall Only.

ENGR 478. Honors in the Major. 3 Credits.

Honors in the Major is designed to recognize student excellence within interdisciplinary and disciplinary academic programs.

P: min 3.50 all cses req for major and min gpa 3.75 all UL cses req for major.

ENGR 493. Special Topics in Electrical Engineering. 3 Credits.

This course introduces special topics in the field of Electrical Engineering. The topic of the course will be decided by the Electrical Engineering faculty and approved by the Engineering disciplinary Chair prior to being offered.

P: Junior or Senior standing in Electrical Engineering or Electrical Engineering Technology.

ENGR 494. Co-op. 1-2 Credits.

Participation in a full-time position at a host organization providing direct, on-the-job experience with professionals already successful in the selected field. The co-op will be in a position closely related to a professional career associated with the major. Students must complete at least two (2) co-op credits during the fall or spring semester and one (1) credit in the summer to be considered full-time status. Course is repeatable for credit. No more than 6 credits may be used to meet requirements for a major and no more than 3 credits may be used to meet requirements for a minor; may vary by academic department.

P: Junior standing and minimum 2.0 GPA in major emphasis (Dept. will monitor GPA req.).

ENGR 495. Teaching Assistantship. 1-6 Credits.

The student and supervising teacher must prepare a statement that identifies the course with which the assistantship will happen, objectives for the assistantship, and expectations in order to fulfill the course objectives. Students are not eligible to receive credit in both the course they assist the instructor with and the teaching assistantship in the same semester. Typically student has previously taken the course prior to enrollment in the assistantship. Course is repeatable for credit.

Fall and Spring.

ENGR 497. Internship. 1-12 Credits.

Supervised practical experience in an organization or activity appropriate to a student's career and educational interests. Internships are supervised by faculty members and require periodic student/faculty meetings. Course is repeatable for credit.

ENGR 498. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. A student wishing to study or conduct research in an area not represented in available scheduled courses should develop a preliminary proposal and seek the sponsorship of a faculty member. The student's advisor can direct him or her to instructors with appropriate interests. A written report or equivalent is required for evaluation, and a short title describing the program must be sent early in the semester to the registrar for entry on the student's transcript. Course is repeatable for credit.

P: fr or so st with cum gpa > or = 2.50; or jr or sr st with cum gpa > or = 2.00.

Fall and Spring.

Entrepreneurship (ENTRP)

Courses

ENTRP 298. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. A student wishing to study or conduct research in an area not represented in available scheduled courses should develop a preliminary proposal and seek the sponsorship of a faculty member. The student's advisor can direct him or her to instructors with appropriate interests. A written report or equivalent is required for evaluation, and a short title describing the program must be sent early in the semester to the registrar for entry on the student's transcript. Course is repeatable for credit.

P: fr or so st with cum gpa > or = 2.50; or jr or sr st with cum gpa > or = 2.00.

ENTRP 371. e-Entrepreneurship and Digital Management. 3 Credits.

This course provides an overview of how to create new business, capture new markets, and operate businesses virtually in today's digital era. In addition to topics related to e-marketing, idea generation, online peer networks, innovation, social media, feasibility, and e-business models, the course delves into managing people and businesses in the digital era by discussing topics such as online leadership, managing virtual teams, digital knowledge management, and online communication.

P: Sophomore status; Bus Adm major or minor or Acctg major or minor or Entrepreneurship Certificate or ONLINE Majors of: Integrative Leadership/Organizational Leadership (BA & BAS) with a Business Administration emphasis or Business Administration minor
Fall and Spring.

ENTRP 373. Entrepreneurial Finance. 3 Credits.

This course introduces the undergraduate student to the entrepreneurial finance topics of self-funding, friendly funding, seed funding, microlending and microlenders, debt financing, equity financing and other nonbank financing sources, sources and uses of funds, startup financial statement development and projections, debt and equity term sheets, valuations, and starting the bookkeeping process.

P: Junior status; ENTRP 371; satisfaction of mathematical competency requirement; Bus Adm major or minor or Acctg major or minor or Entrepreneurship Certificate.
Fall Only.

ENTRP 481. Small Business Management & Family Entrepreneurship. 3 Credits.

This course focuses on topics in small business management, family business, and family entrepreneurship. These include: buying (into), growing, and selling or exiting a small business and family business; self-employment, employees, and contractors; microbusiness topics; hiring, training, and employee development in small and family businesses; finance and accounting functions in small and family businesses; intellectual property and forms of business ownership; family entrepreneurship strategies; and franchising strategies.

P: Junior status and an overall minimum GPA of 2.0; Accounting, Business Administration, Finance, HR Management, Management, Marketing major or minor or ONLINE Majors of: Integrative Leadership/Organizational Leadership (BA & BAS) with a Bus Adm emphasis
Fall and Spring.

ENTRP 485. New Venture Acceleration. 3 Credits.

In this course, students will be developing real high growth-oriented businesses based on an identified opportunity in the market. Topics include high growth-oriented firms and technology-based firms, business model design, customer development and acquisition, value proposition development, minimum viable product development, and skills to present well to equity investors.

P: Junior status; ENTRP 371 and ENTRP 373; Bus Adm major or minor or Acctg major or minor or Entrepreneurship Certificate.
Spring.

ENTRP 495. Teaching Assistantship. 1-6 Credits.

The student and supervising teacher must prepare a statement that identifies the course with which the assistantship will happen, objectives for the assistantship, and expectations in order to fulfill the course objectives. Students are not eligible to receive credit in both the course they assist the instructor with and the teaching assistantship in the same semester. Typically student has previously taken the course prior to enrollment in the assistantship. Course is repeatable for credit.

Fall and Spring.

ENTRP 496. Project/Research Assistantship. 1-6 Credits.

The student must prepare a research proposal, and both parties should identify the research arrangement and how the student will complete the work to fulfill the course objectives within the assigned term.

Fall and Spring.

ENTRP 497. Internship. 1-12 Credits.

Supervised practical experience in an organization or activity appropriate to a student's career and educational interests. Internships are supervised by faculty members and require periodic student/faculty meetings. Course is repeatable for credit.

ENTRP 498. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. A student wishing to study or conduct research in an area not represented in available scheduled courses should develop a preliminary proposal and seek the sponsorship of a faculty member. The student's advisor can direct him or her to instructors with appropriate interests. A written report or equivalent is required for evaluation, and a short title describing the program must be sent early in the semester to the registrar for entry on the student's transcript. Course is repeatable for credit.

P: fr or so st with cum gpa > = 2.50; or jr or sr st with cum gpa > or = 2.00.

Fall and Spring.

ENTRP 499. Travel Course. 1-6 Credits.

Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.

P: cons of instr & prior trip arr & financial deposit.

Environmental Science (ENV SCI)

Courses

ENV SCI 102. Introduction to Environmental Sciences. 3 Credits.

Examines the interrelationships between people and their biophysical environment, including the atmosphere, water, rocks and soil, and other living organisms. The scientific analysis of nature and the social and political issues of natural resource use.

Fall and Spring.

ENV SCI 103. Introduction to Environmental Sciences Lab. 1 Credit.

Laboratory course to accompany ENV SCI 102

P: ENV SCI 102.

ENV SCI 198. First Year Seminar. 3 Credits.

Reserved for New Incoming Freshman.

ENV SCI 260. Energy and Society. 3 Credits.

The issues relating energy and society rather than energy technology per se: global energy flows; sources of energy; energy-related problems, policy and conservation; energy growth; future scenarios.

Fall and Spring.

ENV SCI 299. Travel Course. 1-6 Credits.

Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.

P: cons of instr & prior trip arr & financial deposit.

ENV SCI 301. Radioactivity: Past, Present, and Future. 3 Credits.

Radioactive isotopes play a significant role in many aspects of the natural and human environments. People are affected throughout their lives by natural and anthropogenic isotopes at local, national, and global scales. From radon in houses and radium in local drinking water supplies to fallout from Chernobyl, humans are directly impacted through health, economic, and technological pathways.

REC: HS chemistry or earth science, or Geosci 102 with at least a C grade

Fall Only.

ENV SCI 303. Environmental Sustainability. 3 Credits.

Principles of environmental sustainability rooted in interdisciplinary and systems perspectives; sustainability of our natural resource system; natural chemical, physical and biological systems which affect and influence sustainable practices; politics and economics of environmental sustainability.

P: None. REC: Env Sci 102

Fall and Spring.

ENV SCI 305. Environmental Systems. 4 Credits.

Physical and chemical aspects of natural environmental processes. The movement, transformation, and fate of materials and contaminants.

P: CHEM 212 with at least a C grade AND GEOSCI 202 with at least a C grade AND MATH 104 or MATH 202 with at least a C grade AND BIOLOGY 201/202 with at least a C grade

Fall and Spring.

ENV SCI 318. Pollution Control. 3 Credits.

Government regulations, manufacturing processes, waste minimization, pollution prevention methods and pollution control techniques of major industries.

P: Chem 212 with at least a C grade.

Fall Only.

ENV SCI 320. The Soil Environment. 4 Credits.

The physical, chemical and biological properties and principals of soils; formation, classification and distribution of major soil orders; function and management of soils in natural, agricultural and urban environments. Includes field and laboratory experiences.

P: CHEM 108 with at least a C grade or CHEM 212 with at least a C grade; REC: GEOSCI 202.

Fall Only.

ENV SCI 323. Pollution Prevention. 3 Credits.

Emphasizes principles of pollution prevention and environmentally conscious products, processes and manufacturing systems. Also addresses post-use product disposal, life cycle analysis, and pollution prevention economics.

P: Env Sci 318 with at least a C grade, OR instructor consent

Spring Odd.

ENV SCI 330. Hydrology. 3 Credits.

Study of the principal elements of the water cycle, including precipitation, runoff, infiltration, evapotranspiration and ground water; applications to water resource projects such as low flow augmentation, flow reregulation, irrigation, public and industrial water supply and flood control.

P: MATH 104 with at least a C or higher math course

Fall Only.

ENV SCI 334. Solid Waste Management. 3 Credits.

This course will focus on technical concepts of solid waste management related to the design and operation of landfills, waste-to-energy systems, composting facilities, recycling facilities, and other emerging waste management technologies.

P: ET 201

Spring.

ENV SCI 335. Water and Waste Water Treatment. 3 Credits.

Water and waste water treatment systems, including both sewage and potable water treatment plants and their associated collection and distribution systems. Study of the unit operations, physical, chemical and biological, used in both systems.

P: GEOSCI 202 with at least a C grade or CHEM 211 with at least a C grade or BIOLOGY 201 & BIOLOGY 202 with at least C grades

Spring.

ENV SCI 336. Environmental Statistics. 3 Credits.

This course emphasizes the principles of data analysis using advanced statistical software (such as R, SAS, etc.). It employs primarily environmental examples to illustrate procedures for elementary statistical analysis, regression, analysis of variance and nonparametric statistics.

P: MATH 260

Fall and Spring.

ENV SCI 337. Environmental GIS. 3 Credits.

This is a project based course where students conduct geospatial data manipulation, analysis and management with a suite of GIS software tools and web-based GIS interfaces. Students will learn about a range of applications of remotely sensed and other geospatial data to natural science problems. Through the course project, students will create a functional GIS to study or model an environmental phenomena or problem.

P: GEOG 250 with at least a C grade. REC: GEOSCI 202

Fall and Spring.

ENV SCI 338. Environmental Modeling. 2 Credits.

This course introduces the fundamental concepts and approaches in dynamic modeling of environmental systems, in which system changes through time are a concern. The course will be focused on the creation, analysis, and interpretation of dynamic models within the framework of systems thinking for exploring a variety of environmental problems. Throughout the course, we will use the STELLA software as a tool to assist us in modeling of environmental systems.

P: MATH 104, MATH 202 or MATH 203

Fall Only.

ENV SCI 339. Scientific Writing. 3 Credits.

This course focuses on key elements of scientific writing, including grammar, attention to audience, and building a logical argument. Students will develop their writing skills through mock grant applications, reports, and journal articles.

Fall and Spring.

ENV SCI 401. Stream Ecology. 4 Credits.

The goal of this course is to develop a profound understanding of the abiotic and biotic processes responsible for shaping the ecosystem in running waters. Focus will be on ecological processes, but nutrient dynamics and fluid mechanics are also important issues as well as the fauna associated to the streambed, mainly macro invertebrates and their ecological role. Theory will be combined with hands on experience providing the student with a tool to manage a stream based on ecological principles.

P: Biology 203

Fall Even.

ENV SCI 403. Limnology. 4 Credits.

Limnology is a broad sub-discipline of ecology that is the study of the structural and functional interrelationships of organisms of inland waters as they are affected by their dynamic physical, chemical and biotic environments. In this course, we will examine the dominant organizing principles and the current conceptual advances in the field of limnology focusing on lakes.

P: Biology 203

Fall Odd.

ENV SCI 415. Solar and Alternate Energy Systems. 3 Credits.

Study of alternate energy systems which may be the important energy sources in the future, such as solar, wind, biomass, fusion, ocean thermal, fuel cells and magneto hydrodynamics.

P: PHYSICS 104 with a C or higher OR PHYSICS 202 with a C or higher OR ENGR 210 with a C or higher or ENGR 308 with a C or higher

Spring.

ENV SCI 424. Hazardous and Toxic Materials. 3 Credits.

The handling, processing, and disposal of materials which have physical, chemical, and biological properties that present hazards to human, animal, and plant life; procedures for worker safety and for compliance with regulations. The metals and nonmetals, carcinogens, radioactive materials, and pathogenic human, animal, and plant wastes.

P: CHEM 212

Spring Odd.

ENV SCI 425. Global Climate Change. 3 Credits.

Examines changes in global climate with emphasis on the processes by which climate change occurs. Focuses on the recent changes in the concentration of atmospheric greenhouse gases and their impact on the earth's global energy budget. Examines the potential environmental impact of a changed climate.

P: Geosci 222 with at least a C grade or Env Sci 102 with at least a C grade.

Spring.

ENV SCI 433. Ground Water: Resources and Regulations. 3 Credits.

An overview of the geology, properties, flow, and pollution of ground water systems. Techniques of aquifer characterization and water quality monitoring are introduced and evaluated. Regulatory and policy approaches to moderate use and ensure adequate high quality supplies of this valuable resource in the future are also reviewed.

P: GEOSCI 202

Fall Even.

ENV SCI 460. Resource Management Strategy. 3 Credits.

Application of the principles of systems analysis to the sustainable use of material and energy resources. Emphasis on use of analytical tools of economics (e.g. costs-benefit, cost-effectiveness, and risk-benefit analysis) and the process of public policy making and implementation.

REC: background in econ and conservation.

Fall and Spring.

ENV SCI 464. Atmospheric Pollution and Abatement. 3 Credits.

This course will provide students an understanding of atmospheric processes and weather patterns and how they affect pollutant transport. Sources, sinks, environmental effects, and abatement technologies for air pollutants will be addressed. Atmospheric reactions that create pollution or deplete stratospheric ozone will be included.

P: CHEM 212 and CHEM 214 and ET 201

Fall Odd.

ENV SCI 467. Capstone in Environmental Science. 4 Credits.

A project-based course in which students address a practical application of scientific and mathematics skills in the environmental sciences. Topics vary.

P: BIOLOGY 306 with at least a C grade or ENV SCI 305 with at least a C grade, and MATH 260 with at least a C grade

Fall and Spring.

ENV SCI 478. Honors in the Major. 3 Credits.

Honors in the Major is designed to recognize student excellence within interdisciplinary and disciplinary academic programs.

P: min 3.50 all cses req for major and min gpa 3.75 all UL cses req for major.

Fall and Spring.

ENV SCI 491. Senior Thesis/Research in Environmental Science. 3-4 Credits.

A project-based capstone experience where individual students address a specific aspect of the environmental sciences through the use of scientific and mathematical skills.

P: BIOLOGY 306 with at least a C grade or ENV SCI 305 with at least a C grade; MATH 260 with at least a C grade; instr consent. REC: BIOLOGY 306 and ENV SCI 305.

Fall and Spring.

ENV SCI 492. Practicum in Environmental Science. 1-4 Credits.

A project-based course in which students address a practical application of scientific and mathematics skills in the environmental sciences. Topics vary. Course is repeatable for credit if topics differ.

P: BIOLOGY 306 with at least a C grade or ENV SCI 305 with at least a C grade, and MATH 260 with at least a C grade

Fall and Spring.

ENV SCI 495. Teaching Assistantship. 1-6 Credits.

The student and supervising teacher must prepare a statement that identifies the course with which the assistantship will happen, objectives for the assistantship, and expectations in order to fulfill the course objectives. Students are not eligible to receive credit in both the course they assist the instructor with and the teaching assistantship in the same semester. Typically student has previously taken the course prior to enrollment in the assistantship. Course is repeatable for credit.

Fall and Spring.

ENV SCI 497. Internship. 1-12 Credits.

Supervised practical experience in an organization or activity appropriate to a student's career and educational interests. Internships are supervised by faculty members and require periodic student/faculty meetings. All internships must be taken P-NC. Course is repeatable for credit.

P: jr st and gpa > or = 2.75 and completion of 3 UL cses in maj or min.

Fall and Spring.

ENV SCI 498. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. A student wishing to study or conduct research in an area not represented in available scheduled courses should develop a preliminary proposal and seek the sponsorship of a faculty member. The student's advisor can direct him or her to instructors with appropriate interests. A written report or equivalent is required for evaluation, and a short title describing the program must be sent early in the semester to the registrar for entry on the student's transcript. Course is repeatable for credit.

P: fr or so st with cum gpa > or = 2.50; or jr or sr st with cum gpa > or = 2.00.

Fall and Spring.

ENV SCI 499. Travel Course. 1-6 Credits.

Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.

P: cons of instr & prior trip arr & financial deposit.

English as a Second Language (ESL)

Courses

ESL 80. Grammar I. 3 Credits.

This course will further students' understanding of English syntax, morphology and structure. Students will focus on productive mastery of verb agreement and tense as well as the syntactic framework of English. Students will learn about dependent and independent clauses and appropriate use of conjunctions to increase confidence using a variety of sentence structures in both oral and written production.

ESL 81. Reading and Vocabulary I. 3 Credits.

This course is designed for students who struggle to read in English, and are not yet confident in their ability to extract important information from a text. In this course we will focus on using contextual clues to create meaning from unfamiliar vocabulary and confusing semantic structures. Students will learn to extract main ideas, gain comfort with a variety of texts including fiction, non-fiction, academic textbooks, news articles, internet search results, etc.

ESL 82. Writing Workshop I. 6 Credits.

This course will focus on moving students from basic, short paragraphs to 5 paragraph essays with topic sentences and supporting details that reinforce well-formed thesis statements. Students will learn about focus, organization and cohesion in their writing, with an emphasis on creating strong arguments that are clearly conveyed with American stylistic conventions.

ESL 83. Listening and Speaking for Everyday Life. 3 Credits.

This course is designed for non-native speakers of English who are seeking to improve their skills for social interactions. A combination of structured and semi-structured production opportunities will help learners to feel confident in everyday interactions. Students will participate in conversations, debates and presentations about current events, cultures around the globe, and many other topics of interest! Opportunities for listening for understanding will be met with a variety of contexts including guest speakers, movies and news clips.

ESL 85. Understanding American Culture. 3 Credits.

Living in a country and among a people who are not your own can prove to be a bit overwhelming and challenging at times. This integrated skills course will focus on cultural adjustment and gaining a better understanding American culture through field experiences, media exposure, readings, and class discussion. Students will grow in their understanding of role of gender and race in America, family life, holidays, leisure activities and a little bit of history, too. Students will emerge from this course with an increased ability to work cross-culturally with partners and in groups as they pursue further study.

ESL 90. Grammar II. 3 Credits.

This course will continue student understanding of advanced grammatical structures. Students will discuss tense and agreement, modals, active/passive tense, subordinate clauses, parallel structure and more. Students will become more effective writers and more confident communicators through this coursework.

ESL 91. Reading & Vocabulary II. 3 Credits.

This course will focus on being able to identify main ideas and details that will enable students to summarize academic texts. Students will build reading fluency and develop techniques to assist them with the reading load of university. These skills include skimming, scanning, asking questions of the text, as well as identifying and defining critical vocabulary.

ESL 92. Writing Workshop II. 6 Credits.

This course will introduce students to the concept of writing as recursive process. Students will understand how to develop a thesis, and how to use that thesis to communicate clearly and effectively using strong supporting details throughout their essays. Students will focus on creating effective transitions that smooth communication and highlight important details. Students exiting this course will understand the importance of proper grammar and spelling for effective communication. The course will culminate in a research paper in which students learn research techniques and gain an understanding of proper citations.

ESL 93. Listening & Note-taking II. 3 Credits.

In this course, students will be exposed to university style lectures and develop strategies for effective note-taking within that setting. In addition, this course will focus on student response time for academic conversations. Students will focus on the ability to hear, comprehend, process and respond in a timely manner when working in academic settings with professors and other students. Enhancing these skills will be crucial to your academic success!.

ESL 94. Advanced Oral Communication. 3 Credits.

This course is designed for students who are preparing to engage in university level academic coursework. Emphasis will be placed on enhancing students' communicative skills in both formal and informal academic settings. We will focus on oral fluency in developing appropriate syntactic and semantic structures as well as accent reduction. Students will learn the importance of stress, rhythm and intonation in the American English accent. Students enrolling in this course should be prepared to take new risks and stretch the limits of what they can do with their English!

Engineering Technology (ET)

Courses

ET 101. Fundamentals of Engineering Technology. 2 Credits.

This course equips students with the tools to be a successful student and practicing engineering technologist. Topics covered include ethics, project management, team work, working with data, creating presentations, engineering design, and an understanding of the engineering technology profession.

P: None
Fall Only.

ET 103. Surveying. 3 Credits.

This course covers fundamental concepts and theory of engineering measurements; adjustment and use of instruments; computations; measurement of distance, difference in elevation, angles, and directions; and route and construction surveys. Applications of probability and statistical analysis of surveying are included.

P: MATH 104 or higher; Major in Environmental Engineering Tech
Fall Only.

ET 105. Fundamentals of Drawing. 3 Credits.

This course equips students with the computer aided design software tools to generate 2D and 3D graphics that meet industry standards.

P: MATH 101 with at least a C grade or WPT-MFND score >465 and WPT-AALG score >525 and a declared major in Mechanical, Electrical, or Environmental Engineering Technology
Fall and Spring.

ET 142. Introduction to Programming. 3 Credits.

This is an introductory course in computer programming using the C++ language. Topics covered include problem solving, algorithms, selected statements, repetition, arrays, functions, and sub-programs. Applications to electrical engineering technology are emphasized.

P: MATH 104 with a C or higher, and declared major in Electrical Engineering Technology or Electrical Engineering.
Spring.

ET 198. First Year Seminar. 3 Credits.

First Year Seminar, topics vary.
Reserved for New Incoming Freshman.

ET 201. Introduction to Environmental Engineering. 3 Credits.

This course is designed to educate students in the principal and practice of air quality management and solid and hazardous waste management. This includes sources of air pollution, health and environmental effects of air pollution, and regulations governing air pollution. For solid waste this includes sources of solid waste, disposal of solid waste, regulations, and health and environmental effects.

P: CHEM 211 and CHEM 213 with a C or higher and Major in Environmental Engineering Tech
Fall Only.

ET 203. Introduction to Water and Waste Water. 3 Credits.

This course provides an overview of water resources, drinking water standards, water quality characteristics, water pollutants, and storm water management. Sampling and laboratory instrument procedures are included with statistical analysis of data to complete lab reports.

P: CHEM 211 and CHEM 213 with a C or higher
Fall Only.

ET 206. Chemistry for Engineers. 4 Credits.

This course will provide engineering students with a background in important concepts and principles of chemistry. Emphasis will be on areas not relevant for an engineering context with practical applications. In addition to the fundamental concepts of atomic structure, solutions, stoichiometry, kinetics, and enthalpy of reactions, the connections between chemistry, physics, and materials science will be investigated.

P: Math 104 or concurrent enrollment or equivalent, and either Mechanical Engineering or Mechanical Engineering Technology or Electrical Engineering Technology or Electrical Engineering major.
Fall Only.

ET 207. Parametric Modeling. 2 Credits.

This course provides skills and knowledge to enhance computer-aided design and solid modeling concepts including; part modeling, assemblies, engineering drawings and sheet metal modeling. Also Introduces kinematics motion and finite element simulation concepts by using the SOLIDWORKS software.

P: MATH 101 with a C or higher OR WPT-MFND score >465 and WPT-AALG score >525, and declared major in Mechanical Engineering or Mechanical Engineering Technology
Fall and Spring.

ET 218. Fluid Mechanics. 3 Credits.

This course covers the theory of fluids including hydrostatics, hydrostatic forces, buoyancy and stability, Bernoulli's equation, pipe flow, open channel flow, drag and lift.

P: PHYSICS 103 with a C or higher OR PHYSICS 201 with a C or higher OR ENGR 213 with a C or higher, and declared major in Environmental Engineering Technology or Mechanical Engineering Technology
Spring.

ET 250. Continuous Signals and Linear Systems. 3 Credits.

This course provides an introduction to signals and systems analysis techniques for continuous-time signals and linear systems. Topics include continuous-time signals and linear systems definitions and properties as well as signal processing techniques and applications. Signals and systems representations and applications to circuit analysis will also be performed using MATLAB.

P: MATH 203 with a C or higher, and declared major in Electrical Engineering Technology
Fall Only.

ET 318. Fluid Power Systems. 3 Credits.

This course covers the concept of fluid power and introduces common hydraulic and pneumatic systems used in engineering applications. Design, analysis, operation, maintenance, and application of these fluid power systems are discussed. Topics also include fluid directional, flow and pressure control.

P: ET 218 with a C or higher
Fall Only.

ET 323. Pollution Prevention. 3 Credits.

Emphasizes principles of pollution prevention and environmentally conscious products, processes and manufacturing systems. Also addresses post-use product disposal, life cycle analysis, and pollution prevention economics.

P: Env Sci 318 with at least a C grade, OR instructor consent
Spring Odd.

ET 324. Motors and Drives. 3 Credits.

This course analyzes selection, set-up, and circuitry associated with AC and DC drives and motors. Topics include DC motor characteristics. AC induction, specialty machine performance and characteristics, stepper motors, servomotors, and three phase power systems are also included.

P: ENGR 308 with a C or higher, and declared major in Mechanical Engineering Technology
Spring.

ET 330. Hydrology. 3 Credits.

Study of the principal elements of the water cycle, including precipitation, runoff, infiltration, evapotranspiration and ground water; applications to water resource projects such as low flow augmentation, flow reregulation, irrigation, public and industrial water supply and flood control.

P: MATH 104 with at least a C or higher math course
Fall Only.

ET 331. Advanced Water and Waste Water Treatment. 3 Credits.

Water and waste water treatment systems, including both sewage and potable water treatment plants and their associated collection and distribution systems. Study of the unit operations, physical, chemical and biological, used in both systems.

P: ET 203
Spring Even.

ET 334. Solid Waste Management. 3 Credits.

This course will focus on technical concepts of solid waste management related to the design and operation of landfills, waste-to-energy systems, composting facilities, recycling facilities, and other emerging waste management technologies.

P: ET 201
Spring.

ET 340. Advanced Programmable Logic Controllers. 3 Credits.

This course covers interfacing programmable logic controllers to communicate with each other in a complete system. Actuators used in typical industrial related processes are explored. Operation and application of electronic instrumentation and control systems are also covered.

P: ENGR 328 with a C or higher, and ENGR 329 with a C or higher
Fall Only.

ET 342. Supervisory Control and Data Acquisition. 3 Credits.

This course uses knowledge acquired from previous courses including embedded controllers and electrical circuit design as it applies to techniques for precision measurements, interpreting measurement data, and using it to control systems. Hands on laboratory experiments are provided to demonstrate and verify the concepts in precision measurement theory as it relates to process measurements and the accuracy of electrical measurements in industry.

P: ENGR 328 with a C or higher
Fall Only.

ET 350. Data Communication and Protocols. 3 Credits.

Concepts needed to understand data, communications, and networking are presented in this course. The principles associated with data communication, transmission media, interfaces, error control, flow control, synchronization, circuit switching, and packet switching are investigated.

P: ET 250 with a C or higher

Spring.

ET 360. Project Management. 3 Credits.

This course presents an overview of project management with an emphasis on engineering projects. Topics include pre-construction planning, project scheduling systems, critical path management, risk and effects analysis, and failure models.

P: Junior standing and either Electrical, Environmental, or Mechanical Engineering Technology major OR junior standing and Mechanical, or Electrical Engineering major

Fall and Spring.

ET 380. Industrial Automation Control. 3 Credits.

This course provides exposure to the technology of automation and control for both discrete and continuous manufacturing industries; architecture of industrial automation systems; introduction to automatic control; fundamentals and programming principles of programmable logic controllers (PLC) and relay logic controllers (RLL).

P: ENGR 216 with a C or higher, and ENGR 308 with a C or higher

Fall Only.

ET 385. Robotics. 3 Credits.

This course introduces the fundamentals of robotics, transformation of coordinate frame, kinematics, dynamic modeling, trajectory generation and control of robots. Will involve robot simulations using MATLAB/Simulink.

P: ENGR 204 with a C or higher, and ENGR 214 with a C or higher

Fall Only.

ET 390. Mechatronics. 3 Credits.

This course provides the knowledge and skills for the design and development of mechanical systems that utilize microcontrollers (dedicated control computers) in order to achieve performance that is not possible with purely mechanical systems, for example: feedback control, automatic acquisition of performance data, adaptive behavior, and interacting with operators (user interface). Students will gain lab-based, hands-on exposure to the design of mechatronic systems including: real-time programming of a microcontroller; selecting sensors and actuators and interfacing them to a microcontroller; and the development and testing of an actual mechatronic system. In addition, students will gain an appreciation for key aspects of mechatronic systems including: sampling rates, noise, interrupts, open and closed-loop control, system integration, and the importance of good documentation.

P: ENGR 204 with a C or higher, ENGR 214 with a C or higher, and ENGR 308 with a C or higher

Spring.

ET 391. GIS. 3 Credits.

This course provides an introduction to Geographic Information Systems and the utilization of spatial data for solving geographic problems. Both theoretical concepts of GIS technology and practical applications of GIS will be studied.

P: ET 101 and ET 105 both with a grade of C or higher

Fall Only.

ET 400. Co-op/Internship in Engineering Technology. 3 Credits.

Co-ops/internships are offered on an individual basis and consist of a program of learning activities planned in consultation with a faculty member and an industry sponsor. A student may also conduct research with sponsorship of an individual faculty member. Course is not repeatable for credit.

P: junior or senior standing; Major in Electrical, Environmental or Mechanical Engineering Tech

Fall and Spring.

ET 405. Applied Thermodynamics. 3 Credits.

This course provides senior level students with an overview of applied thermodynamics. Students will apply basic thermodynamics laws to analyze different cycles and systems, including: Vapor power cycles; Gas power cycles; Internal combustion engines; Refrigeration cycles and air conditioning systems; Combined heat and power (CHP) systems; Waste heat recovery technologies, especially organic Rankine cycles.

P: ENGR 324 with a C or higher

Spring.

ET 410. Capstone Project. 3 Credits.

In this class students form teams and define a technological problem with specifications. After developing project proposals, teams work toward solutions while applying principles of technical design from the curriculum. Each team will deliver a formal presentation and each student will provide a written report upon completion.

P: Senior standing in Environmental Engineering Technology or Electrical Engineering Technology or Mechanical Engineering Technology

Spring.

ET 415. Solar and Alternate Energy Systems. 3 Credits.

Study of alternate energy systems which may be the important energy sources in the future, such as solar, wind, biomass, fusion, ocean thermal, fuel cells and magneto hydrodynamics.

P: PHYSICS 104 with a C or higher OR PHYSICS 202 with a C or higher OR ENGR 210 with a C or higher or ENGR 308 with a C or higher

Spring.

ET 420. Lean Processes. 3 Credits.

This course focuses on the time value of money as well as operating a business using lean manufacturing with the Six Sigma and other operational models. Topics covered include decisions under risk, best alternative using economic models, present worth analysis, rate of return, and cost benefit analysis.

P: ET 101, ET 360 or concurrent enrollment; Major in Environmental Engineering Tech.

ET 424. Hazardous and Toxic Materials. 3 Credits.

The handling, processing, and disposal of materials which have physical, chemical, and biological properties that present hazards to human, animal, and plant life; procedures for worker safety and for compliance with regulations. The metals and nonmetals, carcinogens, radioactive materials, and pathogenic human, animal, and plant wastes.

P: CHEM 212

Spring Odd.

ET 464. Atmospheric Pollution and Abatement. 3 Credits.

This course will provide students an understanding of atmospheric processes and weather patterns and how they affect pollutant transport. Sources, sinks, environmental effects, and abatement technologies for air pollutants will be addressed. Atmospheric reactions that create pollution or deplete stratospheric ozone will be included.

P: CHEM 212 and CHEM 214 and ET 201

Fall Odd.

ET 495. Teaching Assistantship. 1-6 Credits.

The student and supervising teacher must prepare a statement that identifies the course with which the assistantship will happen, objectives for the assistantship, and expectations in order to fulfill the course objectives. Students are not eligible to receive credit in both the course they assist the instructor with and the teaching assistantship in the same semester. Typically student has previously taken the course prior to enrollment in the assistantship. Course is repeatable for credit.

Fall and Spring.

ET 497. Internship. 1-12 Credits.

Supervised practical experience in an organization or activity appropriate to a student's career and educational interests. Internships are supervised by faculty members and require periodic student/faculty meetings. Course is repeatable for credit.

ET 498. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. A student wishing to study or conduct research in an area not represented in available scheduled courses should develop a preliminary proposal and seek the sponsorship of a faculty member. The student's advisor can direct him or her to instructors with appropriate interests. A written report or equivalent is required for evaluation, and a short title describing the program must be sent early in the semester to the registrar for entry on the student's transcript. Course is repeatable for credit.

P: fr or so st with cum gpa > or = 2.50; or jr or sr st with cum gpa > or = 2.00.

Finance (FIN)

Courses

FIN 282. Personal Financial Planning. 3 Credits.

Exploration and functional analysis of consumers' financial needs and problems in our modern and complex society; learning to formulate financial goals, implement and monitor them through specific plans, financial functions such as budgeting, investing, financing, protecting and distributing wealth; philosophies and values of consumers; legal aspects of consumer rights.

Fall and Spring.

FIN 298. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. A student wishing to study or conduct research in an area not represented in available scheduled courses should develop a preliminary proposal and seek the sponsorship of a faculty member. The student's advisor can direct him or her to instructors with appropriate interests. A written report or equivalent is required for evaluation, and a short title describing the program must be sent early in the semester to the registrar for entry on the student's transcript. Course is repeatable for credit.

P: fr or so st with cum gpa > or = 2.50; or jr or sr st with cum gpa > or = 2.00.

FIN 343. Corporation Finance. 3 Credits.

Organization of basic financial management functions and principles for business; management of fixed and working capital; short-term and long-term financial planning through investment and financing decisions; domestic and international money and capital markets; ethical issues relating to business financial management.

P: ACCTG 201

Fall and Spring.

FIN 344. Real Estate Principles. 3 Credits.

Nature of real estate ownership, importance of land contracts, title transfer, and mortgage instruments; real estate valuation, finance and investment; impacts of taxation, insuring, marketing, and laws affecting real estate (not intended to prepare students for real estate licensing examination).

P: FIN 343 and an overall minimum GPA of 2.5

Spring.

FIN 345. Risk Management and Insurance. 3 Credits.

Nature of risks, principal techniques of risk management and the bases for making decisions with respect to the management of personal and business risks.

P: FIN 343 and an overall minimum GPA of 2.5

Fall Only.

FIN 415. Employee Benefits and Retirement Planning. 3 Credits.

Fundamentals of employee benefits and retirement planning. The course includes an examination of anticipated retirement needs and potential qualified and non-qualified options that might be available. Topics include corporate and individual retirement plans, planning strategies to meet client goals, retirement income management, an integrated framework for the analysis of needs and the fulfillment of goals in the workplace.

P: FIN 343 and an overall minimum GPA of 2.5

Fall Only.

FIN 425. Estate and Trust Planning. 3 Credits.

Application of estate planning methodologies and policies to personal financial planning. Studies the legal, tax, financial, and non-financial aspects of this process, and covers topics such as trusts, will, advance medical directives, charitable giving, wealth transfers, and related taxes.

P: FIN 343 and an overall minimum GPA of 2.5

Spring.

FIN 442. Principles of Investment. 3 Credits.

Fundamental concepts, theories, and techniques relating to investing; securities markets, investment vehicles and environments, economic, industry and security analyses, portfolio construction and management; active and passive investment strategies; global investment perspectives and their impacts on investors; blend of facts and theories relating to traditional and modern portfolio approaches; ethics in investment decisions; applied computer-assisted investment decisions.

P: FIN 343 and BUS ADM 220 or MATH 260 or PSYCH 205 and an overall minimum GPA of 2.5

Fall and Spring.

FIN 445. International Financial Management. 3 Credits.

Conceptual framework and applications of financial management decisions of multinational firms in a global setting; survey of the international financial environment; determinants of international portfolio and direct investment capital flows; assessment and management of impacts of foreign exchange and hedging strategies; impacts of international factors on capital budgeting and financial structure decisions; multinational money and capital markets; taxation of international business.

P: FIN 343 and an overall minimum GPA of 2.5

Spring.

FIN 446. Advanced Corporation Finance. 3 Credits.

Short-term and long-term financial decisions under risk and uncertainty; financial analysis planning and control; in-depth coverage of theories and applications of capital structure, cost of capital, dividend policies; working capital management; long-term financing decisions; valuation of mergers and acquisitions; international capital budgeting.

P: FIN 343 and an overall minimum GPA of 2.5

Fall and Spring.

FIN 450. Bank Administration and Management. 3 Credits.

Commercial banking theories and practices from a financial management perspective; operations, administration, overall asset-liability management of commercial banks, including bank services, credit and loan pricing and analysis, investment portfolio problems, profitability, cost control, and capital budgeting and analysis; implications of deregulation or re-regulation on the financial industry.

P: FIN 343 and an overall minimum GPA of 2.5

Fall Only.

FIN 475. Financial Plan Development. 3 Credits.

Synthesize and apply comprehensive financial planning concepts and techniques to simulated or actual clients in areas of household accounting, taxes, investments, risk management, retirement planning and estate planning. Students will prepare comprehensive, professional level personal financial plans.

P: ACCTG 410, FIN 343, FIN 345, FIN 415, FIN 425, and FIN 442 and an overall minimum GPA of 2.5

Spring.

FIN 478. Honors in the Major. 3 Credits.

Honors in the Major is designed to recognize student excellence within interdisciplinary and disciplinary academic programs.

P: min 3.50 all cses req for major and min gpa 3.75 all UL cses req for major.

Fall and Spring.

FIN 495. Teaching Assistantship. 1-6 Credits.

The student and supervising teacher must prepare a statement that identifies the course with which the assistantship will happen, objectives for the assistantship, and expectations in order to fulfill the course objectives. Students are not eligible to receive credit in both the course they assist the instructor with and the teaching assistantship in the same semester. Typically student has previously taken the course prior to enrollment in the assistantship. Course is repeatable for credit.

Fall and Spring.

FIN 496. Project/Research Assistantship. 1-6 Credits.

The student must prepare a research proposal, and both parties should identify the research arrangement and how the student will complete the work to fulfill the course objectives within the assigned term.

P: jr st.

FIN 497. Internship. 1-12 Credits.

Supervised practical experience in an organization or activity appropriate to a student's career and educational interests. Internships are supervised by faculty members and require periodic student/faculty meetings. Course is repeatable for credit.

P: jr st.

Fall and Spring.

FIN 498. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. A student wishing to study or conduct research in an area not represented in available scheduled courses should develop a preliminary proposal and seek the sponsorship of a faculty member. The student's advisor can direct him or her to instructors with appropriate interests. A written report or equivalent is required for evaluation, and a short title describing the program must be sent early in the semester to the registrar for entry on the student's transcript. Course is repeatable for credit.

P: fr or so st with cum gpa > or = 2.50; or jr or sr st with cum gpa > or = 2.00.

First Nations Studies (FNS)

Courses

FNS 198. First Year Seminar. 3 Credits.

Reserved for New Incoming Freshman.

FNS 210. American Indians In Film. 3 Credits.

This course examines how Hollywood films both construct and appropriate images of American Indians. Students will view films beginning with the silent film era and ending with contemporary movies while exploring and challenging common stereotypes of Native people.

FNS 211. Mentoring First Nations Youth. 3 Credits.

In this is a service learning course that places college students in the field in K-8 classrooms as mentors and tutors to First Nations children. The course teaches skills and dispositions to work with children, teachers, staff and administrators in K-8 with an emphasis on First Nations education. Through extensive field work in K-8 classrooms, undergraduates develop successful relationships in the schools, experience early classroom involvement, and interact with youth. The course is unique in its emphasis on indigenous education and working with First Nations youth while learning from tribal Elder teachers.

P: As required to work in WI public schools, students must pass a back ground check and students must pass a TB test.

Fall and Spring.

FNS 224. First Nations and The Sacred. 3 Credits.

This course explores the world views and oral traditions of First Nations people. Students will examine concepts, ideas, accompanying opinion, and practices within the holistic concept of the Sacred.

FNS 225. Introduction to First Nations Studies: The Tribal World. 3 Credits.

This introductory course to First Nations Studies presents the American Indian tribal cultural context through both information and class structure. A core value is personal sovereignty supported by respect, reciprocity, and relationship.

Fall and Spring.

FNS 226. Introduction to First Nations Studies: Social Justice. 3 Credits.

This introductory course in First Nations Studies will examine the impact of European and American political, economic, and social systems upon American Indian nations in the U.S.

Fall and Spring.

FNS 299. Travel Course. 1-6 Credits.

Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.

P: cons of instr & prior trip arr & financial deposit.

FNS 301. Oneida Language I. 3 Credits.

A course on the Oneida language offered with the aid of indigenous speakers. Emphasis varies with student interest. Tools and resources for further independent study are stressed.

Fall and Spring.

FNS 302. Oneida Language II. 3 Credits.

A course on the Oneida language typically offered in the Oneida community with the aid of native speakers. Emphasis varies with student interest. Tools and resources for further independent study are stressed.

P: FNS 301.

Fall and Spring.

FNS 303. Oneida Language III. 3 Credits.

A course on the Oneida language typically offered in the Oneida community with the aid of native speakers. Emphasis varies with student interest. Tools and resources for further independent study are stressed.

P: FNS 302.

Fall and Spring.

FNS 304. Oneida Language IV. 3 Credits.

A course on the Oneida language typically offered in the Oneida community with the aid of native speakers. Emphasis varies with student interest. Tools and resources for further independent study are stressed.

P: FNS 303.

FNS 305. Oneida Language V. 3 Credits.

A course on the Oneida language typically offered in the Oneida community with the aid of native speakers. Emphasis varies with student interest. Tools and resources for further independent study are stressed.

P: FNS 304.

FNS 306. Oneida Language VI. 3 Credits.

A course on the Oneida language typically offered in the Oneida community with the aid of native speakers. Emphasis varies with student interest. Tools and resources for further independent study are stressed.

P: FNS 305.

FNS 360. Women and Gender in First Nations Communities. 3 Credits.

This course examines the traditional and contemporary status of First Nations women. The course focuses on the fluid definitions and constructions of gender identity before and after Euro-American contact, exploring the intersections of racism, sexism, homophobia, colonialism, globalization. Decolonization and resistance are primary themes of the course.

REC: FNS 225, FNS 226 or WOST 241.

FNS 372. Indigenous Nations Oral and Storytelling Traditions. 3 Credits.

Study of the cultural values of Indigenous Nations in North America reflecting the indigenous intellect. Indigenous elder knowledge, story telling methodology, and literature (poetry, and novels) are explored.

P: FNS 225 or 226 or one 300/400 level literature course.

Spring.

FNS 374. Wisconsin First Nations Ethnohistory. 3 Credits.

An in-depth exploration of one First Nation located in Wisconsin: Anishinaabe (Ojibway), Oneida, Menominee, Potawatomi or Mohican. This course explores the culture, history, and contemporary status of one of these nations.

Spring.

FNS 385. First Nations Intellectual Traditions. 3 Credits.

Drawing upon American Indian oral traditions and Elder epistemology, this course will examine the diverse traditional, cultural, spiritual, and political values and world views of American Indian Nations.

P: FNS 225 or FNS 226

Spring Odd.

FNS 391. First Nations Studies Capstone Seminar. 3 Credits.

This course is designed for students who already have a background in American Indian Studies. It is a variable content course which includes such topics as contemporary issues, environmental justice, American Indian law, and repatriation. Course is repeatable for credit; may be taken 2 times for a total of 6 credits.

P: FNS 225 and FNS 226

Spring.

FNS 392. First Nations Justice and Tribal Governments. 3 Credits.

This course explores the pre-contact justice systems and constructions of "justice" among American Indian nations. The impact of colonization upon these structures will be examined as well as the formation and operation of contemporary tribal governing structures.

P: FNS 225 or FNS 226 or DJS 204 or DJS 325

Spring Even.

FNS 393. First Nations and Education Policy. 3 Credits.

Basic background and vocabulary necessary to understand, discuss, and analyze the complex variables and important common denominators that affect Tribal and U.S. citizens, particularly through education policy at the federal/state levels.

P: FNS 225 or 226.

Fall Even.

FNS 399. First Nations Studies Oral Tradition Concentration. 3-12 Credits.

The FNS Oral Tradition Concentration allows students an opportunity to study tribal oral traditional knowledge in a variety of settings including working with American Indian tribal members and Elders.

P: FNS major or minor; FNS 225, 226; Instructor Approval.

Fall and Spring.

FNS 478. Honors in the Major. 3 Credits.

Honors in the Major is designed to recognize student excellence within interdisciplinary and disciplinary academic programs.

P: min 3.50 all cses req for major and min gpa 3.75 all UL cses req for major.

FNS 495. Teaching Assistantship. 1-6 Credits.

The student and supervising teacher must prepare a statement that identifies the course with which the assistantship will happen, objectives for the assistantship, and expectations in order to fulfill the course objectives. Students are not eligible to receive credit in both the course they assist the instructor with and the teaching assistantship in the same semester. Typically student has previously taken the course prior to enrollment in the assistantship. Course is repeatable for credit.

Fall and Spring.

FNS 497. Internship. 1-12 Credits.

Supervised practical experience in an organization or activity appropriate to a student's career and educational interests. Internships are supervised by faculty members and require periodic student/faculty meetings. Course is repeatable for credit.

P: jr st.

Fall and Spring.

FNS 498. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. A student wishing to study or conduct research in an area not represented in available scheduled courses should develop a preliminary proposal and seek the sponsorship of a faculty member. The student's advisor can direct him or her to instructors with appropriate interests. A written report or equivalent is required for evaluation, and a short title describing the program must be sent early in the semester to the registrar for entry on the student's transcript.

P: fr or so st with cum gpa > or = 2.50; or jr or sr st with cum gpa > or = 2.00.

Fall and Spring.

FNS 499. Travel Course. 1-6 Credits.

Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.

P: cons of instr & prior trip arr & financial deposit.

French (FRENCH)

Courses

FRENCH 100. SNC Consortium. 3 Credits.

St. Norbert College course, extended to UWGB students through a consortium agreement.

FRENCH 101. Introduction to the French Language I. 4 Credits.

Development of basic ability in understanding, reading, speaking and writing in French.

Fall Only.

FRENCH 102. Introduction to the French Language II. 4 Credits.

Development of basic ability in understanding, reading, speaking and writing in French.

P: none; REC: 1 yr h.s. or 1 sem college French.

Spring.

FRENCH 200. SNC Consortium. 3 Credits.

St. Norbert College course, extended to UWGB students through a consortium agreement.

FRENCH 201. Intermediate French Language I. 3 Credits.

Further development of the ability to understand, read and speak French.

P: none; REC: 2 yrs h.s. or 2 sem college French.

Fall Only.

FRENCH 202. Intermediate French Language II. 3 Credits.

Further development of the ability to understand, read and speak French.

P: none; REC: 3 yrs h.s. or 3 sem college French.

Spring.

FRENCH 222. Special Topics. 3 Credits.

French 222 is an intermediate-level course meant to serve as an extension of learning that took place in French 202. French 222 has an emphasis on continued language proficiency in French and includes the study of different cultural topics, including literature, film, and other cultural products and practices.

P: FRENCH 202

Fall and Spring.

FRENCH 299. Travel Course. 1-6 Credits.

Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.

P: cons of instr & prior trip arr & financial deposit.

FRENCH 300. SNC Consortium. 3 Credits.

St. Norbert College course, extended to UWGB students through a consortium agreement.

FRENCH 320. Intermediate Composition and Conversation. 3 Credits.

Development of fluency through classroom practice in conversation and composition.

P: none; REC: 4 yrs h.s. or 4 sem college French.

Fall Only.

FRENCH 325. Advanced French Conversation and Composition. 3 Credits.

Continues development of fluency through intensive practice and study of the spoken and written language. Stresses accurate use of grammatical structures and sensitivity to differences in style, tone and levels of language from colloquial to formal.

P: FRENCH 320

Spring.

FRENCH 329. Representative French Authors. 3 Credits.

Important novels, plays, poems, and essays representative of major eras and movements of French society foster appreciation of the language and understanding of the literature and culture. Includes different styles of writing and differing treatment of recurring themes. Offered in the language. May be repeated for credit when different subtitle is studied.

P: FRENCH 320

Spring.

FRENCH 333. Literary Themes. 3 Credits.

Explores a single theme such as fantasy, war, revolution, love, alienation, through the literature of one or many nations. May be repeated for credit when a different theme is studied.

P: FRENCH 320

Fall Odd.

FRENCH 345. Advanced French Grammar and Translation. 3 Credits.

In-depth review and continued study of French grammar, including fundamentals of comparative English-French grammar, and basic principles of translation from French into English and English into French.

P: FRENCH 320

Fall Odd.

FRENCH 346. French Phonetics and Public Speaking. 3 Credits.

Intensive study of French sound system to improve accuracy of pronunciation and intonation. Different accents studies. Intonation patterns needed for different social situations practiced.

P: FRENCH 320

Fall Even.

FRENCH 354. France Today. 3 Credits.

Aspects of French history and traditional customs and values of contemporary French culture, including rural and urban life, industry and commerce, art and music, etc.

P: FRENCH 320

Fall Even.

FRENCH 355. Le Monde Francophone. 3 Credits.

A study of the French-speaking (francophone) world outside of France. Students will become familiar with essential features of the geography, history, and culture of francophone countries on five continents.

P: FRENCH 320

Spring Even.

FRENCH 367. Business French. 3 Credits.

Students read and discuss business articles and correspondence, cultural aspects of business communication. Areas include banking, correspondence, import-export, computers.

P: FRENCH 320

Spring Odd.

FRENCH 478. Honors in the Major. 3 Credits.

Honors in the Major is designed to recognize student excellence within interdisciplinary and disciplinary academic programs.

P: min 3.50 all cses req for major and min gpa 3.75 all UL cses req for major.

Fall and Spring.

FRENCH 495. Teaching Assistantship. 1-6 Credits.

The student and supervising teacher must prepare a statement that identifies the course with which the assistantship will happen, objectives for the assistantship, and expectations in order to fulfill the course objectives. Students are not eligible to receive credit in both the course they assist the instructor with and the teaching assistantship in the same semester. Typically student has previously taken the course prior to enrollment in the assistantship. Course is repeatable for credit.

Fall and Spring.

FRENCH 497. Internship. 1-12 Credits.

Supervised practical experience in an organization or activity appropriate to a student's career and educational interests. Internships are supervised by faculty members and require periodic student/faculty meetings. Course is repeatable for credit.

Fall and Spring.

FRENCH 498. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. A student wishing to study or conduct research in an area not represented in available scheduled courses should develop a preliminary proposal and seek the sponsorship of a faculty member. The student's advisor can direct him or her to instructors with appropriate interests. P: fr or so st with cum gpa > or = 2.50; or jr or sr st with cum gpa > or = 2.00.

Fall and Spring.

FRENCH 499. Travel Course. 1-6 Credits.

Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.

P: cons of instr & prior trip arr & financial deposit.

Geography (GEOG)

Courses

GEOG 102. World Regions and Concepts: A Geographic Analysis. 3 Credits.

Introduction to regional geography, exploring the relationship between physical ecologies and human ecologies. The course covers the regional geographies of the earth's major geographic realms.

Fall Only.

GEOG 198. First Year Seminar. 3 Credits.

First Year Seminar, topics vary.

Reserved for New Incoming Freshman.

GEOG 209. Landscapes of North America. 3 Credits.

A general survey of the characteristics and origins of the major natural/physical regions of North America, with emphasis on national parks and monuments and other public areas. Class work will utilize remotely sensed imagery (aerial and satellite) to analyze each major area. Field Trips may be required.

Spring Even.

GEOG 210. Human Geography and Concepts. 3 Credits.

This course introduces you to some of the major topics and models studied in human geography. Specifically, this course will examine the global patterns of population, culture, economic and political systems, and the interconnectedness at the international, national, and sub-national scales.

Fall Only.

GEOG 211. American Ethnic Minorities. 3 Credits.

The geography of American ethnic minority groups. An introduction to ethnic geography that examines the experience of people of African, Asian, Hispanic, and Native heritage in the United States and Canada. These ethnic minorities are studied using the major themes of cultural geography such as spatial distribution, migration patterns and locational patterns.

GEOG 235. Wisconsin Landscapes and Regions. 3 Credits.

The geography of Wisconsin's natural and cultural landscapes with an emphasis on their sequential development and changing patterns of land use and settlement. Natural resources, population, land utilization, and economic development of the state.

GEOG 250. Introduction to Geographic Information Systems (GIS). 3 Credits.

Computerized Geographic Information Systems (GIS) represent revolutionary software advancement that allow sophisticated information management, analysis and mapping with computer systems. In this class you will learn basic principles for creation and analysis of digital maps, cartographic concepts, and experience an intensive introduction to GIS software (e.g., ArcGIS).

Fall and Spring.

GEOG 299. Travel Course. 1-6 Credits.

Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.

P: cons of instr & prior trip arr & financial deposit.

GEOG 321. Coastal Resources Policy and Management. 3 Credits.

How shall we manage where land and waters meet? This course analyzes the importance of coastal resources, ranging from Wisconsin to the Great Lakes to our Pacific, Atlantic, and Gulf coasts, and addresses how rising water levels and stronger storms combine with increased human pressure to force difficult choices on communities to adapt. Using a resiliency framework, we will study biophysical and human development issues on land development, overuse, risk, and their consequent human, environmental, aesthetic, and nearshore effects; climate change impacts on water levels and storms; and numerous case studies of how communities are changing their policy, planning, and redevelopment strategies to adapt to current and future conditions.

REC: PU EN AF 102

Fall Only.

GEOG 341. Urban Geography. 3 Credits.

The course will focus on the different perspectives within contemporary urban geography and introduce students to social constructions of urban morphology and the interaction between social forces and spatial organization.

Spring.

GEOG 350. GIS in Public and Environmental Policy. 3 Credits.

Uses state-of-the-art software to integrate digitized data maps, transfer data, manage relational data bases, overlay maps, display, query, edit interactive graphics, and geocode addresses. Focus is upon GIS applications tailored to public and environmental policy, e.g., tax base analysis, property mapping, natural resources inventory, crime demography, transportation routing, natural hazards, and emergency management.

P: GEOG 250

Fall and Spring.

GEOG 351. Elements of Cartography. 3 Credits.

Principles of basic cartography, including problem identification and clarification, data collection and analysis, compilation, generalization, and symbolization; presentation of data on medium and large scale maps.

P: sophomore standing

Spring.

GEOG 353. Air Photo Interpretation. 3 Credits.

Techniques for the interpretation of human and natural land use. Wide variety of aerial photo formats and scales are used. Vertical and oblique photos, satellite images, and Internet web sites incorporated into course material.

P: sophomore standing

Fall Only.

GEOG 370. Geography of South America. 3 Credits.

A survey course which will explore the physical features, resources, people, and the political economy of the American southern hemisphere.

Fall Even.

GEOG 450. Advanced Geographic Information Systems. 3 Credits.

Project-based course using ArcGIS. Students define a project, develop a database, analyze spatial data, and develop GIS maps displaying results of their analysis.

P: Geog 350 or Pu En Af 350.

Spring Even.

GEOG 470. Glacial Geology & Landscapes. 3 Credits.

This course explores the extremes in environmental behavior which characterize the last 2.6 million years of Earth's history during the Pleistocene and Holocene Epochs. The course will provide students with the skills necessary to be able to recognize and describe glacial landforms, the materials of which they are composed, and the geologic processes by which they form.

P: Geosci 202 with at least a C grade; REC: Geosci 203.

Fall Even.

GEOG 495. Teaching Assistantship. 1-6 Credits.

The student and supervising teacher must prepare a statement that identifies the course with which the assistantship will happen, objectives for the assistantship, and expectations in order to fulfill the course objectives. Students are not eligible to receive credit in both the course they assist the instructor with and the teaching assistantship in the same semester. Typically student has previously taken the course prior to enrollment in the assistantship. Course is repeatable for credit.

Fall and Spring.

GEOG 497. Internship. 1-12 Credits.

Supervised practical experience in an organization or activity appropriate to a student's career and educational interests. Internships are supervised by faculty members and require periodic student/faculty meetings. Course is repeatable for credit.

P: jr st.

Fall and Spring.

GEOG 498. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. A student wishing to study or conduct research in an area not represented in available scheduled courses should develop a preliminary proposal and seek the sponsorship of a faculty member. The student's advisor can direct him or her to instructors with appropriate interests. A written report or equivalent is required for evaluation, and a short title describing the program must be sent early in the semester to the registrar for entry on the student's transcript.

P: fr or so st with cum gpa > or = 2.50; or jr or sr st with cum gpa > or = 2.00.

Fall and Spring.

GEOG 499. Travel Course. 1-6 Credits.

Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.

P: cons of instr & prior trip arr & financial deposit.

Geoscience (GEOSCI)

Courses

GEOSCI 102. Natural Hazards. 3 Credits.

Explores the dynamic character of the Earth System by characterizing and understanding the causes and consequences of natural hazards. Hazards considered will include earthquakes, tsunamis, volcanic hazards (local, regional, global scales), meteorological hazards (hurricanes, tornadoes, flooding, coastal erosion), and landslides.

Fall and Spring.

GEOSCI 198. First Year Seminar. 3 Credits.

First Year Seminar, topics vary.

Reserved for New Incoming Freshman.

GEOSCI 202. Physical Geology. 4 Credits.

Description and analysis of the geological processes that shape the earth's major internal and external features. Origins, properties and use of the earth's rock and mineral resources. Students will not receive credit for both Geosci 202 and Geosci 102.

Fall and Spring.

GEOSCI 203. Earth System History. 3 Credits.

The physical history of the Earth through geologic time and the attendant evolution of biological organisms; principles governing interpretation of the rock and fossil record; unraveling of events culminating in modern landscape and life forms.

P: Geosci 202 with at least a C grade.

Spring.

GEOSCI 204. Earth System History Laboratory. 1 Credit.

Practical application of geologic principles and techniques to interpretation of Earth history. Introduction to stratigraphic principles, sedimentary environments, and fossil identification.

P: Geosci 203 with at least a C grade or conc enr.

Spring.

GEOSCI 222. Ocean of Air: Weather and Climate. 3 Credits.

Fundamental processes of the atmosphere, the resulting weather and climate, and the effects of the atmosphere on other aspects of the earth's environments and on humans.

Fall and Spring.

GEOSCI 223. Ocean of Air: Weather and Climate Laboratory. 1 Credit.

Laboratory course to accompany GEOSCI 222. Application of physical principles learned in lecture through a combination of data analysis, problem solving, and experimentation.

P: conc enr in GEOSCI 222

Fall and Spring.

GEOSCI 298. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. A student wishing to study or conduct research in an area not represented in available scheduled courses should develop a preliminary proposal and seek the sponsorship of a faculty member. The student's advisor can direct him or her to instructors with appropriate interests. A written report or equivalent is required for evaluation, and a short title describing the program must be sent early in the semester to the registrar for entry on the student's transcript.

P: fr or so st with cum gpa > or = 2.50; or jr or sr st with cum gpa > or = 2.00.

Fall and Spring.

GEOSCI 299. Travel Course. 1-6 Credits.

Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.

P: cons of instr & prior trip arr & financial deposit.

GEOSCI 301. Introduction to Geoscience Field Methods. 2 Credits.

A survey of methods of field investigations including description and measurement of rock sequences, introduction to geological mapping, surveying, and writing geological reports.

P: Geosci 202.

Spring Odd.

GEOSCI 325. Regional Climatology. 3 Credits.

The elements, controls, and classification of climates; the distribution of climate types over the earth; world patterns of climate.

REC: Geosci 222.

Fall Even.

GEOSCI 340. Introduction to Mineralogy & Petrology. 4 Credits.

Explores mineral chemistry and structures, identification, association, and occurrence. Surveys the distribution, chemistry, and mineral associations in relation to tectonic environment to interpret rock forming processes.

P: Geosci 202 with at least a C grade.

Fall Even.

GEOSCI 350. Structural Geology and Geodynamics. 3 Credits.

How do rocks fracture? How do rocks flow? How is heat transmitted from the core to the crust? This class is a survey of the deformation and dynamics of Earth. We will focus on the stress-strain relationship and deformation styles of Earth materials, as well as the transport of heat and mass by Earth processes.

P: GEOSCI 202. REC: MATH 202

Fall Odd.

GEOSCI 402. Sedimentology & Stratigraphy. 3 Credits.

Modern concepts and techniques used to study and interpret the origins and distribution of sediments and sedimentary rocks; principles of biostratigraphy and physical stratigraphy and sedimentology.

P: Geosci 202 with at least a C grade and 203 with at least a C grade.

Fall Odd.

GEOSCI 421. Geoscience Field Trip. 1-3 Credits.

Intensive three or four-day field study tour of the geology, soils, and landscapes of Wisconsin and/or surrounding states. Each offering will focus on a different geological theme and will focus on a specific region. Cost of transportation, guidebook, meals and lodging borne by student. Course is repeatable for credit if topics differ; may be taken 6 times for a total of 9 credits.

P: GEOSCI 202 with at least a C grade OR Consent of the instructor.

Fall and Spring.

GEOSCI 432. Hydrogeology. 3 Credits.

Introduction to the geological and physical principles governing ground water flow. Description of aquifer properties, chemical processes, equation of flow, well hydraulics, and environmental concerns.

P: Geosci 202 with at least a C grade; REC: Env Sci 330 with at least a C grade; Math 202.

Spring.

GEOSCI 450. Ore Deposits. 3 Credits.

This course is a survey of economically important Earth materials. How do ore bodies form? What are they used for? What strategies can we use to extract the ore? Additionally, we will also focus on the environmental impacts from extraction and what can be done as possible remediation strategies.

P: GEOSCI 202. REC: GEOSCI 340

Spring Even.

GEOSCI 470. Glacial Geology & Landscapes. 3 Credits.

This course explores the extremes in environmental behavior which characterize the last 2.6 million years of Earth's history during the Pleistocene and Holocene Epochs. The course will provide students with the skills necessary to be able to recognize and describe glacial landforms, the materials of which they are composed, and the geologic processes by which they form.

P: Geosci 202 with at least a C grade; REC: Geosci 203.

Fall Even.

GEOSCI 478. Honors in the Major. 3 Credits.

Honors in the Major is designed to recognize student excellence within interdisciplinary and disciplinary academic programs.

P: min 3.50 all cses req for major and min gpa 3.75 all UL cses req for major.

GEOSCI 492. Special Topics in Geoscience. 1-4 Credits.

Topics not covered by regular courses, such as geomorphology, geology of Wisconsin, laboratory methods, and others. Offerings of different topics can be repeated for credit.

P: None. REC: ECON 102.

GEOSCI 495. Teaching Assistantship. 1-6 Credits.

The student and supervising teacher must prepare a statement that identifies the course with which the assistantship will happen, objectives for the assistantship, and expectations in order to fulfill the course objectives. Students are not eligible to receive credit in both the course they assist the instructor with and the teaching assistantship in the same semester. Typically student has previously taken the course prior to enrollment in the assistantship. Course is repeatable for credit.

Fall and Spring.

GEOSCI 497. Internship. 1-12 Credits.

Supervised practical experience in an organization or activity appropriate to a student's career and educational interests. Internships are supervised by faculty members and require periodic student/faculty meetings. Course is repeatable for credit.

P: jr st.

Fall and Spring.

GEOSCI 498. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. A student wishing to study or conduct research in an area not represented in available scheduled courses should develop a preliminary proposal and seek the sponsorship of a faculty member. The student's advisor can direct him or her to instructors with appropriate interests. A written report or equivalent is required for evaluation, and a short title describing the program must be sent early in the semester to the registrar for entry on the student's transcript.

P: fr or so st with cum gpa > or = 2.50; or jr or sr st with cum gpa > or = 2.00.

Fall and Spring.

GEOSCI 499. Travel Course. 1-6 Credits.

Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.

P: cons of instr & prior trip arr & financial deposit.

German (GERMAN)

Courses

GERMAN 101. Introduction to the German Language I. 4 Credits.

Development of basic ability in understanding, reading, speaking and writing in German.

Fall Only.

GERMAN 102. Introduction to the German Language II. 4 Credits.

Development of basic ability in understanding, reading, speaking and writing in German.

P: none; REC: 1 yr h.s. or 1 sem college German.

Spring.

GERMAN 201. Intermediate German Language I. 3 Credits.

Further development of the ability to understand, read and speak German.

P: none; REC: 2 yrs h.s. or 2 sem college German.

Fall Only.

GERMAN 202. Intermediate German Language II. 3 Credits.

Further development of the ability to understand, read and speak German.

P: none; REC: 3 yrs h.s. or 3 sem college German.

Spring.

GERMAN 222. Special Topics. 3 Credits.

GERMAN 222 is an intermediate-level course meant to serve as an extension of learning that took place in GERMAN 202. GERMAN 222 has an emphasis on continued language proficiency in German and includes the study of different cultural topics, including literature, film, and other cultural products and practices.

P: GERMAN 202

Fall and Spring.

GERMAN 285. Study Abroad: Germany. 3-15 Credits.

P: cons of instr & prior trip arr & financial deposit.

GERMAN 299. Travel Course. 1-6 Credits.

Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.

P: cons of instr & prior trip arr & financial deposit.

GERMAN 320. Intermediate German Conversation and Composition. 3 Credits.

Development of greater fluency through classroom practice in conversation and composition.

P: none; REC: 4 yrs h.s. or 4 sem college German.

Fall Only.

GERMAN 325. Advanced German Conversation and Composition. 3 Credits.

Continues development of fluency through intensive practice and study of the spoken and written language. Stresses accurate use of grammatical structures and sensitivity to differences in style, tone and levels of language from colloquial to formal.

P: GERMAN 320

Spring.

GERMAN 329. Representative German Authors. 3 Credits.

Important novels, plays, poems, and essays representative of major eras and movements of German society foster appreciation of the language and understanding of the literature and culture. Includes different styles of writing and differing treatment of recurring themes. Offered in the language.

Course is repeatable for credit if topics differ.

P: GERMAN 320

Fall Only.

GERMAN 333. Literary Themes. 3 Credits.

Explores a single theme such as fantasy, war, revolution, love, alienation, through the literature of one or many nations. May be repeated for credit when a different theme is studied.

P: GERMAN 320

Spring Even.

GERMAN 335. Literary Eras. 3 Credits.

Studies the works of a number of writers in relation to their time; includes poetry, prose and drama. May be repeated for credit when a different era is studied.

P: GERMAN 320

Spring Even.

GERMAN 345. Advanced German Grammar. 3 Credits.

This course will assist students in improving their overall language proficiency by focusing on more challenging aspects of German syntax and semantics.

P: GERMAN 320

Fall Odd.

GERMAN 350. Major German Drama. 3 Credits.

Study of German drama either by period or by theme. May be repeated for credit when content is different.

P: GERMAN 320

Spring Odd.

GERMAN 351. Major German Prose Fiction. 3 Credits.

Study of German short story and/or novels either by period or by theme.

P: GERMAN 320

Fall Even.

GERMAN 355. Deutsche Kultur und Landeskunde. 3 Credits.

Expands students' linguistic and cultural proficiency in German through discussion of German history, politics and the arts.

P: GERMAN 320

Spring Even.

GERMAN 357. German Cinema. 3 Credits.

Historical and critical introduction to the work of prominent German filmmakers and to cinematic representations of German culture.

P: None. REC: GERMAN 320

Fall Even.

GERMAN 358. German Politics and Society. 3 Credits.

Students will gain insight into and knowledge of the political and cultural issues confronting Germany, Europe's most populous country and its largest economy. This course will examine political structures and institutions as well as contemporary issues that influence German and European politics.

REC: junior or senior standing

Spring Odd.

GERMAN 420. Business German. 3 Credits.

Examines business culture and practices in the German speaking world. Practical exercises, including specialized vocabulary for telephoning, writing business correspondence and a German CV, are combined with an analysis of German corporate structures, industry, labor, management, banking, marketing and advertising.

P: GERMAN 320

Spring Even.

GERMAN 425. German Translation Studies. 3 Credits.

This course will introduce students to the theory and practice of translating both into and from modern German. Through readings in translation theory and comparative linguistics as well as through group work, students will become aware of the structures and nuances of both languages.

P: GERMAN 320. REC: GERMAN 345

Spring Odd.

GERMAN 478. Honors in the Major. 3 Credits.

Honors in the Major is designed to recognize student excellence within interdisciplinary and disciplinary academic programs.

P: min 3.50 all cses req for major and min gpa 3.75 all UL cses req for major.

Fall and Spring.

GERMAN 485. Study Abroad: Germany. 3-15 Credits.

A semester of study at the University of Kassel in Germany. Students register before departing; upon return, they must submit descriptions of courses taken, evaluations from professors, a formal certificate, and a letter grade.

P: cons of instr & prior trip arr & financial deposit.

Fall and Spring.

GERMAN 495. Teaching Assistantship. 1-6 Credits.

The student and supervising teacher must prepare a statement that identifies the course with which the assistantship will happen, objectives for the assistantship, and expectations in order to fulfill the course objectives. Students are not eligible to receive credit in both the course they assist the instructor with and the teaching assistantship in the same semester. Typically student has previously taken the course prior to enrollment in the assistantship. Course is repeatable for credit.

Fall and Spring.

GERMAN 497. Internship. 1-12 Credits.

Supervised practical experience in an organization or activity appropriate to a student's career and educational interests. Internships are supervised by faculty members and require periodic student/faculty meetings. Course is repeatable for credit.

Fall and Spring.

GERMAN 498. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. A student wishing to study or conduct research in an area not represented in available scheduled courses should develop a preliminary proposal and seek the sponsorship of a faculty member. The student's advisor can direct him or her to instructors with appropriate interests. A written report or equivalent is required for evaluation, and a short title describing the program must be sent early in the semester to the registrar for entry on the student's transcript.

P: fr or so st with cum gpa > or = 2.50; or jr or sr st with cum gpa > or = 2.00.

Fall and Spring.

GERMAN 499. Travel Course. 1-6 Credits.

Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.

P: cons of instr & prior trip arr & financial deposit.

Health Information Mgmt & Tech (HIMT)

Courses

HIMT 300. Survey of Contemporary Computing. 3 Credits.

This course provides a basic overview of contemporary information technology and computers. Topics include computer concepts (e.g., hardware, system architectures, operating systems, etc.), communication technologies, Internet technologies, and data organization/structures. Special emphasis placed on database management systems and data warehousing.

P: HIMT major, Junior standing

Fall and Spring.

HIMT 301. Digital Literacy in Healthcare. 3 Credits.

This course provides an overview of medical clinical workflow, with emphasis on inter-professional electronic documentation and functionalities of the electronic health record (EHR). Through hands-on experience, this course advances the students' understanding of the electronic health record, Health IT policies, data and database management systems in support of the EHR.

Fall and Spring.

HIMT 310. Healthcare Systems and Organizations. 3 Credits.

This course provides an overview of how healthcare and public health are organized and how their services are delivered in the United States (US). Topics to be covered include: public policy (including US health reform initiatives), organization of healthcare systems, components and operation of healthcare organizations including e-health delivery, professional roles and accreditation, legal and regulatory issues including licensure requirements.

P: HIMT major, Junior standing

Fall and Spring.

HIMT 320. Survey of Information Technology in Healthcare. 3 Credits.

Essential healthcare information technologies (HIT) that are used for healthcare information systems (HISs) are examined. Popular HISs include electronic medical record systems (EMRS), the computerized provider order entry systems, telemedicine, telehealth and e-prescribing.

P: HIMT Major; Junior standing

Fall and Spring.

HIMT 330. Healthcare I: Terminology & Body Systems. 3 Credits.

Specific terminology and vocabulary used by workers in healthcare and public health will be examined. Topics include medical terminology that broadly relates to human anatomy and physiology, body systems and diagnosis, including prefixes, suffixes, roots and combined forms. Topics will also include healthcare taxonomies and nomenclatures (e.g. ICD-9-CM, ICD-10, etc.).

P: Biology 201/202 with a C or better or Hum Biol 102 with a C or better; HIMT Major and Junior standing

Fall and Spring.

HIMT 340. Ethical issues, Security Management and Compliance. 3 Credits.

This course introduces three broad subjects: 1) evidence-based medical ethics pertaining to healthcare information management, 2) framework of healthcare information security management including security principles, policies and procedures, security management models, risk assessment, and protection mechanisms, 3) healthcare regulations and compliance with focuses on the legislative systems, policies, and legal environment in the U.S. and the existing health information laws, regulations and standards. Also addressed are the elements and development of compliance programs.

P: HIMT Major; Junior standing

Fall and Spring.

HIMT 345. Programming and Software Development. 3 Credits.

Fundamental concepts of programming using a contemporary data analysis language. Topics include variables, conditional execution, functions and methods, iteration, strings, files, and data structures. Applications will be taken from the Healthcare Information Systems.

P: HIMT 301 or conc enr; HIMT major; Junior standing

Fall Only.

HIMT 350. Statistics for Healthcare. 3 Credits.

This is an introductory course in statistical methods for the health sciences. The course will emphasize the principles of statistical reasoning, underlying assumptions, hypothesis testing, and careful interpretation of results. Some topics covered; major study designs, descriptive statistics, graphical displays of data, probability, confidence intervals and tests for means, differences of means, sample size and power, differences of proportions, chi-square tests for categorical variables, regression, multiple regression, and non-parametric statistics.

P: MATH 101, HIMT major, Junior standing

Fall and Spring.

HIMT 355. Principles of Management for HIMT Professionals. 3 Credits.

This course provides an overview of basic principles involved in management and communication. Topics include basic management principles, communication skills, interpersonal communication competence, negotiation technique, team/consensus building, professional development, and problem solving/decision-making processes.

P: HIMT Major, Junior standing

Fall Only.

HIMT 360. Healthcare II: Survey of Disease & Treatments. 3 Credits.

This course further investigates the topics covered in HIMT 330 Health Care I. Based on each body system the course will further expand into the topics of human disease, human health issues and classification of disease/health issues. Diagnostics, Treatment and Clinical procedures that are currently in practice. In addition, the course will incorporate Pharmacotherapeutic concepts (drugs and therapies to treat/prevent/control human disease/health issues), investigating the variety of drugs used for disease treatment for each body system, this will include the current biologicals that are used for treatment. Topics will include how the drugs and biologicals work, their limitations, and the current diversity of available drugs and biologicals.

P: HIMT 330, HIMT major, Junior standing

Fall and Spring.

HIMT 365. Healthcare Economics. 3 Credits.

Applications of microeconomic theory to analyze the behavior of health and health care markets. Topics will include: supply and demand of health care services, private health insurance markets, government provision of health care services and health insurance, and health care policy.

P: HIMT Major, Junior standing

Fall Only.

HIMT 370. Healthcare Systems: Analysis & Design. 3 Credits.

This is the first course in a two-course sequence that addresses methods and techniques of healthcare information system (IS) analysis and design as performed within the system development life cycle. Included will be techniques for problem definition, requirements gathering, analysis, logical design, selection and evaluation of alternative healthcare information systems solutions from the point of view of the health provider and user. An emphasis is placed on analysis, selection, and evaluation of information systems as they relate to healthcare.

P: HIMT 301, HIMT major, Junior standing

Spring.

HIMT 375. Database Structures and Management Systems. 3 Credits.

Analyze and design databases to support computer-based information systems. Develop and implement relational database management systems using SQL. Topics include: data modeling techniques such as entity-relationship modeling, extended entity-relationship modeling, database constraints, database normalization techniques, and basic and advanced features of database query language SQL, etc.

P: HIMT 345, HIMT major, Junior standing
Spring.

HIMT 380. Healthcare Billing, Coding and Reimbursement. 3 Credits.

This course examines the coding and reimbursement connection; topics include managed care plans, prospective payment systems, Medicare-Medicaid reimbursement, resource-based Relative Value Scale, case mix management, and revenue cycle management.

P: HIMT 330 & HIMT 360, HIMT major, Junior standing
Fall and Spring.

HIMT 400. Healthcare Information and Technology - Data. 3 Credits.

This course explores the sources and data contents of health-care information as well as the proper presentation of it for different usage levels. Topics addressed include: 1) data structure and use of health information (individual, comparative and aggregate), 2) type and content of health record, 3) data quality assessment, 4) secondary data sources, 5) healthcare data sets, 6) Health information archival systems, and 7) National Healthcare Information Infrastructure (NHII). The course will also cover topics in bioinformatics.

P: HIMT 360; HIMT major; Junior standing
Fall and Spring.

HIMT 410. Healthcare Systems: Implementation and Integration. 3 Credits.

Covers the back-end stages of healthcare systems development lifecycle through the procurement route: development of technical design specifications, procurement procedures (RFP, RFQ, vendor evaluation and selection, and contracting), systems configuration and integration, installation, conversion, operation, and maintenance. Pre-installation testing and post-conversion auditing and monitoring will be emphasized to address the upcoming requirements of federal certification of EHR systems.

P: HIMT 301, HIMT 370, HIMT major, Junior standing
Fall and Spring.

HIMT 415. Human Resource Management in Healthcare. 3 Credits.

This course examines the role of HIM staff in managing human resources to facilitate staff recruitment, retention and supervision.

P: HIMT Major, Junior standing
Spring.

HIMT 420. Healthcare Systems: Project Management. 3 Credits.

This course addresses the phenomenal impact information system (IS) projects have had on healthcare delivery. Students learn how healthcare IS projects affect organizations, doctors, patients, and chronic-illness treatments, as well as individuals interested in managing their own healthcare. Concepts and tools for effective healthcare IS project management, process re-engineering and work redesign are introduced. The purpose of this course is to expose students to IS project management activities in healthcare settings. Topics covered include recent healthcare IS project trends, budgeting, scheduling, resource management, scope, risk analysis, and deployment controls. The genesis of healthcare project management is covered using specific cases and examples.

P: HIMT Major, Junior standing
Fall and Spring.

HIMT 425. Data Warehousing and Mining. 3 Credits.

Examine the concept of data warehouse and its effectiveness in supporting strategic decision making. Address the process of creating data warehouse/data-mart solutions from the identification of the enterprise informational and analytical needs to producing business intelligence by extracting information from the data warehouse by using data mining methods and models.

P: HIMT 375; HIMT major; Junior standing
Fall Only.

HIMT 430. Quality Assessment and Improvement. 3 Credits.

This course examines the Quality Assessment and Quality Improvement cycle (Plan, Do, Act, Check) and the role of the HIT/HIM in the process. Tools used in quality and risk management processes will be examined.

P: HIMT 350, HIMT major, Junior standing
Spring.

HIMT 435. Data Communications and Networks in Healthcare. 3 Credits.

This course provides fundamentals of data communications and networking techniques, and examines the linkage of information technology strategies and technological solutions enabling effective communication within and between health care organizations. Major topics include fundamental concepts of data communications and applications, network communication devices, basic technologies of the Local Area Network, Wireless Local Area Network, Wide Area Network, Internet and the Web, the OSI stack, health care information systems standards, and the HIE, RHIN, and the NHIN.

P: HIMT 301, HIMT major, Junior standing
Spring.

HIMT 440. Group Processes, Team Building and Leadership. 3 Credits.

This course introduces students to the necessary group/team processes that are at the root of building, developing, and maintaining medical/healthcare work teams and the effective functioning of such teams. The course also provides an overview of leadership development techniques. Also included is a focus on the uses of various communication technologies in the team building and functioning processes.

P: HIMT Major; Junior standing
Spring.

HIMT 445. Application of Leadership & Management in Healthcare Technology. 3 Credits.

This course assimilates and integrates concepts and applications of management and leadership in the healthcare advancing on the topics covered in HIMT 355, 365 and 415. Topics will include strategic leadership concepts, exploring key factors that impact management and planning, change management, critical organizational behaviors for leadership and management focusing on best practices and organizational accountability and assessment models.

P: HIMT 355, HIMT 365 & HIMT 415; HIMT major; Junior standing
Spring.

HIMT 450. Healthcare Information and Technology - Standards. 3 Credits.

This course will be an introduction to healthcare information technology standards including standards and regulations for documentation, and will cover health information standards. The course will also investigate soft-ware applications and enterprise architecture in health-care and public health organizations.

P: HIMT major; Junior standing
Fall and Spring.

HIMT 489. Pre-Capstone. 1 Credit.

This is a one-credit course that is intended to serve as an orientation for the HIMT 490 Capstone course as well as a credentialing exam prep course. The Pre-Capstone will help you get more comfortable with all that's involved in the Capstone experience. HIMT 489 will also help prepare you for the upcoming credentialing exam(s) that you will be sitting for (in particular, the RHIA and CAHIMS exams). Please look through the content and discover the steps you need to take to be successful. Take special note of the deadlines and requirements for submitting your documents. Those deadlines are very important. This is a Pass/Fail course. It is a pre-requisite for HIMT 490.

P: HIMT Major; Junior standing. REC: Course must be taken in semester just prior to taking HIMT 490
Fall and Spring.

HIMT 490. Capstone. 3 Credits.

This course is capstone course for both tracks of the degree program. Students are required to find an internship site that is related to healthcare and set up a semester long project from which they can gain hands-on experience in the areas of their concentration. Project set-up will be jointly done by the student, site sponsor, and the faculty of this course, whereas internship supervision will be performed by the project supervisor and the course instructor.

P: HIMT 420, HIMT 489; Last semester of program; HIMT Major
Fall and Spring.

HIMT 498. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. A student wishing to study or conduct research in an area not represented in available scheduled courses should develop a preliminary proposal and seek the sponsorship of a faculty member. The student's advisor can direct him or her to instructors with appropriate interests. A written report or equivalent is required for evaluation, and a short title describing the program must be sent early in the semester to the registrar for entry on the student's transcript.

P: HIMT major, Junior standing
Fall and Spring.

History (HISTORY)

Courses

HISTORY 101. Foundations of Western Culture I. 3 Credits.

Comprehensive chronological survey of major events, people, and ideas that have influenced the history, literature, art, and culture of Western Civilization. This course covers ancient civilization through the Renaissance.

Fall and Spring.

HISTORY 102. Foundations of Western Culture II. 3 Credits.

Comprehensive chronological survey of major events, people, and ideas that have influenced the history, literature, art, and culture of Western Civilization. This covers the Renaissance up to the present.

Fall and Spring.

HISTORY 103. World Civilizations I. 3 Credits.

Chronological survey of major events, people, and ideas that have influenced the history, literature, art, and culture of various world civilizations. This course covers the origins of civilization to the Age of Exploration.

Fall and Spring.

HISTORY 104. World Civilizations II. 3 Credits.

Healthcare Management (HLTH MGT)

Courses

HLTH MGT 150. Certified Nursing Assistant (CNA). 3 Credits.

Certified nursing assistants play an important role as members of the comprehensive healthcare team in a variety of medical settings. CNAs are employed in hospitals, long-term care facilities, nursing homes, hospices, community care facilities and as home health aides in patient's homes. In addition to receiving technical skills, students will learn additional concepts necessary to provide excellent person-centered care. The CNA program includes a combination of lectures, laboratory practices and supervised clinical work at a medical care facility. This program is recognized and approved by the Wisconsin Department of Health Services. Upon successful completion of the program, the student is eligible to take the Wisconsin Nursing Assistant Competency Examination.

P: Pass a Caregiver Background Check, documentation of influenza vaccine and negative Tuberculosis test.

HLTH MGT 301. Health Care Systems. 3 Credits.

This course focuses on the organization, delivery, and financing of healthcare in the U.S. It examines both private and public health sectors and effects of government health care policy on the quality of healthcare delivery.

Fall Odd.

HLTH MGT 302. Healthcare Management. 3 Credits.

This course provides an introduction to healthcare management including important issues such as management thinking, cost management, strategic planning, and quality improvement. Case studies will be used to enhance student learning.

Spring Even.

HLTH MGT 401. Healthcare Economics & Policy. 3 Credits.

Overview of the economics that drive healthcare in the United States. Topics include a review of major healthcare systems, basic economic principles, payers of healthcare, relationship of healthcare policy to economics, and healthcare reform.

Fall Even.

HLTH MGT 402. Population Healthcare Management. 3 Credits.

This course examines new requirements for population-oriented health delivery initiatives, and the challenges and opportunities to improve health within and across populations. Topics include determinants of health, sources of population health data, measuring health outcomes, and disease management.

Spring Odd.

HLTH MGT 495. Teaching Assistantship. 1-6 Credits.

The student and supervising teacher must prepare a statement that identifies the course with which the assistantship will happen, objectives for the assistantship, and expectations in order to fulfill the course objectives. Fall and Spring.

HRM 362. Introduction to Human Resource Management. 3 Credits.

Personnel management: human resource planning, recruitment, selection, training, motivation, fringe benefits, salary and wages, labor relations, and performance evaluation.

Fall and Spring.

HRM 460. Employee Development and Training. 3 Credits.

This course provides a detailed look at employee training and development in addition to career management. The goal of training is to improve knowledge, skills, attitudes, and/or behaviors as they relate to employees' current position so that they can perform at a higher level. Employee development is the process of building the skillsets employees need to take on additional responsibilities in their current job and/or receive future promotions. Both processes involve careful consideration of internal and external environmental forces and the mission and vision of the company. The course is designed to demonstrate how training, and development are integrated to support the organization's strategic HRM practices as well as how they relate to other human resource management functions.

P: HRM 362 and an overall minimum GPA of 2.5

Fall Only.

HRM 465. Recruitment and Selection. 3 Credits.

This course provides a detailed look at staffing in organizations, including how organizations plan for their staffing needs, use job analysis to develop job descriptions and specifications, choose whether to recruit internally or externally, choose among job candidates, and use statistical analysis to validate selection criteria. The course examines and analyzes various recruitment methods and selection tools, as well as the theoretical and empirical support for each.

P: HRM 362

Spring.

HRM 466. Employment Law. 3 Credits.

This course provides a detailed look at the law pertaining to human resource management (HRM), including discrimination, occupational health and safety, labor standards, employee information and privacy, negligence, discipline and termination, employment contracts, and collective agreements. Students will learn the substantive law pertaining to HRM, the sources of that law, and how to identify and address legal risks.

P: HRM 362 and an overall minimum GPA of 2.5

Fall Only.

HRM 467. Compensation and Benefits Planning. 3 Credits.

Theories of compensation and work motivation and their impact on various reward systems and the rationale for decisions affecting the selection of benefits.

P: HRM 362

Spring Even.

HRM 468. Employee Relations. 3 Credits.

This course examines the employer-employee relationship including such topics as organizational policies, employee handbooks, handling complaints, resolving conflicts, managing change, managing diversity, interpersonal mistreatment in the workplace, and the impact of globalization on employee relations. Also covered are various aspects of labor relations, or the relationship between management, employees, and labor unions. In addition, this course explores the social sustainability and ethical implications of human resource management including the effects of high-performance work practices on employee well-being.

P: HRM 362

Fall Odd.

HRM 469. Performance Management and Job Analysis. 3 Credits.

This course provides an in-depth examination of performance management, including defining, measuring and evaluating performance and improving performance management systems. Other areas of focus are role of performance appraisal in performance management and methods to improve accuracy and reduce bias in performance appraisal. Students will also learn the methods and process of job analysis as well as how job analysis informs other key HRM functions. Additional topics include job descriptions, job design, job evaluation, and performance feedback. Legal, business case, and ethical implications of performance management and job design are discussed.

P: HRM 362

Fall Only.

HRM 470. Human Resource Management Analytics. 3 Credits.

This course examines how human resource management (HRM) metrics and analytics are used in evidence-based management. Students will learn how to collect, analyze, and interpret data to assess the effectiveness of, and make decisions regarding, HRM functions including recruitment methods, training programs, wellness interventions, retention strategies, and performance management systems. Other key topics include validating selection criteria as predictors of performance, diversity and discrimination analytics, HRM information systems, and HRM consulting.

P: HRM 362; BUS ADM 220 or MATH 260 and overall GPA of 2.5

Spring.

Human Biology (HUM BIOL)

Courses

HUM BIOL 102. Introduction to Human Biology. 3 Credits.

Basic concepts, principles, and processes in human biology; the origin of life, evolution, cells, biochemical processes, physiological systems, genetics and metabolism.

Fall and Spring.

HUM BIOL 116. First Aid and Emergency Care Procedures. 3 Credits.

Student will learn all aspects of first aid training such as victim assessment and treating all types of illnesses and injuries; all skills for Professional Rescuer CPR; dealing with infectious diseases and their transmission.

Fall and Spring.

HUM BIOL 198. First Year Seminar. 3 Credits.

topics vary

Reserved for New Incoming Freshman.

HUM BIOL 200. Professions in Human Biology. 1 Credit.

The overarching goal of the course is to empower students to achieve career goals. Students will learn how to pursue careers effectively in human biology from student mentors, professional advisors, faculty and alumni.

P: Declared Human Biology Major with freshman or sophomore status

Fall and Spring.

HUM BIOL 202. Ethnic Minorities in Science. 3 Credits.

The history and culture of science in the US will be examined, in order to understand what has led to the current under-representation of ethnic minorities in science. The often overlooked contributions of scientists who are members of ethnic minorities will be recognized.

Spring.

HUM BIOL 205. Biotechnology and Human Values. 3 Credits.

Examination of technological developments in biology and medicine, including genetic, behavioral, and organism modification and the moral and ethical concerns raised by such technologies.

P: Hum Biol 102 or Biology 201/202.

Fall and Spring.

HUM BIOL 206. Fertility, Reproduction, and Family Planning. 3 Credits.

Factors that influence reproduction and fertility, i.e., physiological, psychological, social, cultural, and ethical; the methods available for limiting or increasing reproduction; the nature of family planning programs.

P: HUM BIOL 102 or BIOLOGY 201 & BIOLOGY 202

Fall and Spring.

HUM BIOL 208. Scientific Conditioning of the Athlete. 3 Credits.

Principles and techniques of training - including strength, agility, and endurance. Interrelationships between training and athletic participation, principles of physiology of exercise, and general and specific techniques of physical conditioning are studied.

P: Hum Biol 102 with a grade of C or better OR Biology 201/202 with a grade of C or better.

Fall Only.

HUM BIOL 210. Prevention and Treatment of Athletic Injuries. 3 Credits.

This is an introductory course focusing on the basic principles of athletic training (sports medicine). Emphasis will be placed on the role of the athletic trainer in regards to injury prevention, health/injury assessment, and management/rehabilitation of sports related injuries. Content includes history of athletic training, athletic training room procedures, physiology of healing, acute emergency management, and medical referral process. Students learn techniques related to taping, wrapping, splinting, ambulatory aides, and modalities applied to the healing process.

P: Hum Biol 102 with a grade of C or better OR Biology 201/202 with a grade of C or better.

Fall and Spring.

HUM BIOL 215. Personal Health and Wellness. 3 Credits.

Theoretical and practical knowledge about health and wellness, with experiential exercises to heighten awareness of one's own values, attitudes, and abilities toward healthy living.

HUM BIOL 217. Human Disease and Society. 3 Credits.

Impact of diseases in humans. Emphasizes the major diseases, their causes, individual effects, historical significance, and methods of control.
Fall and Spring.

HUM BIOL 221. Anatomy and Physiology I. 4 Credits.

An examination of the structure and function of the human body at the molecular, cellular, tissue, organ, and system levels of organization. The integration of these levels of organization within the human organism is emphasized. This is the first semester of a two-semester sequence.

P: Biology 201/202 with at least a C grade

Fall and Spring.

HUM BIOL 222. Anatomy and Physiology II. 4 Credits.

An examination of the structure and function of the human body at the molecular, cellular, tissue, organ, and system levels of organization. The integration of these levels of organization within the human organism is emphasized. This is the second semester of a two-semester sequence.

P: Hum Biol 221.

HUM BIOL 240. Anatomy and Physiology. 4 Credits.

This course examines the fundamental structure and function of tissues, organs, and systems of the human body.

P: BIOLOGY 201/202 with at least a C grade AND HUM BIOL 241 or concurrent enrollment

Fall and Spring.

HUM BIOL 241. Anatomy and Physiology Lab. 1 Credit.

Laboratory Course that accompanies HUM BIOL 240.

P: HUM BIOL 240 or concurrent enrollment AND CHEM 207 or concurrent enrollment

Fall and Spring.

HUM BIOL 250. Fitness for Life. 3 Credits.

An introductory course pertaining to health related fitness, including its impact on society and the individual. Students will develop and implement a personal fitness program based on current research in the area. The role and value of fitness will be discussed in terms of physical and emotional health, heart disease, longevity, and quality of life.

P: Hum Biol 102.

HUM BIOL 297. Internship. 1-3 Credits.

Supervised practical experience in an organization or activity appropriate to a student's career and educational interests. Internships are supervised by faculty members and require periodic student/faculty meetings. Course is repeatable for credit; may be taken 3 times for a total of 3 credits.

HUM BIOL 299. Travel Course. 1-6 Credits.

Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.

P: cons of instr & prior trip arr & financial deposit.

HUM BIOL 310. Human Genetics. 3 Credits.

The molecular basis of heredity, genetic diseases, and genetic technologies including cloning, genetic testing, and gene therapy will be evaluated.

P: Biology 201/202 with at least a C grade ; Chem 108 or 212 with at least a C grade.

Fall and Spring.

HUM BIOL 315. Cellular and Molecular Neuroscience. 3 Credits.

This course is a study of the cellular and molecular mechanisms underlying nervous system function. Particular emphasis will be paid to the functioning of neurons of the central nervous system. A subset of topics to be covered include ion movements, ion channels, neurotransmitters and receptors, synaptic transmission, integration, synaptic plasticity, and circuits. The complexity of explaining behavior at the cellular level will be illustrated with several examples and applications of material. Primary literature discussions will be utilized as part of the curriculum.

P: BIOLOGY 201 AND either HUM BIOL 240 or PSYCH 203

Fall Only.

HUM BIOL 318. Reproductive Biology. 3 Credits.

Course explains basic reproductive processes with emphasis on the factors, both hormonal and environmental, that affect reproductive functions in mammals; how these processes can be modified to control reproduction.

P: BIOLOGY 202 with at least a C grade and BIOLOGY 203 with at least a C grade; OR HUM BIOL 240 with a C grade or better.

Spring.

HUM BIOL 322. Epidemiology. 3 Credits.

Foundational knowledge of epidemiology, the study of disease in/among populations, and relevant introductory bio-statistical methods and practical applications to public health and biomedical sciences.

REC: BIOLOGY 201 with a grade of C or higher AND BIOLOGY 202 with a grade of C or higher; OR HUM BIOL 202 with a grade of C or higher

Spring.

HUM BIOL 324. The Biology of Women. 3 Credits.

This course will examine the physiology of the adult female body and will address health issues that are unique to or different in women. Emphasis will be placed on the effects of female sex hormones on multiple processes (reproductive, nervous, endocrine, and cardiovascular) in the body.

P: HUM BIOL 102 with at least a C grade or BIOLOGY 201/202 with at least a C grade

Spring.

HUM BIOL 331. Science and Religion: Spirit of Inquiry. 3 Credits.

This course examines the differing world views of science and religion; origins of science in the Judeo-Christian West; sources of conflicts; domains of validity; and of limitations of science and religion.

P: Hum Biol 102 with at least a C grade or Biology 201/202 with at least a C grade; and sophomore status
Spring.

HUM BIOL 333. Principles of Sports Physiology. 3 Credits.

This course emphasizes the applied aspects of (exercise) physiology. Major topics include: use of energy during exercise, principles of training, aerobic training, interval training, strength training, gender and exercise, ergogenic aids, e.g., blood doping, and the impact of environmental conditions, e.g., altitude, on exercise.

P: Hum Biol 240 with at least a C grade
Spring.

HUM BIOL 341. Human Anatomy Laboratory. 1 Credit.

This course involves learning human anatomy and human anatomy dissection techniques using cadavers through the process of dissecting and analyzing human cadaver specimens. Students will learn detailed human anatomy for a specific area of interest by dissecting and identifying anatomical components of that area. In addition, students will learn major significant human anatomy for the entire human body to include muscles, nerves, blood vessels, glands, GI tract and reproductive systems.

P: HUM BIOL 240 AND HUM BIOL 241 AND approval by instructor. REC: HUM BIOL 351, BIOLOGY 340
Fall Only.

HUM BIOL 351. Kinesiology. 4 Credits.

This course provides an in depth study of the human musculoskeletal system as it pertains to movement of the body and/or its parts. There are three major components to this course - anatomy (detailed musculoskeletal anatomy), functional anatomy (understanding bodily movement in light of anatomical structure), and biomechanics (mathematical quantification of bodily movement, forces, etc.)

P: HUM BIOL 240 & HUM BIOL 241 with a grade of C or higher AND CHEM 207 or conc enr
Fall Only.

HUM BIOL 360. Exercise Physiology. 3 Credits.

In this course, students learn the ventilatory, cardiovascular, muscular, hormonal, and metabolic response to (acute) exercise and exercise training.

P: HUM BIOL 240 with a grade of C or higher AND MATH 260 AND concurrent enrollment in HUM BIOL 361
Fall Only.

HUM BIOL 361. Human Physiology Lab - Exercise and Metabolism. 1 Credit.

The laboratory involves measurement, analysis, and interpretation of a variety of physiological parameters that are associated with physical exercise. Students will do experiments designed to assess exercise related changes in heart rate, blood pressure, ventilation, and oxygen consumption. Additionally, students will do assessments on EKG, pulmonary function, body composition and maximal exercise capacity.

P: Concurrent enrollment in Hum Biol 360.
Fall Only.

HUM BIOL 401. Art and Science. 1 Credit.

Examination of art and science as ways of knowing, including discussion of various points of view regarding the differences and similarities between the two.

P: Hum Biol 102 or Biology 201/202 or Biology 203/204
Spring.

HUM BIOL 402. Human Physiology. 3 Credits.

This course involves detailed study of the mechanisms of human physiology. General principles of physics, chemistry, biology, and regulation and feedback within physiological processes are used to understand human physiology from the cellular to the organismal level. Processes and mechanisms underlying the function of the nervous, muscular, endocrine, cardiovascular, digestive, respiratory, renal, reproductive, and immune systems are studied. Examples of normal and disease-state physiology are used to practice application of material, develop a thorough understanding of each process, and improve critical-thinking skills.

P: HUM BIOL 240 or HUM BIOL 222 with at least a C grade, AND BIOLOGY 307 or CHEM 330, or NUT SCI 327
Fall and Spring.

HUM BIOL 403. Human Physiology Laboratory. 1 Credit.

This course examines a number of physiological principles in a laboratory setting. Students will develop skills in laboratory techniques, experimental design, science writing and presentation, and critical analysis of scientific literature. Students will also develop skills in data literacy including skills for statistical testing, and analysis, interpretation, graphical representation, and presentation of data. This course includes writing emphasis (WE) and capstone designations.

P: HUM BIOL 402 with at least a C grade or conc enr or BIOLOGY 346 with at least a C grade or conc enr; AND MATH 260
Spring.

HUM BIOL 405. Biotechnology and Ethics. 3 Credits.

Examination of the science and ethics of biotechnology including genomics, eugenics, recombinant DNA technology, reproductive technology, stem cells, drugs, modified organisms, and treatment of diseases.

P: none; REC: Hum Biol 102 or Biology 201/202.

Fall and Spring.

HUM BIOL 413. Neurobiology. 3 Credits.

This course will cover the physiological and molecular mechanisms of nervous system function. Topics include neuroanatomy; development and differentiation of neuronal cells; chemical and electrical functions; synaptic pharmacology; sensory receptors; learning and memory; and various disease states and medical treatments.

P: PSYCH 308 or consent of instructor

Spring.

HUM BIOL 422. Immunology. 3 Credits.

This course examines the mechanisms of vertebrate, particularly human defense against microbial invasion and cancer.

P: BIOLOGY 323 with at least a C grade or BIOLOGY 307 with at least a C grade; CHEM 212 with at least a C grade; and MATH 260 with at least a C grade

Spring.

HUM BIOL 423. Immunology Lab. 1 Credit.

This laboratory course examines the mechanisms of innate and acquired immunity.

P: HUM BIOL 422 or conc enr and CHEM 207 or conc enr

Spring Odd.

HUM BIOL 426. Cancer Biology. 3 Credits.

This course examines the genetic changes and molecular events that lead to abnormal cell growth and cancer. Topics covered include oncogenes, tumor suppressor genes, angiogenesis, invasion and metastasis, cancer stem cells, therapeutic approaches for cancer treatment, and cancer prevention.

P: Biology 307 or Hum Biol 310 or Biology 410 with at least a C grade

Fall Only.

HUM BIOL 427. Cancer Biology Laboratory. 1 Credit.

In this inquiry-based laboratory course, students will use molecular and cellular techniques to conduct research projects that examine the hallmark characteristics of cancer cells.

P: Hum Biol 426 or concurrent enrollment

Spring Even.

HUM BIOL 444. Endocrinology. 3 Credits.

This course examines the major endocrine organs of the body and the processes that are controlled / integrated by hormones. Clinical examples of endocrine disease (e.g. diabetes, Graves disease) will be considered from the viewpoint of the insight they give to the understanding of endocrine physiology.

P: HUM BIOL 240 with a grade of C or better AND (either) HUM BIOL 402 or BIOLOGY 307

Spring.

HUM BIOL 478. Honors in the Major. 3 Credits.

Honors in the Major is designed to recognize student excellence within interdisciplinary and disciplinary academic programs.

P: min 3.50 all cses req for major and min gpa 3.75 all UL cses req for major.

Fall and Spring.

HUM BIOL 495. Teaching Assistantship. 1-6 Credits.

The student and supervising teacher must prepare a statement that identifies the course with which the assistantship will happen, objectives for the assistantship, and expectations in order to fulfill the course objectives. Students are not eligible to receive credit in both the course they assist the instructor with and the teaching assistantship in the same semester. Typically student has previously taken the course prior to enrollment in the assistantship. Course is repeatable for credit.

HUM BIOL 496. Project/Research Assistantship. 1-6 Credits.

The student must prepare a research proposal, and both parties should identify the research arrangement and how the student will complete the work to fulfill the course objectives within the assigned term.

P: Chem 207 and approval by faculty mentor.

HUM BIOL 497. Internship. 1-16 Credits.

Supervised practical experience in an organization or activity appropriate to a student's career and educational interests. Internships are supervised by faculty members and require periodic student/faculty meetings. Course is repeatable for credit.

P: jr st.

Fall and Spring.

HUM BIOL 498. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. A student wishing to study or conduct research in an area not represented in available scheduled courses should develop a preliminary proposal and seek the sponsorship of a faculty member. The student's advisor can direct him or her to instructors with appropriate interests. A written report or equivalent is required for evaluation, and a short title describing the program must be sent early in the semester to the registrar for entry on the student's transcript.

P: fr or so st with cum gpa > or = 2.50; or jr or sr st with cum gpa > or = 2.00.

Fall and Spring.

HUM BIOL 499. Travel Course. 1-6 Credits.

Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.

P: cons of instr & prior trip arr & financial deposit.

Humanistic Studies (HUM STUD)

Courses

HUM STUD 100. Living the Humanities. 3 Credits.

This team-taught course introduces students to the Humanities as a way of study. By grappling with one of humanity's problems--such as the ethics of eating or our imprint on the environment--students explore various ways in which the strengths and values that are unique to the humanities can best prepare students for their future. Course is not repeatable for credit.

Fall and Spring.

HUM STUD 110. Introduction to Film. 3 Credits.

Examines film as literature, as a visual and aural art, as technology, and as a medium which both reflects and influences social trends, values, and attitudes. Involves viewing a range of films and examining their place in film history.

Fall Only.

HUM STUD 160. Introduction to Language. 3 Credits.

Study of language and linguistics, including basic principles and methods in structural linguistics, social and regional variation in language, historical change and introductory study of meaning.

Spring.

HUM STUD 198. First Year Seminar. 3 Credits.

First Year Seminar, topics vary.

Reserved for New Incoming Freshman

Fall and Spring.

HUM STUD 200. Introduction to Digital and Public Humanities. 3 Credits.

This course introduces students to the fields of digital and public humanities, with an emphasis on how we think about, and through, digital and public spaces. Students read, discuss, and write about humanities texts and artifacts, but also engage with the tools, platforms, methods, and projects of these emerging fields. Topics include curation, design, visualization, networked interaction, and collaborative research.

P: None. REC: Hum Stud 100

Fall Only.

HUM STUD 201. Introduction to the Humanities. 3 Credits.

Major methods and ideas of the humanities, examined in selected works of literature, philosophy and fine arts.

Spring.

HUM STUD 210. Film and Society. 3 Credits.

The ways in which films reflect and influence society. Examines films for their social content and the social milieu of their creation, the ways in which different cultures use films and the cross-cultural influences which occur.

HUM STUD 213. Ethnic Diversity and Human Values. 3 Credits.

This course will explore some of the most fundamental questions of human values and meaning by studying the rich literature, history, and culture of one or more of the following groups of the United States: African American, American Indian, Asian American, and Latino. Course is not repeatable for credit.

Fall and Spring.

HUM STUD 220. ESL: Listening and Speaking Across Cultures. 3-6 Credits.

Global and discrete listening and speaking skills for ESL students based on content in intercultural communication. Emphasis on note-taking, listening for main ideas and key details, organizing and delivering speeches, and participating effectively in debates and small and large group discussions.

P: International student status or permission of instructor.

Fall Only.

HUM STUD 299. Travel Course. 1-6 Credits.

Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.

P: cons of instr & prior trip arr & financial deposit.

HUM STUD 300. Intermediate Digital and Public Humanities. 3 Credits.

Students explore methods and approaches of the digital and public humanities in-depth, perform research, and complete work on a collaborative project.

P: Hum Stud 200

Fall Only.

HUM STUD 318. Topics in Linguistics/TESL. 3 Credits.

Analysis and discussion of topics of central importance in applied linguistics and Teaching English as a Second Language (TESL). Possible topics include: Teaching Grammar to ELLs; Second Language Pragmatics; Second Language Writing; and others.

HUM STUD 319. Second Language Acquisition & Assessment. 3 Credits.

Overview of issues in second-language acquisition and assessment, including linguistic, cognitive, social, and affective factors. Students will examine and think about learner language, read research on learner language, and consider implications for second-language teaching.

Rec: Hum Stud 160.

Fall Only.

HUM STUD 320. Language and Identity. 3 Credits.

This course explores the role that language attitudes and ideologies as well as identity play in the speech and patterns of language use of native speakers as well as those acquiring a second language. We will address these issues in relation to various immigrant groups in the US, with a special focus on Hispanic communities across the US. In addition, within the broader picture, we will look at the question of language use and identity construction; that is, the social meaning that certain variations in language have (i.e. power and solidarity traits) and the use that native speakers make of these variables to construct an identity.

REC: HUM STUD 160 or EDUC 311 or EDUC 315.

Spring.

HUM STUD 321. Sociolinguistics. 3 Credits.

The study of language in relation to society, including social and regional dialects, bilingualism and language contact, speech communities, the ethnography of language, and applications such as language policy and planning.

P: None. REC: Hum Stud 160.

Fall Only.

HUM STUD 323. The Hebrew Bible (Old Testament). 3 Credits.

Interdisciplinary study of the Hebrew Bible (also called the Old Testament), read and discussed in English.

P: none; REC: jr st.

Fall Even.

HUM STUD 324. The New Testament. 3 Credits.

The origins of the Christian tradition as reflected in the primary texts of that tradition in the New Testament: The major divisions of the writings of the New Testament, the life of Jesus as recorded in the gospels, the importance of St. Paul and the apocalyptic writings of St. John.

P: none; REC: jr st.

Spring Odd.

HUM STUD 326. Non-Western Religions. 3 Credits.

The two major religions of the East, Hinduism and Buddhism: the richness, variety and flexibility of the faith and practice of Hinduism, with its belief in a multiplicity of gods and goddesses; and the various sects and schools of Buddhism--Theravadic, Mayahana, Zen and Tantric.

P: none; REC: jr st.

Spring Even.

HUM STUD 333. Utopia and Dystopia. 3 Credits.

This course examines utopian and dystopian thought in literature, philosophy, politics, and social thought as well as attempts to realize utopian visions. The course focuses on the question of the value of utopian and dystopian thought in their historical and contemporary moments. What can utopia teach us about our society and the directions in which it may develop?

Spring Even.

HUM STUD 334. The Ancient World. 3 Credits.

Focuses on aspects of the cultures and civilizations of the ancient world as reflected in its texts and fine arts.

P: jr st.

Fall Only.

HUM STUD 335. The Medieval World. 3 Credits.

Focuses on the history, society, culture and values of the middle ages as reflected in its literature and fine arts.

P: jr st.

Spring.

HUM STUD 336. The Renaissance. 3 Credits.

Explores human values as they appear in texts and fine arts in the 15th and 16th century European Renaissance.

P: jr st.

Fall Only.

HUM STUD 337. The Age of Reason. 3 Credits.

Immerses in the ideas that fueled the enlightenment era in seventeenth and eighteenth century Europe. Focuses specifically on political turmoil amidst radical thinking, the revolution in the conduct of science, and the impact of these changes on the social world.

P: jr st.

Spring.

HUM STUD 343. International Cinema. 3 Credits.

This course explores international cinema and the filmic arts with particular attention to their diverse cultural, social and political contexts as a means of expanding students' knowledge of the human condition and human cultures throughout the world. Students will engage in critical analysis of filmmaking, film aesthetics and narrative structure, while developing a deepened appreciation for cross-cultural experiences and the ways cinema creates meaning.

Spring Odd.

HUM STUD 350. Interdisciplinary Study of Great Works. 1-3 Credits.

Interdisciplinary study of one or more works central to the Humanistic tradition. Variable content.

P: jr st.

Fall and Spring.

HUM STUD 351. Interdisciplinary Themes in Humanities. 3 Credits.

Interdisciplinary examination of a single important theme in the Humanities. Variable content. Course is repeatable for credit if topics differ.

P: jr st.

Spring.

HUM STUD 352. Literatures in Translation. 3 Credits.

A study of selected works of literatures in translation. A variable content course.

P: jr st.

HUM STUD 353. Latinx Culture. 3 Credits.

This course is an introduction to US Hispanic/ Latinx history, civilization, literature, and culture. The course is designed to provide an opportunity to understand cultural commonalities and differences of the people generally grouped in the United States under the single ethnic category of "Latinx/ Hispanic" and who have become the largest minority group. The course will focus on understanding sociological, historical and artistic productions and how they affect the construction of an ethnic identity and will address key issues regarding Latinx/Hispanic experiences in the US such as the constitution of ethnicity, language issues, immigration debates, the border/wall as a reality and as a symbol, the influence of media, visual and pop culture on the formation and marketing of an ethnic consciousness as well as other topics.

Spring.

HUM STUD 356. German Culture. 3 Credits.

The culture of the German-speaking world from the earliest periods to the present with a focus on how contemporary Germany has been shaped by issues of history, religion, art, music, philosophy, and commerce.

Fall Odd.

HUM STUD 360. Globalization and Cultural Conflict. 3 Credits.

This course examines the phenomenon of globalization and its impact on cultural identity as well as the conflicts in values and belief-systems that have arisen in its wake. We will explore the notion of a clash of civilizations and cultures with particular emphasis on the supposed clash between the West and the Islamic world.

REC: jr st

Spring Odd.

HUM STUD 370. Sustainability through the Humanities. 3 Credits.

This course offers a critical exploration of the problem of sustainability from the perspective of the humanities, including history, First Nations Studies, literature, and philosophy. The problem of environmental sustainability has at least as much to do with our cultures, histories, languages, and philosophies as it does with more concrete factors such as resource usage and pollution. To the extent that humanistic disciplines help us to expand and broaden how we comprehend the natural world, so too might they provide us with essential resources and tools with which to imagine and mount broad and value-infused solutions. This course will include a digital and public humanities project.

P: Junior Standing REC: HISTORY 220, PHILOS 220, or FNS 224

Spring.

HUM STUD 375. Humanities, Business and Critical Thinking. 3 Credits.

The Humanities in general and literature in particular provide tools for critical thinking that produce a new level of discourse, often outside of author / artist intent. This course will analyze literary works from the advent of modern capitalism to the present to engage in discussions of literary representations of business and economic modals

REC: Major: Integrative Leadership Studies

Spring.

HUM STUD 382. Romanticism to Modernism. 3 Credits.

Studies the challenge to tradition and reason and the response to that challenge from the development of romanticism in the late 18th century to the flowering of modernism in the early twentieth century.

REC: jr st.

Fall Only.

HUM STUD 383. Contemporary Cultural Issues. 3 Credits.

A study of contemporary cultural and social issues through historical, literary, philosophical, and artistic analysis. Course is repeatable for credit if topics differ; may be taken 2 times for a total of 6 credits.

P: HISTORY 102. REC: jr st

Spring.

HUM STUD 384. Topics in World Cultures. 3 Credits.

Study of cultures and worldviews outside of Western Europe and the United States. Course is repeatable for credit if topics differ; may be taken 2 times for a total of 6 credits.

P: none; REC: jr st.

Fall Only.

HUM STUD 400. Humanities Practicum. 3 Credits.

In this course students gain in-depth, hands-on experience by collaboratively creating humanities projects. Course is repeatable for credit if topics differ; may be taken 2 times for a total of 6 credits.

P: None. REC: HUM STUD 200

Fall and Spring.

HUM STUD 478. Honors in the Major. 3 Credits.

Honors in the Major is designed to recognize student excellence within interdisciplinary and disciplinary academic programs.

P: min 3.50 all cses req for major and min gpa 3.75 all UL cses req for major.

Fall and Spring.

HUM STUD 480. Humanities Seminar. 3 Credits.

A capstone seminar for humanities majors, examining basic questions and issues in the humanities. Course will emphasize student participation and a substantial term paper. Course is repeatable for credit if topics differ; may be taken 2 times for a total of 6 credits.

P: Humanistic Studies or Humanities major

Fall Only.

HUM STUD 497. Internship. 1-12 Credits.

Supervised practical experience in an organization or activity appropriate to a student's career and educational interests. Internships are supervised by faculty members and require periodic student/faculty meetings. Course is repeatable for credit.

P: jr st.

Fall and Spring.

HUM STUD 498. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. A student wishing to study or conduct research in an area not represented in available scheduled courses should develop a preliminary proposal and seek the sponsorship of a faculty member. The student's advisor can direct him or her to instructors with appropriate interests. A written report or equivalent is required for evaluation, and a short title describing the program must be sent early in the semester to the registrar for entry on the student's transcript.

P: fr or so st with cum gpa > or = 2.50; or jr or sr st with cum gpa > or = 2.00.

Fall and Spring.

HUM STUD 499. Travel Course. 1-6 Credits.

Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.

P: cons of instr & prior trip arr & financial deposit.

Information Sciences (INFO SCI)

Courses

INFO SCI 198. First Year Seminar. 3 Credits.

Reserved for New Incoming Freshman.

INFO SCI 201. Information, Computers and Society. 3 Credits.

A survey of the social, legal and ethical impacts of computers on individuals and society.

Fall Only.

INFO SCI 210. Information Problems. 3 Credits.

An introduction to understanding and solving information problems, including: a survey of the field of information science; practice in algorithmic thinking; techniques for finding, assessing, organizing, and presenting information; and confrontation with ethical and value issues.

Spring.

INFO SCI 299. Travel Course. 1-6 Credits.

Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.

P: cons of instr & prior trip arr & financial deposit.

INFO SCI 302. Introduction to Data Science. 3 Credits.

This course provides an introduction to data science and provides an overview of useful data science tools. Topics covered will include tools, database management, retrieval and management of data, best practices for effectiveness and mitigating risk.

P: At least 18 credits in COMP SCI, INFO SCI or COMM

Spring.

INFO SCI 332. Mobile Platforms and Apps. 3 Credits.

This course has a cross-disciplinary emphasis and is suitable for INFO SCI, COMP SCI and COMM students. This course will incorporate a complete study and practice of the mobile applications world. Students will explore business models of application development and deployment. As cross-disciplinary teams, the students will design, develop and fully produce one real and unique app. While CS students will focus on the technical aspects of the product, other students in this course will focus on original content creation (such as art, news stories, social media, video games, videos, etc.).

P: At least 18 credits in COMP SCI, INFO SCI or COMM

Fall Only.

INFO SCI 341. Survey of Gaming and Interactive Media. 3 Credits.

This course provides students with a thorough understanding of the history, study, of the modern video game industry and video games as a creative and communicative medium. Subjects covered in this course include the history of the industry in terms of its technological and economic development. Students will also analyze how video games have evolved and used more powerful multimedia capabilities to craft narratives and virtual worlds, and critically engage with game content to analyze games and break them down into component elements to understand what makes for good design. The course will also analyze the cultural and political impact of games from psychological effects to the debate over governmental regulation. The course will also provide students with the tools they need to succeed in a variety of professions in the video game industry, from journalism to development to public relations and beyond.

P: sophomore standing

Fall Only.

INFO SCI 342. Game Design. 3 Credits.

This course will introduce students to the fundamentals, concepts and tools used in the development of board games, modern 2-D and 3-D real-time interactive computer video games. The fundamentals of video game creation begin with a study of board game creation. Topics covered include game design concepts, design documents, prototyping, artificial intelligence and game mechanics. Students will pitch, design and create their own games in this course.

P: sophomore standing

Spring.

INFO SCI 390. Technical Writing. 3 Credits.

Scientific and technical writing for professional and lay audiences, including news articles and features, laboratory reports, training and procedure manuals, grant and contract proposals and technical reports.

P: Eng Comp 100 or 164 or ACT English score of 25 or higher; and completion of nat sci gen educ req.

INFO SCI 410. Analytics and Information Problems. 3 Credits.

Practice in solving information problems and documenting skills for external audiences.

P: senior status

Spring.

INFO SCI 411. Statistical Techniques and Decision Modeling. 3 Credits.

This course develops an understanding of core and advanced statistical concepts used in data science. It builds on core statistical concepts covered in other foundational statistics courses. Topics include hypothesis testing, classical and Bayesian statistical inference, multiple regression, logistic regression, analysis of variance, and non-parametric methods. The course also introduces students to decision modeling techniques including Monte Carlo simulation, linear and non-linear optimization, decision trees, and risk analysis. The course includes hands-on exercises.

P: 15 credits of COMP SCI, INFO SCI, or COMM

Spring.

INFO SCI 412. Data Mining and Predictive Analytics. 3 Credits.

The course discusses data mining and introduces students to machine learning concepts used in analytics. It provides the basics of building predictive models using structured and unstructured data and clustering, association, and classification techniques. It covers predictive modeling using regression, survival analysis, artificial neural networks, support vector machines, decision trees, and genetic algorithms. The courses involves hands-on exercises with WEKA, Python, and R.

P: MATH 260 or INFO SCI 302 or INFO SCI 411

Fall Even.

INFO SCI 440. Information and Computing Science Practicum. 3 Credits.

A project course in which teams submit proposals to work in an information problem. Projects provide experience in leadership roles, resource allocation, scheduling, documentation, client relations, and presentation. Problems typically draw on a wider array of skills than in other individual classes.

P: sr st.

Fall and Spring.

INFO SCI 443. Game Development. 3 Credits.

In this course, students will learn how to use a modern 3D game engine (e.g. Unreal Engine 4). They will learn about the art pipeline, the design pipeline, and the backend programming to make it all work. Game engine concepts such as scripting, AI, animations, sound, story, and gameplay behaviors will be covered in the lecture and labs. This is a hands-on capstone style course which is well suited to artists, designers, and programmers. During the course students will work together in game teams to demonstrate their learning through creating their own games.

P: 30 credits (sophomore standing) and COMP SCI 256 or DESIGN 231 or INFO SCI 342 or MUSIC 122 or ENGLISH 212

Fall Only.

INFO SCI 478. Honors in the Major. 3 Credits.

Honors in the Major is designed to recognize student excellence within interdisciplinary and disciplinary academic programs.

P: min 3.50 all cses req for major and min gpa 3.75 all UL cses req for major.

Fall and Spring.

INFO SCI 495. Teaching Assistantship. 1-6 Credits.

The student and supervising teacher must prepare a statement that identifies the course with which the assistantship will happen, objectives for the assistantship, and expectations in order to fulfill the course objectives. Students are not eligible to receive credit in both the course they assist the instructor with and the teaching assistantship in the same semester. Typically student has previously taken the course prior to enrollment in the assistantship. Course is repeatable for credit.

Fall and Spring.

INFO SCI 496. Project/Research Assistantship. 1-6 Credits.

The student must prepare a research proposal, and both parties should identify the research arrangement and how the student will complete the work to fulfill the course objectives within the assigned term.

Fall and Spring.

INFO SCI 497. Internship. 1-12 Credits.

Supervised practical experience in an organization or activity appropriate to a student's career and educational interests. Internships are supervised by faculty members and require periodic student/faculty meetings. Course is repeatable for credit.

P: jr st.

Fall and Spring.

INFO SCI 498. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. A student wishing to study or conduct research in an area not represented in available scheduled courses should develop a preliminary proposal and seek the sponsorship of a faculty member. The student's advisor can direct him or her to instructors with appropriate interests. A written report or equivalent is required for evaluation, and a short title describing the program must be sent early in the semester to the registrar for entry on the student's transcript.

P: fr or so st with cum gpa > or = 2.50; or jr or sr st with cum gpa > or = 2.00.

Fall and Spring.

INFO SCI 499. Travel Course. 1-6 Credits.

Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.

P: cons of instr & prior trip arr & financial deposit.

Italian (ITALIAN)

Courses

ITALIAN 101. Introduction to the Italian Language I. 4 Credits.

Development in basic ability in understanding, reading, speaking and writing Italian.

Fall Only.

ITALIAN 102. Introduction to the Italian Language II. 4 Credits.

Development in basic ability in understanding, reading, speaking and writing Italian.

REC: 1 yr. h.s. or 1 semester of college Italian.

Spring.

Japanese (JAPANESE)

Courses

JAPANESE 100. SNC Consortium. 4 Credits.

St. Norbert College course, extended to UWGB students through a consortium agreement.

JAPANESE 101. Elementary Japanese 1. 4 Credits.

An intensive introduction to practical Japanese with an emphasis placed on the four language skills: understanding, speaking, reading and writing.

Course is offered at St. Norbert College and is not included in UWGB residency requirement for degree.

Fall Only.

JAPANESE 102. Elementary Japanese 2. 4 Credits.

Continuation of Japanese 101. Course is offered at St. Norbert College and is not included in UWGB residency requirement for degree.

P: Japanese 101.

Spring.

JAPANESE 200. SNC Consortium. 3 Credits.

St. Norbert College course, extended to UWGB students through a consortium agreement.

JAPANESE 203. Intermediate Japanese 1. 4 Credits.

Short basic readings, conversations, and grammar. Course is offered at St. Norbert College and is not included in UWGB residency requirement for degree.

P: Japanese 102.

Fall Only.

JAPANESE 204. Intermediate Japanese 2. 4 Credits.

A continuation of JAPANESE 203 with emphasis on developing facility in oral and written expression. Course is offered at St. Norbert College and is not included in UWGB residency requirement for degree.

P: Japanese 203.

Spring.

JAPANESE 300. SNC Consortium. 3 Credits.

St. Norbert College course, extended to UWGB students through a consortium agreement.

JAPANESE 305. Intermediate Reading, Conversation, and Composition. 4 Credits.

A continuation of JAPANESE 204 with emphasis on developing facility in oral and written expression. A cultural orientation prior to a study-abroad experience Course is offered at St. Norbert College and is not included in UWGB residency requirement for degree.

P: Japanese 204.

JAPANESE 375. Japanese Civilization. 3 Credits.

A background of history, art and institutions as an aid to the understanding of Japanese thought in literature as well as culture and to appreciate the Japanese people. Course is offered at St. Norbert College and is not included in UWGB residency requirement for degree.

P: Japanese 305 and 389.

JAPANESE 389. Special Topic. 3 Credits.

Topics of special interest, dealing with Japanese literature, civilization or culture. Course is offered at St. Norbert College and is not included in UWGB residency requirement for degree.

P: Japanese 305.

JAPANESE 390. Advanced Conversation, Grammar and Composition. 4 Credits.

Emphasis on developing facility in oral expression based on literatures and cultures. Attention to phonetics, pronunciation and syntax. Development of more difficult and sophisticated patterns of expression. Course is offered at St. Norbert College and is not included in UWGB residency requirement for degree.

Mathematics (MATH)

Courses

MATH 94. Elementary Algebra. 3 Credits.

Intended as a preparation for Math 101. Topics include: properties of real numbers, exponents and polynomials, simplifying variable expressions, linear equations and inequalities, factoring, graphing, and basic quadratic equations. Offered on a pass/no credit, non-degree credit basis only.

Fall and Spring.

MATH 97. Mathematics Study Skills. 1 Credit.

MATH 97 is a one credit course intended for students concurrently enrolled in MATH 99. This course will provide students with mathematics and problem-solving instruction and cover study skills strategies for succeeding in mathematics courses. Students will gain insights into how they learn mathematics through various activities and reflections. They will also receive any extra support needed so that they are successful in their MATH 99 course.

P: Concurrent enrollment in MATH 99

Fall and Spring.

MATH 99. Intermediate Algebra. 2 Credits.

Intended as a preparation for Math 101. Topics include: functions, linear equations, quadratic equations, set operations, Venn diagrams, polynomials, rational functions, rational exponents, radicals. Offered on a pass/no credit, non-degree credit basis only.

P: MATH 94 with a P grade or WPT-MFND score greater than 415 or ACT Math score >17 or SAT Math score >490

Fall and Spring.

MATH 100. Math Appreciation. 3 Credits.

An exploration of the exciting, rich, practical, historical, and creative nature of mathematics, while emphasizing reasoning skills and problem-solving abilities. Core material includes probability/statistics, rational and irrational numbers, infinity, and additional topics chosen from other areas of modern mathematics.

Fall and Spring.

MATH 101. Advanced Algebra. 2 Credits.

Absolute values, linear inequalities, system of linear equations in three variables, matrices, complex numbers, quadratic functions, exponential functions, logarithmic functions, sequences.

P: MATH 99 with a P grade or WPT-MFND test score > 465 or ACT Math score > 20 or SAT Math score > 540

Fall and Spring.

MATH 102. Quantitative Reasoning. 3 Credits.

This course is intended to develop analytic reasoning and the ability to solve quantitative problems. Topics to be covered include construction and interpretation of graphs, functional relationships, descriptive statistics, geometry and spatial visualization, math of finance, exponential growth, and basic probability. Appropriate use of units and dimensions, estimates, mathematical notation and available technology will be emphasized throughout the course.

P: MATH 94 with a P grade or WPT-MFND test score > 415 or ACT Math score >17 or SAT Math score >490

Fall and Spring.

MATH 104. Precalculus. 4 Credits.

Functions and their graphs, the algebra of functions, polynomial functions, rational functions, exponential and logarithmic functions, trigonometric functions, analytic trigonometry, conic sections

P: MATH 101 with at least a C grade or WPT-MFND score >465 and WPT-AALG score >525 or ACT Math score >24 or SAT Math score >590

Fall and Spring.

MATH 198. First Year Seminar. 3 Credits.

First Year Seminar, topics vary.

Reserved for New Incoming Freshman.

MATH 202. Calculus and Analytic Geometry I. 4 Credits.

Differential and integral calculus of the elementary functions with associated analytic geometry; transcendental functions; techniques of integration; application.

P: MATH 104 with at least a C grade or WPT-MFND score >465 and WPT-AALG score >525 and WPT-TAG score >525 or ACT Math score >26 or SAT Math score >630

Fall and Spring.

MATH 203. Calculus and Analytic Geometry II. 4 Credits.

Differential and integral calculus of the elementary functions with associated analytic geometry; transcendental functions; techniques of integration; application; sequences and series.

P: Math 202 with at least a C grade.

Fall and Spring.

MATH 209. Multivariate Calculus. 4 Credits.

Real-valued functions of several variables; tangent and normal lines; chain rule for partial derivatives; extrema; least squares method; higher-ordered derivatives; integration; polar and cylindrical coordinates; spherical coordinates; vector fields; line integrals; physical applications.

P: Math 203 with at least a C grade.

Fall and Spring.

MATH 260. Introductory Statistics. 4 Credits.

Using statistical software, this course covers descriptive statistics, probability, the normal distribution, estimation, hypothesis testing, confidence intervals, chi-square tests for categorical data, correlation, and simple linear regression.

P: MATH 101 with at least a C, or WPT-MFND score > 465 and WPT-AALG score > 525, or ACT Math score > 24, or SAT Math score > 590

Fall and Spring.

MATH 299. Travel Course. 1-6 Credits.

Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.

P: cons of instr & prior trip arr & financial deposit.

MATH 305. Ordinary Differential Equations. 4 Credits.

First-order differential equations, equilibrium solutions and stability, linear equations of higher order, Fourier series and periodic solutions, Laplace transform methods, first-order linear systems of differential equations with constant coefficients, eigenvalues and boundary value problems.

P: Math 203 with at least a C grade.

Fall Only.

MATH 314. Proofs in Number Theory and Topology. 3 Credits.

The skills necessary to read and write theoretical mathematics with basic material of Number Theory and Topology that will be needed for further study in theoretical mathematics.

P: Math 202 with at least a C grade; REC: Math 320.

Spring.

MATH 320. Linear Algebra and Matrix Theory. 4 Credits.

Matrices and vector space concepts, linear dependence and independence, systems of linear equations, linear transformations, determinants, eigenvalues and eigenvectors; functions of vectors, spectral decompositions

P: Math 202 with at least a C grade.

Fall Only.

MATH 323. Analysis. 4 Credits.

The real number system, sequences of real numbers and their generalizations to real-valued functions, series of real numbers, continuity of a function, the theory of differentiation, the theory and development of the Riemann integral, Picard's theorem.

P: Math 209 with at least a C grade and 314 with at least a C grade.

Fall Only.

MATH 328. Abstract Algebra. 3 Credits.

Groups, rings, and fields as organizing ideas. Basic structure theorems. Applications.

P: MATH 314 with at least a C grade and MATH 320 with at least a C grade

Spring.

MATH 329. Applied Regression Analysis. 4 Credits.

Techniques for fitting regression models are developed and applied to data using statistical software. Topics include simple linear regression, multiple regression, inference, regression diagnostics, remedial measures, model selection, logistic regression, and an introduction to nonlinear regression models.

P: MATH 260 with at least a C and MATH 320 with at least a C. REC: Knowledge of Excel and R

Fall Only.

MATH 355. Applied Mathematical Optimization. 3 Credits.

Introduction to mathematical optimization: mathematical modeling of optimization problems, analytical and numerical optimization techniques, applications. Linear programming: simplex method, duality, integer programming; nonlinear programming: Lagrange multipliers, Karush-Kuhn-Tucker optimality conditions, convexity; approximation techniques: line search methods, gradient methods, conjugate gradient methods; variational problems; dynamic programming; optimal control.

P: MATH 209 with at least a C grade AND MATH 320 with at least a C grade or concurrent enrollment

Spring.

MATH 360. Theory of Probability. 3 Credits.

Probability concepts and counting techniques; expected value; discrete, continuous, and multivariate probability distributions; moments and moment-generating functions; transformations and functions of random variables; and the Central Limit Theorem.

P: Math 209 with at least a C grade.

Fall Even.

MATH 361. Mathematical Statistics. 3 Credits.

Properties of point estimators (bias, consistency, sufficiency), methods of estimation (method of moments, maximum likelihood estimation), hypothesis testing and interval estimation, power, likelihood ratio tests, chi-square tests, and nonparametric statistics.

P: MATH 360 with at least a C grade

Spring Odd.

MATH 385. Foundations of Geometry. 3 Credits.

Intuitive and deductive introductions to Euclidean, non-Euclidean, transformation, fractal, and projective geometries and their applications

P: Math 314 with at least a C grade.

Spring.

MATH 410. Complex Analysis. 3 Credits.

Algebra and geometry of complex numbers; analytic functions, elementary transformations, integration, Taylor and Laurent series, contour integration, residues, conformal mapping.

P: Math 209 with at least a C grade.

Spring Even.

MATH 425. Dynamical Systems. 3 Credits.

Fundamental concepts and techniques of discrete and continuous dynamical systems; asymptotic behavior, structural stability, elementary bifurcations, strange attractors, fractals, chaos. Applications to physical and biological systems.

P: Math 209 with at least a C grade and 320 with at least a C grade; and 305 with at least a C grade or conc enr.

Spring Odd.

MATH 430. Design of Experiments. 4 Credits.

Statistical theory and practice underlying the design of scientific experiments, and methods of analysis. Replication, randomization, error, linear models, least squares, crossed and nested models, blocking, factorial experiments, Latin squares, confounding, incomplete blocks, split-plots.

P: MATH 202 with at least a C and MATH 260 with at least a C

Spring Even.

MATH 431. Multivariate Statistical Analysis. 4 Credits.

Principles and practice in the analysis of multivariate data. Correlation, partial correlation, principle components, factor analysis, discriminant functions, canonical correlation, cluster analysis, multidimensional scaling. Emphasis on computer analysis of actual data.

P: MATH 260 with at least a C, MATH 320 with at least a C, and MATH 329 with at least a C

Spring Odd.

MATH 478. Honors in the Major. 3 Credits.

Honors in the Major is designed to recognize student excellence within interdisciplinary and disciplinary academic programs.

P: min 3.50 all cses req for major and min gpa 3.75 all UL cses req for major.

Fall and Spring.

MATH 492. Special Topics in Mathematics. 1-4 Credits.

This course brings together students and professors who have a mutual interest in some topic not otherwise available among the usual mathematics and statistics offerings.

MATH 495. Teaching Assistantship. 1-6 Credits.

The student and supervising teacher must prepare a statement that identifies the course with which the assistantship will happen, objectives for the assistantship, and expectations in order to fulfill the course objectives. Students are not eligible to receive credit in both the course they assist the instructor with and the teaching assistantship in the same semester. Typically student has previously taken the course prior to enrollment in the assistantship. Course is repeatable for credit.

Fall and Spring.

MATH 497. Internship. 1-12 Credits.

Supervised practical experience in an organization or activity appropriate to a student's career and educational interests. Internships are supervised by faculty members and require periodic student/faculty meetings. Course is repeatable for credit.

P: jr st.

Fall and Spring.

MATH 498. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. A student wishing to study or conduct research in an area not represented in available scheduled courses should develop a preliminary proposal and seek the sponsorship of a faculty member. The student's advisor can direct him or her to instructors with appropriate interests. A written report or equivalent is required for evaluation, and a short title describing the program must be sent early in the semester to the registrar for entry on the student's transcript.

P: fr or so st with cum gpa > or = 2.50; or jr or sr st with cum gpa > or = 2.00.

Fall and Spring.

MATH 499. Travel Course. 1-6 Credits.

Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.

P: cons of instr & prior trip arr & financial deposit.

Management (MGMT)

Courses

MGMT 198. First Year Seminar. 3 Credits.

First Year Seminar, topics vary.

Reserved for New Incoming Freshman.

MGMT 298. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. A student wishing to study or conduct research in an area not represented in available scheduled courses should develop a preliminary proposal and seek the sponsorship of a faculty member. The student's advisor can direct him or her to instructors with appropriate interests. A written report or equivalent is required for evaluation, and a short title describing the program must be sent early in the semester to the registrar for entry on the student's transcript. Course is repeatable for credit.

P: fr or so st with cum gpa > or = 2.50; or jr or sr st with cum gpa > or = 2.00.

Fall and Spring.

MGMT 370. Data Science for Managers. 3 Credits.

The course helps students understand the fundamentals of using data to support their decision-making and to visually represent data. Students will develop visualization and decision models designed to effectively communicate the meaning of complex data sets in a business context. Students will also learn how Business Intelligence (BI) is used by organizations to make better business decisions, use fewer resources, and improve the bottom line. Students will learn numerous in-demand technical skills

P: Sophomore standing

Fall and Spring.

MGMT 380. International Business Management. 3 Credits.

The course takes both micro and macro-level perspectives of organizations and delves into the field of international business. It gives a student a fundamental understanding of the international operating context and looks at strategies, and structures for dealing with the challenges and opportunities arising in global markets.

P: 15 credits completed

Spring.

MGMT 389. Organizational Behavior. 3 Credits.

A micro organizational behavior course examining motivation, leadership, job satisfaction, learning, group dynamics, and stress in the organizational setting.

Fall and Spring.

MGMT 452. Teams. 3 Credits.

The course explores the design and management of organizational teams and work groups. It examines the components of effective teams and enhances teamwork skills and expertise. Topics include group composition, goals, processes, team behaviors, team leadership, team performance and technological tools.

P: MGMT 389

Spring.

MGMT 460. Leading Innovation and Change. 3 Credits.

The course helps students develop skills to lead teams and organizations to achieve innovative outcomes. Students will develop an understanding of the factors that lead to successful management of innovation including overcoming barriers to innovation, leading innovation and developing and nurturing an innovative culture. Students learn how organizations respond to change and how to manage change throughout different organizational levels. They will understand the role of change agents and all aspects of change management including planning and performance, communication structures, and politics, among others.

P: MGMT 389

Spring.

MGMT 461. Diversity in Organizations. 3 Credits.

The course introduces students to an overview of diversity in business and the issues, challenges, and opportunities presented by this diversity. It focuses on understanding, sensitivity, and appreciation for cultural differences. Students will learn about diversity in all forms including race, ethnicity, gender, religion, sexual orientation, appearance, age, ability and class. Additionally students will learn about the specific behaviors and skills needed to shape an inclusive climate and how to manage diversity as a leader.

P: MGMT 389

Fall Even.

MGMT 472. Leadership Development. 3 Credits.

This course provides a framework for lifelong leadership development to ensure students can make an impact on both personal and organizational success. Students will build their leadership potential by developing critical leadership competencies needed to think strategically, coach and develop organizational talent, lead people through change, and influence people toward mutually beneficial outcomes. An emphasis will be placed on understanding that leadership development is an ongoing process throughout one's career.

P: MGMT 389

Fall and Spring.

MGMT 478. Honors in the Major. 3 Credits.

Honors in the Major is designed to recognize student excellence within interdisciplinary and disciplinary academic programs.

P: min 3.50 all cses req for major and min gpa 3.75 all UL cses req for major.

Fall and Spring.

MGMT 479. Organizational Culture & Design. 3 Credits.

A macro-organizational course examining the use of organizational design as a tool for organizing business processes and developing organizational capabilities. The course focuses on organizational environments, structure, power and politics, conflict, innovation, technology, and culture.

P: MGMT 389

Spring Even.

MGMT 482. Capstone in Business Strategy. 3 Credits.

The course focuses on the formulation, selection and implementation of business strategies through assessment of organizational performance; competitive, market and industry analysis; development of strategic positions and identification of strategic opportunities. Students practice strategic thinking for a cross section of business types from small, closely held to corporate, publicly-held, multiple business enterprises. The concepts and ideas of the course are explored through the analysis of case studies.

P: 95-earned credits; and ACCTG 202, ECON 202 or ECON 203; MKTG 322 or ECON 303; FIN 343 or ECON 330; MGMT 389 or ECON 485; and Accounting, Business Administration, Finance, HR Management, Management, Marketing, Economics major; and a minimum GPA of 2.5

Fall and Spring.

MGMT 495. Teaching Assistantship. 1-6 Credits.

The student and supervising teacher must prepare a statement that identifies the course with which the assistantship will happen, objectives for the assistantship, and expectations in order to fulfill the course objectives. Students are not eligible to receive credit in both the course they assist the instructor with and the teaching assistantship in the same semester. Typically student has previously taken the course prior to enrollment in the assistantship. Course is repeatable for credit.

Fall and Spring.

MGMT 496. Project/Research Assistantship. 1-6 Credits.

The student must prepare a research proposal, and both parties should identify the research arrangement and how the student will complete the work to fulfill the course objectives within the assigned term.

P: jr st.

MGMT 497. Internship. 1-12 Credits.

Supervised practical experience in an organization or activity appropriate to a student's career and educational interests. Internships are supervised by faculty members and require periodic student/faculty meetings. Course is repeatable for credit.

P: jr st.

Fall and Spring.

MGMT 498. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. A student wishing to study or conduct research in an area not represented in available scheduled courses should develop a preliminary proposal and seek the sponsorship of a faculty member. The student's advisor can direct him or her to instructors with appropriate interests. A written report or equivalent is required for evaluation, and a short title describing the program must be sent early in the semester to the registrar for entry on the student's transcript. Course is repeatable for credit.

P: fr or so st with cum gpa > or = 2.50; or jr or sr st with cum gpa > or = 2.00.

Fall and Spring.

Military Science (MIL SCI)

Courses

MIL SCI 101. Leadership and Military Science I. 2 Credits.

This is an introductory course designed to focus on the fundamental components of service as an officer in the United States Army. Students are familiarized with individual values, leadership traits and the fundamentals of officer ship. Students also learn "life skills" of physical fitness, communication applications, both oral and written, as well as interpersonal relationships. The lab provides basic instruction on squad movement techniques and the six-squad tactical missions of patrolling, attack, defense, ambush, reconnaissance, and squad battle drills. Additionally, students learn basic map reading, first aid, physical fitness, and military formations to include basic marching techniques.

Fall Only.

MIL SCI 102. Leadership and Military Science II. 2 Credits.

This course is an orientation to leadership theory and the fundamentals of decision-making process by learning how to solve problems and develop critical thinking skills. Students develop followership skills and the ability to learn goal-setting techniques while working in a group interaction setting. The lab continues to provide basic instruction on squad movement techniques and the six-squad tactical missions of patrolling, attack, defense, ambush, reconnaissance and squad battle drills. Students are introduced to the operations order format.

Spring.

MIL SCI 103. Introduction to Military Science I. 1 Credit.

An introductory course designed to focus on the fundamental components of service as an officer in the United States Army. Students are familiarized with individual values, leadership traits and the fundamentals of officer ship. Students also learn "life skills" of physical fitness, communication applications, both oral and written, as well as interpersonal relationships. The course provides basic instruction on squad movement techniques and the six-squad tactical missions of patrolling, attack, defense, ambush, reconnaissance, and squad battle drills. Additionally students learn basic map reading, first aid, physical fitness, and military formations to include basic marching techniques. Students are eligible to attend Fox Valley Battalion events to include; Ranger Challenge, Commanders Cup competition and the Military Dining In.

Fall Only.

MIL SCI 104. Introduction to Military Science II. 1 Credit.

Further development of leadership skills and the orientation of the ROTC program designed to focus on the fundamental components of service as an officer in the United States Army. Students are familiarized with individual values, leadership traits and the fundamentals of officer ship. Students also learn "life skills" of physical fitness, communication applications, both oral and written, as well as interpersonal relationships. The course provides basic instruction on squad movement techniques and the six-squad tactical missions of patrolling, attack, defense, ambush, reconnaissance, and squad battle drills. Additionally students learn basic map reading, first aid, physical fitness, and military formations to include basic marching techniques. Students are eligible to attend Fox Valley Battalion events to include: Ranger Buddy, Northern Warfare Challenge, Norwegian Foot March, German Armed Forces Badge Competition and the Military Ball.

Spring.

MIL SCI 183. Military Conditioning. 1 Credit.

Students participate in the United States Army's military conditioning and fitness program designed to develop both individual fitness and the leadership skills and knowledge essential to the management of an effective organizational physical fitness program. Course is repeatable for credit; may be taken 8 times for a total of 8 credits.

Fall and Spring.

MIL SCI 201. Basic Leadership and Management I. 3 Credits.

Students learn how to resolve ethical problems by applying leadership theory and principles. Students learn self-development techniques such as the importance of stress management, time management and the ability to solve problems. Lastly, students apply communication theory and skills in a leadership study focusing on problem solving. The lab applies basic leadership theory and decision making during practical exercises in a field environment. Students continue to develop basic map reading, first aid, physical fitness and military formations to include basic march techniques.

P: Mil Sci 101 and Mil Sci 102

Fall Only.

MIL SCI 202. Basic Leadership and Management II. 3 Credits.

Students focus primarily on leadership with an extensive examination of the unique purpose, roles and obligations of commissioned officers. Students also focus, in detail, on the origin of our institutional values and their practical application in the decision-making process and leadership theory. Students use case studies to learn the Army's ethical decision-making process. The lab continues to apply basic leadership theory and decision making during practical exercises in a field environment. Students continue to develop basic map reading, first aid, physical fitness and military formations to include basic march techniques.

P: Mil Sci 101 and Mil Sci 102

Spring.

MIL SCI 301. Advanced Leadership and Management I. 4 Credits.

Students are introduced to the Leader Development Program that will be used to evaluate their leadership performance and provide developmental feedback for the remainder of their cadet years. Cadets are taught how to plan and conduct individual and small unit training, as well as basic tactical principles. Cadets will also learn reasoning skills and the military specific application of these skills in the form of the Army's troop. The lab reinforces small unit tactical training while employing the troop leading procedure to accomplish planning and decision-making. Students continue to learn basic map reading, first aid, physical fitness and military formations to include basic march techniques.

P: Mil Sci 101, 102, 201, and 202

Fall Only.

MIL SCI 302. Advanced Leadership and Management II. 4 Credits.

The course focus is doctrinal leadership and tactical operations at the small unit level. Students are provided opportunities to plan and conduct individual and collective training for Army operations. Synthesizing training, leadership and team building is the primary focus. Upon completion, students possess the fundamental confidence and competence of leadership in a small unit setting. The lab continues reinforcing small unit tactical training while employing the troop leading procedures to accomplish planning and decision-making. Students also continue basic map reading, first aid, physical fitness and military formations to include basic march techniques.

P: Mil Sci 101, 102, 201 and 202

Spring.

MIL SCI 401. Applied Leadership and Management I. 4 Credits.

This course concentrates on leadership, management and ethics to begin the final transition from cadet to lieutenant. Students focus on attaining the knowledge and proficiency in several critical areas they need to operate effectively as Army Officers. These areas include coordinating activities with staff, counseling theory and practice within the Army Context, training management and ethics. Students develop and possess the fundamental skills, attributes and abilities to operate as competent leaders in a cadet battalion. They must confidently communicate to subordinate cadets their preparedness to shoulder the responsibilities entrusted to them.

P: Mil Sci 301 and Mil Sci 302

Fall Only.

MIL SCI 402. Applied Leadership and Management II. 4 Credits.

Students learn the legal aspects of decision-making and leadership. Instruction introduces the student to the organization of the Army from the tactical to the strategic level. Students learn administrative and logistical management focusing on the fundamentals of soldier and unit level support. Practical exercises require the student, both individually and collectively, to apply their knowledge to solve problems and confront situations commonly faced by junior officers. The lab continues to sharpen the student's leadership skills. Students normally change leadership positions to hone their skills, attributes and abilities as leaders. Again, they must confidently communicate to subordinate cadets their preparedness to shoulder the responsibilities entrusted to them.

P: Mil Sci 301 and Mil Sci 302

Spring.

MIL SCI 498. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. A student wishing to study or conduct research in an area not represented in available scheduled courses should develop a preliminary proposal and seek the sponsorship of a faculty member. The student's advisor can direct him or her to instructors with appropriate interests. A written report or equivalent is required for evaluation, and a short title describing the program must be sent early in the semester to the registrar for entry on the student's transcript.

Fall and Spring.

Music Applied (MUS APP)

Courses

MUS APP 11. Keyboard Musicianship I. 1 Credit.

Instruction in basic keyboard skills to include scales, chords, simple accompaniments, and beginning to intermediate solo literature.

Fall Only.

MUS APP 13. Advanced Keyboard Musicianship. 1 Credit.

Practical study of harmony, figured bass, score reading and improvisation at the piano.

P: Completion of or concurrent enrollment in MUSIC 152.

Spring.

MUS APP 21. Keyboard Musicianship II. 1 Credit.

Instruction in basic keyboard skills to include scales, chords, simple accompaniments, improvisation, and beginning to intermediate solo literature.

P: None. REC: MUS APP 11

Spring.

MUS APP 31. Keyboard Musicianship III. 1 Credit.

Instruction in basic keyboard skills to include scales, chords, simple accompaniments, and beginning to intermediate solo literature.

P: None. REC: MUS APP 21

Fall Only.

MUS APP 41. Keyboard Musicianship IV. 1 Credit.

Instruction in basic keyboard skills to include scales, chords, etudes, and performance, transposition and improvisation of accompaniments.

P: None. REC: MUS APP 31

Spring.

MUS APP 45. Elementary Voice I. 1 Credit.

Beginning level instruction in vocal health, and the physiology and techniques of singing. Use of the singing voice in teaching music is a course component.

P: Music 151 or conc enr.

Fall and Spring.

MUS APP 69. Elementary Guitar. 1 Credit.

This course is designed to build a technical and musical vocabulary for effective use of the guitar as an accompanying instrument in the music classroom. Basic instruction on the Ukulele will also be included.

P: MUSIC 253 and must provide guitar.

Spring.

MUS APP 101. Keyboard Lessons 1. 1-2 Credits.

Students study the solo literature of keyboard instruments through private instruction. The development of proper technique and a mature tone are significant components. Placement is by audition. Special enrollment restrictions apply.

P: Conc enr in or completion of MUSIC 151 or 152; Conc Enr in MUS ENS 241 or 261 or 262

Fall and Spring.

MUS APP 102. Keyboard Lessons 2. 1-2 Credits.

Students study the solo keyboard literature through private instruction. The development of proper technique and a mature tone are significant components. Placement is by audition. Special enrollment restrictions apply.

P: Conc enr in or completion of MUSIC 151 or MUSIC 152; Conc Enr in MUS ENS 241 or MUS ENS 261 or MUS ENS 262; Minimum grade of C in MUS APP 101

Fall and Spring.

MUS APP 105. Voice Lessons 1. 1-2 Credits.

Students study the solo literature of their voice through private instruction. The development of proper technique and a mature tone are significant components. Placement is by audition. Special enrollment restrictions apply. Course is repeatable for credit; may be taken for a total of 2 credits.

P: Conc enr in or completion of MUSIC 151 or 152; Conc Enr in MUS ENS 261 or 262 (TERM SPECIFIC)

Fall and Spring.

MUS APP 106. Voice Lessons 2. 1-2 Credits.

Students study the solo literature of their voice through private instruction. The development of proper technique and a mature tone are significant components. Placement is by audition. Special enrollment restrictions apply.

P: Conc enr in or completion of MUSIC 151 or MUSIC 152; Conc Enr in MUS ENS 261 or MUS ENS 262; Minimum grade of C in MUS APP 105. Fall and Spring.

MUS APP 127. Instrumental Lessons 1. 1-2 Credits.

Students study the solo literature through private instruction. The development of technique and a mature tone are significant components. Placement is by audition. Special enrollment restrictions apply.

P: Conc enr in or completion of MUSIC 151; Conc enr in MUS ENS 241 REC: Conc enr in MUSIC 115
Fall and Spring.

MUS APP 128. Instrumental Lessons 2. 1-2 Credits.

Students study the solo literature through private instruction. The development of proper technique and a mature tone are significant components. Placement is by audition. Special enrollment restrictions apply.

P: Conc enr in or completion of MUSIC 152; Conc enr in MUS ENS 241; Minimum grade of C in MUS APP 127. REC: Conc enr in MUSIC 116. Fall and Spring.

MUS APP 201. Keyboard Lessons 3. 1-2 Credits.

Students study the solo literature of the piano through private instruction. The development of proper technique and a mature tone are significant components. Placement is by audition. Special enrollment restrictions apply.

P: Conc enr in or completion of MUSIC 253 or MUSIC 254; Conc Enr in MUS ENS 241 or MUS ENS 261 or MUS ENS 262 or MUS ENS 441 or MUS ENS 461 or MUS ENS 462; Minimum grade of C in MUS APP 102
Fall and Spring.

MUS APP 202. Keyboard Lessons 4. 1-2 Credits.

Students study the solo literature of the piano through private instruction. The development of proper technique and a mature tone are significant components. Placement is by audition. Special enrollment restrictions apply.

P: Conc enr in or completion of MUSIC 253 or MUSIC 254; Conc Enr in MUS ENS 241 or MUS ENS 261 or MUS ENS 262 or MUS ENS 441 or MUS ENS 461 or MUS ENS 462; Minimum grade of C in MUS APP 201
Fall and Spring.

MUS APP 205. Voice Lessons 3. 1-2 Credits.

Students study the solo literature of voice through private instruction. The development of proper technique and a mature tone are significant components. Placement is by audition. Special enrollment restrictions apply.

P: Conc enr in or completion of MUSIC 253 or MUSIC 254; Conc Enr in MUS ENS 261 or MUS ENS 262; Minimum grade of C in MUS APP 106. Fall and Spring.

MUS APP 206. Voice Lessons 4. 1-2 Credits.

Students study the solo literature of voice through private instruction. The development of proper technique and a mature tone are significant components. Placement is by audition. Special enrollment restrictions apply.

P: Conc enr in or completion of MUSIC 253 or MUSIC 254; Conc Enr in MUS ENS 261 or MUS ENS 262 or MUS ENS 461 or MUS ENS 462; Minimum grade of C in MUS APP 205. Fall and Spring.

MUS APP 227. Instrumental Lessons 3. 1-2 Credits.

Students study the solo literature through private instruction. The development of proper technique, historically accurate interpretations, and a mature tone are significant components. Placement is by audition. Special enrollment restrictions apply.

P: Conc enr in or completion of MUSIC 253; Conc Enr in MUS ENS 241 or 441; Minimum grade of C in MUS APP 128. Fall and Spring.

MUS APP 228. Instrumental Lessons 4. 1-2 Credits.

Students study the solo literature of percussion through private instruction. The development of proper technique, stylistically appropriate interpretations, and a mature tone are significant components. Placement is by audition. Special enrollment restrictions apply.

P: Conc enr in or completion of MUSIC 254; Conc Enr in MUS ENS 241 or 441; Minimum grade of C in MUS APP 227. REC: Conc enr in MUSIC 354. Fall and Spring.

MUS APP 299. Travel Course. 1-6 Credits.

Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.

P: cons of instr & prior trip arr & financial deposit.

MUS APP 301. Keyboard Lessons 5. 1-3 Credits.

Students study the solo literature of the piano through private instruction. The development of proper technique and a mature tone are significant components. Placement is by audition. Special enrollment restrictions apply.

P: Conc enr in or completion of MUSIC 353 or MUSIC 354; Conc enr in MUS ENS 441 or MUS ENS 461 or MUS ENS 462; Minimum grade of C in MUS APP 202
Fall and Spring.

MUS APP 302. Keyboard Lessons 6. 1-3 Credits.

Students study the solo literature of the piano through private instruction. The development of proper technique and a mature tone are significant components. Placement is by audition. Special enrollment restrictions apply.

P: Conc enr in or completion of MUSIC 353 or MUSIC 354; Conc Enr in MUS ENS 241 or MUS ENS 261 or MUS ENS 262 or MUS ENS 441 or MUS ENS 461 or MUS ENS 462; Minimum Grade of C in MUS APP 301

Fall and Spring.

MUS APP 305. Voice Lessons 5. 1-3 Credits.

Students study the solo literature of voice through private instruction. The development of proper technique and a mature tone are significant components. Placement is by audition. Special enrollment restrictions apply.

P: Conc enr in or completion of MUSIC 353 or MUSIC 354; Conc Enr in MUS ENS 261 or MUS ENS 262 or MUS ENS 461 or MUS ENS 462; Minimum grade of C in MUS APP 206.

Fall and Spring.

MUS APP 306. Voice Lessons 6. 1-3 Credits.

Students study the solo literature of voice through private instruction. The development of proper technique and a mature tone are significant components. Placement is by audition. Special enrollment restrictions apply.

P: Conc enr in or completion of MUSIC 353 or MUSIC 354; Conc Enr in MUS ENS 261 or MUS ENS 262 or MUS ENS 461 or MUS ENS 462; Minimum grade of C in MUS APP 305.

Fall and Spring.

MUS APP 327. Instrumental Lessons 5. 1-3 Credits.

Students study the solo literature of percussion through private instruction. The development of proper technique, stylistically appropriate interpretations, and a mature tone are significant components. Placement is by audition. Special enrollment restrictions apply.

P: Conc enr in or completion of MUSIC 353; Conc enr in MUS ENS 441; Minimum grade of C in MUS APP 228.

Fall and Spring.

MUS APP 328. Instrumental Lessons 6. 1-3 Credits.

Students study the solo literature through private instruction. The development of proper technique, stylistically appropriate interpretations, and a mature tone are significant components. Placement is by audition. Special enrollment restrictions apply.

P: Conc enr in or completion of MUSIC 354; Conc enr in MUS ENS 441; Minimum grade of C in MUS APP 327.

Fall and Spring.

MUS APP 396. Junior Recital. 0 Credits.

Required of students pursuing the B.M. degree. An elective course for any other student who qualifies.

P: Music major and concurrent enrollment in Mus App 302, 306, or 328.

Fall and Spring.

MUS APP 401. Keyboard Lessons 7. 1-3 Credits.

Students study the solo literature of the piano through private instruction. The development of proper technique and a mature tone are significant components. Placement is by audition. Special enrollment restrictions apply.

P: Conc enr in or completion of MUSIC 353 & MUSIC 354; Conc Enr in MUS ENS 441 or MUS ENS 461 or MUS ENS 462; Minimum grade of C in MUS APP 302

Fall and Spring.

MUS APP 402. Keyboard Lessons 8. 1-3 Credits.

Students study the solo literature of the piano through private instruction. The development of proper technique and a mature tone are significant components. Placement is by audition. Special enrollment restrictions apply.

P: Conc enr in or completion of MUSIC 353 or MUSIC 354; Conc Enr in MUS ENS 441 or MUS ENS 461 or MUS ENS 462; Minimum grade of C in MUS APP 401

Fall and Spring.

MUS APP 405. Voice Lessons 7. 1-3 Credits.

Students study the solo literature of voice through private instruction. The development of proper technique and a mature tone are significant components. Placement is by audition. Special enrollment restrictions apply.

P: MUSIC 353 & MUSIC 354; Conc Enr in MUS ENS 461 or MUS ENS 462; grade of C or better in MUS APP 306.

Fall and Spring.

MUS APP 406. Voice Lessons 8. 1-3 Credits.

Students study the solo literature of voice through private instruction. The development of proper technique and a mature tone are significant components. Placement is by audition. Special enrollment restrictions apply.

P: MUSIC 353 & MUSIC 354; Conc Enr in MUS ENS 461 or MUS ENS 462; Minimum grade of C in MUS APP 405.

Fall and Spring.

MUS APP 427. Instrumental Lessons 7. 1-3 Credits.

Students study the solo literature through private instruction. The development of proper technique, stylistically appropriate interpretations, and a mature tone are significant components. Placement is by audition. Special enrollment restrictions apply.

P: Conc enr in or completion of MUSIC 353; Conc enr in MUS ENS 441; Minimum grade of C in MUS APP 328.

Fall and Spring.

MUS APP 428. Instrumental Lessons 8. 1-3 Credits.

Students study the solo literature through private instruction. The development of proper technique, stylistically appropriate interpretations and a mature tone are significant components. Placement is by audition. Special enrollment restrictions apply.

P: Conc enr in or completion of MUSIC 354; Conc enr in MUS ENS 441; Minimum grade of C in MUS APP 427.

Fall and Spring.

MUS APP 496. Senior Recital. 1 Credit.

Students will research historical, social, cultural, and/or musically significant aspects of the literature they perform. The research will be presented in performance, writing, and/or other media. Students will be responsible for developing and carrying out a promotional plan for their recital. Required of students pursuing the B.M. degree with an emphasis in performance.

P: Music major and concurrent enrollment in Mus App 402, 406, or 428.

Fall and Spring.

MUS APP 497. Internship. 1-12 Credits.

Supervised practical experience in an organization or activity appropriate to a student's career and educational interests. Internships are supervised by faculty members and require periodic student/faculty meetings. Course is repeatable for credit.

This course will equip students to understand the interdisciplinary role, historical progression, musical methodology, technological application, and unique artistry of music in video games. Students will contribute to the class learning environment by researching and presenting a game music composer from an interdisciplinary perspective. Through guided instruction, students will also compose their own basic game music. (No musical background required!)

Spring.

MUSIC 121. Survey of Western Music. 3 Credits.

The musical styles of several well-known composers as evident in selected compositions; review of a basic repertoire of musical compositions of various forms and styles.

Fall Only.

MUSIC 122. Electronic Music Production. 3 Credits.

This project-based course will teach the basic principles of modern music production using the Ableton Live software platform. Topics covered include audio and MIDI tracking, clip editing, software instruments, effects, synthesis, sampling, and elementary editing and mixing.

Fall and Spring.

MUSIC 151. Music Theory I. 3 Credits.

The materials of which Western music is made are viewed not only in structural terms, but also in psychological, aesthetic and social perspective.

Fall Only.

MUSIC 152. Music Theory II. 3 Credits.

The materials of which Western music is made are viewed not only in structural terms, but also in psychological, aesthetic and social perspective.

P: Music 151.

Spring.

MUSIC 165. Fundamentals of Recording Technology. 1 Credit.

Survey of microphone use, interconnection, stereo microphone techniques, signal flow, gain structure, editing, and other fundamental aspects of classical recording techniques. The course also includes specific orientation for recording procedures and protocols for UWGB music program performances as well as production protocols for Phoenix Studios podcasts.

P: None. REC: Declared music major

Spring.

MUSIC 166. Digital Audio Overview. 3 Credits.

This course is a transfer destination course for NWTC 10-206-100 and is a requirement for the BA in Audio Production.

Spring.

MUSIC 170. Fundamentals of Music. 3 Credits.

This course is designed to acquaint the student with the fundamentals of music through experiences with the keyboard, rhythm instruments, singing, listening, and note reading.

Spring.

MUSIC 198. First Year Seminar. 3 Credits.

First Year Seminar

Reserved for New Incoming Freshman.

MUSIC 209. Applied Composition. 1 Credit.

An individualized approach to the study of music composition, with an emphasis on small-scale forms and small ensemble works. Course is repeatable for credit; may be taken 4 times for a total of 4 credits.

P: Completion of MUSIC 152 with a grade of B or better, Music Major, and permission of instructor

Fall and Spring.

MUSIC 215. Advanced Sight Singing and Ear Training. 1 Credit.

Concentrated musicianship training with emphasis on chromatic melodies, advanced rhythmic, melodic, and harmonic dictation.

P: Successful completion of MUSIC 116 with a grade of C or better

Fall Only.

MUSIC 220. Introduction to Jazz Theory and Improvisation. 2 Credits.

An introduction to jazz theory and improvisation through lecture and classroom performance on instrument and voice. Emphasis will be placed on scales, modes and harmonic progressions which are common to the jazz repertoire.

P: Music 151 or conc enrl. Rec: ability to read music.

Spring Even.

MUSIC 224. Popular Music Since 1955. 3 Credits.

Evolution of popular music since 1955 and its relationship to society, especially rock music in the 1960's and early 1970's, the period of greatest stylistic expansion and also the period in which the music was most intimately intertwined with its social milieu.

Fall Only.

MUSIC 242. Jazz and Pop Literature. 2 Credits.

Open to singers or instrumentalists. Students memorize and perform standard pop and jazz literature.

P: Music 151.

Spring Odd.

MUSIC 253. Music Theory III. 3 Credits.

Study of tonal and structural organization in music: non-chord tones, seventh chords, secondary harmonic relationships, methods of modulation, simple forms, counterpoint, and chromatic tonality.

P: MUSIC 116 and MUSIC 152 with a grade of C or better, and completion of MUS APP 102, MUS APP 106 or MUS APP 128

Fall Only.

MUSIC 254. Music Theory IV. 3 Credits.

Advanced study of chromatic tonality in music: methods of modulation, reductionism, advanced chromatic functions, enharmonicism, and materials of impressionism and 20th century technique.

P: Successful completion of MUSIC 215 and 253. REC: conc enrl MUSIC 354.

Spring.

MUSIC 265. Audio Engineering I. 3 Credits.

This course is a transfer destination course for NWTC 10-206-102 and is a requirement for the BA in Music, Audio Production emphasis.

Fall Only.

MUSIC 266. Audio Engineering II. 3 Credits.

This course is a transfer destination course for NWTC 10-206-103 and is a requirement for the BA in Music, Audio Production emphasis.

Spring.

MUSIC 272. Women in the Performing Arts. 3 Credits.

This interdisciplinary course examines the contributions of women in the performing arts and looks closely at the factors which constrain and further women's creativity in a variety of performing genres: dance, theater, opera, musical theater, conducting, composition, etc.
Spring Even.

MUSIC 283L. Integrated Materials in Music. 2 Credits.

A study of the basic materials of music theory with an integrated approach to the visual or aural recognition of those materials.

MUSIC 299. Travel Course. 1-6 Credits.

Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.
P: cons of instr & prior trip arr & financial deposit.

MUSIC 301. Music Technology Systems. 2 Credits.

This course will provide information and experience with the terminology, resources and techniques needed to successfully record, edit, and produce music using a digital audio workstation. In addition, topics such as live sound, analog synthesis, MIDI, and notation software will be explained and used to enhance student-created music.

P: Music 103 and completion or conc enr in Music 152.
Spring Even.

MUSIC 305. Diction for Singers I. 2 Credits.

Introduction to the International Phonetic Alphabet and a specialized approach to diction study for American English and French.
Fall Even.

MUSIC 306. Diction for Singers II. 2 Credits.

Specialized approach to diction study of Italian and German using the International Phonetic Alphabet.
P: Music 305.
Spring Odd.

MUSIC 311. Jazz Improvisation. 1-2 Credits.

Development of skills in musical improvisation: notation and function of chords, chord symbols, scales and rhythms; selected record listening and playing sessions.
P: MUSIC 253
Fall and Spring.

MUSIC 319. Choral/Vocal Techniques. 1 Credit.

This course will provide instruction in: 1) a basic method of teaching vocal production at all levels of public school instruction; 2) basic skills in arranging, adapting, and creating scores for small and large choral ensembles; and 3) basic techniques for choosing high quality choral literature from the Renaissance to the present, suitable for performance at all levels of public school instruction. Course is repeatable for credit; may be taken 3 times for a total of 3 credits.
P: MUSIC 253 and MUS APP 11; and MUSIC 306 or conc enr
Spring Odd.

MUSIC 333. Basic Conducting. 2 Credits.

Detailed study of conducting techniques: practical application to choral and instrumental ensembles.
P: MUSIC 152 and one of the following; MUS APP 102, MUS APP 104, MUS APP 106 or MUS APP 128
Fall Only.

MUSIC 341. Woodwind Techniques. 2 Credits.

Experience in the performance, pedagogy and critical evaluation of woodwind instruments, including flute, oboe, bassoon, clarinet, and saxophone. Experience arranging and adapting music for woodwind players in school ensembles.
P: Music 152 or 153 and one of the following; Mus App 102, 104, 106, 108, 110, 112, 114, 116, 118, 120, 122, 124, 126, 128, 130 or 138.
Fall Even.

MUSIC 342. Brass Techniques. 2 Credits.

Experience in the performance, pedagogy and critical evaluation of brass instruments, including trumpet, French horn, trombone, baritone, and tuba. Experience arranging and adapting music for brass instruments in student ensembles.
P: Music 152 or 153 and one of the following; Mus App 102, 104, 106, 108, 110, 112, 114, 116, 118, 120, 122, 124, 126, 128, 130 or 138.
Fall Odd.

MUSIC 343. String Techniques. 2 Credits.

Experience in the performance, pedagogy and critical evaluation of string instruments, including violin, viola, violoncello and string bass. Experience arranging and adapting music for string players in school ensembles.
P: MUSIC 152 and one of the following; MUS APP 102, MUS APP 106 or MUS APP 128
Spring Odd.

MUSIC 344. Choral Conducting and Rehearsal Techniques. 3 Credits.

Advanced study of conducting and rehearsal techniques for school vocal ensembles, including principles, techniques and methods of choral tone, diction and score study.

P: Music 333; REC: jr st.

Spring Even.

MUSIC 345. Percussion Techniques. 2 Credits.

Experience in the performance, pedagogy and critical evaluation of percussion instruments, including snare drum, timpani, keyboards, and accessories. Experience arranging for percussionists in school ensembles.

P: Music 152 or 153 and one of the following; Mus App 102, 104, 106, 108, 110, 112, 114, 116, 118, 120, 122, 124, 126, 128, 130 or 138.

Spring Even.

MUSIC 348. Instrumental Conducting and Rehearsal Techniques. 3 Credits.

Advanced study of conducting and rehearsing school instrumental ensembles, including score preparation, analysis and musical error detection with specific assignments for marching band and jazz ensemble directing.

P: Music 333; REC: Music 341 or 342 or 343 or 345.

Spring Odd.

MUSIC 353. Music History I. 3 Credits.

Historical examination of Western music from antiquity to the 18th century.

P: Music 152.

Fall Only.

MUSIC 354. Music History II. 3 Credits.

Historical examination of Western music from 19th century to the present..

P: Music 152 and 353.

Spring.

MUSIC 362. World Music. 3 Credits.

Survey of tribal, folk and non-western art music with an emphasis on cultural, social, religious, political and economic context.

Spring.

MUSIC 363. Jazz History. 3 Credits.

Cultural conflict, influence and enrichment that arise when differing traditions of the arts come into contact with Jazz History.

Fall and Spring.

MUSIC 365. Advanced Audio Mixing. 3 Credits.

This course will address intermediate and advanced topics in mixing multitrack audio and digital audio workstation operation, including units in psychoacoustics, effects processing, ear training for audio engineers, and professional audio mixing strategies.

P: MUSIC 151, MUSIC 265, MUS APP 127. REC: MUSIC 152, MUSIC 266, MUS APP 128

Fall Only.

MUSIC 366. Advanced Studio Techniques. 3 Credits.

This course addresses advanced techniques for all stages of multitrack commercial audio production, including tracking, mixing, stem production, and mastering.

P: MUSIC 151, MUSIC 265, MUS APP 127. REC: MUSIC 152, MUSIC 266, MUS APP 128

Spring.

MUSIC 371. Piano Pedagogy. 2 Credits.

A practical introduction to private and group piano teaching at the elementary and intermediate level. Students will develop teaching skills through reading, observation, analysis and practical training.

P: Music 253, Mus App 102

Fall and Spring.

MUSIC 411. Advanced Composition. 1-2 Credits.

An individualized approach to the study of music composition, with an emphasis on large-scale forms and medium to large ensemble works.

P: 4 credits of MUSIC 209, completion of MUSIC 254 with a grade of B or better, and completion of or concurrent enrollment in MUSIC 354.

Fall and Spring.

MUSIC 417. Jazz Arranging. 2 Credits.

Provides students with the knowledge necessary to write jazz arrangements for small and large ensembles.

P: Music 253

Fall and Spring.

MUSIC 423. Seminar in Music Literature. 3 Credits.

Studies in selected areas of music literature for specific media, such as chamber music, opera, music for keyboard, etc., or on works of a single composer.

P: Music 254 and completion of or concurrent enrollment in Music 354.

Spring Even.

MUSIC 453. Materials and Design. 3 Credits.

Investigation of various compositional techniques and formal processes through score study. Concepts explored through composition exercises and original creative works.

P: Successful completion of MUSIC 254 and completion of or concurrent enrollment in MUSIC 354.

Spring.

MUSIC 455. Orchestration. 3 Credits.

This course introduces the basic principles of orchestration and arranging for choral, wind, string, and jazz/pop ensembles. Emphasis is upon the development of practical and technical skills, including score and part preparation and idiomatic writing for ensembles of varying levels. Several hands-on orchestration and arranging projects will promote interactive student learning.

P: MUSIC 103, MUSIC 151, and MUSIC 152

Fall Even.

MUSIC 465. Senior Audio Seminar I. 3 Credits.

This course will address advanced concepts in audio production and engineering, including advanced microphone theory and techniques, surround sound production, structural and physical acoustics, digital audio encoding, and other topics as determined by student needs and interests.

P: MUSIC 365 or MUSIC 366. REC: MUSIC 365 and MUSIC 366

Fall Only.

MUSIC 466. Senior Audio Seminar II. 3 Credits.

This course will further address advanced concepts in audio production and engineering, including advanced microphone theory and techniques, surround sound production, structural and physical acoustics, digital audio encoding, and other topics as determined by student needs and interests.

P: MUSIC 365 or MUSIC 366. REC: MUSIC 365 and MUSIC 366

Spring.

MUSIC 478. Honors in the Major. 3 Credits.

Honors in the Major is designed to recognize student excellence within interdisciplinary and disciplinary academic programs.

P: min 3.50 all cses req for major and min gpa 3.75 all UL cses req for major.

Fall and Spring.

MUSIC 480. Capstone Project. 3 Credits.

Students complete a faculty approved project with one or more faculty members, at least one of which is from Music, culminating in a performance, composition, production, research project, community based activity, internship, travel course, or other approved project.

P: Music 354

Fall and Spring.

MUSIC 495. Teaching Assistantship. 1-6 Credits.

The student and supervising teacher must prepare a statement that identifies the course with which the assistantship will happen, objectives for the assistantship, and expectations in order to fulfill the course objectives. Students are not eligible to receive credit in both the course they assist the instructor with and the teaching assistantship in the same semester. Typically student has previously taken the course prior to enrollment in the assistantship. Course is repeatable for credit.

Fall and Spring.

MUSIC 497. Internship. 1-12 Credits.

Supervised practical experience in an organization or activity appropriate to a student's career and educational interests. Internships are supervised by faculty members and require periodic student/faculty meetings. Course is repeatable for credit.

P: jr st.

Fall and Spring.

MUSIC 498. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. A student wishing to study or conduct research in an area not represented in available scheduled courses should develop a preliminary proposal and seek the sponsorship of a faculty member. The student's advisor can direct him or her to instructors with appropriate interests. A written report or equivalent is required for evaluation, and a short title describing the program must be sent early in the semester to the registrar for entry on the student's transcript.

P: fr or so st with cum gpa > or = 2.50; or jr or sr st with cum gpa > or = 2.00.

Fall and Spring.

MUSIC 499. Travel Course. 1-6 Credits.

Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.

P: cons of instr & prior trip arr & financial deposit.

Nursing (NURSING)

Courses

NURSING 200. Fundamentals of Healthcare Terminology. 3 Credits.

Healthcare professionals have their own language and terminology. If you are interested in pursuing a career in healthcare, health science, or human service, this course will give you a foundation to communicate with physicians, nurses, and other health professionals. The course will focus on the concept of health, clinical terminology and body systems, medical diagnoses and conditions, and trends in several areas of healthcare. Students will be exposed to healthcare-related information and literature sources.

Fall and Spring.

NURSING 240. Introduction to Professional Nursing Concepts. 2 Credits.

This course introduces students to professional nursing concepts for delivery of person-centered, quality nursing care across health settings. Active learning is emphasized as students learn the nursing process and develop clinical judgment skills. Students are introduced to the role of the nurse as a member of the interprofessional healthcare team.

P: Admission to the Traditional Nursing Major

Spring.

NURSING 250. Communicating and Managing Healthcare Information. 2 Credits.

This course introduces students to interpersonal communication and use of information technologies in healthcare. These skills and technologies are critical to the development of therapeutic relationships with patients and the interprofessional healthcare team. Legal and ethical issues related to health information technology and health information exchanges will be examined.

P: Admission to the Traditional Nursing Major

Spring.

NURSING 255. Health Assessment for Nursing Practice. 3 Credits.

This course focuses on the development of interviewing and health history taking skills, as well as, physical examination and psychosocial assessment skills for nursing practice. Students will practice and refine their assessment and psychomotor skills in a laboratory setting. Emphasis on effective communication and documentation skills critical for the provision of safe, effective nursing care are included.

P: Admission to the Traditional Nursing major

Spring.

NURSING 270. Basic & Intermediate Nursing Skills and Simulation. 2 Credits.

This course introduces students to basic and intermediate nursing skills through demonstration and simulations. Student will learn and demonstrate competence in basic skills to provide high-quality patient-centered care.

P: Admission to the Traditional Nursing Major

Spring.

NURSING 280. Pathophysiology Concepts for Nursing Practice. 3 Credits.

An introduction to the basic concepts of pathophysiology. Students examine the phenomena that produce alterations in human physiologic function and the resulting human response highlighting their importance to nursing practice.

P: Admission to the Traditional Nursing major; HUM BIOL 240 or HUM BIOL 221 & 222

Spring.

NURSING 290. Foundations of Nursing Practice: Practicum/Experiential Learning. 2 Credits.

In this clinical course, students demonstrate developing nursing knowledge and skills in the provision of safe person-centered, evidence-based care. Students will develop confidence with the application of skills and clinical judgment in a variety of settings.

P: Admission to the Traditional Nursing Major. REC: NURSING 240, NURSING 250, NURSING 270, NURSING 280

Spring.

NURSING 300. Pharmacology for Nursing Practice. 3 Credits.

An introduction to the basic concepts of pharmacology. Students will focus on the principles of pharmacology and administration, mechanisms of drug actions, contraindications, adverse and toxic effects, and lifespan considerations.

P: Admission to the Traditional Nursing Major; NURSING 240, NURSING 250, NURSING 270, NURSING 280, NURSING 290

Fall Only.

NURSING 305. Healthy Aging and Chronic Care Management. 3 Credits.

This course introduces students to nursing concepts for delivery of evidence-based nursing care of the older adult population. Nursing interventions designed to assist persons with chronic conditions to prevent or reduce common risk factors that contribute to decline in physical and mental function, impair quality of life, and contribute to excess disability are addressed. Students will identify population-focused opportunities to promote wellness for older adults, caregivers/families, and communities.

P: Admission to the Traditional Nursing Major

Fall Only.

NURSING 320. Health & Illness Concepts I. 3 Credits.

This course focuses on health and illness concepts emphasizing delivery of evidence-based, person-centered nursing care across the health/illness continuum. Students apply the nursing process to plan care for individuals across care settings. Exemplars illustrate common health processes and/or alterations of homeostasis and protection, elimination, urinary, and regulatory systems.

P: Admission to the Traditional Nursing Major; NURSING 240, NURSING 250, NURSING 270, NURSING 280, NURSING 290
Fall Only.

NURSING 331. Health & Illness Concepts I: Advanced Nursing Skills/Simulation. 1 Credit.

This course introduces students to advanced nursing skills through demonstration and simulations. Evidence-based clinical reasoning is applied in the simulated setting. Students will demonstrate evolving nursing knowledge and competence in advanced skills to provide safe, high-quality patient-centered care.

P: Admission to the Traditional Nursing Major; NURSING 240, NURSING 250, NURSING 270, NURSING 280, NURSING 290. REC: Co-requisites: NURSING 300, 310, 320, 332 (practicum), 340
Fall Only.

NURSING 332. Health & Illness Concepts I: Practicum. 2 Credits.

In this clinical course, students demonstrate evolving nursing knowledge and skills in the provision of safe person-centered, evidence-based care. Students will apply the nursing process while demonstrating application of nursing concepts, skills and clinical judgment in a variety of settings.

P: Admission to the Traditional Nursing Major; Prerequisite NURSING 240, NURSING 250, NURSING 270, NURSING 280, NURSING 290. REC: Co-requisites: NURSING 300, 310, 320, 331 (advanced skills), 340
Fall Only.

NURSING 340. Quality Improvement. 2 Credits.

Students are introduced to quality improvement as a foundation for quality care and safety. Data to monitor the processes and outcomes of care are discussed. Methods to design and test changes to continuously improve the quality and safety of healthcare systems are explored.

P: Admission to the Traditional Nursing Major; NURSING 240, NURSING 250, NURSING 260, NURSING 270, NURSING 280, NURSING 290; PSYCH 205 or equivalent introductory statistics course
Fall Only.

NURSING 350. Professional Development I: Nursing Theory, Image and Ethics. 3 Credits.

This course examines the history of the nursing profession and nursing theories that contribute to the evolution of nursing's role as a member of the interprofessional healthcare team. The principles that form the cornerstone of biomedical ethical decision making will be applied to the care of persons in diverse settings. Team building and group process skills are further examined.

P: None. REC: NURSING 240, NURSING 340
Spring.

NURSING 360. Health & Illness Concepts II. 3 Credits.

This course focuses on health and illness concepts emphasizing delivery of evidence-based, person-centered nursing care across the health/illness continuum. Students apply the nursing process to plan care for individuals across care settings. Exemplars illustrate common health processes and/or alterations of Oxygenation (Ventilation, Transport, Perfusion) and Movement and Coordination (Neurological system).

P: Admission to the Traditional BSN Major; NURSING 280, NURSING 300, & NURSING 320
Spring.

NURSING 370. Evidence-Based Practice: Translating Research to Practice. 2 Credits.

This course will expose students to research methods and designs and evidence-based practice concepts. Students will learn to critically appraise qualitative and quantitative research methods/designs and nursing literature to inform safe, quality, patient-centered care.

P: Admission to the Traditional Nursing major; junior standing; Elementary statistics or equivalent. REC: NURSING 240, NURSING 250, NURSING 260, NURSING 270, NURSING 280, NURSING 290
Spring.

NURSING 380. Alterations in Health & Illness II: Practicum/Simulation. 2 Credits.

In this clinical course, students will demonstrate advanced nursing knowledge and skills in the provision of safe person-centered, evidence-based care. Students will apply the nursing process while demonstrating confidence with the application of skills and clinical judgment in a variety of settings.

P: Admission to the Traditional BSN Major; Concurrent enrollment in NURSING 360, NURSING 370, NURSING 390. REC: Satisfactory completion of Health and Background Requirements via CastleBranch
Spring.

NURSING 390. Leadership for Sustainable Healthcare: Health Disparities, Health Equity, & the Nursing Profession. 3 Credits.

This course will explore issues of health equity and health disparities from several perspectives. Health disparities are one way we can measure our progress toward achieving health equity. Health equity can be defined as a focus on ensuring opportunities for everyone to attain their highest level of health. Students will examine the role that systems (i.e., health, education, public health, civil, etc.) play in contributing to and addressing these disparities. The Social Determinants of Health (e.g., socioeconomic status, race/ethnicity, gender, education, geography) will provide a framework on which to explore these vulnerabilities.

P: Admission to the Traditional BSN Major; NURSING 240, NURSING 250, NURSING 280, & NURSING 290. REC: Concurrent enrollment in NURSING 350, NURSING 360, NURSING 370, & NURSING 380
Spring.

NURSING 400. Nursing Care of the Childbearing Family. 3 Credits.

This course prepares students to provide nursing care for the childbearing family. Students will recognize the needs of the childbearing family and demonstrate understanding of the nurse's role in providing efficient and cost-effective care. Additional topics include effective communication skills, basic bio/psycho/social/spiritual assessment of the childbearing family, pharmacology and commonly administered medications, principles of comfort and safety, resources and services, and the roles of healthcare team members as they relate to the childbearing family.

P: Admission to the Traditional BSN Major; Senior Standing; NURSING 300, NURSING 320, NURSING 331, NURSING 332, NURSING 360, NURSING 370, NURSING 380. REC: Concurrent enrollment in NURSING 410, NURSING 420, NURSING 430, NURSING 440

Fall Only.

NURSING 407. Foundations of Professional Nursing Practice. 3 Credits.

Philosophical perspectives, theories, and standards are applied to the practice of professional nursing. Factors influencing nursing/health care delivery are analyzed. Professional communication skills are enhanced.

P: Nursing Major and RN License

Fall and Spring.

NURSING 410. Behavioral Health Care Management. 3 Credits.

Apply theories and implement evidence-based care for clients with psychiatric/mental health issues, including psychosocial concepts; cultural, ethical, and legal influences; and wellness of individuals and family groups. Development of professional role in psychiatric/mental health nursing.

P: Admission to the Traditional BSN Major; Senior Standing; NURSING 300, NURSING 320, NURSING 331, NURSING 332, NURSING 360, NURSING 370, NURSING 380. REC: Concurrent enrollment in NURSING 400, NURSING 420, NURSING 430, NURSING 440

Fall Only.

NURSING 420. Nursing with Diverse Populations Practicum. 2 Credits.

This clinical course complements the theory, models, and concepts learned in Nursing Care of the Childbearing Family (400) and Behavioral Health Nursing (410). Students will demonstrate advanced nursing knowledge and skills in the provision of safe person-centered, evidence-based care for individuals and families across the lifespan. Students will apply the nursing process while demonstrating confidence with the application of skills and clinical judgment in a variety of settings while working as a member of a multidisciplinary team.

P: Admission to the Traditional BSN Major; NURSING 240, NURSING 270, NURSING 280, NURSING 300, NURSING 320, NURSING 331, NURSING 332, NURSING 360, NURSING 370, NURSING 380; Conc enr in NURSING 400, NURSING 410, NURSING 430 and NURSING 440

Fall Only.

NURSING 430. Population/Community Health Nursing Theory. 3 Credits.

This course introduces students to nursing concepts for delivery of evidence-based nursing care of individuals, families, populations, and communities to facilitate optimal health outcomes. Nursing interventions are designed at the individual, community, and system levels to prevent or reduce common risk factors.

P: Admission to the Traditional BSN Major.

Fall Only.

NURSING 440. Population/Community Health Nursing Practicum. 1 Credit.

This clinical course complements the theory, models, and concepts learned in Community Health Nursing 430. The focus is on disease prevention and health promotion for individuals, families, and communities applying primary, secondary, and tertiary levels of prevention. Students are exposed to the population-based public health nursing interventions and to the nursing process as it relates to the practice of community health nursing, while working within a multidisciplinary team.

P: Admission to the Traditional BSN Major.

Fall Only.

NURSING 441. Chronic Care Management. 3 Credits.

Exploration of interaction of biological, psychological, social, and environmental factors important to understanding management of chronic conditions at the individual, family, community, and societal levels.

P: Nursing major and RN license

Fall and Spring.

NURSING 446. Research and Evidence-Based Practice. 3 Credits.

This course introduces the importance of research to improve clinical practice, strategies to evaluate the quality of research and evidence, and increase integration of research into practice.

P: Nursing Major and RN license; MATH 260, PSYCH 205 or BUS ADM 220 or conc enr.

Fall and Spring.

NURSING 447. Leadership and Management. 3 Credits.

Examines nursing leadership and management using relevant theories and concepts. Analyze decision making in relation to delegation, supervision, and group process.

P: Nursing Major and RN License

Fall and Spring.

NURSING 450. Health & Illness Concepts III: Complex Care. 3 Credits.

This course focuses on the care of patients experiencing complex, high acuity health conditions. Students synthesize previously acquired knowledge gained in the Health & Illness I and II courses as they examine high acuity patient to plan and provide care. Exemplars illustrating high acuity conditions in all body systems will be applied.

P: Admission to the Traditional BSN Major; Senior Standing; NURSING 400, NURSING 420, NURSING 430, NURSING 440
Spring.

NURSING 453. Information Management and Healthcare Technology. 3 Credits.

Utilize computer and information/decision science to support quality and safety in health care. Explore informatics issues and examine nursing's role in healthcare technology. Opportunities to use and master various healthcare technologies and healthcare data will be given.

P: Nursing major and RN license
Fall and Spring.

NURSING 454. Community Health Nursing. 3 Credits.

This course provides an overview of community nursing theory, roles, tools and skills needed to promote the health of individuals, families, and populations in communities.

P: Nursing Major and RN License
Fall and Spring.

NURSING 455. Community Health Nursing Practicum. 3 Credits.

Community Health Nursing Practicum complements the theory, models, and concepts learned in Community Health Nursing. It is a practice component that brings community health nursing into reality. The focus is on disease prevention and health promotion for individuals, families, aggregates, and communities.

P: Major in Nursing: Nursing 454 or concurrent enrollment
Fall and Spring.

NURSING 461. Care Transitions Practicum Immersion. 4 Credits.

This course is a clinical immersion experience designed to provide comprehensive learning opportunities that promote integration of baccalaureate learning outcomes to prepare the graduate for professional nursing practice. Students will demonstrate advanced nursing knowledge and skills under the direction of a nurse mentor in the provision of safe person-centered, evidence-based care. Students will apply concepts, knowledge, and skills necessary to bridge the gap between education and practice. The attributes of immersion education include demonstrating increasing levels of competency and independence, learner accountability, and self-assessment.

P: Admission to the Traditional BSN Major, Senior standing, NURSING 400, NURSING 410, NURSING 420, NURSING 430, NURSING 440. REC: Concurrent enrollment in NURSING 450, NURSING 470, NURSING 480
Spring.

NURSING 470. Professional Development: Navigating the Nursing Profession. 2 Credits.

This course examines the focuses on professional role socialization and integrates the Nurse of the Future Competency Model. Students will build their skills in resume writing, job interviewing, and career development. Faculty will assist students to develop individualized NCLEX-RN preparation strategies based on a review of the HESI Comprehensive Predictor Examination.

P: Admission to the Traditional BSN Major; Senior Standing; NURSING 400, NURSING 420, NURSING 430, NURSING 440
Spring.

NURSING 478. Honors in the Major. 3 Credits.

Honors in the Major is designed to recognize student excellence within interdisciplinary and disciplinary academic programs.

P: min 3.50 all cses req for major and min gpa 3.75 all UL cses req for major.
Fall and Spring.

NURSING 480. Leadership: Nursing in an Evolving Healthcare System. 3 Credits.

This course introduces students to leadership skills for safe effective practice as a new graduate nurse; issues affecting nursing practice; leadership attributes, e.g., creating effective teams, confident interaction with others, resolving conflict, managing resources, leadership for assuring patient safety and quality care.

P: Admission to the Traditional BSN Major; Senior Standing; NURSING 400, NURSING 420, NURSING 430, NURSING 440
Spring.

NURSING 490. Synthesis for Nursing Practice. 3 Credits.

Course focus is synthesis of professional nursing roles introduced in previous courses. In addition, nursing theories are analyzed in light of their value to practice. Nursing's societal involvement is emphasized.

P: Major in Nursing; Nursing 407, 441, 446, 447, 453, 454, 455, and 492 or conc enrl.
Fall and Spring.

NURSING 492. Special Topics in Nursing. 2-4 Credits.

Course topics vary. Typical topics include Nursing Care of Older Adults, Pharmacology, Pathophysiology, Women's Health Care, Informatics, School Health.

P: major in Nursing.

NURSING 495. Teaching Assistantship. 1-6 Credits.

The student and supervising teacher must prepare a statement that identifies the course with which the assistantship will happen, objectives for the assistantship, and expectations in order to fulfill the course objectives. Students are not eligible to receive credit in both the course they assist the instructor with and the teaching assistantship in the same semester. Typically student has previously taken the course prior to enrollment in the assistantship. Course is repeatable for credit.

Fall and Spring.

NURSING 498. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. A student wishing to study or conduct research in an area not represented in available scheduled courses should develop a preliminary proposal and seek the sponsorship of a faculty member. The student's advisor can direct him or her to instructors with appropriate interests. A written report or equivalent is required for evaluation, and a short title describing the program must be sent early in the semester to the registrar for entry on the student's transcript.

P: fr or so st with cum gpa > or = 2.50; or jr or sr st with cum gpa > or = 2.00.

Fall and Spring.

NURSING 499. Travel Course. 1-6 Credits.

Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.

P: cons of instr & prior trip arr & financial deposit.

Nutritional Sciences (NUT SCI)

Courses

NUT SCI 198. First Year Seminar. 3 Credits.

Reserved for New Incoming Freshman.

NUT SCI 201. Survey of Nutrition Related Professions. 1 Credit.

An overview of the educational, credentialing and practice opportunities for dietetic and related professions. Explore career options for graduates, examine current trends that impact on future jobs, conduct a self-assessment and develop personal career goals.

Fall and Spring.

NUT SCI 202. Ethnic Influences on Nutrition. 3 Credits.

This course examines the ways in which ethnicity influences food habits and can affect nutrition and health status.

Fall and Spring.

NUT SCI 208. Art and Science of Healthy Food Preparation. 3 Credits.

Students will learn principles, practices and techniques of healthy food preparation. Emphasis will be on learning to combine textures, spices, and ingredients to optimize flavor, aesthetic appeal, and nutritional value of prepared foods. Additionally, students will learn to prepare foods appropriate to health maintenance and disease prevention. The course, taught in the food lab, will incorporate both lecture and hands-on (lab) components.

Fall Only.

NUT SCI 212. Science of Food Preparation. 4 Credits.

Studies the chemical, physical and microbiological characteristics of food and the manipulation of these factors to meet quality standards. Laboratory activities demonstrate principles of food science as applied to food preparation, sanitation and safety.

P: Chem 108 with at least a C grade or Chem 211 with at least a C grade.

Fall Only.

NUT SCI 242. Food and Nutritional Health. 3 Credits.

A basic course in nutrition with an emphasis on the application of nutrition concepts to personal everyday life. Covers the role of nutrients (calories, carbohydrates, fats, protein, vitamins and minerals) in promoting health. Evaluates a healthy diet and lifestyle.

Fall and Spring.

NUT SCI 250. World Food and Population Issues. 3 Credits.

World hunger and population growth as interrelated problems. Dimensions of the world food situation and its implications; scope, complex causes and effects of malnutrition; general strategies and obstacles to the solution of world food and population problems.

Fall and Spring.

NUT SCI 260. Childhood Obesity: Challenges and Solutions. 3 Credits.

This course will examine the current national and global research related to childhood obesity, with a focus on the physiological, environmental, and behavioral factors that may predispose children and adolescents to obesity. Strategies for effective treatment and prevention will also be examined.

Spring.

NUT SCI 270. Sport and Performance Nutrition. 3 Credits.

Nutrition is essential to sustain and enhance fitness, performance, and health. This course will analyze nutritional and metabolic factors that optimize peak performance. Scientific methods will be put into practice to develop individualized plans to manage nutrition needs. Nutrition periodization practices will be explored in relation to exercise, sport, and human performance to promote energy, recovery, and health.

Fall and Spring.

NUT SCI 299. Travel Course. 1-6 Credits.

Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.

P: cons of instr & prior trip arr & financial deposit.

NUT SCI 300. Human Nutrition. 3 Credits.

Examines the physiologic and metabolic roles of nutrients and their food sources. Analysis of the nutrient content of diets and requirements for maintenance of health and prevention of chronic diseases.

P: Biology 201/202 with at least a C grade; and Chem 108 with at least a C grade or Chem 212 with at least a C grade.

Fall and Spring.

NUT SCI 312. Quantity Food Production and Service. 4 Credits.

Principles of quantity food preparation, service, and budgeting in food service systems. Projects and laboratories afford pertinent practical experiences.

P: Nut Sci 212 with at least a C grade.

Spring.

NUT SCI 327. Nutritional Biochemistry. 4 Credits.

A lecture/laboratory course of applied organic chemistry and biochemistry with an emphasis on human nutrition and disease. Examines structure/function relationships and reactions of molecules, metabolic regulation and the roles of nutrients in normal and abnormal metabolism.

P: Biology 201/202 with at least a C grade; and both Chem 300 and 301 with at least a C grade or both Chem 303 and 305 with at least a C grade.

Fall Only.

NUT SCI 350. Life Cycle Nutrition. 3 Credits.

Covers nutrient needs and physiologic changes relevant to stages of the life cycle. Also examines psychosocial and environmental conditions that impact on nutrition status in each stage.

P: Nut Sci 300 with at least a C grade.

Spring.

NUT SCI 402. Management in Dietetic Practice. 3 Credits.

Examines management roles and functions in dietetic practice with an emphasis on a system's approach to management. Focuses on leadership skills and tools needed for operational change and quality improvement.

P: Nut Sci 312 or conc enroll.

Spring.

NUT SCI 421. Community and Public Health Nutrition. 4 Credits.

Application and integration of the principles of nutrition concepts and their delivery in the context of social, economic, and cultural environments in various scales of community settings. At the graduate level, emphasis will be placed on agency needs assessment, management and coordination of public health or nutrition programming, and project outcome assessment. At the undergraduate level, a major focus will be on the development and implementation of a nutrition intervention program for a selected target group with measurable goals and objectives.

P: Junior standing, Declared major in Human Biology with a Nutritional Science emphasis or an Applied Public Health emphasis, and NUT SCI 300 with at least a C grade

Fall Only.

NUT SCI 427. Nutrigenomics and Advanced Nutrient Metabolism. 3 Credits.

This course examines several biochemical pathways associated with diet and lifestyle related diseases, with emphasis on the role of nutrition in modulating these pathways and disease risk. Nutrigenomics, oxidation/antioxidants, eicosanoid and inflammation mechanisms, and diet and cancer are covered.

P: NUT SCI 300 with at least a C grade; REC: NUT SCI 327.

Spring.

NUT SCI 478. Honors in the Major. 3 Credits.

Honors in the Major is designed to recognize student excellence within interdisciplinary and disciplinary academic programs.

P: min 3.50 all cses req for major and min gpa 3.75 all UL cses req for major.

Fall and Spring.

NUT SCI 485. Medical Nutrition Therapy I: An Integrative and Functional Approach. 3 Credits.

Theory, principles and application of communication and counseling as applied to behavior changes; application of nutrition assessment and the nutrition care plan process. Health care systems, managed care, and reimbursement.

P: PSYCH 102 or PSYCH 203 with at least a C grade; and NUT SCI 300 with at least a C grade

Fall Only.

NUT SCI 486. Medical Nutrition Therapy II: An Integrative and Functional Approach. 4 Credits.

Principles and applications of nutrition therapy in the prevention and treatment of common and complex diseases.

P: NUT SCI 485 with a least a C grade

Spring.

NUT SCI 487. Nutritional Science Seminar. 1 Credit.

Exploration of the role of the nutrition professional in food and nutrition-related public policy; application of the code of ethics for the dietetics profession.
 P: Senior status and enrollment in Nut Sci/Dietetics emphasis
 Fall Only.

NUT SCI 495. Teaching Assistantship. 1-6 Credits.

The student and supervising teacher must prepare a statement that identifies the course with which the assistantship will happen, objectives for the assistantship, and expectations in order to fulfill the course objectives. Students are not eligible to receive credit in both the course they assist the instructor with and the teaching assistantship in the same semester. Typically student has previously taken the course prior to enrollment in the assistantship. Course is repeatable for credit.
 Fall and Spring.

NUT SCI 496. Project/Research Assistantship. 1-6 Credits.

The student must prepare a research proposal, and both parties should identify the research arrangement and how the student will complete the work to fulfill the course objectives within the assigned term.
 P: Chem 207 and approval by faculty mentor.

NUT SCI 497. Internship. 1-12 Credits.

Supervised practical experience in an organization or activity appropriate to a student's career and educational interests. Internships are supervised by faculty members and require periodic student/faculty meetings. Course is repeatable for credit.
 P: jr st.
 Fall and Spring.

NUT SCI 498. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. A student wishing to study or conduct research in an area not represented in available scheduled courses should develop a preliminary proposal and seek the sponsorship of a faculty member. The student's advisor can direct him or her to instructors with appropriate interests. A written report or equivalent is required for evaluation, and a short title describing the program must be sent early in the semester to the registrar for entry on the student's transcript.
 P: fr or so st with cum gpa > or = 2.50; or jr or sr st with cum gpa > or = 2.00.
 Fall and Spring.

NUT SCI 499. Travel Course. 1-6 Credits.

Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.
 P: cons of instr & prior trip arr & financial deposit.

Organizational Leadership (ORG LEAD)

Courses

ORG LEAD 198. Introduction to Leadership. 3 Credits.

In this course, you will explore perceptions of leadership, reflect on beliefs about leadership and understand the role and influence of leaders in today's society.

ORG LEAD 301. Rising Leadership. 3 Credits.

This course is designed to help learners recognize, assess, and address policies, procedures, and practices related to gender in the workplace, and to guide leaders, and aspiring leaders, in creating organizations in which all employees are encouraged to reach their full potential.

ORG LEAD 302. Gender & Equity in Organizational Leadership. 3 Credits.

This course prepares students to think critically about the ways gender and leadership intertwine in organizations in the form of systems of power, privilege, and oppression. Through exploration of important questions and relevant issues of gender and equity, this course prepares the student to develop an understanding of potential gender barriers in organizations while gaining critical self-awareness around one's own identity and leadership practices. Students will assess the role of effective leadership styles that promote inclusivity in organizations.
 Fall Only.

ORG LEAD 346. Organizational Research and Statistics. 3 Credits.

The focus of this course is on workplace research. Students will learn to identify problems and questions in need of solutions, to collect data that may be relevant to the solution, to use the tools of statistics to analyze and interpret data and to draw conclusions warranted by data analysis.
 P: None. REC: ORG LEAD 198, PU EN AF 344.

ORG LEAD 347. Budgeting and Financial Management. 3 Credits.

This course will examine and address the intersection of budgeting and financial management across all three organizational sectors - public, private, and nonprofit, highlighting similarities and differences. It will delve into techniques, strategies, theories, and applications of budgeting and financial management, with an emphasis on real-world applications in organizations of all sizes and types.
 P: None. REC: ORG LEAD 198; PU EN AF 344.

ORG LEAD 348. Organizational Behavior Across Sectors. 3 Credits.

The course is designed to develop student's skills in managing individuals and groups in business, government, and nonprofit settings. It focuses on the knowledge, self-awareness, and skills appropriate for leaders in organizations such as communication, collective decision-making, conflict negotiation and resolution, motivation, and politics through the lens of the individual.

P: Sophomore status. REC: ORG LEAD 198; PU EN AF 344

Fall and Spring.

ORG LEAD 400. Organizational Leadership Capstone. 3 Credits.

This capstone course helps students synthesize learning in their major, their area(s) of emphasis and/or minor(s), and their general education courses, and provides a platform for discussion and reflection on the meaning and practice of leadership and engaged citizenship.

P: ORG LEAD major and senior status.

ORG LEAD 420. Mindful Leadership. 3 Credits.

In this course, students will explore what it means to be a mindful leader and how leaders are most effective when they are fully aware of their thoughts and actions, and their impact on people and organizations.

P: None. REC: ORG LEAD 198, PU EN AF 344

Fall and Spring.

ORG LEAD 478. Honors in the Major. 3 Credits.

An individual contract is developed in consultation with a faculty member who is proficient in the subject matter of the topic with the approval of the Coordinator Organizational Leadership program.

ORG LEAD 495. Teaching Assistantship. 1-6 Credits.

The student and supervising teacher must prepare a statement that identifies the course with which the assistantship will happen, objectives for the assistantship, and expectations in order to fulfill the course objectives. Students are not eligible to receive credit in both the course they assist the instructor with and the teaching assistantship in the same semester. Typically student has previously taken the course prior to enrollment in the assistantship. Course is repeatable for credit.

Fall and Spring.

ORG LEAD 497. Internship. 1-6 Credits.

Supervised practical experience in an organization or activity appropriate to a student's career and educational interests. Internships are supervised by faculty members and require periodic student/faculty meetings. Must obtain the approval of the Organizational Leadership program coordinator or department chairperson. Course is repeatable for credit; may be taken 3 times or for a total of 6 credits.

ORG LEAD 498. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. A student wishing to study or conduct research in an area not represented in available scheduled courses should develop a preliminary proposal and seek the sponsorship of a faculty member. The student's advisor can direct him or her to instructors with appropriate interests. A written report or equivalent is required for evaluation, and a short title describing the program must be sent early in the semester to the registrar for entry on the student's transcript.

Philosophy (PHILOS)

Courses

PHILOS 101. Introduction to Philosophy. 3 Credits.

This course will acquaint you with some of the more interesting topics and methodologies in Philosophy. Our principal focus is to learn to identify and evaluate philosophical arguments, which we will do by considering topics that circle our endeavor to grasp and understand ultimate reality. Here are some of the questions we will ask: Does the mind exist apart from the body? Do we have free Will? Is life inherently meaningful? Is moral value something that humans alone possess, or is it present in the world around us? Is there such a thing as a 'good' human life?

Fall and Spring.

PHILOS 102. Contemporary Ethical Issues. 3 Credits.

Ethics is one branch of philosophy, and philosophy is an attempt to understand the most basic concepts and theories that people use to understand the nature of the world, human beings, and human beings' place in the world. The main concerns of ethics are the nature of good and evil and the basis of right and wrong conduct. It is easy to form a quick belief about what a good life is, or about whether abortion is right or wrong, whether capital punishment is justified, and so on. Someone may even have some reasons for his/her beliefs on such issues. But in ethics that is not enough. Ethics asks whether the reasons are really good ones, ones that truly justify the belief in question, ones that can truly withstand an objective critical examination, ones that truly fit in well with a solid system of ethical beliefs. This course deals with some of the most important questions of ethics, and tries to answer them on the basis of the highest standards of reasoning. We will first examine a number of different ethical theories. After we have studied ethical theories, we will go on to consider particular ethical issues. These issues will also be critically and systematically examined. Such issues may include abortion, genetic engineering, euthanasia, the death penalty, freedom of speech, war and terrorism, and animal rights.

PHILOS 103. Logic and Reasoning. 3 Credits.

This course introduces the students to the basic concepts and skills of logical reasoning which is central to critical thinking. With the objective of constructing good arguments for successful persuasion and defending ourselves against the illogical and fallacious appeals that bombard us daily, this course examines formal and informal fallacies, rules of syllogisms, and propositional logic and applies these logical tools to samples of real-life situations.

Fall and Spring.

PHILOS 105. Is Morality for Sale?. 3 Credits.

This course hopes to introduce us to the study of morality and moral practice by first asking whether we ought to behave morally and, if so, what, exactly, it might mean to think and act in a moral way. The course will explore several challenges to morality--such as relativism, evolution, and the possibility that God does not exist. We will also examine the moral implications of birth, death, and pleasure, as well as how freedom, equality, and loyalty enter into our moral lives. We will conclude by considering a host of ways in which moral values are or ought (not) to be for sale.

Fall and Spring.

PHILOS 107. Philosophy of Love, Sex, and Friendship. 3 Credits.

A philosophical examination of personal relationships and interactions such as family, friendship, sex, and romance, with an eye toward their relevance to the individual life and the pursuit of happiness, as well as society as a whole and the manner in which it is and ought to be structured around such relationships.

Fall Only.

PHILOS 198. First Year Seminar. 3 Credits.

First Year Seminar

Reserved for New Incoming Freshman

Fall Only.

PHILOS 208. Biomedical Ethics. 3 Credits.

This course is an introduction to biomedical ethics. The first part of the course provides an introduction to basic ethical theory, which is intended to serve as a background aid for thinking through the particular issues discussed in the remainder of the course. Specific topics to be discussed in the second part of the course include confidentiality and truth-telling in the doctor/patient relationship, medical experimentation and informed consent, abortion, treatment decisions for seriously ill infants, physician assisted suicide, and health care reform.

Spring.

PHILOS 212. Philosophy, Religion, and Science. 3 Credits.

This course considers the relationship between science and religious beliefs, explores the value of knowledge, and asks if science needs a moral vision. After considering these theoretical questions, it then examines issues like religion and evolution, religion and natural laws, the mind-body relationship, genetic engineering, human experimentation, cloning, and euthanasia. Students will read texts from thinkers like Francis Bacon, Charles Darwin, Stephen Jay Gould, Richard Dawkins and John Paul II.

Spring Even.

PHILOS 213. Ancient Philosophy. 3 Credits.

The primary objective of this course is to introduce the student to the writings and arguments of the major ancient Greek philosophers. Accordingly, the course is both philosophical and historical. It is philosophical in the sense that we will try to understand the major components of the philosophical theories of the most influential thinkers of ancient Greece as well as examine the reasoning through which they arrived at these theories. It is historical in the sense that we will look at the development and growth of philosophical thought in ancient Greece and, as much as possible, situate these thinkers in their historical context. The course will cover five historical figures or groups of figures in ancient Greek philosophy: 1) Pre -Socratic Philosophers, 2) Socrates, 3) Plato, 4) Aristotle, and 5) Hellenistic Philosophers.

Fall Only.

PHILOS 214. Early Modern Philosophy. 3 Credits.

This course explores the philosophical ideas that served as the catalyst for the radical and moderate enlightenment, spanning roughly from the early 17th century to mid-18th century. Topics discussed include the nature of human identity, the physical and mental world, God, causation, free will, knowledge, and skepticism. We will read selections from Rene Descartes, Nicolas Malebranche, Benedict Spinoza, Gottfried Leibniz, John Locke, George Berkeley, and David Hume. This course will emphasize the critical reading, thinking, and writing skills indicative of the Philosophy discipline.

P: none; REC: Philos 101..

Spring.

PHILOS 216. Introduction to Asian Philosophy. 3 Credits.

The objectives of this course are (1) to help the students to acquire a basic knowledge of the metaphysics, ethics, and natural philosophy of three major Asian philosophies: Buddhism, Confucianism, and Daoism, (2) to enable the student to acquire a deeper understanding of the living values and ways of life characteristic of a major portion of the world's non-Western population, and (3) to aid students in the development of critical thinking and writing skills. Students will gain proficiency in (a) reading philosophical texts closely, (b) critically analyzing arguments, and (c) formulating their own opinions both verbally and in writing. This course is divided into three parts. The first part is on Buddhism, the second part on Confucianism, and the third part on Daoism.

Spring.

PHILOS 217. Introduction to the Philosophy of Religion. 3 Credits.

This course introduces students to the exciting field of the Philosophy of Religion. After exploring basic questions in metaphysics and epistemology, the course will consider topics like God's existence and attributes, problems of evil, religious experience, love, miracles, hell, purgatory, heaven and contemporary atheism. Students will understand controversies about these topics and will be encouraged to develop their own ideas about them.
Fall Only.

PHILOS 220. Environmental Ethics. 3 Credits.

This course aims to raise our awareness of deep philosophical questions about the nature and location of value and how this may alter our understanding of our ethical relation to the environment. You should expect to become more confident in your ability to identify, articulate, and defend your own opinions on ethical issues and to sharpen your critical thinking skills in the process. Topics discussed include whether human interests are ethically dominant, what defines the outer boundary of the ethical sphere, how to best decide between competing ethical interests, whether pragmatism is a value, and how technology informs the discussion.
Fall Only.

PHILOS 227. Business Ethics. 3 Credits.

This course (1) explores basic ethical theories, and (2) examines them as a foundation for determining the rightness or wrongness of various decisions and practices in business. We will focus on specific cases and examples. The fact that there is no one universal set of behaviors considered ethical and no one set of guidelines considered correct poses unique challenges to determining the ethics of business decisions and conduct. But the business world is continually confronted with ethical challenges, situations in which the values and ethics of individuals may conflict with those of the teams or organizations they work for. This course probes ethical topics and issues which people in business face in their workplaces. Among the topics covered are corporate responsibility, and conflicts of interest between public interest and the interests of business, the rights of employees, the ethics of advertising, and the morality of information disclosure.
Fall and Spring.

PHILOS 299. Travel Course. 1-6 Credits.

Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.
P: cons of instr & prior trip arr & financial deposit.

PHILOS 301. Ethical Theory. 3 Credits.

This course aims at acquainting students with a number of major ethical theories in the Western philosophical tradition. Students will read classical and contemporary writings on a number of major ethical topics such as pleasure, egoism, relativism, happiness, moral responsibility, utilitarianism, deontological ethics, and virtue ethics. In addition to the reading, students will focus on reconstructing and critically reflecting the arguments on the issues on these topics in class discussions and writings.

P: none; REC: jr st and one philos cse.

Spring Even.

PHILOS 308. Philosophy and the Sciences. 3 Credits.

Science is often thought to be the ultimate form of objectivity and rational inquiry. But what is 'science'? Is there one scientific method? What reasons do we have to regard it as more truth-conducive than other routes to knowledge? Is there such a thing as a truly unbiased experiment? Do we mean to say that our scientific theories are true? What kind of justification would be required for such claims? And what about the many strange entities of science? Do electrons exist, or are they just useful fictions to fill holes in scientific theories? Are laws of nature real entities?

P: none; REC: Philos 214.

Fall Even.

PHILOS 309. Religion and Medieval Philosophy. 3 Credits.

This course examines main themes in medieval philosophy. After examining the relationship between faith and reason, students will explore the nature of the soul, knowledge, the afterlife, God's existence, the ontology of universals and other important philosophical topics. Readings will include selections from the work of Christian, Islamic and Jewish thinkers like Anselm, Thomas Aquinas, Bonaventure, Duns Scotus, William of Ockham, Maimonides, Averroes and Avicenna.

P: none; REC: Philos 213 and 214.

Spring Odd.

PHILOS 323. Modern Philosophy. 3 Credits.

Course topics vary. In one iteration, this course will work its way through seminal thinkers in nineteenth century philosophy including (though not limited to) Hegel, Marx and Nietzsche. Our aim will be to both connect these thinkers to earlier ideas and trends in Philosophy and to see how they extend such ideas in radically different ways. In another iteration, this course will delve into a somewhat later historical movement in Philosophy - the existentialists. We will begin with the early influence of Russian authors before moving through later thinkers such as Heidegger, Camus and Sartre. The course will include literary and philosophical readings. Course is repeatable for credit if topics differ; may be taken 2 times for a total of 6 credits.

P: none; REC: Philos 213 and 214.

Fall Odd.

PHILOS 324. Contemporary Philosophy. 3 Credits.

Course topics vary, but may include Philosophy of Mind and/or Emotion, Experimental Philosophy, Phenomenology, Contemporary French Philosophy or other recent movements afoot in Europe and America, representing both Analytic and Continental traditions in Philosophy. Course is repeatable if topics differ; may be taken 2 times for a total of 6 credits.

P: PHILOS 214

Spring Odd.

PHILOS 326. Philosophy, Politics and Law. 3 Credits.

The primary objective of this course is to acquaint students with the fundamental concepts, issues, theories, and arguments of political and legal philosophy. Students will read selections from classical and contemporary philosophers on fundamental political and legal issues. We will consider such controversial topics as surrogate motherhood, disability, affirmative action, and same-sex marriage. The emphasis throughout will be on the understanding and critically evaluating the argumentation of the philosophers we will studying. Students will be required to formulate their own arguments on important issues, but their argumentation must be informed with the political and legal theories found in the text.

P: none

Fall Even.

PHILOS 351. Happiness and the Good Life. 3 Credits.

This course examines the concept of a happy life through a study of the Asian philosophies of Buddhism, Confucianism, Daoism. We will be reading primary texts and secondary philosophical texts, and we will watch and examine influential movies and videos on the topic.

P: None REC: Philos 102.

PHILOS 401. Plato and Aristotle. 3 Credits.

This course is critical investigation of the first two comprehensive, philosophical systems of Western civilization. Plato and Aristotle each proposed and argued for a full metaphysics, epistemology, ethics, political philosophy, and philosophy of art. In this course students will be engaged in an in-depth study of their major works.

REC: Philos 213

Fall Odd.

PHILOS 403. Topics in Philosophy. 3 Credits.

Course topics vary. This will be an in-depth study of a current topic or a figure in philosophy and/or an area of research for one of our faculty members. The aim will be to include students in live and contemporary philosophical literature and debates. Course is repeatable for credit if topics differ; may be taken 5 times for a total of 15 credits.

P: upper level cse in Philos.

Fall Even.

PHILOS 420. Metaphysics. 3 Credits.

Metaphysics is the study of Being and the various forms it takes in this world and possibly beyond. It comprises some of the oldest and most difficult questions in Philosophy. In this class we will investigate some of its major historical and contemporary topics, which may include the status of Platonic Forms, the reality and identity of ordinary particulars, what kind of thing causality is, what makes states of affairs possible or necessary, what are space and time, and whether any progress can be made in such endeavors (the question of anti-realism). In a special iteration of this course we look specifically and in great depth at the question of Free Will. We rely entirely on primary-source readings to explore the challenge of free will, the plausibility of compatibilism, and tenability of hard determinism. Along the way, we will discuss how the free will debate informs our thinking about God's foreknowledge, criminal punishment, love and friendship, possible worlds, and even time-travel. Course is repeatable for credit; may be taken 2 times for a total of 6 credits.

P: Philos 213 or Philos 214 REC: Philos 309 or Philos 324

Spring Even.

The student and supervising teacher must prepare a statement that identifies the course with which the assistantship will happen, objectives for the assistantship, and expectations in order to fulfill the course objectives. Students are not eligible to receive credit in both the course they assist the instructor with and the teaching assistantship in the same semester. Typically student has previously taken the course prior to enrollment in the assistantship. Course is repeatable for credit.

Fall and Spring.

PHILOS 497. Internship. 1-12 Credits.

Supervised practical experience in an organization or activity appropriate to a student's career and educational interests. Internships are supervised by faculty members and require periodic student/faculty meetings. Course is repeatable for credit.

P: jr st.

Fall and Spring.

PHILOS 498. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. A student wishing to study or conduct research in an area not represented in available scheduled courses should develop a preliminary proposal and seek the sponsorship of a faculty member. The student's advisor can direct him or her to instructors with appropriate interests. A written report or equivalent is required for evaluation, and a short title describing the program must be sent early in the semester to the registrar for entry on the student's transcript.

P: fr or so st with cum gpa > or = 2.50; or jr or sr st with cum gpa > or = 2.00.

Fall and Spring.

PHILOS 499. Travel Course. 1-6 Credits.

Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.

P: cons of instr & prior trip arr & financial deposit.

Physics (PHYSICS)

Courses

PHYSICS 103. Fundamentals of Physics I. 5 Credits.

A non-calculus physics sequence covering fundamentals of mechanics, energy, power, thermodynamics and sound. Applications to the areas of biology, chemistry, the earth science and technology. During Fall semesters, this is a blended, or hybrid, course. It includes both online and face-to-face components. Full credit will not be granted for both PHYSICS 103 and PHYSICS 201.

P: MATH 104 with at least a C grade or WPT-MFND score >465 and WPT-AALG score >525 and WPT-TAG score >525 or ACT Math score >26 or SAT Math score >630

Fall and Spring.

PHYSICS 104. Fundamentals of Physics II. 5 Credits.

A non-calculus physics sequence covering fundamentals of electricity and magnetism, electronics, light, atomic and nuclear structure and relativity.

Applications to the areas of biology, chemistry, the earth science and technology. During Spring semesters, this is a blended, or hybrid, course. It includes both online and face-to-face components. Full credit will not be granted for both PHYSICS 104 and PHYSICS 202.

P: PHYSICS 103 with at least a C grade or PHYSICS 201 with at least a C grade

Fall and Spring.

PHYSICS 141. Astronomy. 3 Credits.

A study of the solar system, stars, galaxies and universe. High school algebra and geometry competency is highly recommended. Full credit will not be granted for both PHYSICS 141, PHYSICS 143, or both PHYSICS 141 and PHYSICS 144.

Fall and Spring.

PHYSICS 142. Observational Astronomy. 1 Credit.

Observation of solar system, galactic and extra-galactic objects, and introduction to basic observational techniques in astronomy. Includes telescopic and unaided eye observation, positional astronomy, astro-photography, optic spectroscopy, interpretation of astronomical data, and astronomy laboratory exercises. High school algebra and geometry competency is highly recommended.

Fall and Spring.

PHYSICS 143. The Solar System. 3 Credits.

Contemporary understanding of the Solar System; the sky and celestial motions; ancient astronomy; the Copernican revolution; light, gravity, orbits, and astronomical instruments; formation of the solar system; sun, planets and moons; asteroids, comets, meteors and meteorites; and the origin of life. High school algebra and geometry competency is highly recommended. Full credit will not be granted for both PHYSICS 141 and PHYSICS 143.

Fall Only.

PHYSICS 144. Stars, Galaxies and the Universe. 3 Credits.

Contemporary understanding of stellar systems: historical development; light, gravity, atoms and nuclei; astronomical instruments; properties and life cycles of the Sun and stars; black holes; the Milky Way and other galaxies; cosmology. High school algebra and geometry competency is highly recommended. Full credit will not be granted for both PHYSICS 141 and PHYSICS 144.

Spring.

PHYSICS 180. Concepts of Physics. 3 Credits.

Survey of physics, including motion, forces, momentum, energy, solids, liquids, gases, sound, heat, electricity, magnetism, light, atomic and nuclear physics. Designed for non science majors. Full credit will not be granted for both Physics 180 and 103, 104, 201 or 202.

Fall Only.

PHYSICS 181. Concepts of Physics Laboratory. 1 Credit.

Laboratory course to accompany Physics 180. Full credit will not be granted for both Physics 181 and 103, 104, 201 or 202.

P: Physics 180 or conc enr.

Fall Only.

PHYSICS 198. First Year Seminar. 3 Credits.

First Year Seminar, topics vary.

Reserved for New Incoming Freshman.

PHYSICS 201. Principles of Physics I. 5 Credits.

A calculus physics sequence for students of science and engineering. Includes fundamentals of mechanics, Newton's laws, momentum, energy, fluid statics and dynamics; temperature, heat transfer, thermodynamics; vibrations, waves and sound; electric forces and fields, DC and AC circuits, magnetism; atomic structure, semiconductors; electromagnetic waves, light; relativity, quantum mechanics, nuclear physics and elementary particles.

P: MATH 202 with at least a C grade, or concurrent enrollment in MATH 202 with instructor consent

Fall Only.

PHYSICS 202. Principles of Physics II. 5 Credits.

A calculus physics sequence for students of science and engineering. Includes fundamentals of mechanics, Newton's laws, momentum, energy, fluid statics and dynamics; temperature, heat transfer, thermodynamics; vibrations, waves and sound; electric forces and fields, DC and AC circuits, magnetism; atomic structure, semiconductors; electromagnetic waves, light; relativity, quantum mechanics, nuclear physics and elementary particles.

P: Either PHYSICS 201 with at least a C grade or ENGR 214 with at least a C grade

Spring.

PHYSICS 310. Modern Physics. 3 Credits.

Modern physics has opened the door to exciting areas of exploration: very fast, very small, and very large. This course first examines the fast and small (relativity and quantum mechanics) then applies them to the large scale field of cosmology.

P: MATH 202

Spring Even.

PHYSICS 404. Electricity and Magnetism. 3 Credits.

An advanced approach to electrical and magnetic phenomena; waveguides, electrical energy generation and transmission, Maxwell's equations and electromagnetic waves, electric and magnetic properties of matter.

P: Physics 202 with at least a C grade and Math 209 with at least a C grade.

Fall Even.

PHYSICS 417. Nuclear Physics and Radiochemistry. 3 Credits.

Properties and reactions of atomic nuclei; application of the properties of radioactive nuclei to the solution of chemical, physical, biological and environmental problems.

P: Chem 212 and 214 with at least a C grade and Physics 202 with at least a C grade: REC: Chem 321.

Fall Odd.

PHYSICS 420. Advanced Physics Laboratory. 1 Credit.

Upper-level experiments in Nuclear Physics, Optics and the experimental determination of fundamental physical constants.

P: Math 203 with at least a C grade, Physics 310 with at least a C grade.

Fall Odd.

PHYSICS 495. Teaching Assistantship. 1-6 Credits.

The student and supervising teacher must prepare a statement that identifies the course with which the assistantship will happen, objectives for the assistantship, and expectations in order to fulfill the course objectives. Students are not eligible to receive credit in both the course they assist the instructor with and the teaching assistantship in the same semester. Typically student has previously taken the course prior to enrollment in the assistantship. Course is repeatable for credit.

Fall and Spring.

PHYSICS 497. Internship. 1-12 Credits.

Supervised practical experience in an organization or activity appropriate to a student's career and educational interests. Internships are supervised by faculty members and require periodic student/faculty meetings. Course is repeatable for credit.

P: jr st.

Fall and Spring.

PHYSICS 498. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. A student wishing to study or conduct research in an area not represented in available scheduled courses should develop a preliminary proposal and seek the sponsorship of a faculty member. The student's advisor can direct him or her to instructors with appropriate interests. A written report or equivalent is required for evaluation, and a short title describing the program must be sent early in the semester to the registrar for entry on the student's transcript.

P: fr or so st with cum gpa > or = 2.50; or jr or sr st with cum gpa > or = 2.00.

Fall and Spring.

Political Science (POL SCI)

Courses

POL SCI 100. Global Politics and Society. 3 Credits.

The course explores political power and human connections on a global scale. The course covers concepts and ideas on the interaction of governments, organizations, and peoples across regions, cultures, and communities. The course helps students develop a global outlook on their future prospects as citizens and professionals in a globalized world.

Fall and Spring.

POL SCI 101. American Government and Politics. 3 Credits.

The institutions and political processes of American National government and the nature of political analysis; the Constitution, ideological and cultural bases of American politics; the role of political parties, elections and interest groups; policy-making processes in the Congress, the presidency and courts.

Fall and Spring.

POL SCI 102. Introduction to Politics. 3 Credits.

What is the ideal form of government and society? A survey and analysis of ideas related to citizenship in the community, nation and world, with emphasis on competing political values/ideologies and civic engagement.

POL SCI 120. Politics of Crime and Punishment. 3 Credits.

Focuses on the competing goals of public policy in criminal justice, from public order, due process, efficiency, rights and liberties. Analyzes the interplay of key actors including police, courts and prisons in policy-making and implementation. Includes the role of media and myth.

POL SCI 198. First Year Seminar. 3 Credits.

Reserved for New Incoming Freshman.

POL SCI 299. Travel Course. 1-6 Credits.

Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.

P: cons of instr & prior trip arr & financial deposit.

POL SCI 305. Urban Politics and Policy. 3 Credits.

Structures and operations of city governments and their responses to policy issues such as education, employment, social welfare, housing, transportation, migration, racial discrimination, urban sprawl and social inequality. Course examines the role of race and ethnicity in each policy issue.

P: jr st; and POL SCI 101 or UR RE ST 100

Fall Only.

POL SCI 310. The American Presidency. 3 Credits.

The president's role in public policy-making. Topics include the history of the presidency, presidential elections, the nature and use of presidential power, the organization and operation of the executive office, the presidential relationship with Congress and the bureaucracy, and presidential leadership.

P: Pol Sci 101.

Fall Even.

POL SCI 312. Community Politics. 3 Credits.

This course emphasizes the historical dimensions of community politics in the U.S. It also explores the role of grass roots social movements in shaping local politics.

P: none; REC: POL SCI 101.

Spring.

POL SCI 316. Congress: Politics and Policy. 3 Credits.

The role of Congress in American politics and policymaking, including the history of Congress, elections, representation, committees, political parties and leadership, rules and procedures, interest groups and lobbying, presidential-congressional relations, and the role of Congress in both domestic and foreign policy decisions.

P: Pol Sci 101.

Spring.

POL SCI 318. Political Behavior. 3 Credits.

An introduction to political behavior that approaches the topics of elections, public opinion, voting behavior, mass media, and political socialization through the application of quantitative methods of analysis.

P: Pol Sci 100 or 101.

Fall Only.

POL SCI 333. Political Science Research Lab. 3 Credits.

Students will work with a small group of their peers to develop a research project on a contemporary topic related to politics. Over the course of the semester, students will develop a research question, conduct a literature review, gather and analyze data, and write a research paper. Along the way, students will read journal articles, books, and book chapters that will help them refresh their memories on research methods and statistics. Course is repeatable for credit; may be taken 2 times for a total of 6 credits.

P: POL SCI 101 and PSYCH 205. REC: COMM SCI 301 and POL SCI 318

Fall Odd.

POL SCI 340. Political Theory. 3 Credits.

The foundations of Western political theory from the Greek polis to the 20th century. Discusses and analyzes leading political theorists in their historical contexts and in terms of their basic ideas and concepts. Attaches the study of politics to the history of Western political thought and practice.

P: Pol Sci 100 or 101.

Fall Only.

POL SCI 349. American Political Thought. 3 Credits.

The history and development of American political thought, with attention to the thinkers and themes influential to controversies, ideologies, and institutions in American politics.

P: POL SCI 101 OR HISTORY 205 OR HISTORY 206 OR DJS 101

Spring.

POL SCI 351. Comparative Politics. 3 Credits.

The course examines fundamental concepts in the study of the processes and outcomes of politics in a variety of country settings. It illustrates the rich diversity of political life, shows available institutional alternatives, explains differences in political regimes and outcomes, and communicates the importance of global political and economic changes.

P: POL SCI 100 or POL SCI 101

Fall and Spring.

POL SCI 353. Politics of Developing Areas. 3 Credits.

This course examines contemporary problems of comparative political development and changing patterns of political economy in developing areas. The main focus is on the prospects for democracy and economic prosperity after the Cold War.

P: Pol Sci 100 or 101.

Spring Odd.

POL SCI 360. International Relations. 3 Credits.

The course focuses on competing explanations for interaction between state and non-state actors, and analyzes recent changes in international organizations and the international political economy.

P: POL SCI 100 or POL SCI 101

Fall Only.

POL SCI 370. Foreign and Defense Policies. 3 Credits.

Explores the institutions and political processes related to U.S. foreign and defense policies, including the international challenges facing the United States, the nation's policy goals and their evolution over time, the strategies used to achieve those goals, and conflicts over policy implementation and its success.

Spring.

POL SCI 406. State and Local Government. 3 Credits.

Policy and institutional comparisons across states and local governments through hands-on research, placing a special focus on Wisconsin's local governments.

P: POL SCI 101 or PU EN AF 215

Spring.

POL SCI 478. Honors in the Major. 3 Credits.

Honors in the Major is designed to recognize student excellence within interdisciplinary and disciplinary academic programs.

P: min 3.50 all cses req for major and min gpa 3.75 all UL cses req for major.

Fall and Spring.

POL SCI 480. Senior Seminar/Capstone in Political Science. 3 Credits.

This course is designed to be taken during the last semester of one's UW-Green Bay education to cap off training in political science and related fields. In this course, students will complete either a research paper that approaches the standards of graduate school, and thus professional norms of research and publishing, or a significant service learning project designed to put theoretical knowledge into practice. As a result, the course has two major objectives that are organized around important disciplinary research objectives: 1) to practice standard political science research methods and 2) to conduct applied research and activities in political science.

P: Completion of three UL courses required for the major.

Fall and Spring.

POL SCI 495. Teaching Assistantship. 1-6 Credits.

The student and supervising teacher must prepare a statement that identifies the course with which the assistantship will happen, objectives for the assistantship, and expectations in order to fulfill the course objectives. Students are not eligible to receive credit in both the course they assist the instructor with and the teaching assistantship in the same semester. Typically student has previously taken the course prior to enrollment in the assistantship. Course is repeatable for credit.

Fall and Spring.

POL SCI 497. Internship. 1-12 Credits.

Supervised practical experience in an organization or activity appropriate to a student's career and educational interests. Internships are supervised by faculty members and require periodic student/faculty meetings. Course is repeatable for credit.

P: jr st.

Fall and Spring.

POL SCI 498. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. A student wishing to study or conduct research in an area not represented in available scheduled courses should develop a preliminary proposal and seek the sponsorship of a faculty member. The student's advisor can direct him or her to instructors with appropriate interests. A written report or equivalent is required for evaluation, and a short title describing the program must be sent early in the semester to the registrar for entry on the student's transcript.

P: fr or so st with cum gpa > or = 2.50; or jr or sr st with cum gpa > or = 2.00.

Fall and Spring.

POL SCI 499. Travel Course. 1-6 Credits.

Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.

P: cons of instr & prior trip arr & financial deposit.

Psychology (PSYCH)

Courses

PSYCH 97. Math Preparation for Social Science Statistics. 1 Credit.

This course will cover the math preparation you will need to be successful in PSYCH 205 (e.g., order of operations, fractions, lines). We will pace the course so that we practice the math concepts that match up to each week's statistical concepts. Offered on a pass/no credit, non-degree credit basis only.

P: Concurrent enrollment in PSYCH 205

Fall and Spring.

PSYCH 102. Introduction to Psychology. 3 Credits.

Understanding of behavior from psychophysiological, cognitive, social and clinical perspectives; important issues, methods and findings in the study of psychological processes.

Fall and Spring.

PSYCH 198. First Year Seminar. 3 Credits.

First Year Seminar, topics vary.

Reserved for New Incoming Freshman

Fall Only.

PSYCH 203. Introduction to Lifespan Development. 3 Credits.

Human development from conception through death: physical development, social and emotional development, and psychological development. Topics may also include personality development, the development of language, intellectual development and creativity, and the process of human learning.

Fall and Spring.

PSYCH 205. Social Science Statistics. 4 Credits.

An introduction to descriptive and inferential statistics using social science examples. Data analysis and interpretation including computerized statistical software in a lab setting.

P: PSYCH 97; or Concurrent or prior enrollment in PSYCH 97 or WPT:MFND test score ≥ 416 ; or Post-baccalaureate status

Fall and Spring.

PSYCH 225. Career Planning. 1 Credit.

Provides students with the knowledge and resources necessary for effective career decision-making in college. The class sessions and assignments focus on self-assessment, learning and applying career development theories, exploring major and career options, and establishing goals for career/life planning.

Fall and Spring.

PSYCH 299. Travel Course. 1-6 Credits.

Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.

P: cons of instr & prior trip arr & financial deposit.

PSYCH 300. Research Methods in Psychology. 4 Credits.

Critical understandings of empirical research including research ethics, design, data collection, analysis, and communication. Completion of individual and group laboratory projects.

P: PSYCH 102; Previous completion and/or concurrent enrollment of PSYCH 205 or MATH 260 or BUS ADM 220

Fall and Spring.

PSYCH 308. Physiological Psychology. 3 Credits.

Introduction to the biological bases of behavior, such as sleep, hunger, and emotion. Basic sensory, motor, and brain mechanisms are described in reference to normal and abnormal behaviors.

P: Psych 102 AND Hum Biol 102 or Biology 201/202 with a C or better

Fall and Spring.

PSYCH 310. Drugs and Behavior. 3 Credits.

Psychoactive drugs will be studied regarding their effects on the brain, behaviors and society.

P: PSYCH 102 AND HUM BIOL 102 or BIOLOGY 201 & BIOLOGY 202. REC: PSYCH 308

Fall and Spring.

PSYCH 315. Social Cognitive Affective Neuroscience. 3 Credits.

This course illustrates the biological bases of behavior with emphasis placed on the basics of neurobiology and the application of neuroscience to our understanding of social, cognitive, and affective processes such as self-control, decision-making, memory, language, and attention. Neuroscience seeks to understand the design and operating principles of the mind, as instantiated in the brain and body.

P: PSYCH 102

Fall and Spring.

PSYCH 321. Sport and Performance Psychology. 3 Credits.

This course is intended to provide a general overview of sport and performance psychology with lectures, discussions, and interactive activities.

Students will learn basic sport and performance psychology terms, concepts, models, and theories, as well as understand how they affect sport and other (e.g., music) performances.

P: PSYCH 102.

PSYCH 330. Social Psychology. 3 Credits.

An exploration of theory, method, and empirical results regarding individual behavior in groups. Major topics include social cognition, aggression, helping, and attraction.

P: Psych 102 AND Psych 300 or Comm Sci 301 or Psych 302

Fall and Spring.

PSYCH 331. Infancy and Early Childhood Development. 3 Credits.

Current theories, methods of study and research in the study of human development from conception through the early childhood years, and the interrelationships among biological, social, and psychological aspects of development.

P: Psych 203; REC: Psych 300 or Psych 302

Fall and Spring.

PSYCH 332. Middle Childhood and Adolescent Development. 3 Credits.

This course examines salient issues concerning adolescent development. Socio-cultural, psychological and physical growth factors in the developmental process of the adolescent are examined.

P: Psych 203; REC: Psych 300 or Psych 302

Fall and Spring.

PSYCH 343. Adult Development and Aging. 3 Credits.

Theory and empirical research concerning developmental processes across the adult life span; psychological, cultural and biological factors which influence development in young adulthood, middle adulthood and old age.

P: Psych 203; REC: Psych 300 or Psych 302

Fall and Spring.

PSYCH 344. Dying, Death, and Loss. 3 Credits.

Death, dying, and loss from a multidisciplinary diversity perspective; the development of death concepts across the life span, end of life issues, different approaches to understanding grief, and cross-cultural death practices and their relation to the American death system.

P: PSYCH 203; REC: PSYCH 300 or PSYCH 302

Fall and Spring.

PSYCH 345. Human Sexuality. 3 Credits.

Overview of human sexuality including reproductive physiology and health, sexual function and dysfunction, educational and intervention strategies, and sexual orientation and gender expression diversity.

P: PSYCH 203. REC: HUM BIOL 102.

PSYCH 350. Cultural Psychology. 3 Credits.

A cross-cultural examination of core psychological processes and areas of study, such as cognition, emotion, development, and personality.

P: PSYCH 102

Fall and Spring.

PSYCH 380. Conservation Psychology. 3 Credits.

The psychology behind understanding and motivating humans to practice sustainable behaviors.

PSYCH 390. Environmental Psychology. 3 Credits.

Examines ways the built and natural environment influence human behavior; applied in home, community, school, and work environments.

P: PSYCH 102.

PSYCH 401. Psychology of Women and Gender. 3 Credits.

The psychology of women examines traditional and feminist approaches to women in psychological theory and research as frameworks for understanding women's development and experience in family, academic, work, and relationship roles. The interacting influences of biology, socialization, and cultural context are considered. Identity development for males and females throughout the life span, as well as the development and variation of sexual orientation will be discussed.

P: PSYCH 102 or PSYCH 203. REC: PSYCH 203 and PSYCH 300 or PSYCH 302

Fall and Spring.

PSYCH 415. Industrial and Organizational Psychology. 3 Credits.

Examines the human side of organizations from a scientific framework. Topics include job analysis, performance appraisal, employee selection, training, motivation, job satisfaction, work teams, leadership, and organization development.

P: Psych 102 AND Psych 300 or Comm Sci 301 or Psych 302.

PSYCH 417. Psychology of Cognitive Processes. 3 Credits.

Contemporary theory and research on thinking processes; how people understand and interpret events around them; attention, recognition, thinking, memory, language, imagery and problem-solving.

P: PSYCH 102

Fall and Spring.

PSYCH 420. Psychological Testing. 3 Credits.

An overview of the uses and underlying psychometric concepts of psychological tests. Examines selected tests in the areas of intelligence, personality, achievement, and interest assessment. Discusses controversial social, legal, ethical, and cultural issues related to testing.

P: PSYCH 300 or PSYCH 302

Fall and Spring.

PSYCH 424. Psychology of Emotion. 3 Credits.

This is an advanced undergraduate psychology course designed to expose students to the science of emotion. Students will study the many ways in which biological, cultural, cognitive, and other factors can contribute to our emotional experiences.

P: Psych 102 and Psych 300 or Psych 302.

PSYCH 429. Theories of Personality. 3 Credits.

Theories and research in psychology of personality and how biological, emotional, behavioral, social, and cognitive factors affect and are affected by personality.

P: Psych 102 AND Psych 203

Fall and Spring.

PSYCH 435. Psychopathology. 3 Credits.

This is an advanced undergraduate psychology course designed to describe and critique the primary models for defining and evaluating normal and abnormal human behavior in American society. Students will learn about the many ways in which biological, emotional, behavioral, cultural, and cognitive factors can contribute to distress, impairment, and treatment, both to individuals and those around them.

P: PSYCH 102

Fall and Spring.

PSYCH 438. Counseling and Psychotherapy. 3 Credits.

This class provides an introduction to many contemporary approaches to counseling and their theoretical and research base. It also addresses issues relevant to professional practice in the field, along with the roles of development, values, ethics, and context/culture in the counseling process.

P: PSYCH 102

Fall and Spring.

PSYCH 440. Multicultural Counseling and Mental Health. 3 Credits.

This course involves an exploration of cultural groups, beliefs, and practices within the U.S. and focuses on ways that culture, race, ethnicity, and associated concepts, such as oppression and privilege, influence definitions and treatments of mental illness.

P: Psych 102 and sophomore status

Spring.

PSYCH 443. Spirituality and Development. 3 Credits.

This course explores how spirituality, religion, and faith reflect and represent important aspects of development across the lifespan. Important questions to address include the following: How may 'spirituality' be defined? How does religion influence character development? Discussion of theoretical, research, and practice applications.

P: Psych 203.

PSYCH 450. Health Psychology. 3 Credits.

This course examines how health and illness are studied from a psychological perspective. Topics include coping with stress, leading a healthy lifestyle, factors influencing smoking, alcohol use, and exercise, the patient-practitioner interaction, and chronic and terminal illness.

P: PSYCH 102 AND PSYCH 300 or PSYCH 302 or COMM SCI 301.

PSYCH 471. Field Experience I. 2 Credits.

The course will focus on preparation to work with grieving children/adolescents. Students will learn about grief camps for children and help plan activities for Camp Lloyd. Students will prepare for working with the children and each other during Camp Lloyd week.

P: None; REC: PSYCH 344

Spring.

PSYCH 472. Field Experience II. 1 Credit.

Students will gain hands-on experience working with grieving children at Camp Lloyd. Students will prepare for Camp, serve as a Camp Lloyd Buddy, and reflect on their experiences after camp. Course is repeatable for credit; may be taken 4 times for a total of 4 earned credits.

P: PSYCH 344; PSYCH 471.

PSYCH 478. Honors in the Major. 3 Credits.

Honors in the Major is designed to recognize student excellence within interdisciplinary and disciplinary academic programs.

P: min 3.50 all cses req for major and min gpa 3.75 all UL cses req for major.

Fall and Spring.

PSYCH 490. Capstone in Psychology. 3 Credits.

An in-depth, integrative, interdisciplinary exploration of a topic that varies by section or semester. Course is not repeatable for credit.

P: PSYCH 300; Declared major in psychology; REC: Senior Status

Fall and Spring.

PSYCH 492. Applied Research Lab. 3 Credits.

Students are accepted into an applied research lab to acquire in-depth applied research skills working on projects within a group lab setting. Hands-on data application, collection, and interpretation lead to presentations and potential publications. Course may be repeated 4 times for a total of 12 earned credits.

REC: PSYCH 300.

Fall and Spring.

PSYCH 495. Teaching Assistantship. 1-6 Credits.

The student and supervising teacher must prepare a statement that identifies the course with which the assistantship will happen, objectives for the assistantship, and expectations in order to fulfill the course objectives. Students are not eligible to receive credit in both the course they assist the instructor with and the teaching assistantship in the same semester. Typically student has previously taken the course prior to enrollment in the assistantship. Course is repeatable for credit.

P: Psych 102 or Psych 203; 3.0 GPA in Psych and consent of instructor

Fall and Spring.

PSYCH 496. Project/Research Assistantship. 1-6 Credits.

The student must prepare a research proposal, and both parties should identify the research arrangement and how the student will complete the work to fulfill the course objectives within the assigned term.

P: PSYCH 102 OR PSYCH 203 and consent of instructor. REC: PSYCH 300 or COMM SCI 205

Fall and Spring.

PSYCH 497. Internship. 1-12 Credits.

Supervised practical experience in an organization or activity appropriate to a student's career and educational interests. Internships are supervised by faculty members and require periodic student/faculty meetings. Course is repeatable for credit.

P: jr st and gpa > or = 2.75

Fall and Spring.

PSYCH 498. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. A student wishing to study or conduct research in an area not represented in available scheduled courses should develop a preliminary proposal and seek the sponsorship of a faculty member. The student's advisor can direct him or her to instructors with appropriate interests. A written report or equivalent is required for evaluation, and a short title describing the program must be sent early in the semester to the registrar for entry on the student's transcript.

P: fr or so st with cum gpa > or = 2.50; or jr or sr st with cum gpa > or = 2.00.

Fall and Spring.

PSYCH 499. Travel Course. 1-6 Credits.

Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.
P: cons of instr & prior trip arr & financial deposit.

Public & Environmental Affairs (PU EN AF)

Courses

PU EN AF 102. Environment and Society. 3 Credits.

Complex, energy-intensive societies are facing multiple challenges due to finite resources. This course examines the relationship between humans and the biophysical environment at local, national, and global levels. Emphasis is given to the impact of personal attitudes, cultural beliefs, economics, politics, technology and available resources on environmental problems and solutions. We use systems analysis to highlight how our biophysical environment conditions our human endeavors, and how we need to create resilient social systems to achieve a sustainable society.
Fall and Spring.

PU EN AF 103. Environment and Society Lab. 1 Credit.

A natural science course describing the human alteration of the physical environment with the resulting effects on air, water, soils, vegetation, animal life, & humans. Field trip(s) may be required. Meets DPI requirements for environmental education at some UW baccalaureate institutions.
Spring.

PU EN AF 152. Introduction to Graphic Display and Planning. 3 Credits.

This course introduces students to understand large information conveyed in graphics and to develop skills to create graphic design for the purpose of displaying, use and conveying/projecting accurate graphics. The course will give students the basic tools to successfully convey accurate messaging and vision.
Fall Only.

PU EN AF 198. First Year Seminar. 3 Credits.

First Year Seminar, topics vary.
Reserved for New Incoming Freshman.

PU EN AF 202. Introduction to Public Policy. 3 Credits.

Contemporary issues in American public policy. Substantive public policies such as those dealing with the American economy, health care, energy, environmental quality, the welfare state and social programs. Models of the policy process are also considered.
Fall and Spring.

PU EN AF 215. Introduction to Public Administration. 3 Credits.

Using case studies, this course explores the principal tools and methods for conducting public affairs, the external and internal elements affecting public agencies, and the role of these elements and the human dimension in creating and implementing public policies and programs.
Fall and Spring.

PU EN AF 220. Economics, Politics, and Government Action. 3 Credits.

Today, government plays a huge role in the economy in three broad ways. First, there is a large and growing array of economic laws and regulations. Second, the government provides a large range of services through various government programs and agencies. These include Social Security, Medicare, Medicaid, government housing, unemployment and disability insurance, and various poverty programs, among others. Finally, government programs need to be financed. These include the federal income tax, state income taxes, Social Security taxes, inheritance taxes, property taxes, and high excise taxes on goods such as gasoline, alcohol and tobacco products, among others.
Spring.

PU EN AF 225. Introduction to the Nonprofit Sector. 3 Credits.

The purpose of this course is to introduce students to the world of nonprofit organizations including the diverse range of organizations and the activities they engage in and the enormous range of services that the sector provides. The course takes a macro-level approach, focusing on the sector as a whole. Through community engagement and guest speakers, students learn the opportunities and career paths that exist in this field.
Spring.

PU EN AF 254. Introduction to Designing with Communities and Neighborhoods. 3 Credits.

The main objective of the course is to introduce students to the fundamentals of urban design and allow students to engage with and critically assess design elements that create places that foster community identity and place making. The course addresses the vexing problems in residential, commercial, office, recreational and public areas in small cities.
Fall Only.

PU EN AF 299. Travel Course. 1-6 Credits.

Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.
P: cons of instr & prior trip arr & financial deposit.

PU EN AF 301. Environmental Politics and Policy. 3 Credits.

U.S. and global environmental problems and their political implications. Emphasizes U.S. environmental politics, issues and controversies in environmental protection policy, the performance of governmental institution in response to environmental challenges, and strategies for environmental improvement.

P: POL SCI 101 or PU EN AF 202

Fall Only.

PU EN AF 306. Regulatory Policy and Administration. 3 Credits.

The origins, purposes and operation of regulatory agencies and the programs in the U.S.: theories of regulation, issues and controversies in regulatory policy, and decision-making in such areas as economic regulation, public health, consumer protection workplace safety and environmental quality.

P: POL SCI 101 or PU EN AF 202

Fall Even.

PU EN AF 314. Administrative Law. 3 Credits.

Administrative law in the American federal (intergovernmental) system: connections between administrative law issues and issues of public policy; and legal dimensions of administrative problems.

P: POL SCI 101 or PU EN AF 215

Fall Only.

PU EN AF 315. Public and Non-Profit Management. 3 Credits.

Using applied learning techniques, this course explores management in public and nonprofit organizations from the perspective of a manager. Topics include board leadership, role of executive, motivation, marketing, fundraising, planning, and more. Students investigate and analyze the management practices of a local organization.

P: POL SCI 101 or PU EN AF 202 or PU EN AF 215 or PU EN AF 225.

PU EN AF 322. Environmental Planning. 3 Credits.

History, processes, and impacts of environmental planning in the United States. Action forcing legislation and its effect on environmental issues and processes. Combines earth sciences and natural sciences with mapping and planning to understand key aspects of adapting our built environment to not impose further on our natural environments, and in fact to remediate some of the damage caused to natural environments and social well-being. Emphasizes adaptive environmental planning and implementation at the national, state, and local levels in the contexts of growing human populations, decreasing natural resources, and climate change.

REC: PU EN AF 102 or Env Sci 102.

Spring.

PU EN AF 323. Sustainable Land Use. 3 Credits.

How do we develop walkable, equitable communities and sustainable land use plans for urban and rural areas? This course uses a systems perspectives analysis of land use control methods, legal foundations, social implications, environmental impacts, financial influences, civil and property rights, cumulative impacts, and more. Land use is an increasingly contested topic due to external financial interests, growth pressures, shifting populations, and conditions placed on personal or property rights. Sustainable land use planning requires understanding the interplay between humans and the landscapes we live in or draw from and the constraints or opportunities we work with to fashion more sustainable land use at the local, regional, and national level.

P: None. REC: PU EN AF 202 or ENV SCI 102

Fall Even.

PU EN AF 324. Transitioning to Sustainable Communities. 3 Credits.

Rising energy costs and climate change mean that we need resilient communities based on localizing inputs/outputs to support health, jobs, housing, transportation, schools, agriculture and city services. We emphasize the many facets of human settlements and the increasingly limited biophysical resources we depend on to structure our social, economic, and environmental systems, and how to make them self-sustaining, energy-efficient, and reliant on local control for job creation, wealth creation, food production and other land use issues. Systems analysis allows us new perspective of the complexities surrounding these interconnected problems. Applying innovative strategies in every sector of daily life will make communities more resilient as they face higher energy costs and climate variability.

P: None. REC: PU EN AF 202 or ENV SCI 102

Fall and Spring.

PU EN AF 326. Philanthropy: Civic Engagement through Giving. 3 Credits.

A hands-on, student-led course where students give away an actual grant to a local organization. After studying community needs, interviewing experts, gathering local data, working with nonprofits and learning from area philanthropists, students choose how to allocate actual funds (provided by community partners) to one or more to organizations in the community. Appropriate for all majors.

Spring.

PU EN AF 335. Principles and Practices of Emergency Management. 3 Credits.

The philosophy of comprehensive Emergency Management will be discussed with the four attendant steps, which include mitigation, preparedness, response and recover. In addition, legal issues involving state and Federal law effecting emergency operations will be studied.

REC: Pu En Af 315.

PU EN AF 336. Strategic Emergency Preparedness, Planning and Implementation. 3 Credits.

Strategic planning and budgeting is a very important component in emergency planning and mitigation. Learn how to acquire and allocate resources, plan for crises with or without warning, and implement preparedness programs.

PU EN AF 337. Disaster Response Operations and Management. 3 Credits.

Examine the roles and responsibilities of the players in a crisis event. Explore the various problems associated with response operations such as: inadequate preparedness measurers, safety and site security, politics, and record keeping.

PU EN AF 338. Disaster Recovery. 3 Credits.

Examine disaster recovery in isolation. Explore the short and long term effects of disasters, as well as, the process of putting families, businesses and communities back together. You will learn the importance of reconstruction and relocation.

PU EN AF 339. Political and Policy Dimensions of Emergency Management. 3 Credits.

This course considers the political and policy environment in which emergency management is practiced. It focuses on political processes and phenomena associated with mitigating the likely effects of extreme events, responding to them, and recovering from them. The course is intended to help emergency managers develop an understanding of local, state, federal, and intergovernmental politics affecting and affected by extreme events.

PU EN AF 344. Leadership in Organizations. 3 Credits.

There is no single leadership theory or approach that will universally apply across all situations. The purpose of this course is to introduce students to the major theories and models of leadership with a focus on how we can use these theories and models to transform our leadership in practice. Through the use of interactive course activities, students will identify strong leadership practices and distill principles of exemplary leadership for use in their own organizations and communities.

P: None. REC: ORG LEAD 198.

PU EN AF 345. Human Resource and Risk Management. 3 Credits.

This course is applicable to organizations which utilize paid or volunteer staff and face multiple sources of risk to their functioning. Topical coverage will include risk assessment and planning as well as staff development, performance standards, and professional practices regarding proper interviewing, hiring, evaluation and dismissal procedures. Legal requirements and the institutional setting for both human resource and enterprise risk management will be examined.

Fall and Spring.

PU EN AF 351. Water Resources Policy and Management. 3 Credits.

The world faces unprecedented challenges as vital water is used and abused, mismanaged and wasted. This course is a comprehensive analysis of the current state of water issues and future implications, introducing basics of water management and planning. Topics covered are: basic hydrological cycle, human impacts on the hydrologic cycle, water pollution, flood and drought, mining of aquifers, water conflicts, state water laws, historical municipal and irrigation development, dams and pipelines, water and wastewater treatment (and related laws), effects of land use, effects of climate change, FOOD-ENERGY-WATER nexus, economics of water, and contemporary strategies to improve water use and quality. Focus is mostly national, with many local and global examples.

Spring.

PU EN AF 360. Immigration and Immigration Policy. 3 Credits.

The course explores the dynamics and evolution of U.S. immigration policies with attention to issues of restriction, integration, citizenship, and belonging. Social and cultural dimensions of immigration, divisions of power in immigration policy making and enforcement, and policies towards refugees and asylum-seekers are included.

P: jr st.

Fall Only.

PU EN AF 378. Environmental Law. 3 Credits.

An overview of major environmental laws such as the Clean Air and Clean Water Acts, with emphasis on how these laws are implemented by the federal and state governments.

P: POL SCI 101 or PU EN AF 202 or PU EN AF 215

Fall Only.

PU EN AF 379. Natural Resources Policy, Law, and Administration. 3 Credits.

This course examines public land and resources policy, law and administration from multiple perspectives. It covers environmental and administrative decision making and various contemporary resource management problems and conflicts.

P: Pol Sci 101 or Pu En Af 202

Spring Even.

PU EN AF 380. Global Environmental Politics and Policy. 3 Credits.

This course explores the transnational and international context of environmental politics and policy. Particular focus areas include the causes of environmental harm, the meaning of sustainability, and the relevance of new environmental actors on the global stage.

P: jr st. REC: POL SCI 100

Spring.

PU EN AF 390. Colloquium in Environmental Sustainability & Business. 1 Credit.

Required component of the Certificate in Sustainability and the Sustainability Minor. Focus is placed be upon the nature of systems thinking systems dynamics, and problem solving. Will address systems dynamics in natural world policy creation, human creativity and the arts, and business decision making. Latter half of class is applications focused. Course is non-repeatable for credit; course may be taken for 1 credit which is offered in the first 5 weeks of the semester to satisfy the 1 credit component of the Certificate of Sustainability and to satisfy the first of 3 required Colloquium credits taken for the Sustainability Minor.

P: jr st & EMBI certificate enrollment or sustainability minor enrollment
Fall and Spring.

PU EN AF 391. Colloquium in Environmental Sustainability & Business II. 2 Credits.

Required component of the Sustainability Minor. Focus is placed be upon the nature of systems thinking systems dynamics, and problem solving. Will address systems dynamics in natural world policy creation, human creativity and the arts, and business decision making. Course is non-repeatable for credit; course must be taken for 2 credits which are offered in the last 9 weeks of the semester to satisfy the remaining 2 required Colloquium credits needed for the Sustainability Minor.

P: PU EN AF 390. REC: jr st & sustainability minor enrollment
Fall and Spring.

PU EN AF 407. Service in the Public Sector. 3 Credits.

This course explores what is meant by public service, with a special focus on service in local governmental settings. The course considers case studies from the International City/County Management Association and what management and leadership in local government entails. Course is repeatable for credit; may be taken 2 times for a total of 6 credits.

P: POL SCI 101 or PU EN AF 202 or PU EN AF 215 or PU EN AF 225
Fall Only.

PU EN AF 408. Public Policy Analysis. 3 Credits.

An introduction to public policy analysis and to the policy-making process, primarily in American government. The course emphasizes the political aspects of policy analysis, models and methods for rational design of public policies, and applications of policy studies to particular public problems.

P: POL SCI 101 or PU EN AF 202 or PU EN AF 215 or PU EN AF 225
Fall and Spring.

PU EN AF 415. Public and Nonprofit Budgeting. 3 Credits.

The purposes and attributes of major public budgetary systems: principles and methods in designing and managing relationships among program planning, policy planning and budgetary operation; applications of analytical and decision-assisting tools in public budgetary operations.

P: POL SCI 101 or PU EN AF 202 or PU EN AF 215
Fall and Spring.

PU EN AF 425. Fundraising and Marketing for Nonprofits. 3 Credits.

The course is designed for students aspiring to manage a nonprofit or serve on a Board of Directors. Throughout the semester, students develop a portfolio of marketing and fundraising plans and materials for a nonprofit organization. Emphasis on writing for social media, case statements, total development plans, and grant seeking.

P: Pu En Af 315
Fall Only.

PU EN AF 428. Public and Nonprofit Program Evaluation. 3 Credits.

A course that develops a working understanding and selected skills relating to the conduct of program evaluations. This course focuses on skills needed to identify and measure program outcomes in order to ensure the effectiveness of programs. Throughout the semester, students develop an actual evaluation plan in partnership with a local public or nonprofit organization, developing professional skills including writing, presenting, communicating, and working in teams.

P: POL SCI 101 or PU EN AF 202 or PU EN AF 215 or PU EN AF 225.

PU EN AF 430. Seminar in Ethics and Public Action. 3 Credits.

A capstone course intended to introduce a range of ethical concerns in public affairs. Through theoretical and case study readings and applied projects, students deal with ethical issues and varied responses to them.

Fall and Spring.

PU EN AF 431. Building Sustainable Landscapes. 3 Credits.

This course covers the principles, materials, and methods you need to know for building a wide variety of outdoor sustainable projects to create resilient environments. Topics cover remediating brownfields, healing injured soils, stabilizing slopes, using living materials, collecting and reusing water, raingardens and swales, porous pavements, materials origin and fate, embodied energy and maintenance energy costs, native plants and permaculture designs, urban agriculture and wildlife corridors, using light and darkness to your advantage, reducing noise, sustainable inputs to landscape maintenance, certification or other ways of measuring sustainable outcomes, pre-construction considerations, and more. Students will apply these concepts in a small demonstration project. No previous construction experience required.

P: None. REC: PU EN AF 102 or ENV SCI 102 or consent of instructor
Fall Odd.

PU EN AF 450. Advanced Geographic Information Systems. 3 Credits.

Project-based course using ArcGIS. Students define a project, develop a database, analyze spatial data, and develop GIS maps displaying results of their analysis.

P: Geog 350 or Pu En Af 350.

Spring Even.

PU EN AF 452. Planning Theory and Methods. 3 Credits.

Planning for public and not-for-profit agencies: theory and practical significance of planning; the political and administrative setting of planning operations; and methods of planning analysis such as strategic planning.

P: BUS ADM 220 or PSYCH 205 or MATH 260

Fall Even.

PU EN AF 461. Special Topics in Public and Environmental Affairs. 3 Credits.

An interdisciplinary study of public policy issues selected from public administration and environmental policy and planning. Includes issues such as health care reform, environmental policy analysis, policy planning.

PU EN AF 478. Honors in the Major. 3 Credits.

Honors in the Major is designed to recognize student excellence within interdisciplinary and disciplinary academic programs.

P: min 3.50 all cses req for major and min gpa 3.75 all UL cses req for major.

Fall and Spring.

PU EN AF 490. EMBI Co-Op/Experience. 3 Credits.

Required component of the Certificate in Environmental Sustainability and Business. Enrolled students will be placed by EMBI in a business, nonprofit, or governmental setting that involves interdisciplinary problem solving within an environmental sustainability context. This will be a special co-op/ internship/project experience. Course is repeatable for credit; may be taken 2 times for a total of 6 credits.

P: Junior standing and enrollment in Environmental Sustainability and Business certificate program.

Fall and Spring.

PU EN AF 493. Peer Mentor for First Year Seminar. 3 Credits.

In this course, students will work in First Year Seminar classes as peer mentors for first year students. Peer mentors will help promote the development of skills relevant to student success, will encourage student engagement with the university, and will act as a role model for first year students. Through this work, peer mentors will learn about college student development and effective practices in teaching and learning, will develop professional and interpersonal skills such as communication and leadership, and will have the opportunity to apply this knowledge in their work with first year students.

P: Successful completion of First Year Seminar and approval of Instructor.

Fall and Spring.

PU EN AF 495. Teaching Assistantship. 1-6 Credits.

The student and supervising teacher must prepare a statement that identifies the course with which the assistantship will happen, objectives for the assistantship, and expectations in order to fulfill the course objectives. Students are not eligible to receive credit in both the course they assist the instructor with and the teaching assistantship in the same semester. Typically student has previously taken the course prior to enrollment in the assistantship. Course is repeatable for credit.

Fall and Spring.

PU EN AF 496. Project/Research Assistantship. 1-6 Credits.

The student must prepare a research proposal, and both parties should identify the research arrangement and how the student will complete the work to fulfill the course objectives within the assigned term.

P: jr standing or higher. REC: completion of COM SCIENCE 205 Social Science Statistics (or similar course) and COM SCI 301 Foundations for Social Research (or similar course).

PU EN AF 497. Internship. 1-12 Credits.

Supervised practical experience in an organization or activity appropriate to a student's career and educational interests. Internships are supervised by faculty members and require periodic student/faculty meetings. Course is repeatable for credit.

P: jr st.

Fall and Spring.

PU EN AF 498. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. A student wishing to study or conduct research in an area not represented in available scheduled courses should develop a preliminary proposal and seek the sponsorship of a faculty member. The student's advisor can direct him or her to instructors with appropriate interests. A written report or equivalent is required for evaluation, and a short title describing the program must be sent early in the semester to the registrar for entry on the student's transcript.

P: fr or so st with cum gpa > or = 2.50; or jr or sr st with cum gpa > or = 2.00.

Fall and Spring.

PU EN AF 499. Travel Course. 1-6 Credits.

Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.

P: cons of instr & prior trip arr & financial deposit.

Supply Chain Management (SCM)

Courses

SCM 200. Principles of Supply Chain Management. 3 Credits.

This is an introductory course in supply chain management (SCM). This will allow students to understand the components of supply chain management; its role within the function and across other functions in an enterprise.

P: BUS ADM 130 AND (BUS ADM 220 or MATH 260 or PSYCH 205 or ORG LEAD 346)

Fall and Spring.

SCM 298. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. A student wishing to study or conduct research in an area not represented in available scheduled courses should develop a preliminary proposal and seek the sponsorship of a faculty member. The student's advisor can direct him or her to instructors with appropriate interests. A written report or equivalent is required for evaluation, and a short title describing the program must be sent early in the semester to the registrar for entry on the student's transcript. Course is repeatable for credit.

P: fr or so st with cum gpa > or = 2.50; or jr or sr st with cum gpa > or = 2.00.

Fall and Spring.

SCM 380. Project Management. 3 Credits.

Project management is an essential component in today's business environment, particularly in Supply Chain Management. This course covers the project management methodology recommended by the Project Management Institute, USA (PMI). It prepares students for successfully managing projects or new initiatives in organizations from inception to completion in a consistent and structured manner. This course provides standardized terms and exposes students to the knowledge area, process groups, and processes defined in the Project Management Book of Knowledge (PMBOK) and used in project management worldwide. It prepares students for clearly defining the scope of a project, including budgeting and cost management, human resource planning, communication planning, stakeholder analyses, and submission of the final product/service to operations associated with a project.

P: BUS ADM 130 AND (BUS ADM 220 or MATH 260 or PSYCH 205 or ORG LEAD 346)

Fall and Spring.

SCM 381. Operations Management. 3 Credits.

The first part of the operations management course will provide features of production/service systems, methods of modeling, and the control system for operations/service. Topics include aggregate planning, forecasting techniques, workforce, and operations scheduling, and material requirement planning. The second part will cover the models and techniques for managing inventory systems, the deterministic and stochastic inventory models, and lot sizing in continuous and periodic review systems.

P: SCM 200 and an overall minimum GPA of 2.5

Spring.

SCM 383. Enterprise Resource Planning. 3 Credits.

The Enterprise Resource Planning (ERP) course provides details on the need and the use of an ERP system in supply chain management (SCM) in industries. It provides the basic structure of an ERP system in an organization. It is a hands-on course to be taught in a computer lab to train students on the use of an ERP system. This course will provide training on various aspects of SCM functions such as how to: (1) create/modify/delete an item-master, a vendor-master, a purchase order and a contract; (2) request an advance from accounts; (3) check inventory of raw material, work-in-progress (WIP), and finished goods; and (4) look for demands.

P: SCM 200 and an overall minimum GPA of 2.5

Fall Only.

SCM 384. Supply Chain Management. 3 Credits.

This course allows students to understand the components of Supply Chain Management (SCM), and its role within and across the function in an enterprise. The objectives of supply chain management are to create value, build a competitive infrastructure, leverage worldwide logistics, synchronize demand and supply, and to measure performance. SCM deals with storage and distribution of goods and services, in the right quantity, right condition, at the right time, and in the right place. The goal of this course is to provide an overview of the supply chain management function and associated concepts. The course provides an understanding of the activities involved in this function. This course also provides a basic understanding of the analytical tools and applications used in SCM. The course introduces some challenges in managing global supply chains. The course provides an opportunity to work in teams, explore a real-life situation related to concepts taught in the course, and to do a research project.

P: SCM 200

Fall and Spring.

SCM 434. Logistics Management. 3 Credits.

This course is about logistics and transport management. The course allows students to deepen their knowledge and understanding of various logistics & transportation management components, their role across other functions in an enterprise, and their importance in the global business environment. The primary objective of logistics management is to provide support for the storage and distribution of goods and services, from an enterprise to customers, and any returns from customers to an enterprise with or without channel partners. This course aims to build on the learnings from the previous SCM courses and provide an in-depth understanding of the roles of the logistics function, concepts, and principles used in addressing the needs of an enterprise while minimizing the costs and environmental impacts.

P: SCM 200 and overall minimum GPA of 2.5

Fall Only.

SCM 495. Teaching Assistantship. 1-6 Credits.

The student and supervising teacher must prepare a statement that identifies the course with which the assistantship will happen, objectives for the assistantship, and expectations in order to fulfill the course objectives. Students are not eligible to receive credit in both the course they assist the instructor with and the teaching assistantship in the same semester. Typically student has previously taken the course prior to enrollment in the assistantship. Course is repeatable for credit.

Fall and Spring.

SCM 496. Project/Research Assistantship. 1-6 Credits.

The student must prepare a research proposal, and both parties should identify the research arrangement and how the student will complete the work to fulfill the course objectives within the assigned term.

Fall and Spring.

SCM 498. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. A student wishing to study or conduct research in an area not represented in available scheduled courses should develop a preliminary proposal and seek the sponsorship of a faculty member. The student's advisor can direct him or her to instructors with appropriate interests. A written report or equivalent is required for evaluation, and a short title describing the program must be sent early in the semester to the registrar for entry on the student's transcript. Course is repeatable for credit.

Fall and Spring.

Sociology (SOCIOLOGY)

Courses

SOCIOLOGY 101. Introduction to Sociology. 3 Credits.

Major sociological concepts and ideas and their application to contemporary societies.

Fall and Spring.

SOCIOLOGY 130. Contemporary Social Problems. 3 Credits.

Sociological analysis of the nature, extent, causes, and potential solutions to selected major social problems such as poverty and wealth, racial and gender discrimination, crime and violence, drug abuse, family problems, quality of education, inadequate health care, population problems, intergroup conflict, and threats to the environment.

SOCIOLOGY 160. Sociology of Human Sexuality. 3 Credits.

Sociological overview of issues in human sexuality. Course is based on sociological investigations of the origins, nature and biosocial consequences of varying customs and ideals of human sexuality. Among topics that may be covered are: sex and family life, contraception, abortion and social power, violations of sexual norms and ideas about sexual propriety, origins and impact of sexual liberation movements, sociosexual aspects of epidemics, sociological interpretations of sexual dissatisfactions.

SOCIOLOGY 203. Ethnic and Racial Identities. 3 Credits.

The character of racial, religious and ethnic minority groups; social and economic adjustments in American society; the role of private and public agencies.

P: SOCIOLOGY 101 or ANTHRO 100

Fall Only.

SOCIOLOGY 220. Sociology of Marriage and the Family. 3 Credits.

Marriage and the family as social institutions in a changing world. Historical changes and societal variations in family patterns. Changes over the life cycle. Explores the sources and consequences of a variety of family forms.

SOCIOLOGY 235. Introduction to Social Psychology. 3 Credits.

Introduction to the study of social psychology with focus on sociological contributions to the study of social interaction and small group theory; topics may include: socialization, motivation, attitudes, values, communications, leadership.

P: SOCIOLOGY 101

Spring Odd.

SOCIOL 238. Sociological Perspectives on Gender. 3 Credits.

A sociological examination of roles assigned to women and men in society, including the experiences of marriage, parenthood, employment and occupational attainment. Pays particular attention to gender role socialization and its cultural reinforcement, to patterns of gender relations and to ongoing changes.

SOCIOL 246. Juvenile Delinquency. 3 Credits.

Overview of history and theories of juvenile delinquency, family and school relations, and best practices and programs in dealing with juvenile delinquency.

P: None. REC: SOCIOL 101 or ANTHRO 100.

SOCIOL 299. Travel Course. 1-6 Credits.

Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.

P: cons of instr & prior trip arr & financial deposit.

SOCIOL 302. Class, Status and Power. 3 Credits.

Class, status and power as determinants of group interests, preferences, ideologies and struggles; examination at the national and international levels.

P: SOCIOL 101

Spring Even.

SOCIOL 303. Race and Ethnic Relations. 3 Credits.

Comparative study of race and ethnic relations in the United States and other countries. The focus is on theories of race relations and ethnic stratification and the importance of these issues in national and international perspective. Case studies of ethnic relations in particular countries (e.g., South Africa, Brazil, Malaysia, Lebanon, Soviet Union) will be emphasized.

P: SOCIOL 101 or SOCIOL 203

Fall Odd.

SOCIOL 304. Deviant Behavior. 3 Credits.

Foundations of morality and the relationship between morality and deviance; positive and negative aspects of both deviance and conformity.

P: SOCIOL 101.

SOCIOL 307. Social Theory. 3 Credits.

Critical analysis of classical and contemporary social theories with attention to the social and intellectual context and contemporary application.

P: SOCIOL 101

Fall Even.

SOCIOL 308. Sociology of the Family. 3 Credits.

A sociological approach to marriage and families in American society: historical changes in family life; the problems of defining family; social class; ethnicity and gender as key variables in family power; life transitions; and divorce and remarriage.

P: sophomore standing AND SOCIOL 101 or PSYCH 203 or ANTHRO 100

Fall Only.

SOCIOL 310. Urban Sociology. 3 Credits.

The study of social life and population groups in the urban environment. Our concern is with the social and psychological consequences of city life and the political and economic forces which have produced the industrial and corporate cities of the present day. Other topics include theories of "community," the location of industrial and commercial areas, the distribution of racial and ethnic groups, and urban problems such as poverty, housing, and public services.

P: jr st; and UR RE ST 100 or PU EN AF 202 or SOCIOL 101

Fall Only.

SOCIOL 311. Collective Behavior and Social Movements. 3 Credits.

Structure and processes of crowds, social movements and masses; societal contexts and relationships to social change.

P: SOCIOL 101.

SOCIOL 315. Street Gangs in America. 3 Credits.

Organization of and subculture of street gangs in American communities; differences among ethnic/racial street gangs; representation of gang identity through graffiti, tattoos, clothing, music; gang membership and wannabes.

P: Sociol 101 or Anthro 100 or Ur Re St 100.

Spring Odd.

SOCIOL 320. Sociology of Religion. 3 Credits.

Study of religious institutions and religious movements; sociological theories about the origin of religions; sociological study about the effects of religion in contemporary society.

P: SOCIOL 101 or ANTHRO 100

Fall Even.

SOCIOL 321. Topics in Sociology. 3 Credits.

Explores a single theme from a sociological perspective. Course is repeatable for credit if topics differ.

P: SOCIOL 101

Fall and Spring.

SOCIOL 335. Social Psychology. 3 Credits.

Sociological analysis of the origins and development the self through the socialization process. Emphasis is placed on the social influence of social institutions, organizations, and significant others on identity, behavior and attitudes. Explores the various interactional dynamics involved in social process with an emphasis on analysis of theory and research in sociology.

P: SOCIOL 101 or ANTHRO 103. REC: SOCIOL 235

Spring.

SOCIOL 355. Environmental Sociology. 3 Credits.

Explores the socio-cultural foundations of our relationship with the natural environment. Examines the relationship between environmental degradation and social, political, and economic structures. Explores beliefs and values about the environment and their expression in various forms of environmentalism and environmental movements. Also analyzes the presentation of environmental issues in cultural, political, and scientific domains.

P: SOCIOL 101 or ANTHRO 100

Fall Odd.

SOCIOL 375. Sociology of Sexual and Intimate Relations. 3 Credits.

The social construction of intimacy and sexuality in the development of self and personal life with emphasis on gender and intimate experience; changing ideas of love and erotic pleasure; and mass cultural influences on intimate and sexual relations.

Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.

P: cons of instr & prior trip arr & financial deposit.

SOC WORK 300. Professionalism and Teamwork in Social Work. 1 Credit.

This course focuses on developing understanding of self and the facets of social work professionalism in practice. The course addresses social work values and ethics and professional behaviors across practice settings. The roles of teamwork and collaboration in practice are emphasized and reinforced through a service learning component. This course provides a framework for determining readiness to progress to the Senior Field Practicum.

P: Social work major; conc enr in Soc Work 370 & Soc Work 323.

Spring.

SOC WORK 301. Research Methods for Generalist Social Work Practice. 3 Credits.

Provides an overview of the stages of design and implementation of research in the social sciences. Formulation of research questions, development of a research plan, and collection and analysis of data are examined. Compares and contrasts a variety of approaches including experimental designs, field research, qualitative and quantitative methods, program evaluation, and historical research. Highlights importance of using research to inform social work practice, and practice to inform research.

P: major in SOC WORK; PSYCH 205 or MATH 260 or BUS ADM 220, or concurrent enrollment; concurrent enrollment in SOC WORK 305 & SOC WORK 313.

Fall Only.

SOC WORK 305. The Social Work Profession. 3 Credits.

Orientation to the knowledge, skills and values of professional social work practice. Definition of professional competencies expected of a Bachelor of Social Work graduate and their relationship to field training experience.

P: major in Soc Work; WF 105, or concurrent enrollment; concurrent enrollment in SOC WORK 313 & SOC WORK 301

Fall Only.

SOC WORK 307. Ethics in Practice. 3 Credits.

Course examines ethics in practice within human services including critical analysis of complex issues which influence decision-making.

P: None. REC: Sophomore standing.

SOC WORK 313. Social Work Skills Lab I. 1 Credit.

Instruction and practice in basic interviewing skills for the beginning social work professional.

P: Major in Social Work; conc enr in Soc Work 305 & Soc Work 301.

Fall Only.

SOC WORK 323. Social Work Skills Lab II. 1 Credit.

Instruction and practice in interpersonal skills required for working in professional settings, including use of supervision, understanding of organizational culture, power, ethics, community assessment, and resource referral. Students will also learn social work group facilitation.

P: Major in Social Work; SOC WORK 313; conc enr in Soc Work 370 & Soc Work 300.

Spring.

SOC WORK 330. Understanding Diversity, Challenging Oppression: A Service Learning Course for Helping Professionals. 3 Credits.

Service learning course on working with diverse groups and communities for persons considering a career in the helping professions.

P: Sophomore status.

SOC WORK 340. Strengths-Based Group Facilitation. 3 Credits.

This course introduces students to group counseling techniques such as facilitating the process forming a group, determining group type, purpose, size, leadership, establishing goals and clarifying group rules.

P: Sophomore standing.

SOC WORK 342. Psychopharmacology. 3 Credits.

This course introduces students to the basic concepts of psychopharmacology and the function of the organs and systems of the human body and brain. The course defines biological and chemical aspects of various drugs as well as discuss bio-psycho-social- and environmental approaches to understanding substance use.

P: Sophomore standing.

SOC WORK 344. Grant Writing for Success. 1-3 Credits.

This course introduces students to common components of grant writing for human services organizations, including development of goals, objectives, methods, evaluation plans, and budgets.

P: sophomore standing.

SOC WORK 351. Overview of the Child Welfare System. 3 Credits.

Analysis of the place of child welfare policies and services among society's general provisions for family welfare and support. Overview of child welfare programs and services and the broad principles underlying delivery of services.

P: Major in SOC WORK; or with consent of instructor

Fall Only.

SOC WORK 370. Social Work Methods I. 3 Credits.

Application of social work methods to planned changes with organizations and communities; explores how agency and community contexts shape social work practice.

P: Major in Soc Work; Soc Work 305 & Soc Work 301; concurrent enrollment in SOC WORK 300 & SOC WORK 323.

Spring.

SOC WORK 371. Human Behavior and the Social Environment. 3 Credits.

Examines the biological, psychological, social-structural and cultural sources of the behavior of individuals and organizations from the perspective of systems analysis, human diversity and goal-directed behavior; applications to social work practice.

P: Major in SOC WORK; Soc Work 305 & PSYCH 203.

Spring.

SOC WORK 375. Family Principles and Patterns. 3 Credits.

This course is designed to increase familiarity with the family unit and its social role. Topics include basic principles of the family life cycle, how privilege and social positioning impact family life, and typical transitions and challenges experienced by the family.

P: Jr Standing.

SOC WORK 380. Cross Cultural Diversity and the Helping Professions. 3 Credits.

Students who will work with diverse individuals and groups seeking professional services will learn to do so in a culturally relevant manner. Course content specifically focuses on the application of culturally relevant work in the helping professions.

P: sophomore standing.

SOC WORK 395. Special Topics in Social Work. 1-3 Credits.

In-depth coverage of topics not covered by regular courses, such as substance use, mental health problems, interpersonal violence, PTSD, aging, homelessness, LGBTQ issues, religion, spirituality, globalization, and others. Offerings of different topics can be repeated for credit.

P: so st.; REC: WF 105.

SOC WORK 402. Field Practicum I & Integrative Seminar. 5 Credits.

Actual social service work through placement in a social service agency.

P: Major in SOC WORK, conc enr in Soc Work 411 & Soc Work 413, earned grade of "C" or higher in SOC WORK 300

Fall Only.

SOC WORK 403. Field Practicum II & Integrative Seminar. 5 Credits.

Actual social service work through placement in a social service agency.

P: Major in SOC WORK, Soc Work 402 and conc enr in Soc Work 420 & Soc Work 423.

Spring.

SOC WORK 411. Social Work Methods II. 3 Credits.

Application of social work methods with individuals, families and groups; focus on assessment, planning and intervention strategies with an introduction to evaluation and termination processes.

P: Major in SOC WORK and Soc Work 370 & Soc Work 371; concurrent enrollment in SOC WORK 402 & SOC WORK 413.

Fall Only.

SOC WORK 413. Social Work Skills Lab III. 1 Credit.

Instruction and practice in advanced interviewing skills needed by the beginning social work professional.

P: Major in Social Work and SOC WORK 323; conc enr in Soc Work 411 & Soc Work 402.

Fall Only.

SOC WORK 420. Social Work Methods III. 3 Credits.

Theory and methods of planned change interventions with specific populations at risk; integration of micro and macro level practice, with an emphasis on community organizing; evaluation of practice; and termination.

P: Major in Social Work; Soc Work 411; concurrent enrollment in Soc Work 403 & Soc Work 423.

Spring.

SOC WORK 423. Social Work Skills Lab IV. 1 Credit.

Instruction and practice in professional interactional skills focusing on small and large groups, and specialized intervention skills.

P: Major in Social Work; Soc Work 413; conc enr in Soc Work 420 & Soc Work 403.

Spring.

SOC WORK 431. Social Policy Analysis I. 2 Credits.

Instruction and practice in analyzing social problems and related policies; observation with local government policy making; application of skills to specific policy and its implementation in the community.

P: SOC WORK 275, SOC WORK 370, SOC WORK 371; conc enr in SOC WORK 461; Major in SOC WORK

Fall Only.

SOC WORK 433. Social Policy Analysis II. 2 Credits.

Theory and methods for planned social policy change; development and implementation of a planned change project as a follow up to the social problem and policy analyzed in Social Policy Analysis I.

P: Soc Work 431 and conc enr in Soc Work 463, Major in SOC WORK

Spring.

An introduction to improvisational concepts and techniques for role-playing, rehearsal and performance. Students will develop creative and collaborative skills by actively participating in theatre games and improvised scenes. Course is repeatable for credit; may be taken 2 times for a total of 6 credits.
Fall Even.

THEATRE 250. Dramaturgy I (Theatre Theory & Research Methods). 3 Credits.

Students are introduced to the theoretical practices used by practitioners in the interdisciplinary fields of theatre. Additionally, students will be guided through appropriate research practices, all while learning the basics of dramaturgy, the role of the dramaturg, and how it applies to production work. Fall Only.

THEATRE 261. Tap Dance II. 1 Credit.

Continuation of Tap Dance I introducing more complex tap technique. Increase speed and clarity of technique, and complexity of tap combinations and dances. Course is repeatable for credit; may be taken 3 times for a total of 3 credits.

P: Theatre 161.

Fall Only.

THEATRE 283H. Fashion History. 3 Credits.

The history of western fashion from antiquity to the present.

THEATRE 283I. Screenwriting. 3 Credits.

Fundamentals of story-telling through character development, dialogue, and structure. Screenplays will be analyzed for structure and compared to the final product, the film. Students will learn to develop a premise into an outline and complete a first draft.

THEATRE 290. Intermediate Applied Musical Theatre Voice. 1 Credit.

Study of literature drawn from music theatre repertoire. Some classical repertoire will also be utilized for the study of style and the development of proper technique and mature tone. Placement is by audition. Course is repeatable for credit; may be taken 2 times for a total of 2 credits.

P: THEATRE 190 or MUS APP 106; declared Musical Theatre major. REC: conc enr in choral ensemble/workshop or theatre/musical theatre production

Fall and Spring.

THEATRE 298. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. A student wishing to study or conduct research in an area not represented in available scheduled courses should develop a preliminary proposal and seek the sponsorship of a faculty member. The student's advisor can direct him or her to instructors with appropriate interests. A written report or equivalent is required for evaluation, and a short title describing the program must be sent early in the semester to the registrar for entry on the student's transcript.

P: fr or so st with cum gpa > or = 2.50; or jr or sr st with cum gpa > or = 2.00.

Fall and Spring.

THEATRE 299. Travel Course. 1-6 Credits.

Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.

P: cons of instr & prior trip arr & financial deposit.

THEATRE 302. Playwriting I. 3 Credits.

This course develops basic skills in playwriting through assigned readings, class discussions, and creative-writing assignments. Students will exit the course with completed drafts of one 10-minute play and one One-Act play. In addition to building their skills as a playwright, at the end of the semester students will select one of these projects to be presented in a staged-reading format open to the public.

P: THEATRE 200

Spring.

THEATRE 305. Audition Techniques for the Actor. 3 Credits.

Preparation of classic and contemporary monologues and scenes, professional resumes and photos; dealing with the business aspects of establishing a career as an actor.

P: Theatre 231.

Fall Only.

THEATRE 309. Theatre History I: Greek to 19th Century. 3 Credits.

This course will focus on the development of Western theatre history and literature from the Ancient Greeks to the late 19th century. Students will make connections between the cultural practices (politics, religion, social life, etc.) of a particular time and place and the theatre that was produced by it. This will not only lead to a fuller understanding of the origins of this work, but should help the student become a more sophisticated and informed artist and/or audience member when considering the dramatic offerings of today, including television, films and web content.

Fall Only.

THEATRE 310. Theatre History II: Realism to Contemporary. 3 Credits.

This course will focus on the development of Western theatre history and literature from the late 19th century to Contemporary. Students will make connections between the cultural practices (politics, religion, social life, etc.) of a particular time and place and the theatre that was produced by it. This will not only lead to a fuller understanding of the origins of this work, but should help the student become a more sophisticated and informed artist and/or audience member when considering the dramatic offerings of today, including television, films and web content.

REC: THEATRE 309

Spring.

THEATRE 321. Scene Design. 3 Credits.

Practical techniques of scene design: mechanical drawing, rendering and model building for the theatre. Develops ability to create the visual and mechanical environment to support the presentation of theatre pieces.

P: THEATRE 221, THEATRE 223 and THEATRE 224

Fall Even.

THEATRE 322. Costume Design. 3 Credits.

History of costumes as they relate to the theatre; costume design in relation to the play and the actor; study of the processes of costume design: fabric, color and line, mass and light.

P: Theatre 224; and conc enr in Theatre 335, 336, 338 or 339.

Spring Even.

THEATRE 323. Stage Lighting. 3 Credits.

Aesthetic practice of design of lighting in theatrical production: composition and psychological effects of stage lighting; contemporary equipment and control systems.

P: conc enr in Theatre 335 or 336 or 338 or 339; REC: Theatre 221 and 222.

Spring Odd.

THEATRE 325. Stage Makeup. 3 Credits.

Principles and applications of stage makeup: materials, light and color, and character analysis.

P: conc enr in Theatre 335, 336, 338 or 339; REC: Theatre 221 and 222.

Fall Even.

THEATRE 328. Jazz Dance III. 2 Credits.

Advanced study and execution of the style and technique of Jazz Dance. A study of the styles of major choreographers in the American Musical Theatre. Competence in performance is stressed. Course is repeatable for credit; may be taken 5 times for a total of 10 credits.

P: THEATRE 228

Fall Even.

THEATRE 331. Acting III. 3 Credits.

Project based work for the development of specific skills for the actor. Variable Topics include Character Development, Devised Work, Shakespeare, Physical Comedy and Acting for Musical Theatre. Course is repeatable for credit; may be taken 3 times for a total of 9 credits.

P: THEATRE 231; conc enr in THEATRE 335 or THEATRE 336 or THEATRE 338 or THEATRE 339

Spring.

THEATRE 333. Voice for the Actor II. 3 Credits.

A strengthening of structural and tonal work explored in Voice for the Actor I. Introduces stage dialects, character voices, and their healthy production.

P: Theatre 233

Spring Even.

THEATRE 335. Production Practicum: Crews. 1 Credit.

Crew member/staff participation in a theatre production. Course is repeatable for credit; may be taken 8 times for a total of 8 credits.

P: Major or Minor status in Theatre and Dance; Non majors/minors are invited to seek permission to register

Fall and Spring.

THEATRE 336. Production Practicum: Performance. 1 Credit.

Performance in a theatre production. Course is repeatable for credit; may be taken 8 times for a total of 8 credits.

Fall and Spring.

THEATRE 338. Production Practicum: Scene Shop. 1 Credit.

Complete production work in scene shop preparation. Course is repeatable for credit; may be taken 8 times for a total of 8 credits.

Fall and Spring.

THEATRE 339. Production Practicum: Costume Shop. 1 Credit.

Complete production work in costume shop preparation. Course is repeatable for credit; may be taken 8 times for a total of 8 credits.

P: Theatre 222.

Fall and Spring.

THEATRE 340. Dance History. 3 Credits.

Dance History comes from a melting pot of world cultures. Origins and chronological development of dance styles and techniques from pre-historic cultures to present. Historical events, major developments, choreographic works and personalities influencing the development of each dance genre's origin, development, and presence in society today. Genres included but not limited to: folk dance, ballet, modern, jazz/tap, musical theatre, and social dance (from Ballroom to Hip Hop).

Fall Even.

THEATRE 351. Directing I. 3 Credits.

Theories and techniques of theatrical staging and the relationship of the director to the actors and designers. Study of script analysis and rehearsal technique.

P: THEATRE 131, THEATRE 200; and conc enr in THEATRE 335, THEATRE 336, THEATRE 338, THEATRE 339, THEATRE 356, THEATRE 357, THEATRE 358, or THEATRE 359

Fall Only.

THEATRE 352. Directing II. 3 Credits.

Advanced theories and techniques of theatrical performance through staging and directing exercises.

P: Theatre 351.

Spring Even.

THEATRE 356. Production Practicum: Properties and Scene Painting. 1 Credit.

Production work in properties preparation and scenic painting. Course is repeatable for credit; may be taken 5 times for a total of 5 credits.

Fall and Spring.

THEATRE 357. Production Practicum: Wardrobe and Makeup Crew. 1 Credit.

Production work on a wardrobe crew. Course is repeatable for credit; may be taken 16 times for a total of 16 credits.

P: Theatre 222 or Theatre 325

Fall and Spring.

THEATRE 358. Performance Practicum: Musical. 1 Credit.

Performance in a mainstage musical. Course is repeatable for credit; may be taken 8 times for a total of 8 credits.

Fall and Spring.

THEATRE 359. Production Practicum: Theatre Management. 1 Credit.

Production Related Theatre Management work can be completed working with the Production Director or Managing Director of Theatre and Dance predominantly on Front of House related activities. Course is repeatable for credit; may be taken 3 times for a total of 3 credits.

P: Consent of Instructor

Fall and Spring.

THEATRE 361. Tap Dance III. 1 Credit.

Continuation of Tap Dance II. Increase speed, clarity and complexity of technique, combinations and dances. Introduce syncopated and complex rhythms and techniques. Course is repeatable for credit; may be taken 3 times for a total of 3 credits.

P: Theatre 261.

Spring.

THEATRE 364. Musical Theatre History. 3 Credits.

Cultural conflict, influence and enrichment that arise when differing traditions of the arts come into contact with musical theatre and its development.

Spring Even.

THEATRE 372. American Musical Theatre Dance. 1 Credit.

An overview of dance styles commonly used in Musical Theatre. Styles will be discussed in their historical context and technique will be emphasized in a studio setting. The course builds on skills developed in Tap Dance I and Jazz Dance II. Course is repeatable for credit; may be taken 2 times for a total of 2 credits.

P: THEATRE 161 and THEATRE 228

Fall Even.

THEATRE 390. Advanced Applied Musical Theatre Voice. 1-2 Credits.

Study of literature from music theatre repertoire. Some classical repertoire will be utilized for the study of style and the development of proper technique and mature tone. Placement by audition. Course is repeatable for credit; may be taken 4 times for a total of 4 credits.

P: Theatre 290 and instructor consent. REC: conc enr in choral/vocal ensemble or theatre/musical theatre production.

Fall and Spring.

THEATRE 402. Playwriting II (the Long Play). 3 Credits.

An advanced course where students employ skills from Playwriting I to write a full-length play. In the course, attention is given to topics such as: the sustainability of an idea, discovering your voice, marketing & networking, and the role of the playwright in production. The semester culminates in a playwright's festival where staged-readings of students' work will be on display for public audiences.

P: THEATRE 200 and THEATRE 302

Spring.

THEATRE 404. Design Seminar. 1-3 Credits.

Focused study on a specific area or areas of theatrical design and technology such as: rendering, drawing, modeling, projections, special effects, automation, design aesthetics, metalworking, rigging, programming, production management and portfolio presentation. Course is repeatable for credit if topics differ; may be taken 9 times for a total of 9 credits.

THEATRE 410. Playwrights Workshop. 3 Credits.

Advanced writing students will meet once a week for a three-hour period to read and respond to each other's work in an interactive, high-impact, collaborative atmosphere. Each week, one student will bring in their play to be read and critiqued. Students cycle through turns, each time bringing in a new draft to be read. In doing so, students have the opportunity to strengthen their plays in a structured environment while also being exposed to the rigors of the re-writing process as well as the critique process.

P: THEATRE 302 AND THEATRE 402. REC: THEATRE 200 AND THEATRE 250

Fall and Spring.

THEATRE 415. Contemporary Playwriting Methods. 3 Credits.

Students will read and write plays that exist outside the realm of causal-realism. In addition to readings and discussions, students will write plays that utilize the techniques employed by devised, language-based, and non-traditional forms of playwriting.

P: THEATRE 302 and THEATRE 402. REC: THEATRE 200, THEATRE 250, THEATRE 450

Spring Even.

THEATRE 421. Scene Painting. 3 Credits.

A Project oriented course incorporating the tools, materials, and techniques necessary to prepare a variety of visual textures and details necessary in theatrical scenic environments. Projects include Marble, Brick, Stone, Granite, Stencils, wood, Foliage, Metallic or Glass surfaces and a large detailed Final Group Project.

Fall Odd.

THEATRE 422. Costume Crafts. 3 Credits.

Advanced instruction in special topics in costume technology, including but not limited to Millinery, Painting and Dyeing, Corsetry and Padding, Pattern Drafting and Draping, Masks, Armor, and Distressing.

P: Theatre 221 and 222; and conc enr in Theatre 335 or 336 or 338 or 339.

THEATRE 423. Advanced Stage Lighting. 3 Credits.

Aesthetic practice of lighting in theatrical production, emphasizing programming and analysis. Practical application of the tools used in lighting.

P: Theatre 224 and 323; conc enr in Theatre 335, 336, 338 or 339.

Spring Even.

THEATRE 426. Sound for Theatre. 3 Credits.

A Project oriented course exploring the design process used for creating, selecting and editing music/sound effects for a theatrical production. Aesthetic and technical aspects of designing sound are discussed, demonstrated and realized. The course will culminate with each student creating and presenting a complete sound design for a specific script.

Fall Odd.

THEATRE 433. Vocal Specialization. 1 Credit.

Detailed production specific vocal work for special problems and/or solutions to character development and vocal production issues.

Fall and Spring.

THEATRE 440. Choreography. 3 Credits.

Technical forms and applications for composition of movement. Study of rhythmic patterns and their relationships to movement, creative content, musical interpretation, projection and dynamics. Includes movement and placement for large ensembles.

P: THEATRE 228

Fall Odd.

THEATRE 450. Dramaturgy II (Theatre Theory in Practice). 3 Credits.

This high-impact course looks at the intersection where theatre theory meets theatre history and theatre practice. Students will use the UW-GB Department of Theatre and Dance season to act as if they were production dramaturgs to create resource packets, outreach material, and lobby displays through research techniques and application of theatre theory. Use of the work is available to production directors if interested.

P: THEATRE 200 and THEATRE 250. REC: THEATRE 309, THEATRE 310, THEATRE 351

Spring Odd.

THEATRE 478. Honors in the Major. 3 Credits.

Honors in the Major is designed to recognize student excellence within interdisciplinary and disciplinary academic programs.

P: min 3.50 all cses req for major and min gpa 3.75 all UL cses req for major.

Fall and Spring.

THEATRE 480. Theatre Capstone Project. 1-3 Credits.

Students will complete a faculty approved project with one or more faculty members, at least one of which is from Theatre and Dance, culminating in a performance, staged reading, production related design/technical position, research project, community based activity, internship, travel course, or other approved project. Course is repeatable for credit; may be taken 2 times for a total of 6 credits.

P: Theatre 131, Theatre 221, Theatre 222, Theatre 351

Fall and Spring.

THEATRE 495. Teaching Assistantship. 1-6 Credits.

The student and supervising teacher must prepare a statement that identifies the course with which the assistantship will happen, objectives for the assistantship, and expectations in order to fulfill the course objectives. Students are not eligible to receive credit in both the course they assist the instructor with and the teaching assistantship in the same semester. Typically student has previously taken the course prior to enrollment in the assistantship. Course is repeatable for credit.

Fall and Spring.

THEATRE 496. Project/Research Assistantship. 1-6 Credits.

The student must prepare a research proposal, and both parties should identify the research arrangement and how the student will complete the work to fulfill the course objectives within the assigned term.

THEATRE 497. Internship. 1-12 Credits.

Supervised practical experience in an organization or activity appropriate to a student's career and educational interests. Internships are supervised by faculty members and require periodic student/faculty meetings. Course is repeatable for credit.

P: jr st.

Fall and Spring.

THEATRE 498. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. A student wishing to study or conduct research in an area not represented in available scheduled courses should develop a preliminary proposal and seek the sponsorship of a faculty member. The student's advisor can direct him or her to instructors with appropriate interests. A written report or equivalent is required for evaluation, and a short title describing the program must be sent early in the semester to the registrar for entry on the student's transcript.

Fall and Spring.

THEATRE 499. Travel Course. 1-6 Credits.

Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.

P: cons of instr & prior trip arr & financial deposit.

Urban and Regional Studies (UR RE ST)

Courses

UR RE ST 100. Introduction to Urban Studies. 3 Credits.

Examines the richness and complexity of the human experience in modern cities and their broader regional context. The city is seen as an arena in which interrelationships between enduring human concerns and social institutions are expressed and asks how the city influences these interrelationships. Likewise, in what manner do established institutions and concerns influence the city and the metropolitan region of which they are a part? This course is an exploration of cities and how their broader institutional contexts evolve over time.

Fall and Spring.

UR RE ST 198. First Year Seminar. 3 Credits.

Reserved for New Incoming Freshman

Fall Only.

UR RE ST 201. City Life and Globalization. 3 Credits.

The course explores the effect of globalization on people, specifically on urban processes worldwide. This course is comparative in nature and will explore global processes as they challenge people living in urban areas worldwide. The course explores different survival strategies on how to make cities better for a majority of the people.

Spring.

UR RE ST 205. Urban Social Problems. 3 Credits.

The course offers a basic introduction to the history, sociology, geography, economics, and politics of U.S. urban problems; examines specific problems such as jobs, housing, and public finance; and considers future prospects.

Fall and Spring.

UR RE ST 216. Native American Landscapes: Imagined and Lived Spaces. 3 Credits.

The course will explore the relationship between time and space within Native American cultures. The course will compare North American indigenous landscapes and Andean indigenous landscapes.

UR RE ST 299. Travel Course. 1-6 Credits.

Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.

P: cons of instr & prior trip arr & financial deposit.

UR RE ST 313. The City Through Time and Space. 3 Credits.

Analysis of human settlement and the influence of social, economic and technological change on urban structure and the aesthetic qualities of city scapes in historical and cross-cultural settings.

P: jr st; and Ur Re St 100 or 341 or Geog 341.

Spring.

UR RE ST 314. Suburbs. 3 Credits.

The study of suburbanization and suburban lifestyles has long been secondary to general focus on the central city and urban neighborhoods in the urban disciplines (urban geography, urban sociology). In this recentering of urban study on suburban communities, we look at the development of suburbs in the early modern period, the expansion of suburbs in the post-WWII era, and the emergence of a new suburban way of life in the 21st Century.

P: UR RE ST 100
Spring.

UR RE ST 323. Asian American Communities in the United States. 3 Credits.

Review of Asian immigration to the United States; formation of ethnic communities; prejudice and discrimination against Asian groups; and current issues affecting Asian Americans.

P: jr st; and ANTHRO 100 or SOCIOL 101 or SOCIOL 203 or UR RE ST 100
Spring Odd.

UR RE ST 324. Latino Communities in the United States. 3 Credits.

Survey of Latino communities in the United States, taking an interdisciplinary approach exploring Latino voices from the Humanities and Social Sciences. The course will explore issues of formation of ethnic communities, the diversity among Latino communities and current issues affecting Latinos in the U.S. such as immigration policy, bilingual education, and urban issues impacting Latino communities.

P: None
Spring Odd.

UR RE ST 342. Community Economic Development. 3 Credits.

Various forces involved in community economic development, including the human and non human resource potentials, motivation, values and attitudes. Examines social and economic structures such as transportation, communication, and community services from the point of view of community development.

P: jr st; and ECON 202 or ECON 203
Spring Odd.

UR RE ST 351. Transportation and the City. 3 Credits.

The impact of the transportation subsystem of the city upon other urban subsystems (residential, commercial) and upon urban dwellers.

P: jr st; and Pol Sci 101 or 202 or Pu En Af 202 or Ur Re St 100.
Fall Odd.

UR RE ST 360. Three Dimensional Modelling. 3 Credits.

The course addresses the practical experiences encountered in the day-to-day operation of public policy, environmental planning, and public/private planning sector focusing on the skills needed to analyze the visual impacts of projects, and policy in 3 dimensional spaces.

P: GEOG 250
Spring.

UR RE ST 412. Urban Planning. 3 Credits.

Examines current trends in Planning theory, focusing on City Planning, Urban Design, and Regional Planning.

P: jr st REC: Pol Sci 101.
Fall Only.

UR RE ST 431. Seminar in Urban and Regional Studies. 3 Credits.

A capstone course intended to promote understanding of ethics in urban and regional planning, community politics, economic development, and other areas of urban and regional studies. Scholarly and intellectual discussion of community career and volunteer opportunities. Guidance provided for preparing professional resume documentation and engaging in job search activities.

P: Ur Re St major/minor; min 100 completed credits
Fall Only.

UR RE ST 454. Designing Communities and Neighborhoods. 3 Credits.

The main objective of the course is to allow students to engage and critically assess design elements that create places that foster community identity addressing the vexing problems in residential, commercial, office, recreational and public areas in small cities.

P: UR RE ST 100; REC: UR RE ST 341.
Spring.

UR RE ST 461. Special Topics in Urban and Regional Studies. 3 Credits.

A multi-disciplinary investigation into a special topic within urban and regional studies. Includes topics such as education, employment, housing and transportation, and urban and regional policy. Course is repeatable for credit if topics differ. May be taken 2 times for a total of 6 earned credits.

P: written cons of inst.

UR RE ST 478. Honors in the Major. 3 Credits.

Honors in the Major is designed to recognize student excellence within interdisciplinary and disciplinary academic programs.

P: min 3.50 all cses req for major and min gpa 3.75 all UL cses req for major.
Fall and Spring.

UR RE ST 495. Teaching Assistantship. 1-6 Credits.

The student and supervising teacher must prepare a statement that identifies the course with which the assistantship will happen, objectives for the assistantship, and expectations in order to fulfill the course objectives. Students are not eligible to receive credit in both the course they assist the instructor with and the teaching assistantship in the same semester. Typically student has previously taken the course prior to enrollment in the assistantship. Course is repeatable for credit.

Fall and Spring.

UR RE ST 497. Internship. 1-12 Credits.

Supervised practical experience in an organization or activity appropriate to a student's career and educational interests. Internships are supervised by faculty members and require periodic student/faculty meetings. Course is repeatable for credit.

P: jr st.

Fall and Spring.

UR RE ST 498. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.

P: cons of instr & prior trip arr & financial deposit.

Water Science (WATER)

Courses

WATER 201. Introduction to Water Science. 3 Credits.

Water Science is the interdisciplinary study of water and its interaction with solids, liquids, gases, and organisms in various Earth systems. Water is essential to life, and it plays a critical role in nearly every natural process in Earth's lithosphere, atmosphere, hydrosphere, biosphere, and cryosphere. The world faces significant challenges regarding water quantity, quality, and ecological function that are expected to worsen during the 21st century. It is rare to find a real-world system in which water does not play a significant role.

Fall and Spring.

WATER 202. Introduction to Water Science Laboratory. 1 Credit.

Laboratory course to accompany WATER 201 Introduction to Water Science.

WATER 321. Stable Isotopes in the Environment. 1 Credit.

Stable isotope analysis has become a standard tool in modern science. The natural variability in non-radioactive (stable) isotopes corresponds to specific physical and biological processes throughout the global Earth System. This course explores the basics of stable isotope chemistry, with most of the course dedicated to examples of their application across several scientific fields.

P: CHEM 211 or consent of instructor

Spring Odd.

WATER 444. Geochemistry of Natural Waters. 3 Credits.

This class will explore the theory and application of aqueous geochemistry principles to the study of surface and groundwater systems at low to moderate temperatures. The class will focus on inorganic processes including the hydrologic cycle, chemical weathering, chemical activities in natural waters, thermodynamics, kinetics, acid/base equilibria, carbonate chemistry, acid water systems, heavy metals, redox reactions, saline waters, and ancient fluids preserved in fluid inclusions.

P: GEOSCI 202, CHEM 211 & CHEM 212

Fall Even.

WATER 491. Senior Thesis/Research in Water Science. 3 Credits.

A project-based capstone experience where individual students address a specific aspect of water science through the use of scientific and mathematical skills.

P: Senior standing, Math 260 with C or better, instructor consent. REC: Geoscience/Env Sci 432, Water 330, or other appropriate course depending upon focus of thesis project

Fall and Spring.

WATER 495. Teaching Assistantship. 1-6 Credits.

The student and supervising teacher must prepare a statement that identifies the course with which the assistantship will happen, objectives for the assistantship, and expectations in order to fulfill the course objectives. Students are not eligible to receive credit in both the course they assist the instructor with and the teaching assistantship in the same semester. Typically student has previously taken the course prior to enrollment in the assistantship. Course is repeatable for credit.

Fall and Spring.

WATER 497. Internship. 1-12 Credits.

Supervised practical experience in an organization or activity appropriate to a student's career and educational interests. Internships are supervised by faculty members and require periodic student/faculty meetings. All internships must be taken P-NC. Course is repeatable for credit.

WATER 498. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. A student wishing to study or conduct research in an area not represented in available scheduled courses should develop a preliminary proposal and seek the sponsorship of a faculty member. The student's advisor can direct him or her to instructors with appropriate interests. A written report or equivalent is required for evaluation, and a short title describing the program must be sent early in the semester to the registrar for entry on the student's transcript. Course is repeatable for credit.

P: fr or so st with cum gpa > or = 2.50; or jr or sr st with cum gpa > or = 2.00.

Fall and Spring.

Writing Foundations (WF)

Courses

WF 93. Fundamentals of Writing. 3 Credits.

A course designed to prepare students for WF 100 and other courses requiring college-level writing. Emphasis on the recursive process of organizing, writing, and revising short essays. Covers basics of research and of integrating source material into the student's essays. Issues related to punctuation, grammar, and syntax handled on an individual basis as needed. Offered on a pass/no credit, non-degree-credit basis only.

WF 100. First Year Writing. 3 Credits.

Emphasis on writing as a process and on techniques used in academic writing. Also emphasizes essay structure, informative writing and persuasive writing, and locating, evaluating, integrating, and citing source material, including multimodal sources. Reviews conventions of paragraph and sentence structure, punctuation, grammar, and usage as needed.

Fall and Spring.

WF 105. Research and Rhetoric. 3 Credits.

Further instruction and practice in the rhetorical techniques and types of writing covered in WF 100, but with greater emphasis on rhetorical and critical analysis; may also include elements such as original research and the conventions of writing for specific academic communities.

P: WF 100 with a C or better, or WF 164 with a C or better, or ACT English score of 25 or higher, or SAT Reading score of 32 or higher

Fall and Spring.

WF 164. First Year Writing for International Students. 3 Credits.

An introductory course in academic writing for international students. Focuses on topic development, library research, paragraph and essay organization, the writing process, and language style.

P: International student status or permission of instructor.

Fall Only.

WF 198. First Year Seminar. 3 Credits.

First Year Seminar, topics vary.

Reserved for New Incoming Freshman.

WF 200. Professional Writing for Business Majors. 3 Credits.

Professional Writing for Business Majors is a course focused on study and application of the best practices for writing in today's digital and intercultural workplace.

P: WF 100 OR WF 164, OR ACT English score of 25 or above, OR SAT Reading Test score of 32 or above

Fall and Spring.

Women's Studies (WOST)

Courses

WOST 102. Women's Voices. 3 Credits.

An introductory and interdisciplinary humanities course drawing upon diverse texts and methodologies representative of the following humanities disciplines: art, philosophy, religious studies, music, film, history, literature, feminist theory, cultural studies, media studies, and performance art/drama. Students will examine multicultural readings ranging from creative nonfiction, essays, feminist theory, philosophical reflection, fiction, poetry, historical accounts, drama, cultural critique, feminist analysis, memoir, visual arts, letters, diaries, and others to build an understanding of the multiple scholarly approaches in the humanities to the study of women's lives.

WOST 198. First Year Seminar. 3 Credits.

First Year Seminar, topics vary.
Reserved for New Incoming Freshman.

WOST 201. Introduction to LGBTQ Studies. 3 Credits.

This course will provide an introduction into Lesbian, Gay, Bisexual, Transgender, and Queer (LGBTQ) Studies. Considering LGBTQ Studies as an interdisciplinary field, this course will focus on how the central concepts of sexual orientation and gender identity work within history, politics, literature, technology, art, music, philosophy, education, and psychology. Throughout this course, students will work towards a deep understanding of the intersectional dynamics of privilege and oppression as they relate to LGBTQ individuals and culture by exploring the lived experiences of LGBTQ individuals and their families.

WOST 203. Women in Popular Culture. 3 Credits.

In this course, we will examine ways gender has been portrayed and are currently portrayed in the media, in television and movies, popular music, internet, print sources like magazines, popular fiction, and newspapers, and other cultural artifacts. With readings ranging from critical theory to popular fiction, we will speculate on the impact of and source for popular portrayals of women in particular and the social construction of gender, race, and other social categories. The course will also encourage students to question agency in the creation and consumption of mass culture. Issues of race, class, sexual orientation, age, and physical ability will be important as we explore and critically examine the forms and functions of popular culture.

WOST 241. Introduction to Women's & Gender Studies. 3 Credits.

Interdisciplinary introduction to the study of gender, including identity, expression, and sexuality; the influence of gender on social institutions and structures; and an intersectional examination of women, men, and LGBTQ+ lives in the United States historically and today.
Fall and Spring.

WOST 247. Latin American and Latina Women. 3 Credits.

This course will examine the lives and literary works of Latin American and Latina women within Latin American society and in the US. Particular attention will be given to the roles assigned to these women by patriarchal cultures and to the stereotypes that have influenced their lives. This course will examine how Latin American and Latina women have resisted race, class and gender oppression. The complex relationships among these factors and ethnicity will be examined through the analysis of a variety of primary texts, films, and scholarly articles.

WOST 299. Travel Course. 1-6 Credits.

Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.
P: cons of instr & prior trip arr & financial deposit.

WOST 350. Topics in Women's Studies. 3 Credits.

Explores a single theme in Women's Studies scholarship from an interdisciplinary perspective and includes High Impact Practices. Variable content. Course is repeatable for credit if topics differ; may be taken 3 times for a total of 9 credits.
P: None. REC: WOST 101 and WOST 201
Fall Even.

WOST 437. Feminist Theory. 3 Credits.

This course is an introduction to feminist theories from a variety of disciplinary perspectives; we will examine the development of feminist theories, their practice and contrasting viewpoints.
P: WOST 241
Spring Even.

WOST 495. Teaching Assistantship. 1-6 Credits.

The student and supervising teacher must prepare a statement that identifies the course with which the assistantship will happen, objectives for the assistantship, and expectations in order to fulfill the course objectives. Students are not eligible to receive credit in both the course they assist the instructor with and the teaching assistantship in the same semester. Typically student has previously taken the course prior to enrollment in the assistantship. Course is repeatable for credit.
Fall and Spring.

WOST 497. Internship. 1-12 Credits.

Supervised practical experience in an organization or activity appropriate to a student's career and educational interests. Internships are supervised by faculty members and require periodic student/faculty meetings. Course is repeatable for credit.
P: jr st.
Fall and Spring.

WOST 498. Independent Study. 1-4 Credits.

Independent study is offered on an individual basis at the student's request and consists of a program of learning activities planned in consultation with a faculty member. A student wishing to study or conduct research in an area not represented in available scheduled courses should develop a preliminary proposal and seek the sponsorship of a faculty member. The student's advisor can direct him or her to instructors with appropriate interests. A written report or equivalent is required for evaluation, and a short title describing the program must be sent early in the semester to the registrar for entry on the student's transcript.

P: fr or so st with cum gpa > or = 2.50; or jr or sr st with cum gpa > or = 2.00.

Fall and Spring.

WOST 499. Travel Course. 1-6 Credits.

Travel courses are conducted to various parts of the world and are led by one or more faculty members. May be repeated to different locations.

P: cons of instr & prior trip arr & financial deposit.

Faculty Members

A

Rebecca Abler; Professor; Ph.D., Virginia Polytechnic Institute and State University

Riaz Ahmed; Assistant Professor; Ph.D., University of South Carolina

Tanim Ahsan; Assistant Professor; Ph.D., Marquette University

Tohoro F Akakpo; Associate Professor; Ph.D., Michigan State University*

Michael Alexander; Professor; D.M.A., University of Wisconsin - Madison

Zhuoli Alexton; Assistant Professor; Ph.D., Washington State University

Roshelle Amundson; Lecturer; M.F.A., Goddard College

Iftekhhar Anam; Assistant Professor; Ph.D., University of Memphis

John Arendt; Lecturer; M.S., University of Wisconsin - Green Bay

Scott A Ashmann; Professor; Ph.D., Michigan State University*

Dana Atwood; Associate Professor; Ph.D., Western Michigan University

Andrew W Austin; Associate Professor; Ph.D., University of Tennessee

B

Mandeep Bakshi; Associate Professor; Ph.D., Panjab University (India)

Dhanamalee Bandara; Assistant Professor; Ph.D., Texas Tech University

Gaurav Bansal; Professor; Ph.D., University of Wisconsin - Milwaukee*

Paul Belanger; Lecturer; Ph.D., Deakin University

Nolan Bennett; Assistant Professor; Ph.D., Cornell University

Jeffrey A Benzow; Associate Professor; M.F.A., University of Wisconsin - Milwaukee

Devin Bickner; Associate Professor; Ph.D., Iowa State University

Mary D Bina; Senior Lecturer; B.F.A., University of Wisconsin - Milwaukee

Alexander Bozzo; Lecturer; Ph.D., Marquette University

Forrest W Brooks; Lecturer; M.S., University of Wisconsin - Milwaukee*

Douglas Brusich; Assistant Professor; Ph.D., University of Iowa

Sadie Buboltz-Dubs; Assistant Professor; D.A.T., University of Idaho

Katie M Burke; Lecturer; Ph.D., University of Iowa

Katie R Burke; Lecturer; M.B.A., University of Wisconsin - LaCrosse

Kathleen C Burns; Professor; Ph.D., University of Massachusetts

C

Thomas Campbell; Associate Professor; Ph.D., Southern Illinois University

Denise A Carlson-Gardner; Lecturer; B.F.A., University of Wisconsin - Stevens Point

Bryan James Carr; Associate Professor; Ph.D., University of Oklahoma

Julialicia Case; Assistant Professor; Ph.D., University of Cincinnati

Mario Chacon; Assistant Professor; Ph.D., Cornell University

Vallari Chandna; Associate Professor; Ph.D., University of North Texas

Franklin M Chen; Associate Professor; Ph.D., Princeton University*

Shara Cherniak; Lecturer; Ph.D., University of Georgia

Preston Cherry; Assistant Professor; Ph.D., Texas Tech University

Jae Hoon Choi; Assistant Professor; Ph.D., University of Colorado

Nazim Choudhury; Assistant Professor

Gary Christens; Lecturer; M.B.A., University of Wisconsin-Oshkosh

Stacie Christian; Associate Lecturer; M.S., University of Wisconsin - Green Bay

Tsz Lun Chu; Assistant Professor; Ph.D., University of North Texas

Phillip G Clampitt; Professor; Ph.D., University of Kansas

Heather Clarke; Associate Professor; Ph.D., Memorial University

Alise Coen; Associate Professor; Ph.D., University of Delaware

Kevin J Collins; Associate Professor; M.M., University of Texas - Austin

David N Coury; Professor; Ph.D., University of Cincinnati

Herbert Covington; Lecturer; Ph.D., Tufts University

Jason Cowell; Associate Professor; Ph.D., University of Minnesota

Susan Craver; Lecturer; M.B.A., University of Wisconsin - Madison

Marcelo P Cruz; Associate Professor; Ph.D., University of California - Los Angeles

Illene N Cupit; Professor; Ph.D., Temple University

Stephanie Cutlan; Lecturer; Ph.D., University of Memphis

D

Jared Dalberg; Associate Professor; M.Ed., Augusta State University

Tara DaPra; Lecturer; M.F.A., University of Minnesota

Andrea Davidson; Lecturer; D.C., Palmer College of Chiropractic

Gregory J Davis; Professor; Ph.D., Northwestern University*

Kristy J Deetz; Professor; M.F.A., The Ohio State University

Pieter DeHart; Professor; Ph.D., University of Alaska - Fairbanks

Christin A DePouw; Associate Professor; Ph.D., University of Illinois at Urbana - Champaign

Terrisa Deprez; Lecturer; M.S., University of Central Florida

Sarah A Detweiler; Professor; M.F.A., University of Florida

Kelly Deuerling; Assistant Professor; Ph.D., University of Florida

William Dirienzo; Associate Professor; Ph.D., University of Virginia

Mathew E Dornbush; Professor; Ph.D., Iowa State University*

Michael L Draney; Professor; Ph.D., University of Georgia*

E

Stephanie Evenson; Senior Lecturer; D.V.M., University of Wisconsin - Madison

F

Luis Fernandez; Assistant Professor; D.M.A., University of Miami

Hernan Fernandez-Meardi; Associate Professor; Ph.D., Universite de Montreal (Canada)

Patrick S Forsythe; Professor; Ph.D., Michigan State University*

Sauna M Froelich; Lecturer; JD, Marquette University

G

Adam W Gaines; Associate Professor; D.A., Ball State University

Sharon Gajeski; Lecturer; M.S.N., University of Wisconsin - Oshkosh

Susan M Gallagher-Lepak; Professor; Ph.D., University of Wisconsin - Madison*

Clifton G Ganyard; Associate Professor; Ph.D., State University of New York at Buffalo

Alison A Gates; Professor; M.F.A., University of Washington

William Gear; Assistant Professor; Ph.D., University of Pittsburgh*

Matthew Geimer; Lecturer; J.D., University of Wisconsin - Madison

Mary Gichobi; Associate Professor; Ph.D., Iowa State University

Carlos Ulises Gonzalez-Valle; Assistant Professor; Ph.D., Penn State University

Nicole Gouin; Lecturer; M.S.N., University of Wisconsin-Oshkosh

Sara Greenwood; Lecturer; M.S.W., University of Michigan*

Cassie Groeschl; Lecturer; M.S., University of Illinois - Chicago

Joan M Groessl; Associate Professor; Ph.D., Marian University*

Lisa Grubisha; Associate Professor; Ph.D., University of California - Berkeley

Kpoti (Stefan) Gunn; Assistant Professor; Ph.D., Ohio State University

Amulya Gurtu; Associate Professor; Ph.D., Ryerson University

Mary E Guy; Senior Lecturer; M.S., University of Wisconsin - Oshkosh

H

Jennifer Ham; Professor; Ph.D., Rutgers University

Mahmoud Hammouri; Assistant Professor; Ph.D., New Mexico State University

Eric C Hansen; Associate Professor; M.M., University of Kentucky

Richard Hein; Professor; Ph.D., University of Rhode Island

David J Helpap; Associate Professor; Ph.D., University of Wisconsin - Milwaukee*

Georgette Heyrman; Assistant Professor; Ph.D., Northwestern University

Patricia Hicks; Senior Lecturer; Ed.D., Cardinal Stritch University

Todd Hillhouse; Assistant Professor; Ph.D., Virginia Commonwealth University

Michael Holly; Assistant Professor; Ph.D., University of Wisconsin - Madison

Jenell L Holstead; Associate Professor; Ph.D., University of Indiana

Susan Hopkinson; Assistant Professor; Ph.D., University of Maryland - Baltimore*

Maruf Hossain; Associate Professor; Ph.D., University of Memphis

Christopher Houghton; Lecturer; Ph.D., University of Wisconsin - Milwaukee

Rebecca D Hovarter; Lecturer; DNP, University of Minnesota

Robert W Howe; Professor; Ph.D., University of Wisconsin - Madison

Allen Huffcutt; Professor; Ph.D., Texas AM University

Macrae Husting; Lecturer; Ph.D., University of Wisconsin - Milwaukee

Ray Hutchison; Professor; Ph.D., University of Chicago

I

Elif Ikizer; Assistant Professor; Ph.D., University of Connecticut

Jeremy J Intemann; Associate Professor; Ph.D., Iowa State University

Md Rasedul Islam; Assistant Professor; Ph.D., University of Wisconsin - Madison

J

Kevin Jacklin; Lecturer; M.B.A., University of Wisconsin - Oshkosh

William Jacobson; Lecturer; Ph.D., University of Wisconsin - Milwaukee

Derek S Jeffreys; Professor; Ph.D., University of Chicago

Woo Jeon; Professor; Ph.D., University of Wisconsin - Madison

Melvin Johnson; Associate Professor; Ph.D., University of Nebraska - Lincoln

Myunghee Jun; Associate Professor; Ph.D., Seoul National University*

K

Amy Kabrhel; Associate Professor; Ph.D., University of Minnesota

James Kabrhel; Associate Professor; Ph.D., University of Minnesota - Twin Cities

Kevin M Kain; Lecturer; Ph.D., Western Michigan University

Daniel Kallgren; Associate Professor; Ph.D., University of Minnesota - Twin Cities

Heather Kaminski; Assistant Professor; D.B.A., Anderson University

Mark Karau; Professor; Ph.D., Florida State University

John F Katers; Professor; Ph.D., Marquette University*

Timothy U Kaufman; Associate Professor; Ph.D., Loyola University of Chicago*

Justin Kavlie; Assistant Professor; Ph.D., University of North Carolina

Taskia Ahammad Khan; Lecturer; M.S., Bradley University

Carly Kibbe; Assistant Professor; Ph.D., University of Wisconsin - Madison

Mark T Kiehn; Associate Professor; Ph.D., University of Colorado - Boulder*

Hye-Kyung Kim; Associate Professor; Ph.D., Marquette University

Mark Klemp; Associate Professor; Ph.D., University of Michigan

Synde Krause; Lecturer; M.A., Saginaw Valley State University

Kerry Kuenzi; Associate Professor; Ph.D., University of Colorado

Sampath Kumar; Professor; Ph.D., University of Memphis*

L

Jennie Lambrecht; Lecturer; M.Ed., Lesley University

Lisa Lamson; Lecturer; Ph.D., Marquette University

Mary Sue Lavin; Director of Phuture Phoenix; M.A., Marian University

Heather Lawrence; Lecturer; M.S.W., University of Wisconsin - Green Bay*

John P Leary; Associate Professor; Ph.D., University of Wisconsin - Madison*

Minkyu Lee; Associate Professor; M.F.A., Rochester Institute of Technology
